On November 24, 1982, respondent Dahlberg, Inc., formerly known as Dahlberg Electronics, Inc., filed a Request to Reopen Proceeding and to Set Aside Consent Order. The request was filed pursuant to Section 2.51 of the Commission's Rules of Practice. It was placed on the public record for comments. No comments were received.

Respondent asks the Commission to reopen this proceeding and to set aside the order to cease and desist entered on August 6, 1974. The order generally prohibits respondent in the sale of its own brand name hearing aids from, among other things, employing exclusive dealerships and dealer territorial and customer restrictions and from engaging in resale price maintenance and requires respondent to deal with all persons competing with its dealers.

Respondent relies on changed conditions of fact and law and the public interest in seeking to have the proceeding reopened and the order set aside. It relies principally on the Commission's recent opinion and decision in *Beltone Electronics Corp.*, Docket No. 8928 (July 6, 1982). In that matter, the Commission dismissed a complaint against another manufacturer of hearing aids that the Commission had issued on May 6, 1973, simultaneously with the complaint issued in this matter.

The Commission has considered respondent's request and other relevant information and determined that respondent has demonstrated that it would be in the public interest to reopen the proceeding to set aside Subparagraph Nos. 1, 2, 3, 4, 6, 7, 8, and 9 of Paragraph I of the order. However, the Commission will not be precluded from taking enforcement action concerning such practices when the Commission has reason to believe that they violate the law.

The Commission has further considered whether to modify as requested by respondent Subparagraph No. 5 of Paragraph I, the prohibition against resale price maintenance. In this regard, the Commission has determined it would be in the public interest to modify the paragraph to terminate the prohibition against suggested resale prices.

Accordingly,

It is ordered that this matter be, and it hereby is, reopened and that Subparagraph Nos. 1, 2, 3, 4, 6, 7, 8, and 9 of Paragraph I shall be set aside as of the effective date of this order.

It is further ordered that Subparagraph No. 5 of Paragraph I be modified as of the effective date of this order by striking "5" and "or suggesting" and inserting "or" after "stabilizing,".

By direction of the Commission.

Emily H. Rock,

Secretary.

16 CFR Part 13

[Docket 9153]

Gulf & Western Industries, Inc.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of Federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement requires a New York City corporation engaged in the burial casket industry, among other things, to timely divest to a Commission-approved buyer, Alabama-Indiana Metal Products, Inc., located in Anniston, Alabama. The order also requires the corporation to permit prospective purchasers to inspect the Anniston facility and supply them with information concerning the facility's operation. Further, the corporation is barred from acquiring any stock or interest in any concern engaged in the manufacture or sale of burial caskets or their compenents, without prior Commission approval for a period of ten years.

DATES: Complaint issued March 25, 1981 Decision and Order issued April 14, 1983.[1]

FOR FURTHER INFORMATION CONTACT: FTC/CS–2, Robert W. Doyle, Jr., Washington, D.C. 20580 (202) 254–8577.

SUPPLEMENTARY INFORMATION: On Monday, Jan. 17, 1983, there was published in the **Federal Register**, 48 FR 1982, a proposed consent agreement with analysis In the Matter of Gulf & Western Industries, Inc., a corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Acquiring Corporate Stocks or Assets: § 13.5 Acquiring corporate stocks or assets; 13.5–20 Federal Trade Commission Act. Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 7891]

Income Tax; Taxable Years Beginning After December 31, 1953; Treatment of Organization and Syndication Fees

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final Income Tax Regulations relating to the treatment of partnership organization and syndication fees. Changes to the applicable tax law were made by the Tax Reform Act of 1976. The regulations provide necessary guidance to partnerships and partners for compliance with the law.

DATES: The regulations are effective for partnership taxable years beginning after December 31, 1975, with the exception of the rule allowing the amortization of organization expenses which is effective in the case of amounts paid or incurred in partnership taxable years beginning after December 31, 1976.

FOR FURTHER INFORMATION CONTACT: David R. Haglund of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Ave., NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202–566–3459).

SUPPLEMENTARY INFORMATION:

Background

On January 11, 1980, the **Federal Register** published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under sections 707 and 709 of the Internal Revenue Code of 1954 (45 FR 2349). The amendments were proposed to conform the regulations to section 213(b) of the Tax Reform Act of 1976 (90 Stat. 1547). A number of comments on the proposed amendments were received, and a public hearing was held on May 21, 1980. After consideration of all comments regarding the proposed amendments, the attached Treasury decision is adopted.

Treatment of Organization and Syndication Costs

The regulations provide rules reflecting the general rule that no deduction is allowed under chapter 1 of the Code to the partnership or to any partner for any amounts paid or incurred, directly or indirectly, in partnership taxable years beginning after December 31, 1975, to organize a partnership or to promote the sale of (or to sell) an interest in the partnership. However, an exception is provided under which a partnership may elect to amortize its "organizational expenses" paid or incurred in partnership taxable years beginning after December 31, 1976. In the notice of proposed rulemaking the election could be made in connection with the partnership's return of income, including an amended return, for the taxable year the partnership began business. This Treasury decision provides that, for partnerships which begin business in taxable years that end after March 31, 1983, the election must be made in connection with the partnership's return of income for that taxable year filed not later than the date prescribed by law (including any

VOL
48
ISS
87
MY
4
1983
UMI

extension of time). The Treasury decision also clarifies the method of making the election. In response to a comment received on the notice of proposed rulemaking the regulations provide that expenses less than $10 need not be separately listed on the statement describing organizational expenses which is attached to the partnership return.

Definitions

The notice of proposed rulemaking generally limited organizational expenses to those expenses incurred before the end of the taxable year in which the partnership began business. Several comments were received suggesting that the time limitation be expanded to include expenses incurred after the end of the taxable year in which the partnership begins business to take into account the fact that partnerships are restricted in the choice of partnership taxable year. In response to these comments the regulations adopted by this Treasury decision limit organizational expenses to those expenses incurred during the period beginning at a point which is a reasonable time before the partnership begins business and ending with the date prescribed by law for filing the partnership return (determined without regard to any extensions of time) for the taxable year the partnership begins business. The Treasury decision clarifies the rule for cash basis taxpayers who do not pay those expenses until a later time.

Another change from the notice of proposed rulemaking is an amendment making it clear that expenses connected with the addition or removal of partners are not organizational expenses for purposes of section 709.

In response to a number of comments received, the reference to "tax advice pertaining to the adequacy of tax disclosures in the prospectus" as a syndication expense is changed to clarify that the expense relates to advice on the securities law, not the tax laws.

Guaranteed Payments

The regulations provide rules reflecting the statutory language added to section 707 of the Code by the Tax Reform Act of 1976. The new language makes it clear that, for a guranteed payment to be a partnership deduction, it must meet the same tests under section 162(a) as it would if the payment had been made to a person who is not a member of the partnership and the rules of section 263 must be taken into account.

Regulatory Flexibility Act and Executive Order 12291

The Commissioner of Internal Revenue has determined that this final rule is not a major rule as defined in Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required. Because the notice of proposed rulemaking relating to this final rule was published prior to January 1, 1981, the provisions of the Regulatory Flexibility Act do not apply to this final rule.

Drafting Information

The principal author of these regulations is David R. Haglund of the Legislation and Regulations Division, Office of the Chief Council, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

Income taxes, Partnerships.

PART 1—[AMENDED]

Adoption of Amendments to the Regulations

Accordingly, the proposed amendments to 26 CFR Part 1 are hereby adopted as set out below:

Paragraph 1. New §§ 1.709–1 and 1.709–2 are added immediately after § 1.708–1. These new sections read as follows:

§ 1.709–1 Treatment of organization and syndication costs.

(a) *General rule.* Except as provided in paragraph (b) of this section, no deduction shall be allowed under chapter 1 of the Code to a partnership or to any partner for any amounts paid or incurred, directly or indirectly, in partnership taxable years beginning after December 31, 1975, to organize a partnership, or to promote the sale of, or to sell, an interest in the partnership.

(b) *Amortization of organization expenses.* (1) Under section 709(b) of the Code, a partnership may elect to treat its organizational expenses (as defined in section 709(b)(2) and in § 1.709–2(a)) paid or incurred in partnership taxable years beginning after December 31, 1976, as deferred expenses. If a partnership elects to amortize organizational expenses, it must select a period of not less than 60 months, over which the partnership will amortize all such expenses on a straight line basis. This period must begin with the month in which the partnership begins business (as determined under § 1.709–2(c)). However, in the case of a partnership on the cash receipts and disbursements method of accounting, no deduction shall be allowed for a taxable year with respect to any such expenses that have not been paid by the end of that taxable year. Portions of such expenses which would have been deductible under section 709(b) in a prior taxable year if the expenses had been paid are deductible in the year of payment. The election is irrevocable and the period selected by the partnership in making its election may not be subsequently changed.

(2) If there is a winding up and complete liquidation of the partnership prior to the end of the amortization period, the unamortized amount of organizational expenses is a partnership deduction in its final taxable year to the extent provided under section 165 (relating to losses). However, there is no partnership deduction with respect to its capitalized syndication expenses.

(c) *Time and manner of making election.* The election to amortize organizational expenses provided by section 709(b) shall be made by attaching a statement to the partnership's return of income for the taxable year in which the partnership begins business. The statement shall set forth a description of each organizational expense incurred (whether or not paid) with the amount of the expense, the date each expense was incurred, the month in which the partnership began business, and the number of months (not less than 60) over which the expenses are to be amortized. A taxpayer on the cash receipts and disbursements method of accounting shall also indicate the amount paid before the end of the taxable year with respect to each such expense. Expenses less than $10 need not be separately listed, provided the total amount of these expenses is listed with the dates on which the first and last of such expenses were incurred, and, in the case of a taxpayer on the cash receipts and disbursements method of accounting, the aggregate amount of such expenses that was paid by the end of the taxable year is stated. In the case of a partnership which begins business in a taxable year that ends after March 31, 1983, the original return and statement must be filed (and the election made) not later than the date prescribed by law for filing the return (including any extensions of time) for that taxable year. Once an election has been made, an amended return (or returns) and statement (or statements) may be filed to include any organizational expenses not included in the partnership's original return and statement.

§ 1.709–2 Definitions.

(a) *Organizational expenses.* Section 709(b)(2) of the Internal Revenue Code defines organizational expenses as expenses which:

(1) Are incident to the creation of the partnership;

(2) Are chargeable to capital account; and

(3) Are of a character which, if expended incident to the creation of a partnership having an ascertainable life, would (but for section 709(a)) be amortized over such life.

An expenditure which fails to meet one or more of these three tests does not qualify as an organizational expense for purposes of section 709(b) and this section. To satisfy the statutory requirement described in paragraph (a)(1) of this section, the expense must be incurred during the period beginning at a point which is a reasonable time before the partnership begins business and ending with the date prescribed by law for filing the partnership return (determined without regard to any extensions of time) for the taxable year the partnership begins business. In addition, the expenses must be for creation of the partnership and not for operation or starting operation of the partnership trade or business. To satisfy the statutory requirement described in paragraph (a)(3) of this section, the expense must be for an item of a nature normally expected to benefit the partnership throughout the entire life of the partnership. The following are examples of organizational expenses within the meaning of section 709 and this section: Legal fees for services incident to the organization of the partnership, such as negotiation and preparation of a partnership agreement; accounting fees for services incident to the organization of the partnership; and filing fees. The following are examples of expenses that are not organizational expenses within the meaning of section 709 and this section (regardless of how the partnership characterizes them): Expenses connected with acquiring assets for the partnership or transferring assets to the partnership; expenses connected with the admission or removal of partners other than at the time the partnership is first organized; expenses connected with a contract relating to the operation of the partnership trade or business (even where the contract is between the partnership and one of its members); and syndication expenses.

(b) *Syndication expenses.* Syndication expenses are expenses connected with the issuing and marketing of interests in the partnership. Examples of syndication expenses are brokerage fees; registration fees; legal fees of the underwriter or placement agent and the issuer (the general partner or the partnership) for securities advice and for advice pertaining to the adequacy of tax disclosures in the prospectus or placement memorandum for securities law purposes; accounting fees for preparation of representations to be included in the offering materials; and printing costs of the prospectus, placement memorandum, and other selling and promotional material. These expenses are not subject to the election under section 709(b) and must be capitalized.

(c) *Beginning business.* The determination of the date a partnership begins business for purposes of section 709 presents a question of fact that must be determined in each case in light of all the circumstances of the particular case. Ordinarily, a partnership begins business when it starts the business operations for which it was organized. The mere signing of a partnership agreement is not alone sufficient to show the beginning of business. If the activities of the partnership have advanced to the extent necessary to establish the nature of its business operations, it will be deemed to have begun business. Accordingly, the acquisition of operating assets which are necessary to the type of business contemplated may constitute beginning business for these purposes. The term "operating assets", as used herein, means assets that are in a state of readiness to be placed in service within a reasonable period following their acquisition.

Par. 2. Paragraph (c) of § 1.707–1 is amended by inserting a period after the phrase "accrued under its method of accounting" and by striking out the sentence immediately following the phrase "section 162(a) (relating to trade or business expenses)." and inserting in lieu of that sentence the following three sentences:

§ 1.707–1 Transactions between partner and partnership.

* * * * *

(c) *Guaranteed payments.* * * * For a guaranteed payment to be a partnership deduction, it must meet the same tests under section 162(a) as it would if the payment had been made to a person who is not a member of the partnership, and the rules of section 263 (relating to capital expenditures) must be taken into account. This rule does not affect the deductibility to the partnership of a payment described in section 736(a)(2) to a retiring partner or to a deceased partner's successor in interest. Guaranteed payments do not constitute an interest in partnership profits for purposes of sections 706(b)(3), 707(b), and 708(b).

* * * * *

This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917, 26 U.S.C. 7805).

Roscoe L. Egger, Jr.,
Commissioner of Internal Revenue.

Approved: April 15, 1983.

John E. Chapoton,
Assistant Secretary of the Treasury.

BILLING CODE 4830–01–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 936

Approval of an Amendment to the Oklahoma State Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule.

SUMMARY: OSM is announcing its approval of a program amendment to Oklahoma's program to control surface coal mining and reclamation operations. The amendment consists of changes to the State's rules regarding effluent limitations for surface and underground coal mining activities and was submitted to meet the requirements of similar revisions that were made by OSM to the Federal rules.

EFFECTIVE DATE: May 4, 1983.

FOR FURTHER INFORMATION CONTACT: Robert L. Markey, Director, Tulsa Field Office, Office of Surface Mining, 333 West Fourth Street, Room 3432, Tulsa, Oklahoma 74103; Telephone: (918) 581–7927.

SUPPLEMENTARY INFORMATION:

I. Background on the Oklahoma State Program

Information regarding the general background on the Oklahoma State program can be found at 46 FR 4910 (January 19, 1981), 47 FR 14152 (April 2, 1982), and 47 FR 37060 (August 25, 1982).

II. Discussion of the Amendment

On October 21, 1982, OSM promulgated changes to 30 CFR 816.42 (a)(7) and (b), and 817.42 (a)(7) and (b),

VOL
48
ISS
87
MY
4
1983
UMI

the Federal provisions governing water discharge standards (See 47 FR 47216 for further information on the changes made to those Federal rules). Under the revised Federal rules, discharges of water from areas disturbed by surface or underground mining activities shall be made in compliance with all applicable State and Federal water quality laws and regulations and with the effluent limitations for coal mining promulgated by the U.S. Environmental Protection Agency set forth in 40 CFR Part 434. Further, the original provisions of 30 CFR 816.42(b) and 817.42(b), which set forth the conditions when a discharge from the disturbed area would not be subject to the effluent limitations, were removed.

On February 22, 1983, OSM received a proposed program amendment from the Oklahoma Department of Mines intended to modify the State's rules to reflect the changes made to 30 CFR 816.42 (a)(7) and (b), and 817.42 (a)(7) and (b). See OK–451. The Department of Mines indicated in its transmittal letter that it had adopted the new water discharge standards by emergency declaration and that it was presently proceeding to promulgate these changes on a permanent basis through the State's formal rulemaking process. The final rules are expected to be promulgated by July 1983.

The full text of Oklahoma's proposed amendment to its regulations is as follows:

Section 816.42(a)(7) is hereby repealed.

Section 816.42(b) is hereby repealed, and the following substituted:

Discharges of water from areas disturbed by surface mining activities shall be made in compliance with all applicable State and Federal water quality laws and regulations and with the effluent limitations for coal mining promulgated by the U.S. Environmental Protection Agency set forth in 40 CFR Part 434.

Section 817.42(a)(7) is hereby repealed.

Section 817.42(b) is hereby repealed, and the following substituted:

Discharges of water from areas disturbed by underground mining activities shall be made in compliance with all applicable State and Federal water quality laws and regulations and with the effluent limitations for coal mining promulgated by the U.S. Environmental Protection Agency set forth in 40 CFR Part 434.

On March 18, 1983, OSM published a notice in the **Federal Register**, announcing receipt of the amendment and inviting public comment on the adequacy of the amendment (48 FR 11465–11466). The public comment period ended on April 4, 1983.

On April 19, 1983, the Acting Administrator of the Environmental Protection Agency provided written concurrence on Oklahoma's amendment.

III. Director's Findings

The Director finds, in accordance with SMCRA and 30 CFR 732.17 and 732.15(b)(1), that the program amendment provides for effluent limitations for surface and underground coal mining and reclamation operations and that the revised Oklahoma rules at §§ 816.42(b) and 817.42(b) are no less effective than 30 CFR 816.42(b) and 817.42(b).

IV. Public Comments

While public comments were requested, no substantive comments were received. Acknowledgements were received from the following government agencies:

U.S. Department of Agriculture, Soil Conservation Service

U.S. Environmental Protection Agency

The disclosure of government agency comments is made pursuant to section 503(b)(1) of SMCRA and 30 CFR 732.17(h)(10)(i).

V. Director's Decision

Accordingly, the Director, based on the above finding, is approving the February 22, 1983, program amendment to §§ 816.42(b) and 817.42(b) of the Oklahoma rules.

VI. Other Information

The Federal rules at 30 CFR 936.15 are being amended to reflect the action being taken today. Further, OSM is adding additional language to that Section to describe more clearly a previously approved amendment to the Oklahoma program. No substantive change to the Federal rule is intended.

VII. Procedural Matters

Additional Determinations

1. *Compliance with the National Environmental Policy Act.* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act.* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule does not impose any new requirements; rather, it ensures that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act.* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 936

Coal mining, Intergovermental relations, Surface mining, Underground mining.

Dated: April 28, 1983.

Carson W. Culp,

Acting Director, Office of Surface Mining.

PART 936—OKLAHOMA

1. The authority citation for Part 936 is:

Authority: Sec. 503, Pub. L. 95–87, 91 Stat. 407 (30 U.S.C. 1253).

2. 30 CFR 936.15 is revised by designating the existing paragraph as paragraph (a), and by adding a new paragraph (b). Further, paragraph (a) has been clarified by including a brief description of the amendment to the Oklahoma permanent regulatory program that was approved on April 2, 1982. Revised § 936.15 reads as follows:

§ 936.15 Approval of regulatory program amendments.

(a) The Oklahoma permanent regulatory program amendment consisting of a set of new permanent rules, received by OSM on January 22, 1982, as corrected by Oklahoma on March 18, 1982, is approved effective April 2, 1982.

(b) The Oklahoma program amendment to §§ 816.42(b) and 817.42(b) of the Oklahoma rules governing effluent limitations, received by OSM on February 22, 1983, is approved effective May 4, 1983.

BILLING CODE 4310–05–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-1-FRL 2317-7]

Approval and Promulgation of Implementation Plans; Sulfur-in-Fuel Regulations; Connecticut

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is today approving a State Implementation Plan (SIP) revision submitted by the State of Connecticut under its State Energy Trade (SET) program. The intended effect of the rulemaking is to promulgate a change in the sulfur-in-oil SIP limit for Lydall, Inc., in Manchester, Connecticut, so it may burn 1.9% sulfur oil.

EFFECTIVE DATE: May 4, 1983.

ADDRESSES: Copies of the Connecticut submittals are available for public inspection during normal business hours at the Environmental Protection Agency, Room 2312, JFK Federal Building, Boston, Massachusetts 02203; Public Information Reference Unit, Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460; the Office of the Federal Register, 1100 L Street, N.W., Room 9401, Washington, D.C.; and the Connecticut Department of Environmental Protection, Air Compliance Unit, State Office Building, Hartford, Connecticut 06106.

FOR FURTHER INFORMATION CONTACT: Sarah Simon, Air Management Division, Room 2312, JFK Federal Building, Boston, Massachusetts 02203, (617) 223–5633.

SUPPLEMENTARY INFORMATION: The Connecticut Department of Environmental Protection (DEP) has requested approval of a sulfur-in-oil relaxation for Lydall & Foulds Division, Lydall, Inc., in Manchester, Connecticut. The State's revision is based on an approval under its State Energy Trade (SET) Program. The revision will allow Lydall to burn oil containing 1.9% sulfur.

As detailed in the SIP, the SET program provides a method for calculating a new, allowable sulfur limit each year based on oil conversation at the facility (premise) and establishes a well-defined procedure to ensure that these limits comply with the Clean Air Act requirements. EPA proposed to approve the generic procedures of the SET program on May 1, 1981 (46 FR 24597). At that time, we also proposed to approve revised sulfur-in-oil limitations for all Connecticut sources under 250 Million British Thermal Units per hour (MBTU/hr.) which would later be approved by the DEP Commissioner under the SET program. EPA approved the SET program on August 28, 1981 (46 FR 43418) and set up a stream-lined procedure for final federal approval of most of the individual source revisions. We also approved a regulation directly governing this program [Connecticut Regulation 19–508–19(a)(3)(i)] on November 18, 1981 (46 FR 56612).

Although Lydall only has one 30 MBTU/hr boiler, this revision will make Lydall a major sulfur dioxide (SO_2) source (capable of emitting more than 100 tons per year), and the DEP reviewed the impacts of the revision by using the conservative, screening analysis metholodology spelled out in the Connecticut Ambient Impact Analysis Guideline (approved at 46 FR 43418). The full record of the modeling review is on file at the DEP Office.

To summarize briefly, the modeling used DEP's PMTPTA-Conn. model with appropriate background levels and indicated that the revision will not cause any violation of the sulfur dioxide or total suspended particulate National Ambient Air Quality Standards (NAAQS). In addition, the source is more than 20 kilometers from any Prevention of Significant Deterioration (PSD) baseline areas. EPA has determined that the revision will not violate any PSD increments.

The State has complied with all procedures required by State Regulation 19–508–19(a)(3)(i) and the SIP narrative for sources such as Lydall that have no boilers greater than 250 MBTU/hr. The DEP has reviewed this premise's application and determined what sulfur limit is allowable under the SET program. DEP has notified the public of Lydall's application and DEP's proposed decision, has held a hearing, and has submitted the documents and determinations required by the SET program and federal SIP approval.

There was only one comment received by the State on this SET action proposal. This comment raised concerns about the potential adverse effect of burning higher sulfur oil and alleged that the State's public notice of Lydall's application was inadequate and misleading. The State responded to this administrative concern when it completed its review, gave notice of its proposed findings, and held a hearing. The same concerns about burning higher sulfur oil had also been raised in litigation related to the general SET program and recent statewide sulfur-in-oil revision. These concerns were resolved in favor of EPA's original determination that our revision approval actions were acceptable. (See *CFE* v. *EPA*, 696 F. 2d 179 (2d Cir., 1982), *CFE* v. *EPA*, F. 2d 169 (2d Cir., 1982).)

The public has had full opportunity to review the DEP action for these relatively small sources in accordance with the procedures spelled out in EPA's SET program approval. Thus, we are not publishing an additional Notice of Proposed Rulemaking for this individual source action.

EPA concurs in the State's assessment that this revision is an enforceable SIP revision that will not violate NAAQS. Therefore, EPA is approving Lydall's sulfur-in-oil revision, which raises Lydall's sulfur limit to 1.9%.

EPA finds good cause for making this action effective immediately, because the new sulfur limit is already in effect under State law and imposes no additional regulatory burden. The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291. Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court for the appropriate circuit by (60 days from today). This action may not be challeged later in proceedings to enforce its requirements. (See Section 307(b)(2).)

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agriculture Commodities; Inorganic Bromides Resulting From Fumigation With Methyl Bromide

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of inorganic bromides, resulting from post-harvest fumigation with the pesticide methyl bromide, in or on the raw agricultural commodity strawberries. This regulation to establish a maximum permissible level for residues of inorganic bromides in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

EFFECTIVE DATE: Effective on May 4, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs, Emergency Response and Minor Use Section, Registration Division (TS–767C), Environmental Protection Agency, Rm. 716B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202. (703–557–1192).

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule published in the **Federal Register** of March 16, 1983 (48 FR 11134) which announced that the Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petition 2E2654 to EPA on behalf of the IR–4 Technical Committee and the Agricultural Experiment Station of California.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose (1) amending the existing tolerance in 40 CFR 180.123 for residues of inorganic bromides (resulting from fumigation with the pesticide methyl bromide) in or on the raw agricultural commodity strawberries to reflect a post-harvest fumigation use as well as the current pre-harvest use, and (2) increasing the existing tolerance for inorganic bromides in or on strawberries (from use before harvest) from 30 parts per million (ppm) to 60 ppm.

There were no comments or request for referral to an advisory committee received in response to the proposed rule.

The date submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. It is concluded that the tolerance would protect the public health and is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346(a)(e)))

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: April 25, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

Therefore, 40 CFR 180.123 is revised to read as follows:

§ 180.123 Inorganic bromides resulting from fumigation with methyl bromide; tolerances for residues.

Tolerances are established for residues of inorganic bromides (calculated as Br) in or on the following raw agricultural commodities which have been fumigated with the antimicrobial agent and insecticide methyl bromide after harvest (with the exception of strawberries):

Commodities	Parts per million
Alfalfa, hay (Post-H)	50.0
Almonds (Post-H)	200.0
Apples (Post-H)	5.0
Apricots (Post-H)	20.0

BILLING CODE 6560-50-M

40 CFR Part 180

[OPP-300072A; (PH-FRL 2357-5)]

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Sorbitan Fatty Acid Ester Ethoxylates

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes an exemption from the requirement of a tolerance for sorbitan fatty acid ester ethoxylates with 5 moles of ethoxylation when used as an inert ingredient quality control agent in pesticide formulations. This regulation was requested by the Shield-Brite Corporation.

EFFECTIVE DATE: Effective on May 4, 1983.

ADDRESS: Written objections may be submitted to the Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Arthur Donner, Registration Support and Emergency Response Branch (TS–767C), Registration Division, Office of Pesticide Programs, Environmental Protection Agency, Rm. 716 D, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703) 557–7700.

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule published in the **Federal Register** of February 16, 1982 (48 FR 6899) that announced that at the request of the Shield-Brite Corporation, P.O. Box 519, Kirkland, WA 98033, the Administrator proposed to amend 40 CFR 180.1001(c) by broadening the exemption from the requirement of a tolerance for sorbitan fatty acid ester ethoxylates (fatty acids limited to C_{12}, C_{14}, C_{26}, and C_{18}) and their poly(oxyethylene) (POE) derivatives where the POE content averages 16–20 moles. The POE content will be expanded from 16–20 moles to 5–20 moles.

There were no comments or requests for referral to an advisory committee received in response to the notice of proposed rulemaking.

The bases for approval of the exemption were discussed in the proposed rule. The pesticide is considered useful for the purpose for which the exemption is sought. It is concluded that the exemption would protect the public health and is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)))

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: April 25, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

Therefore, 40 CFR 180.1001(c) is amended by adding and alphabetically inserting the inert ingredient sorbitan fatty acid ester ethoxylates with five moles of ethoxylation to read as follows:

§ 180.1001 Exemptions from the requirement of a tolerance.

* * * * * *

(c) * * *

Inert ingredients	Limits	Uses
* * * * * * *		
Sorbitan fatty acid esters (fatty acids limited to C_{12}, C_{14}, C_{16}, and C_{18} containing minor amounts of associated fatty acids) and their derivatives; the poly (oxyethylene) content averages 5-20 moles.		Surfactants, related adjuvants or surfactants

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; 1-Naphthaleneacetic Acid

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the plant growth regulator 1-naphthaleneacetic acid (NAA) in or on the raw agricultural commodity sweet cherries. The regulation to establish a maximum permissible level for residues of NAA in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

EFFECTIVE DATE: May 4, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs, Emergency Response Section, Registration Division (TS–767C), Environmental Protection Agency, Rm. 716B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202. (703–557–1192).

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule published in the **Federal Register** of March 16, 1983 (48 FR 11133) which announced that the Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petition 2E2760 to EPA on behalf of the IR–4 Technical Committee and the Agricultural Experiment Stations of Oregon and Washington.

The petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for residues of the plant growth regulator 1-naphthaleneacetic acid (NAA) in or on the raw agricultural commodity sweet cherries at 0.1 part per million (ppm).

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and other relevant material have been evaluated and discussed in the proposed rule. The pesticide is considered useful for the purpose for which the tolerance is sought. It is concluded that the tolerance would protect the public health and is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if

VOL 48 ISS 87 MY 4 1983 UMI

the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346(a)(e))).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: April 25, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

Therefore, 40 CFR 180.155(a) is amended by adding and alphabetically inserting the raw agricultural commodity sweet cherries to read as follows:

40 CFR Part 180

[PP 2F2670/R556; PH-FRL 2357-6]

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; 2-[1-(Ethoxyimino) Butyl]-5-[2-Ethylthio) Propyl]-3-Hydroxy-2-Cyclohexene-1-One

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for the combined residues of the herbicide 2-[1-(ethoxyimino)butyl]-5-[2-(ethylthio)propyl]-3-hydroxy-2-cyclohexene-1-one and its metabolites in or on certain raw agricultural commodities. This regulation to establish maximum permissible levels for residues of the herbicide was requested, pursuant to a petition, by BASF Wyandotte Corporation.

EFFECTIVE DATE: Effective on May 4, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Robert J. Taylor, Product Manager (PM) 25, Registration Division, Office of Pesticide Programs, Rm. 243, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-1800).

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of June 16, 1982 (47 FR 26019), which announced that BASF Wyandotte Corporation, 100 Cherry Hill Road, Parsippany, NJ 07054, had filed pesticide petition 2F2670 with the Agency proposing to amend 40 CFR Part 180 by establishing tolerances for the combined residues of the herbicide 2-[1-(ethoxyimino)butyl]-5-[2(ethylthio)propyl]-3-hydroxy-2-cyclohexene-1-one and its metabolites containing the 2-cyclohexene-1-one moiety (calculated as the herbicide) in or on the raw agricultural commodities soybeans at 20 parts per million (ppm); meat, fat and meat byproducts of cattle, goats, hogs, horses, poultry, and sheep at 0.05 ppm; milk at 0.05 ppm; and eggs at 0.05 ppm.

The petitioner subsequently amended the petition to decrease the tolerance levels for soybeans to 10.0 ppm, and increase the tolerance levels for fat, meat, and meat byproducts of cattle, goats, hogs, horses, poultry, and sheep to 0.2 ppm and eggs to 0.5 ppm.

No comments were received in response to this notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The toxicology data considered in support of the tolerances included several acute studies, a skin sensitization study (guinea pig) which was negative; a teratology study (rat) with no observed teratogenic effects at 250 milligrams (mg)/kilogram (kg)/day (highest dose tested) and a no-observed-effect level (NOEL) of 40 mg/kg/day for maternal toxicity; and a teratology study (rabbit) with no observed teratogenic effects of 160 mg/kg/day. Effects observed at 480 mg/kg/day in this study (random effects including skeletal and visceral abnormalities, reduced fetal weight and changes in male/female ratios) are considered to be due to extreme toxicity in dams and not to test material. Other toxicology data considered included a 2-generation reproduction study (rat) with a NOEL of 360 mg/kg/day; a 2-year chronic feeding/oncogenicity study (mice) with a NOEL of 120 ppm and no observed oncogenic effects at 1,080 ppm (highest dose tested); a 2-year chronic feeding/oncogenicity study (rats) with a NOEL of > 360 ppm (18 mg/kg/day, highest dose tested) and no observed oncogenic effects; a 6-month dog feeding study with a NOEL of 20 mg/kg/day; a 14-week feeding study (mouse) with a NOEL of 300 ppm; a 14-week feeding study (rat) with a NOEL of 300 ppm; mutagenicity studies including recombinant assays and forward mutations on *B. subtilis, E. coli* and *S. typhimurium* (negative at concentrations of chemical to 100 percent), and a mouse host/mediated assay on *S. typhimurium* (negative at 2.5 grams (gm)/kg/day of chemical); and a metabolism study (rats).

The acceptable daily intake (ADI), based on the 2-year rat chronic feeding/oncogenicity study (NOEL of 360 ppm, 18 mg/kg/day) and using a 100-fold safety factor, is calculated to be 0.18 mg/kg/day. The maximum permissible intake (MPI) for a 60-kg human is calculated to be 10.8 mg/day.

The theoretical maximal residue contribution (TMRC) resulting from these tolerances for a 1.5 kg daily diet is calculated to be 0.2215 mg/day, which utilizes 2.05 percent of the maximum permissible intake (MPI).

Data lacking include a goat feeding study, with hydroxymetabolites and additional toxicity studies (including a subchronic feeding study and a teratology study) all using hydroxymetabolites as test material. The registrant has agreed to perform and submit these studies in the near future.

There are no regulatory actions pending against the registration of the pesticide. The nature of the residues in plants and animals is adequately understood. Adequate analytical method, gas chromatography using a sulfur specific flame photometric detector, is available for enforcement purposes.

The pesticide is considered useful for the purpose for which the tolerances are sought. It is concluded that the tolerances would protect the public health and are established set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities.

A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346(a)(e)))

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; [2,2'(2,5-Thiophenediyl) Bis (5-Tert-Butylbenzoxazole)]

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes an exemption from the requirement of a tolerance for [2,2'(2,5-thiopehenediyl) bis [5-*tert*-butylbenzoxazole)] when used as an inert ingredient quality control agent in pesticide formulations. This regulation was requested by the Ciba-Geigy Corporation.

EFFECTIVE DATE: Effective on May 4, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Arthur Donner, Registration Support and Emergency Response Branch (TS-767C), Registration Division, Office of Pesticide Programs, Environmental Protection Agency, Rm. 716 D, CM#2, 1921 Jefferson Davis Highway, (703-557-7700).

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule published in the **Federal Register** of February 16, 1983 (48 FR 6898) which announced that at the request of the Ciba-Geigy Corporation, P.O. Box 11422, Greensboro, NC 27409, the Administrator proposed to amend 40 CFR 180.1001(d) by establishing an exemption from the requirement of a tolerance for [2,2'(2,5-thiophenediyl) bis (5-*tert*-butylbenzoxazole)], a fluorescent quality control agent that would be used in the continuous monitoring of the quantity of surfactant in pesticide formulations to be applied to growing crops only.

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The bases for the approval and certain toxicity studies were discussed in the proposed rulemaking. The pesticide is considered useful for the purpose for which the exemption is sought. It is concluded that the exemption would protect the public health and is established as set forth below.

Any person adversely affected by the regulation may, within 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Bromoxynil

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for the combined residues of the herbicide bromoxynil in or on certain commodities. This regulation to establish maximum permissible levels for residues of the pesticide was

VOL
48
ISS
87
MAY
4
1983
UMI

requested, pursuant to a petition, by the Union Carbide Agricultural Products Co., Inc.

EFFECTIVE DATE: Effective on May 4, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Robert Taylor, Product Manager (PM) 25, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 245, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703–557–1800).

SUPPLEMENTARY INFORMATION: EPA issued a notice published in the **Federal Register** of November 3, 1982 (47 FR 49892) which announced that the Union Carbide Agricultural Products Co., Inc., P.O. Box 12014, Research Triangle Park, NC 27709, had submitted pesticide petition 2F2753 proposing to amend 40 CFR 180.324 by establishing tolerances for residues of the herbicide bromoxynil in or on the fodder (dry), forage (green), and grain of corn and the fodder, forage, and grain of sorghum at 0.1 part per million (ppm). The tolerance expression in the notice of filing is corrected to reflect residues of the herbicide bromoxynil resulting from the application of its butyric and octanoic acid esters in or on sorghum grain, fodder, and forage and residues of bromoxynil in corn grain, fodder, and forage resulting from the application of its butyric acid ester.

There were no comments received in response to the notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The toxicology data evaluated for bromoxynil octanoate (Technical) included an acute oral study (rat) with a lethal dose (LD_{50}) equal to 270 milligrams (mg)/kilograms (kg); an acute oral study (rabbit) with an LD_{50} equal to 335 mg/kg, an acute oral study (dog) with an LD_{50} greater than 50 and less than 150 mg/kg; a 13-week feeding study (dog) with a NOEL of 5 mg/kg/day (200 ppm); and a 13-week feeding study (rat) with a NOEL of 312 ppm. The studies evaluated for bromoxynil technical include a teratology study (rats) with a teratogenicity NOEL of greater than 15 mg/kg and a fetal toxicity NOEL equal to 5 mg/kg; a microbial mutagenicity assay, nonmutagenic to *S. typhimurium* tester strains; and a 3-generation reproduction (rat) with a NOEL of 300 ppm.

Data currently lacking include oncogenicity studies in two mammalian species and a chronic toxicity study. One oncogenicity study is currently under review and the company has agreed to perform the required studies and to remove the use from the label should the results of the studies exceed the risk criteria for chronic toxicity as stated in 40 CFR 162.11.

The current provisional acceptable daily intake (PADI) is 0.0025 mg/kg/day based on the 13-week dog feeding study noted above and using a 2000-fold safety factor. The maximum permitted intake (MPI) for a 60-kg human is calculated to be 0.15 mg/day. The theoretical maximum residue contribution from existing tolerances for a 1.5-kg daily diet is calculated to be 0.0351 mg/day. The current action will utilize 0.03 percent of the PADI. Published tolerances utilize 23.43 percent of the PADI.

The nature of the residues is adequately understood and an adequate analytical method, gas chromatography with 63 Ni electron capture detector, is available for enforcement purposes. Since no detectable residues are expected in corn grain, fodder, and forage, or sorghum grain, forage, or fodder, no detectable residues would be expected in meat, milk, poultry, and eggs. Even if residues do occur in corn, the established meat tolerances will cover any secondary residues resulting from this use. There are presently no actions pending against the continued registration of the chemical.

The pesticide is considered useful for the purpose for which the tolerances are sought. It is concluded that the tolerances would protect the public health and are established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the **Federal Register**, file written objections with the hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

GENERAL SERVICES ADMINISTRATION

41 CFR Chapter 101

[FPMR Temp. Reg. H–24]

Utilization of Abandoned and Forfeited Motor Vehicles

AGENCY: General Services Administration.

ACTION: Temporary regulation.

SUMMARY: To accelerate disposal actions and make more effective use of available resources, the GSA utilization functions for abandoned and forfeited motor vehicles are being decentralized. This regulation reflects the decentralization of these functions by requiring agencies to report all abandoned and forfeited motor vehicles to the GSA personal property region in which the vehicles are located rather than to the National Capital Region. This regulation also introduces a 6 year reportable standard to coincide with current motor vehicle replacement standards.

DATES:

Effective date: May 4, 1983.

Expiration date: December 31, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Stanley M. Duda, Director, Utilization Division, (703–557–0807).

SUPPLEMENTARY INFORMATION: The General Services Administration has determined that this rule is not a major rule for the purpose of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. The General Services Administration has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule, has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

In 41 CFR Chapter 101, the following temporary regulation is added to the appendix at the end of Subchapter H to read as follows:

Ray Kline,

Acting Administrator of General Services.

April 11, 1983.

Federal Property Management Regulations; Temporary Regulation H–24

To: Heads of Federal agencies

Subject: Utilization of abandoned and forfeited motor vehicles

1. *Purpose.* This regulation changes the requirements for reporting abandoned and forfeited motor vehicles to GSA.

2. *Effective date.* This regulation is effective upon publication in the **Federal Register.**

3. *Expiration date.* This regulation expires December 31, 1983, unless revised or superseded sooner.

4. *Applicability.* The provisions of this regulation apply to Federal agencies having custody of abandoned and forfeited vehicles.

5. *Background.* Section 101–48.101–5 requires agencies to report abandoned and forfeited motor vehicles that are less than 4 years old and in their custody to the GSA National Capital Region (NCR). A decision has been made to change this requirement to provide that motor vehicles less than 6 years old shall be reported to the GSA region in which the vehicles are located. Vehicles 6 or more years old will continue to be screened as nonreportable. This will enable GSA to more effectively make use of available resources in providing for the utilization of motor vehicles. In addition, the 6 year reportable criterion is adopted to reflect motor vehicle replacement standards prescribed by Subpart 101–38.9.

6. *Explanation of changes.*

a. Section 101–48.101–5(c)(14) is revised as follows: Motor vehicles which are 6 or more years old (see § 101–48.101–5(d)(7)).

b. Section 101–48.101–5(d)(7) is added as follows: Reports of abandoned and forfeited motor vehicles less than 6 years old shall be reported to the headquarters office of the GSA region in which the vehicles are located. Motor vehicles 6 or more years old shall be screened as nonreportable.

Ray Kline,

Acting Administrator of General Services.

Proposed Rules

Federal Register
Vol. 48, No. 87
Wednesday, May 4, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 1125 and 1133

[Docket Nos. AO-226-A29 and AO-275-A32]

Milk in the Puget Sound, Washington, and Inland Empire Marketing Areas; Recommended Decision and Opportunity To File Written Exceptions to Proposed Amendments to Tentative Marketing Agreements and to Orders.

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision recommends a merger of the Puget Sound and Inland Empire Federal milk orders, based on industry proposals considered at a public hearing held in September 1981. In addition to the presently regulated marketing areas, the proposed "Puget Sound-Inland" marketing area would include eight additional north-central Washington counties and portions of two other Washington counties. The provisions of the proposed single order are patterned largely after those of the Puget Sound order. The proposed order does not provide, however, for a Class I base plan, which is now contained in the Puget Sound order. The merger is needed to reflect changes in market structure in that the two separately regulated areas have become, in effect, one common market.

DATE: Comments are due by June 3, 1983.

ADDRESS: Comments (four copies) should be filed with the Hearing Clerk, Room 1077, South Building, United States Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Maurice M. Martin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington D.C. 20250, (202) 447-7183.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of Section 556 and 557 of Title 5 of United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. The merged order will promote orderly marketing of milk by producers and regulated handlers.

Prior documents in this proceeding:

Notice of Hearing: Issued June 11, 1981; published June 16, 1981 (46 FR 31424).

Notice of Postponement of Hearing: Issued June 30, 1981; published July 6, 1981 (46 FR 34805).

Notice of Rescheduling of Hearing: Issued July 23, 1981; published July 28, 1981 (46 FR 38524).

Notice of Proposed Suspension: Issued November 6, 1981; published November 12, 1981 (46 FR 55707).

Notice of Suspension: Issued December 7, 1981; published December 10, 1981 (46 FR 60412).

Preliminary Statement

Notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to proposed amendments to the tentative marketing agreements and orders regulating the handling of milk in the Puget Sound, Washington and Inland Empire marketing areas, and of the opportunity to file written exceptions thereto. This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington, D.C. 20250, by the 30th day after publication of this decision in the **Federal Register**. Four copies of the exceptions should be filed. All written submissions made pursuant to this notice will be available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The hearing on the record of which the proposed amendments, as hereinafter set forth, to the tentative marketing agreements, and to the orders as amended, were formulated, was conducted at Seattle, Washington on September 15–19, 1981, and at Spokane, Washington on September 21, 1981, pursuant to notices issued June 11, 1981 (46 FR 31424), July 6, 1981, (46 FR 34805), and July 28, 1981 (46 FR 38524).

The material issues on the record of the hearing relate to:

1. Whether the handling of milk produced for sale in the proposed merged and expanded marketing area is in the current of interstate commerce or directly burdens, obstructs, or affects interstate commerce in milk or its products;

2. Whether the marketing areas of the present Puget Sound, Washington and Inland Empire orders should be included under one order;

3. Whether the proposed merged marketing area should be expanded to include additional territory in the State of Washington;

4. If a single order is issued for the proposed merged and expanded marketing area, what its provisions should be with respect to:

(a) Milk to be priced and pooled;

(b) Classification of milk;

(C) Class prices, location adjustments and butterfat differentials;

(d) Distribution of proceeds to producers; and

(e) Administrative provisions.

Findings and Conclusions

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Character of commerce.* The handling of milk in the proposed and expanded marketing area is in the current of interstate commerce and directly burdens, obstructs, and affects interstate commerce in milk and milk products.

The marketing area specified in the proposed order, hereinafter referred to as the "Puget Sound-Inland marketing area", includes 29 contiguous counties, of which 23 are in Washington and six are in Idaho. The principal cities in this marketing area are Seattle, Spokane, and Tacoma in Washington. The specific territory included in the proposed marketing area is set forth in the marketing area discussion.

Handlers located in the Puget Sound area have route sales in Idaho, Oregon, Washington, and Alaska. Fluid milk

products are disposed of in the proposed marketing area by handlers located in Oregon. Handlers located in that part of the Inland Empire area that is in Washington have route sales in Montana, Idaho, and Oregon. Additionally, a handler located at Missoula, Montana, has fluid milk sales in that part of Idaho that is in the present Inland Empire marketing area. Several California fluid milk plants dispose of fluid milk products in Washington.

Similarly, milk procurement for the proposed merged area crosses state boundaries. Handlers regulated by the Inland Empire order procure milk in Washington, Idaho, and Montana. Milk procurement for the Puget Sound market is confined to Washington.

There are numerous manufacturing plants located within the proposed marketing area that manufacture dairy products. These products are sold in California, Oregon, and other states. Manufactured products produced in many states are offered for sale in Washington and Idaho.

2. *Need for merger of orders.* Marketing conditions in the two separately regulated marketing areas under consideration justify the issuance of a single order regulating the handling of milk in these areas. This single order is the most appropriate means of effectuating the declared policy of the Act.

Federal regulation of milk marketing in the Washington area was first initiated on June 1, 1951, with the issuance of the Puget Sound order. The marketing area was expanded on December 1, 1952, when a portion of King County, Washington, was added. It was further expanded effective July 1, 1966, when portions of Whatcom, Skagit, Snohomish, King, Pierce, and Lewis Counties and all of Island and San Juan Counties in Washington were added.

The Inland Empire order became effective on April 1, 1956. The marketing area was expanded effective October 1, 1957, when two Idaho counties were added. It was further expanded on March 1, 1962 to include the Washington county of Whitman and the Idaho counties of Latah and Shoshone and the remaining portions of Bonner and Kootenai Counties in Idaho.

The merger of the Puget Sound and Inland Empire orders was proposed by Northwest Dairymen's Association (NDA). This producer cooperative association represents a major proportion of the producers supplying milk to handlers regulated by these two orders. Dari-Marketing Service, Inc. (DMS), a federation of three cooperative associations that supply handlers regulated by the Puget Sound order, testified that it did not object to merging the two orders. Several handler witnesses also supported the merger of the two marketing areas under a single order.

The Producers' Base Committee (PBC), which represented nearly 400 Class I based holding producers under the Puget Sound order, also supported combining the two orders. It proposed, however, that technically the present Puget Sound order be amended to include the present Inland Empire marketing area rather than merging the two orders as NDA proposed. PBC took this position on the belief that if NDA's proposed merger were adopted, it would remove the legal authority to continue the existing Puget Sound Class I base plan until the end of 1984, when such authority expires. (A further discussion of this position is set forth under issue 4(d) entitled, "Distribution of proceeds to producers".)

The merger proponent claimed that the order should be merged because the two separately regulated markets, have now become one single market. The principal reasons given by the proponent for merging the orders include the following:

(a) There is substantial competition for sales by handlers regulated under the separate orders;

(b) some of the regulatory provisions of the separate orders cause unnecessary difficulties for handlers operating in both markets;

(c) There have been changes in the structure and operations of producer marketing organizations; and

(d) Separate orders are not encouraging or facilitating the most efficient handling of the reserve milk supplies associated with the separate markets.

When the two orders were promulgated, they regulated the handling of milk in areas that were clearly distinguishable as separate markets for particular handlers and producer groups. Changes in marketing practices and market structure since that time, however, have caused these separately regulated areas to become substantially interrelated in both distribution and producer marketing supply arrangements. It is reasonable to expect that the interrelationship of these present areas will become even more pronounced over time.

At the time the separate marketing area boundaries for each order were established, they reflected the limits of competition among handlers in the respective areas and there was no overlapping of the sales territory of handlers from one order to another. Since then, however, the range of route distribution by regulated handlers in the two markets has greatly expanded. While the reasons for such expansion are varied, they generally can be attributed to better highways, improved transportation and refrigeration facilities, the advent of single service containers, economies of large scale operations, and reciprocity of health standards.

Over the years, there has been extensive consolidation of distribution operations in these respective markets. since the two orders were promulated, the number of regulated handlers has declined significantly. When the Puget Sound order was promulgated, there were 76 handlers regulated under the orders.[1] Presently, there are only 11. In the Inland Empire market, the number of regulated handlers has declined from 11 in 1956 to five in 1981. The fluid milk distribution previously made the now discontinued operations has been absorbed through existing and expanded plant facilities and routes of remaining handlers. Consequently, the distribution areas of some of the large plants, particularly the Puget Sound Plants, have been substantially expanded, resulting in the development of significant intermarket competition among handlers operating under the respective orders.

At the time of the hearing, fluid milk sales were being made on a regular basis in the Inland Empire market by three Puget Sound handlers. Prior to 1976, one of these handlers, the Safeway grocery chain, relied on Inland Empire regulated handlers to serve its stores in that market. Since then and up until the time of the hearing these stores were being supplied from Safeway's own plant at Bellevue, Washington. This plant is a pool plant under the Puget Sound order.

Another Puget Sound pool plant with route distribution in the Inland Empire market is the Seattle Plant of Consolidated Dairy Products Company (CDP), the marketing agent for NDA. In addition to this plant, CDP also operated at the time of the hearing, two Inland Empire order pool distributing plants at Moses Lake and Spokane, Washington, from which there was fluid milk disposition in the Inland Empire and Columbia River Basin areas. CDP has operated the Spokane plant only since September 1981. Prior to that time, the plant was operated by another

[1] Official notice is taken of Federal Milk Order Market Statistics, 1947–56, Statistical Bulletin, No. 248, Issued May 1958, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C.

VOL
48

4
1983
UMI

cooperative association, the former Mayflower Farms.

Since the hearing, another change has occurred in the ownership of a processing plant, which further illustrates that the two regulated areas have lost their indentity as distinct separate markets and actually constitute a single market. Official notice is taken of the commercial fact that recently the Safeway grocery chain acquired the Moses Lake plant from CDP and is now serving its store outlets in the Inland Empire and north-central Washington areas from this plant rather than from its Bellevue Plant. the fluid milk distribution previously made by CDP from the Moses Lake plant has been absorbed at its Spokane and Yakima, Washington plant facilities. This latter plant is a pool distributing plant under the Oregon-Washington order.

Such shifts in plant operations have substantially altered the relative volumes of Class I sales originating from the two respective markets and this situation is likely to continue. As Class I sales shift among the two markets, the Class I utilization percentages of the respective markets change, and as a result the relationship of producer returns as between the two markets also change. this situation does not provide orderly marketing since it tends to promote confusion and discontent among producers.

Unlike the situation with respect to Puget Sound handlers, Inland Empire handlers are not distributing packaged fluid milk products in the Puget Sound marketing area. However, the record indicates that as small dairies in the unregulated area of north-central Washington have gone out of business both Inland Empire and Puget Sound regulated handlers have increased their route disposition in this area. In January 1981, three of the five distributing plants regulated by the Inland Empire order had route disposition in this unregulated area. In the same month, four of the 13 distributing plants regulated by the Puget Sound order had route disposition in this same north-central unregulated area.

Data placed in the record show that Puget Sound distributing plants' out-of-area sales in eastern Washington between November 1970 and November 1980 nearly tripled (from 2.7 million to 6.9 million pounds).[2] In November 1980, nearly 37 percent of the total route disposition by Inland Empire distributing plants was made outside of the marketing area, most of which was made in competition with Puget Sound handlers in north-central Washington.

The above data indicate not only an expansion in the range of distribution but also a substantial overlap of Class I route disposition by handlers regulated by each of the two orders here being considered. Moreover, such distribution patterns illustrate that the two are regulated areas are rapidly losing their identity as separate and distinct markets for particular groups of producers. Under this marketing situation, continuation of a separate regulatory plan for each of these areas is no longer practical or desirable.

The need for a single order to achieve greater stability and a more equitable distribution of returns to producers is accentuated by the impact on particular producer groups by shifts in Class I sales and supplies between the two regulated areas. In the smaller Inland Empire market, particularly, a major loss of Class I sales to the Puget Sound market can have a significant adverse effect on the returns to producers supplying Inland Empire distributors. This situation actually occurred when Safeway decided to serve its stores in the Inland Empire market from its Puget Sound pool distributing plant. Also, multi-market plant operators have caused and continue to represent a potential cause of intermarket shifts of sales. At the time of the hearing, there were three handlers operating distributing plants in each of the two areas that would be regulated by the proposed Puget Sound-Inland order. The gain or loss of a large chain store account by a handler also can have a major impact on producer returns in any one regulated area.

The local nature of the two markets has greatly diminished also in terms of producer marketing organizations. When the individual orders were promulgated, many of the producers in each market were members of separate cooperative associations that confined their marketing activities to the local market. Each producer organization not only marketed the bulk of the milk associated with the market but also handled and disposed of the milk not needed by local handlers.

Through the process of merging and acquisition, the vast majority of the producers supplying each of the separately regulated markets are no longer associated with local market producer groups but are members of the "regional" cooperative association proposing the two-market merger. This multi-market producer group was formed in 1961 through the merger of several cooperatives associated with the Puget Sound market. Since then, the cooperative has merged with other cooperatives in Washington, Idaho, Montana, and Oregon. Its latest merger occurred on September 1, 1981, when Mayflower Farms merged with NDA. Prior to this merger, Mayflower Farms had producer members associated with the Inland Empire market and the nearby Oregon-Washington Federal order market and operated distributing plants in both markets.

The primary reponsibility for marketing and balancing milk supplies in both markets under consideration has been assumed by NDA. In addition to supplying other fluid milk handlers in both markets, NDA's marketing agent, CDP, operates three pool distributing plants and four nonpool manufacturing plants. Most of the reserve milk supplies handled by NDA is channeled to these four manufacturing plants.

It is the practice of NDA to direct the movements of its members' milk and to enter into "full-supply" agreements with many fluid milk handlers in both markets. The cooperative also supplies other handlers on a partial basis, balancing such handlers' requirements that are not met by the handlers' producers. However, in performing these marketing activities and the attendant function of disposing the associated reserve supplies, returns from the member milk sold are distributed to its members on the market with which their milk is regularly associated.

While the present individual orders were designated to implement the development of efficient milk handling arrangements for each market based on local marketing conditions, the separate regulations are not now encouraging or promoting such efficiencies where handlers and cooperative associations are marketing milk in both markets. This is particularly true with respect to the handling of reserve milk supplies by NDA in the Inland Empire market. For example, milk from members of the cooperative that is in excess of the market's fluid requirements and exceeds the capacity of its Spokane manufacturing plant, and which is produced in the Columbia River Basin and Yakima, Washington, area; is moved on a regular basis to the distant CDP's Lynden, Washington, plant. Although this milk en route to the plant moves past nearer fluid milk plant outlets in the Seattle area that NDA supplies, the cooperative makes such inefficient movements solely to avoid pooling milk associated with the Inland Empire market under the Puget Sound order and thus eliminating any adverse

[2] All areas east of Cascade Mountains including Idaho and the Inland Empire marketing area.

effect that such milk would have on the latter market's Class I utilization.

Additionally, several major differences in provisions of the two orders were cited which limit the ability of the proponent cooperative to develop a flexible and efficient milk handling arrangement for the two markets on an integrated basis. These provisions involve pooling and methods of distributing to producers the proceeds from the sale of their milk. Accordingly, the proposed merger would assist the merger proponent in marketing the milk of its members in a more effective and efficient manner without the encumbraces that the separate orders exert on the cooperative's marketing system.

The sanitary requirements relative to the production, processing, and sale of Grade A fluid milk products throughout the proposed marketing area are vitually the same and thus are not an impeding factor in the adoption of a single order for the proposed Puget Sound-Inland marketing area. The State of Washington has reciprocal arrangements on sanitary requirements with the neighboring States of Idaho, Montana, and Oregon, and there is full reciprocity among all political subdivisions within Washington and Idaho. Therefore, sanitary requirements present no limitation on the movements of milk throughout the proposed marketing area.

In view of these circumstances, separate orders for the two areas under consideration are no longer compatible with the current marketing practices in these regulated areas. The adoption of a single regulation for an area that has become a common market will insure more orderly marketing through the application of the same regulatory provisions to all handlers and producers associated with the common market.

There was no opposition testimony presented at the hearing to the proposal to combine the two orders. However, Dari-Marketing Service and the Producers' Base Committee in their post-hearing briefs, stated that the record evidence does not support the need for combining the two markets. The briefs were general in nature on this particular point and did not indicate with any specificity in terms of the marketing evidence why a single order for the area should not be adopted.

The proponent cooperative proposed that the order for the Puget Sound-Inland marketing area continue the provisions of the present Puget Sound order except for certain modifications considered necessary with the merger of the orders. The order proposed herein essentially carries out this concept. The Puget Sound order provisions have been appropriate in achieving the objectives sought by the regulatory plan for the Puget Sound area. Also, many of the order's provisions are essentially the same as corresponding provisions in the Inland Empire order. Accordingly, on the basis of the record evidence, it is found and determined that the Puget Sound order provisions, with certain modifications, will be appropriate for achieving orderly marketing conditions in the proposed Puget Sound-Inland marketing area. Only the significant modifications or specific provisions that were at issue will be dealt with in the decision.

The order adopted herein would continue the use of the part number for the present Puget Sound order, Part 1125. The amended Part 1125, upon issuance, would supersede Part 1133.

Although the present two orders would no longer exist upon effectuation of the Puget Sound-Inland order, this merger action is not intended to preclude the completion of those procedures that would otherwise have existed under the separate orders with respect to milk handled prior to the effective date of the merger. Such procedures which would need to be completed after the effective date of the merger include the announcement of certain class prices and butterfat differentials, submission of reports, computation of uniform prices, payment of obligations, and verification activities. The provisions of the merged order would apply only to that milk handled after the effective date of the merger.

3. *Merged and expanded marketing area.* The marketing area of the proposed merged order should include all of the territory in the presently designated marketing areas of the Inland Empire and Puget Sound orders. Certain additional territory in Washington not now included in any Federal order marketing area also should be a part of the proposed Puget Sound-Inland marketing area. This additional territory includes Adams, Chelan, Douglas, Ferry, Grant, Kittitas, Lincoln, and Okanogan Counties and the presently unregulated portions of Pend Oreille and Stevens Counties. All territory within the boundaries of the designated marketing area which is occupied by government (municipal, State, or Federal) reservations, installations, institutions, or other establishments, likewise should be a part of the marketing area.

The adopted marketing area consists of 23 Washington counties (only certain portions of Lewis, Pacific, and Pierce Counties) and six Idaho counties. The total population of this area is slightly more than 3.3 million (based on April 1, 1980, U.S. Census data). Of this total, about 10 percent is within the unregulated territory proposed herein to be added to the combined marketing areas of the Inland Empire and Puget Sound orders.[3]

As proposed by the merger proponent, the merged marketing area should include the presently unregulated portions of the Washington counties of Pend Oreille and Stevens. The record indicates that regulated handlers distribute milk to available outlets throughout these unregulated areas rather than just in the regulated portions of the counties. There are no plants located in the unregulated areas. The addition of the unregulated portions of the two counties to the marketing area will simplify the reporting of in-area and out-of-area sales as required by the order.

As previously indicated, the merged marketing area should include eight additional north-central Washington counties that are presently unregulated. The inclusion of this area in the proposed marketing area was proposed by the merger proponent. Proponent's witness testified that the majority of fluid milk sales in each of these counties were made by handlers regulated presently under the Inland Empire and Puget Sound orders. He indicated that the inclusion of this area in the marketing area would insure that the Moses Lake plant would maintain continuous pool plant status under the merged order and avoid the possibility of it becoming pooled under the Oregon-Washington order. In this connection, proponent's spokesman stated that the eight-county area in question contains a significant segment of the market served by the Moses Lake plant. He added that CDP, as marketing agent for NDA, must operate its Moses Lake plant in such a way as to avoid the possibility of the plant shifting regulation between the Inland Empire and Oregon-Washington orders. According to the witness, this is because the pricing and other provisions of the Oregon-Washington order "are not currently in the best interest of members of the Northwest Dairymen's Association".

The president of the Independent Milk Producers Distributor Association (a Washington State producer-handler organization) testified in opposition to the inclusion of the eight-county area in

[3] Official notice is taken of "Federal Milk Order Market Statistics, 1980 Annual Summary," Statistical Bulletin Number 670, Agricultural Marketing Service, U.S. Department of Agriculture, issued July 1981.

4
1983
UMI

the merged marketing area. He believed that regulation of the area would have an adverse effect on the four producer-distributor type operations that are located within the proposed eight-county area and who have route distribution in parts of this area. However, he stated that he would not be opposed to the area expansion if a producer-handler would be permitted to purchase without restriction fluid milk products from pool plants as is presently provided under the Inland Empire order. (A discussion of this matter is set forth under the producer-handler definition issue).

At the time of the hearing, there were seven handlers who would be regulated by the merged order that distributed milk in the eight-county area. Four of these handlers were regulated under the Puget Sound order and three under the Inland Empire order. In addition, three handlers regulated by the Oregon-Washington order have route distribution in the areas. Four producer-distributor type operations also have route disposition in four (Douglas, Ferry, Grant and Kittitas) of the eight counties proposed to be included in the merged marketing area.

Estimates of the percentage of fluid milk sales for January 1981 in each of the eight counties were made by the merger proponent and received into evidence. It is apparent from this tabulation that regulated handlers under the two orders proposed herein to be merged have 70 percent or more of the total sales in each of these counties. In four of the eight counties—Adams, Chelan, Lincoln and Okanogan—handlers now regulated under Federal milk orders have 100 percent of the fluid milk sales.

The only unregulated milk that is distributed in the eight-county area comes from four producer-distributor type operations. Their sales represent slightly more than two percent of the total route distribution in the eight-county area. Although none of them testified at the hearing, based on the record evidence, it is expected that these four producer-distributors would be exempt from the pooling and pricing provisions of the proposed order.

The inclusion of this eight-county area in the Puget Sound-Inland marketing area will more appropriately represent the basic sales areas of the handlers who would be subject to the proposed order. It is an area which is contiguous to both the present Puget Sound and Inland Empire marketing areas and is a vital segment of what has now become a single integrated regional marketing area.

The unregulated Washington counties of Clallam, Jefferson, Kitsap and Mason should not be included in the proposed marketing area. These counties are located on the Olympic Peninsula of Washington.

Two relatively small producer-distributor type operations, one at Sequim and the other at Port Orchard, have about three percent of the route disposition in this area. The remainder of the sales in the area are made by six Puget Sound handlers and one Oregon-Washington handler.

The inclusion of these four counties in the proposed marketing area was proposed by the merger proponent. Proponent claimed that regulated handlers are at a disadvantage in competing with the Sequim unregulated handler in certain areas of the four counties because of the retail pricing practices of the unregulated handler. The spokesman for the proponent testified that while regulated handlers are required to pay the order's Class I price for all milk for fluid use distributed in competition with the Sequim unregulated handler, there is no assurance that the costs of such milk are comparable between regulated handlers and the unregulated handler. The witness indicated that without this four-county area being regulated there is no way for the market administrator to audit the books and records of the Sequim handler to determine whether he is relying on his own farm production as his only source of milk for distribution in the area. Proponent's witness also testified that expanding the marketing area in the manner prescribed would simplify CDP's recordkeeping and reporting of route disposition.

The Sequim unregulated handler opposed extending the marketing area to include the four-county area. Opponent claimed that the order would work a hardship on his operation because the production and marketing conditions in the area are significantly different from those that prevail in the remainder of the proposed marketing area. He asserted further that regulation under an order is not necessary to maintain orderly marketing in this relatively sparsely populated area wherein he operates.

The record evidence indicates that the only entities who would be directly affected by this marketing area expansion are the two unregulated milk handlers who rely primarily on their own farm production for their supply. Based on the available information concerning the operations of these two unregulated handlers, it was not shown that the inclusion of the four-county area was necessary for the maintenance of orderly marketing. Moreover, except for NDA's testimony, regulated handlers distribution in these four counties presented no testimony for or against extending the marketing area to include such additional territory. In the absence of any compelling need for regulation of these counties, their inclusion in the proposed marketing area is denied.

4. (a) *Milk to be priced and pooled.* It is necessary to designate clearly what milk and which persons would be subject to the merged order. This is accomplished by providing definitions to describe the persons, plants and milk to which the applicable provisions of the order relate.

The following definitions included in the proposed order will serve to identify the specific types of milk and milk products to be subject to regulation and the persons and facilities involved with the handling of such milk and milk products. Definitions relating to handling and facilities are "route disposition," "plant," "pool plant" and "nonpool plant". Definitions of persons include "producer," "handler," "producer-handler" and "cooperative association". Definitions relating to milk and milk products include "producer milk," "fluid milk products," "filled milk" and "other source milk". A number of these definitions were of particular issue at the hearing and are discussed below. Also, some of the definitions adopted herein are substantially different than presently contained in the Puget Sound and Inland Empire orders and for that reason are discussed below.

Route disposition. A definition of "route disposition" is a convenience for specifying the various kinds of fluid milk sales outlets that will be considered in determining whether a distributing plant would be regulated under the order. Both of the orders that are proposed to be merged include a route disposition definition.

As proposed by the merger proponent and as adopted herein, route disposition would mean any delivery of fluid milk products from a plant to a retail or wholesale outlet, either directly or through any distribution facility or vendor, including any disposition from a plant store or through a vending machine. It would also include packaged fluid milk products transferred to other pool distributing plants. A delivery of bulk fluid milk products to other plants, or a delivery to a military or other ocean transport vessel leaving the marketing area of fluid milk products which originated from a plant located outside the marketing area and were not

received or processed at any pool plant, would not be considered a route disposition.

Such a definition is now contained in essentially this form in both the Puget Sound and Inland Empire orders. Under both orders, conceptually, a fluid milk product is considered disposed of on a route when it leaves the plant (except bulk fluid milk products transferred to other plants). Merger proponent proposed that this route disposition concept be continued under the merged order. Proponent claimed that this is necessary to coordinate the provisions of the merged order with those of the nearby Oregon-Washington order, which provides for the same route disposition concept.

The present Puget Sound order, however, provides in the definition of a "plant" that a handler under certain conditions may elect to account for route disposition from a distribution point rather than from the plant. The conditions under which a handler may exercise this option are: (1) Such distribution is located west of the Cascade Mountain Range; (2) fluid milk products are not received during the month at such distribution point from more one plant; and (3) the handler operating such distribution point notifies the market administrator of his intent to report regularly on the basis of disposition from such distribution point.

The cooperative advocating the merger proposed that this option not be included in the merged order. Proponent claimed that administratively it is more desirable and appropriate to have route disposition occur at one location (the distributing plant) rather than at both a handler's distributing plant and distribution point.

At the hearing, no one opposed the proposal. However, in its post-hearing brief, the Carnation Company (Carnation) opposed the removal of the option on the basis that it would require the handler to keep two sets of sales records—one for the market administrator and the other for the company's records.

It is not possible to determine from the handler's brief how the removal of the option in question would burden the company's recordkeeping. Even if the option were included in the merged order, the record evidence suggests that the handler could not meet the conditions to be ineligible to use the option because of the nature of its operation. Accordingly, it is concluded that the route disposition proposal advocated by the merger proponent is appropriate for the merged order.

Plant. The purpose of a "plant definition" is to designate the type of handling facilities to which the order provisions would apply. As proposed by the merger proponent, the merged order should essentially continue the "plant" definition now contained in the Puget Sound order but with one additional change that was not previously discussed in connection with the "route disposition" definition. This change would remove the words "land and surroundings".

As defined under the merged order, a plant would be the buildings, facilities and equipment that constitute a single operating unit or establishment at which milk or milk products are received, processed or packaged. Separate facilities used solely as intermediary distribution points in the disposition of packaged fluid milk products would not be plants. Similarly, separate facilities at which milk is only reloaded from one tank truck to another would not be a plant as defined herein.

This modified "plant" definition would not change in any way the present concept of what constitutes a plant. It merely makes it clear that the surrounding land on which a plant is located is not a factor to consider in determining whether a facility is a plant or not under the merged order.

Pool plant. It is essential to the operation of a marketwide pool, as discussed later, that minimum performance requirements be established to distinguish between those plants engaged in serving the fluid needs of the regulated market and those that do not serve the market in a way or to a degree that warrants their sharing (by being included in the pool) in the Class I utilization of the market. The pooling standards for distributing plants and supply plants that are provided for in the attached order carry out this concept under present marketing coonditions.

Essentially, the present pooling provisions of the Puget Sound order should be used for the merged order. However, certain features of the pooling standards for a distributing plant should be revised to be in harmony with current marketing conditions existing in the proposed combined and expanded area.

Although is was not included in its initial proposal as listed in the hearing notice, the merger proponent proposed at the hearing that milk diverted from a distribution plant be included as part of such plant's total supply in determining its qualification as a pool plant. In support of this change, the proponent's witness pointed out that if a distributing plant diverted milk at the maximum level permitted under the present Puget Sound order's diversion provisions, a distributing plant could qualify as a pool plant with as little as 2 percent of its total supply distributed in the marketing area and diverted to nonpool plants. He claimed that this was not the cooperative's intent to have a plant qualify as a pool plant at such level. In addition, the witness indicated that since other provisions of the order include milk diverted from a pool supply plant as part of such plant's total supply, it is only appropriate to include diverted milk as a receipt in determining the pool status of a distributing plant. The proposal should be adopted. A distributing plant's required association with the merged market should be measured in terms of the proportion of its total receipts that is disposed of from the plant as route distribution of fluid milk products in the marketing area. Such receipts should include any producer milk that is diverted from the plant. While it is recognized that diverted milk is not physically received at the plant from which diverted, it is, nevertheless, an integral part of that plant's supply of milk and, thus, acquires pool status because of its association with such plant. Therefore, diverted milk should be included as a receipt for purposes of establishing a distributing plant's qualification for pooling.

The Puget Sound order now exempts from the provisions of the order any distributing plant whose route disposition in the marketing area during the month averages 110 pounds or less per day. NDA proposed that this threshold limit be increased from 110 pounds to 300 pounds daily. The witness for the proponent cooperative stated that this change will make the merged order consistent with a similar provision that is now contained in the Oregon-Washington order. He also testified that the proposed 300 pounds per day exemption comports with current marketing conditions and such exemption "will not affect the stability of marketing of milk in the proposed area."

The 300 pounds per day exemption proposal should be adopted. It is not expected that this provision would result in exemption from the order any handler now operating in the proposed marketing area. Such limited route disposition in the marketing area is not considered sufficient to justify imposing the burden of full regulation on a plant that has so little association with the regulated market.

The provisions of the merged order that relate to a distributing plant that simultaneously qualifies as a pool plant under this order and another order should be essentially the same as those that are now provided in the Puget

VOL

1983
UMI

Sound order. However, the "lock-in" period that a distributing plant remains regulated under the order after it has greater route diposition in another maket should be four months rather than three months. The merger proponent proposed this change, which is identical to the lock-in period now containted in the Inland Empire order.

Under the marketing situation that is anticipated to exist when the two orders are consolidated, the four-month lock-in period is appropriate. It will eliminate temporary adverse effects of shifting between orders on a month-by-month basis that can occur when intermarket distributions results in qualifying a distributing plant for pooling under more than one order. Otherwise, the switching of the regulatory status of a distributing plant between orders creates uncertainty and abrupt changes in prices for producers and handlers alike.

As proposed by NDA, the order should specify that in applying the pool plant provisions, that portion of a plant which does not have Grade A approval for the receiving, processing, or packaging of fluid milk products and which is operted separately from the Grade A portion should not be considered a part of a pool plant. Such separation of operations permits a handler to limit his accounting for milk under the order to just the Grade A portion of the plant. As indicated previously, CDP operated a nonfat dry milk plant on the same premises as its Spokane distributing plant. Under the present Inland Empire order, these two plants were treated as separate operations and, thus, only the distributing plant was considered a pool plant under the order. In view of this marketing situation, such exemption should be continued under the merged order.

Nonpool plant. The "nonpool plant" definition of the merged order should specify those categories of plants which are associated with the market but not to the degree that they should be fully regulated by the order. As used herein, a nonpool plant means any milk or filled milk receiving, manufacturing, or processing plant other than a pool plant. A description of the specific categories of nonpool plants included in the "nonpool plant" defmition follows:

An "other order plant" would be a plant that is fully regulated under another Federal order. As such, it cannot be a pool plant under this order.

A plant of a "producer-handler" would be considered a nonpool plant since, by the nature of the operation, as discussed later, the plant is specificallly exempt from pool status.

A "partially regulated distributing plant" would also be considered to be a nonpool plant.

A partially regulated distributing plant would be a distributing plant that does not qualify as a pool plant and is not an other order plant, a producer-handler plant, or an exempt distributing plant. Such a plant would be one from which during the month an average of more than 300 pounds daily of fluid milk products is disposed of as route disposition in the marketing areas. Also, such a plant would have less than 10 percent of its route disposition in the defined marketing areas of the order.

An "unregulated supply plant means a supply plant that does not qualify as a pool supply plant, an other order plant, a producer-handler plant, or an exempt distributing plant. In essence, it is a plant which transfers milk to a pool distributing plant, but not to an extent that would qualify it for pool status under the order. As proposed by the merger proponent and adopted herein, an "exempt distributing plant" means a distributing plant with an average route disposition in the marketing area of less than 300 pounds per day. This type of plant should also be included among the nonpool plants specified in the order.

Handler. The impact of regulation under an order is primarily on handlers. The handler definition identifies persons who will have responsibility for filing reports and/or making payments for milk under the merged order. As herein provided, the following persons are defined as handlers under the order.

(1) The operator of one or more pool plants;

(2) A cooperative association with respect to bulk tank milk that is picked up at the farm and delivered to a pool plant or diverted for its account from pool plant to a nonpool plant;

(3) The operator of a partially regulated distributing plant;

(4) A producer-handler;

(5) The operator of an other order plant from which milk is disposed of in the area;

(6) The operator of an unregulated supply plant; and

(7) The operator of an exempt distributing plant.

Such persons are now defined as handlers under the two individual orders with the exception of the operator of an unregulated supply plant and the operator of an exempt distributing plant. Each person that may incur an obligation (reporting and/or financial) under the order should be designated a handler. This will assure that all information necessary to determine their regulatory status under the order can be readily determined by the market administrator.

The handler who receives milk from producers at a pool plant should be responsible for reporting in detail the quantities of milk received from each producer and each other source. Such handler also should be responsible for reporting the necessary information to determine the utilization of such milk, and for making payments to producers, cooperative associations, and the producer-settlement fund in accordance with the terms of the order. The merged order should include the present cooperative bulk tank handler definition of the Inland Empire order rather than that of the Puget Sound order. The adopted definition requires a cooperative to be the handler on bulk tank milk under its control, unless the buying handler agrees to buy such milk on the basis of with and tests determined from measurements at the farm. The Puget Sound definition, which the merger proponent proposed, gives a cooperative the option of not being the handler on bulk tank milk under its control.

A large proportion of the milk received by plants that would be fully regulated by the merged order is picked up at the farms of producers in tank trucks owned and operated by, or under contract to cooperatives. In such circumstances, it is only the cooperative tha has the opportunity to measure and sample the milk of individual producers that is received at a plant. In the absence of any agreement by the plant operator to be the handler on such milk, the cooperative must be the responsible handler for the milk as it leaves the farm.

Requiring a cooperative to be the handler on milk picked up for its account at the farm of a producer and delivered to a pool plant provides a practicable basis for the complete accounting of such milk. It also recognizes the current handling arrangements used by the cooperatives operating in the individual markets in allocating their members' milk among distributing plants.

As is the case under the individual orders, the merged order should continue to provide that the milk delivered to a pool plant by the cooperative as a "bulk tank handler" would be considered as a receipt of producer milk by the operator of the pool plant at which it was physically received. Under this arrangement, the pool plant operator's obligation for such milk to the producer-settlement fund, to the administrative assessment fund, and to the cooperative would be the same as

for producer milk received directly from the farm of an individual producer. The cooperative would be obligated to the producer-settlement and administrative assessment funds on only that portion of the milk picked up for its account that exceeds the quantity delivered to pool plants.

As proposed by NDA and herein adopted, a cooperative association also should be the handler on the milk of a producer which it diverts for its account from a pool plant to a nonpool plant that is not a producer-handler plant. Both of the two orders proposed to be merged provide that a cooperative may act as a handler for diverted milk. Continuation of this handling arrangement will facilitate the movement of milk not needed for fluid use to nonpool plants for manufacturing.

The merged order should permit a cooperative association to submit a single report that includes all of its receipts of milk from producers and all of its diverted milk, irrespective of whether the milk is associated with plants of other handlers or a cooperative's own plant. This is now provided under the Inland Empire order. However, the present Puget Sound order provides that producer milk diverted from a pool plant operated by a cooperative association shall be reported on an individual plant basis. Specifying that a cooperative association shall be the handler on the producer milk it diverts from pool plants of other handlers to nonpool plants as well as from its own pool plants will simplify the cooperative's accounting for skim milk and butterfat under the merged order.

Producer-handler. The merged order should continue the exemption now contained in each of the two individual orders of a "producer-handler" from the pooling and pricing provisions of the order. Under the merged order, the definition of a producer-handler should be essentially the same as that now contained in the Puget Sound order. However, the type of supplemental fluid milk products that a producer-handler may purchase from pool plants should be modified. In this respect, a producer-handler should be permitted to purchase from pool plants fluid milk products in any form. Such purchases should continue to be limited to a daily average during the month of 100 pounds.

The producer-handler definitions of the Puget Sound and Inland Empire orders differ basically in only one respect. The Puget Sound order limits a producer-handler's supplemental purchases during the month from pool plants to an average of 100 pounds per day of packaged fluid milk products other than whole milk. The Inland Empire order places no restriction on the amount of fluid milk products a producer-handler may purchase from pool plants.

The merger proponent supported a continuation of the Puget Sound producer-handler provisions as modified to coincide with other proposed changes in the provisions of the merged order. It contended that these provisions will permit all persons now designated as producer-handlers under the individual orders to maintain their present exempt status. The witness for the proponent testified his organization was opposed to any relaxation of the producer-handler provisions because it was the proponent's belief that producer-handlers already have an unfair competitive advantage over regulated plants.

Two proprietary handlers and two producer organizations—Producer's Base Committee and Dairy Marketing Services—testified in support of a continuation of the Puget Sound producer-handler definition. They were concerned primarily with any relaxation of the present Puget Sound producer-handler provisions as they relate to the tolerance for purchasing fluid milk products from pool plants. Although it did not testify at the hearing, the Washington State Dairymen's Federation filed a post-hearing brief in support of NDA's producer-handler definition proposal.

As initially included in the notice of hearing, the Sequim, Washington producer-handler proposed that producer-handlers be permitted to purchase fluid milk products from pool plants in an amount not to exceed their own farm production. At the hearing, however, he modified his proposal and supported the position taken by a number of other Puget Sound producer-handlers, including the representative of the Independent Milk Producers Distributor's Association. Their position was that the merged order should include the present Inland Empire order's provision that permits a producer-handler to purchase unlimited quantities of fluid milk products by transfer from pool plants. They claimed that the present Puget Sound order's 100-pound per day limitation on supplemental purchases is too restrictive and does not provide the balancing flexibility needed to cope with seasonal changes in their fluid milk sales. In addition, they all testified in support of being able to purchase fluid milk products in any form, including bulk as well as packaged fluid milk products. Finally, these parties contended that producer-handlers are not causing disorderly marketing conditions in the Puget Sound area.

A primary basis for exempting a producer-handler from the pricing and pooling provisions of the order is that such a person operating customarily has a relatively small operation and is operating in a self-sufficient manner. The milk that is processed, packaged and distributed by a producer-handler is obtained from his own production. Any fluctuations in a producer-handler's daily and seasonal milk needs is met through his own farm production, and any excess milk supplies are disposed of at his own expense. Under this arrangement, a producer-handler seldom can be a major competitive factor in the market for regulated handlers, nor can such a person have a preferred market for his milk relative to producers who supply the regulated handlers and share in the proceeds of the marketwide pool.

If a producer-handler processes milk from his own farm and but also relies on pool plants for substantial supplies, either in bulk or packaged form, his operation's are not significantly different than the operations conducted by a pool handler. However, since his operation is not fully regulated, the pool does not receive the benefits of the producer-handler's Class I sales. Yet, the other producers in the market are bearing the cost of balancing his operation by carrying such operator's necessary reserve milk supplies. Such an operator should not have producer-handler status under the merged order, but should be accorded pool status similar to that of any other handler receiving milk directly from dairy farms.

The only issue that was developed on the record with respect to producer-handlers concerned the extent to which they should be permitted to purchase supplemental supplies of Class I milk from pool plants under the merged order. In considering this issue, particular attention must focus on the specific marketing conditions that existed in the individual markets that led to the development of the current provisions for the respective markets. For instance, in the Puget Sound market, there historically has been a large number of producer-handlers, including some of very substantial size. Moreover, producer-handlers in the Puget Sound market account for the largest proportion of in-area Class I disposition of any of the Federal order markets in the country—nearly 12 percent in October 1980. In view of this marketing situation, it is appropriate to require producer-handlers to rely almost totally on their own milk production to balance their fluid sales. Only in this way can

VOL
48
ISS
87

1983
UMI

there be any reasonable assurance that their exemption would not have an adverse impact on the market. The record evidence indicates that the present Puget Sound order's producer-handler provisions have accommodated producer-handler operations in a manner consistent with the needs of the regulatory program.

Conversely, in the Inland Empire market producer-handlers have not been a major competitive factor. At the time of the hearing, there were only two relatively small producer-handlers operating in a portion of the Idaho segment of the marketing area, compared to 18 such operations in the Puget Sound market. Under these conditions, it has not been necessary under the Inland Empire order to impose stringent limitations on the amount of milk that producer-handlers may purchase from pool plants.

As indicated previously, the present Puget Sound marketing area will represent a very substantial portion of the merged marketing area in terms of population, producer receipts, Class I sales, and producer-handler operations. In view of these considerations, the concept of self-sufficiency with respect to the operations of producer-handlers must be preserved in the merged order in the interest of equity and continuing orderly marketing. To accomplish this, the merged order should continue to limit a producer-handler's purchases from pool plants essentially in the same manner as now provided in the present Puget Sound order. This will insure that producer-handlers under the merged order will continue to be basically self-sufficient operations.

As adopted herein, a producer-handler would be allowed within the limitations on supplemental purchases, to purchase fluid milk products in bulk or packaged form. This change would not undermine the concept of self-sufficiency, but rather would provide a producer-handler with the flexibility to purchase supplemental fluid milk products in the form that fits his needs.

Also, with the adopted reclassification of fluid cream products from Class I to Class II, as discussed later, supplemental purchases of such products from pool plants by producer-handlers no longer should be considered in determining whether a handler's operation meets the producer-handler exemption requirements of the order. There is no reason to believe, in view of the declining importance of the sales of fluid cream products in the respective markets, that this change will provide the opportunity for producer-handlers to become a serious competitive factor for other handlers in the combined market on whom full regulation is imposed.

Definition of dairy farmer for other markets. As proposed by the merger proponent, the merged order should continue the "dairy farmer for other markets" provision now contained in the Puget Sound order. Such provision is designed to preclude any reserve milk supplies associated with non-Federal order fluid markets from being pooled under the order. Without such a provision, it would be possible for any handler who also supplies milk for Class I use to an unregulated plant to handle such milk as nonpool milk when so disposed of and receive such milk at his pool plant as producer milk when not needed for such Class I use. In such event, the pool would be carrying the burden of balancing the unregulated plant's fluid milk requirements without sharing in the higher-valued Class I sales associated with such unregulated plant.

As was pointed out by the spokesman for the proponent cooperative, this situation has occurred in the Inland Empire market in recent years since this order does not contain a "dairy farmer for other markets" provision. In elaborating on this point, he indicated that some dairy farmers who regularly deliver their milk to unregulated fluid milk plants in nearby markets have on occasion delivered their milk to a pool plant during the flush months and acquired producer status and shared in the regulated market's Class I utilization on that portion of milk that was not delivered to unregulated plants. According to the witness, this handling arrangement could be used under the merged order in the absence of the dairy farmer for other markets provision.

Based on the evidence contained in the record, there is a continuing need for the dairy farmer for other markets provision under the merged order because of the existence of nearby non-federally regulated fluid markets, particularly in parts of Idaho and Montana. Continuation of these provisions under the merged order would mean, of course, that producers will not have the economic burden of carrying the reserve milk supplies for any unregulated market.

The dairy farmer for other markets provision, however, should not apply to milk received at a pool plant as diverted milk from an other order plant if such diverted milk is considered producer milk under the other order. Such milk would be classified and priced under the other order. Both of the individual orders proposed to be merged and the nearby Oregon-Washington order specifically prescribe the treatment of such milk that is diverted by regulated plants.

Basis of computing allowable diversions for two or more cooperative associations. The merged order should permit two or more cooperative associations to have their allowable diversions computed on the basis of their combined deliveries of producer milk to pool plants. However, this arrangement should not be permitted unless each association involved has filed a request to this effect with the market administrator prior to the first day of the month the agreement is effective. The request should specify the basis for assigning over-diverted milk to the producer deliveries of each cooperative in the event the cooperatives in a unit exceed the diversion limits specified in the order. Also, the method for assigning over-diverted milk must be approved by the market administrator.

This pooling arrangement is now provided only under the Inland Empire order. Dari Marketing Service proposed that this arrangement be used under the merged order. The federation claimed that as the marketing agent for three separate cooperative associations, adoption of the proposal would provide the cooperatives with the opportunity to mutually arrange for the efficient disposition of milk not needed for fluid use.

The merged order should afford all cooperatives in the market flexibility in the arrangements under which they sell milk to pool plants or dispose of reserve milk supplies to nonpool manufacturing plants. To this end, two or more cooperatives should be allowed to have the amount of their allowable diversions computed on the basis of the combined deliveries of milk by their member producers. Such an arrangement will facilitate the orderly and efficient disposition of the reserve supplies on the market.

4. (b) *Classification of milk.* The merged order should use essentially the same uniform classification plan that is commonly provided in most other Federal milk orders. However, the plan should be modified in several respects to conform to local market conditions and to coordinate certain classification provisions with those of the nearby Oregon-Washington order. Basically, the plan adopted herein provides, as is the case under the individual orders, for the classification of milk according to use, including rules for determining the classification of milk moved from one plant to another and the classification of shrinkage. The plan also sets forth a procedure for allocating a handler's

receipts of milk and milk products from various sources to his utilization in each class in order to determine the classification of producer milk.

Under the classification plan here adopted, Class I milk would include all skim milk and butterfat disposed of in the form of milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, milkshakes and ice milk mixes containing less than 20 percent total solids and mixtures of cream and milk or skim milk containing less than 18 percent butterfat. Skim milk and butterfat disposed of in any such product that is flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted likewise should be classified as Class I milk. Such classification should appy whether the products are disposed of in fluid or frozen form.

Skim milk disposed of in any product described above that is modified by the addition of nonfat milk solids should be Class I milk only to the extent of the weight of the skim milk in an equal volume of an unmodified product of the same nature and butterfat content. The remaining volume of the product, which represents the skim mild equivalent of added nonfat milk solids, would be classified as Class III.

Each product designated herein as a Class I product would be considered a "fluid milk product" as defined in the order. In addition to these fluid milk products, Class I milk would include any skim milk and butterfat not specifically accounted for in Class II or III, other than shrinkage permitted in a Class III classification.

Class III milk should include products which are made from surplus Grade A milk and which compete in a national market with similar products made from manufacturing grade milk. These products include cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese), butter, any milk product in dry form (such as nonfat dry milk), any concentrated milk product in bulk, fluid form that is used to produce a Class III product, and evaporated or condensed milk (plain or sweetened) in a consumer-type package. Additionally, Class III milk should include any product not specified in Class I or Class II.

An intermediate class, Class II, should apply to certain products which can command a higher value than Class III products but which must be competitively priced below Class I in order to compete with non-dairy substitute products or manufactured dairy products that can be used in making Class II products. Class II milk should include skim milk and butterfat disposed of in the form or a "fluid cream product," eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles one of these products. As defined in the order, "fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 18 percent or more butterfat, with or without the addition of other ingredients.

Class II milk would also include bulk fluid milk products and bulk cream products disposed of to any commercial food processing establishment or in producer milk diverted to a commercial food processing establishment at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages. In addition, it would include milk used to produce cottage cheese, lowfat cottage cheese, dry curd cottage cheese, milkshake and ice milk mixes containing 20 percent or more total solids, frozen desserts, frozen dessert mixes, milk or milk products sterilized and packaged in hermetically sealed metal or glass containers, and certain other products as specified in the order.

The classification plan adopted herein was proposed by the merger proponent and embraces the basic features of the uniform classification plan contained in many other Federal orders. This plan was developed from exhaustive hearings held on the broad issue of classification in 1971 for 39 markets. A full discussion and appropriate order language on the uniform classification plan is contained in a final decision issued February 19, 1974 (34 FR 8202, 8452, 8712, 9012). This decision was duly noted on the record of this proceeding. Proponent testified that this classification system, with certain minor revisions, would be fully appropriate for the merged order and would comport with the need for greater uniformity among those essential provisions of marketing orders that should be uniform.

The minor revisions to the uniform classification plan applicable to most orders, which were proposed by the merger proponent and adopted herein, concern the classification of certain fluid cream products and ending inventories of packaged fluid milk products. Under the adopted classification plan, any mixtures of cream and milk or skim milk containing less than 18 percent butterfat would continue to be Class I. Such products are Class II under the 39-market uniform classification plan. Although they are included in Class III in most other Federal orders, inventories of fluid milk products in packaged form on hand at the end of the month should be classified in Class I under the merged order. Such inventories in bulk form, however, should be classified in Class III. This procedure for handling fluid milk product inventories is identical with that provided under the present Puget Sound order and the nearby Oregon-Washington order. Under the Inland Empire order, however, closing inventories of fluid milk products in both bulk and packaged form are classified as Class III.

Such revisions to the 39-market uniform classification plan that are herein adopted recognize the widespread competition for sales in the region by Oregon-Washington order handlers and handlers that would be regulated under the merged order. Under this marketing situation, it is appropriate and necessary that essentially the same system of classification apply under both the merged order and the Oregon-Washington order. Otherwise, such differences in the classification and pricing of milk could be disruptive to the competitive relationships of handlers in the region.

Certain transitional provisions relating to inventories of packaged fluid milk products should apply during the first month of operation of the merged order to those handlers who have been regulated under the Inland Empire order and for any plant in the month in which it first becomes regulated. In these circumstances, it is provided that inventories that had been held over in the form of packaged fluid milk products at such plants would be allocated to available Class III utilization during the month. Should such inventories be allocated to a higher class, the appropriate reclassification charge would apply. This procedure will assure that all handlers under the merged order will be subject to the same pricing for milk used in packaged fluid milk products whether such products enter into the month's accounting as beginning inventory or are made directly from current producer milk receipts.

Foremost-McKesson's Foods Group (Foremost) proposed that the Class II classification in the merged order specify that creaming mixtures used in the production of cottage cheese be classified as Class II milk. The handler's witness stated that he was asking for this variation from the merger proponent's proposed Class II classification provisions to insure that

VOL 48 ISS 87 MAY 4 1983 UMI

cottage cheese creaming mixtures be classified on a used-to-produce basis. He perceived that this change in order language would correct a problem that the handler is currently encountering under the Puget Sound order whereby at the time of audit the market administrator is having to convert the quantity of creamed cottage cheese that the plant disposes of back to the amount of milk product used to produce such products. According to the witness, the work-back method that starts from a disposition basis never equals the handler's plant records in terms of the creaming mixtures used in the production of cottage cheese. Consequently, the handler must make continuing adjustments in his plant production records to reconcile with the market administrator's audit adjustments.

The handler's proposal should not be adopted. The present provisions in the two orders proposed to be merged classify any milk ingredient (including creaming mixtures) used to produce cottage cheese as Class II. Continuation of this classification concept was proposed by the merger proponent and which is adopted herein. The issue raised by the handler is not one of classification, per se, but rather the accounting method that is to be used in determining how much milk was used in the manufacture of cottage cheese.

It should be noted in this regard that if a handler does not maintain proper plant manufacturing records for any product that is accounted for on a used-to-produce basis, the market administrator may have to determine at the time of audit the quantities of milk ingredients used in such a product through a work-back method. The record establishes that this procedure is used by the market administrator in determining the milk ingredients used in the production of cottage cheese by Foremost. Thus, if the handler has problems with this accounting procedure, it is a matter to be dealt with through the market administrator rather than through changing the order.

Allocation of receipts to utilization. Under the merged order, a system of allocating handlers' receipts to the various classes should be similar to that adopted in the Assistant Secretary's June 19, 1964 (29 FR 9002), decision for 76 milk orders (including the Inland Empire and Puget Sound orders). This decision dealt with the issue of integrating into each order's regulatory plan milk which is not subject to classified pricing under any order and receipts at a pool plant from other order plants. The decision provides a procedure for allocating over a handler's total utilization his receipts from all sources and for making payment into the producer-settlement fund on unregulated milk allocated to Class I.

Since the aforementioned decision sets forth the procedures for dealing with unregulated milk under Federal orders, it is appropriate and necessary that the same system of allocation apply under the proposed merged order. Likewise, the appropriate treatment of other order milk received at pool plants under the merged order should conform with the plan included in the aforesaid decision that is used for coordinating the applicable regulations on all movements of milk between and among Federal order markets. Merger proponent recognized the necessity for such coordination and proposed allocation provisions that would be essentially the same as those now provided in the separate orders proposed to be merged.

Under the uniform classification plan, herein adopted, handlers using certain types of other source milk (whether in the form received or in reconstituted form) in the production of Class II products would be permitted to have such other source milk allocated directly to their Class II uses. Direct allocation of such other source milk, however, would be limited to milk products (such as nonfat dry milk and condensed milk or skim milk) that are not fluid milk products or fluid cream products. Neither of the two orders proposed to be merged now provide for the direct allocation to a handler's Class II utilization of nonfluid other source milk receipts.

Handlers rely largely on producers for a regular supply of milk for the products herein included in Class II. The major use of other source milk in making these Class II products is the addition of nonfat dry milk to cream products and to skim milk being used for the manufacture of cottage cheese. On occasion, handlers also may reconstitute nonfat dry milk for cottage cheese production. Condensed milk or skim milk may be similarly used. Handlers choosing to use such other source milk in this way should be permitted to have such milk allocated directly to their Class II utilization rather than allocated first to any Class III utilization they may have.

It is not intended that the Class II outlet for producer milk necessarily be reserved for local producers. This use class merely recognizes that some additional value attaches to producer milk used by regulated handlers in the Class II products. Pricing this milk at a level above the Class III price serves also to reduce the burden on the Class I price of attracting a supply of producer milk for the Class I market. It is not intended that producer returns be enhanced for the purpose of also attracting a full supply of producer milk for handlers' Class II uses. Accordingly, no obligation to the pool (commonly known as a compensatory payment) would be imposed on any other source milk which regulated handlers may use in Class II or on any Class II products that may be distributed in the market by nonpool plants, either directly on routes or through pool plants.

As long as the Class II price for producer milk remains in proper relationship with the cost of alternative supplies, it is not expected that this direct allocation of nonfluid other source milk to Class II will induce handlers to use other source milk in preference to producer milk for processing Class II products. Under the adopted Class II price, producers would represent in most circumstances the most economical source of milk for Class II use. As indicated elsewhere, this would be so with respect to the alternative use of nonfat dry milk, the type of other source milk most commonly used in Class II products. Nonfat dry milk has certain advantages for handlers that producer milk cannot provide. It can be added easily to milk or milk products to increase their nonfat milk solids content. Also, its storability permits handlers to have a concentrated form of nonfat milk solids on hand at all times for emergency use. Nevertheless, the higher cost of nonfat dry milk relative to producer milk would tend to limit its use to only those situations where the nonfat dry milk has a distinct processing advantage for handlers.

No provision should be made for the direct allocation to a handler's Class II utilization of other source milk received in fluid form. Unlike the handling of nonfact dry milk, it would not be unusual for a handler to commingle receipts of fluid other source milk with receipts of producer milk. In this circumstance, it would not be possible to know just how much of the other source milk may have been used in the processing of a Class II product. The difficulty which a handler would have in demonstrating the actual use of fluid other source milk in a Class II product, and the administrative difficulty in verifying such claimed use, warrants the allocation of such milk to Class III.

4. (c) *Class I price and location adjustments.* The Class I price for the Puget Sound-Inland market should be the basic formula price for the second preceding month plus a Class I differential of $1.85. This price should apply to plants located in the base pricing zone (Seattle-Tacoma-Everett area) with prices applicable at plants in other areas to be determined through the use of location adjustments. Also, the same location adjustment rates should apply to the uniform blend price for milk received at such plants.

For the purpose of applying location adjustments, the marketing area should be divided into six pricing zones with certain of these zones extending to other specified areas outside the marketing area. The location adjustment for each zone, the resulting Class I differential (shown parenthetically), and the territory that should be included in each zone area are as follows:

Zone 1—No adjustment ($1.85)

Washington Counties

King	Pierce
Kitsap	Snohomish

Zone 2—Plus 10 cents ($1.95)

Idaho Counties

Benewah	Kootenai
Bonner	Latah
Boundary	Shoshone

Oregon Counties

Benton	Multnomah
Clackamas	Polk
Columbia	Wasco
Hood River	Washington
Linn	Yamhill
Marion	

Washington Counties

Clark	Skamania
Cowlitz	Spokane
Ferry	Stevens
Lincoln	Wahkiakum
Pend Oreille	Whitman

Zone 3—minus 4 cents ($1.81)

Washington Counties

Island	Skagit
Mason	Thurston

Zone 4—minus 6 cents ($1.79)

Washington Counties

Grays Harbor	Pacific
Lewis	Whatcom

Zone 5—minus 10 cents ($1.75

Idaho Counties

Lewis	Nez Perce

Oregon Counties

Gilliam	Sherman
Morrow	Umatilla

Washington Counties

Adams	Garfield
Asotin	Grant
Benton	Kittitas
Chelan	Klickitat
Columbia	Okanogen
Douglas	Walla Walla
Franklin	Yakima

Zone 6—minus 16 cents ($1.69)

Washington Counties

Clallam	San Juan
Jefferson	

Presently, the Puget Sound marketing area is divided into four pricing districts (zones), with certain districts extending to other areas outside the marketing area. The Class I differential in District 1 is $1.85. In the remaining three districts, it is adjusted to $1.75, $1.70, and $1.45, respectively. At other locations outside of the pricing districts, the Class I price is reduced 1.5 cents for each 10 miles that a plant is located from Seattle.

The Class I differential under the Inland Empire order is $1.95. For plants located between 90 and 200 miles from Spokane, the Class I price is reduced by two cents per each 10 miles; and beyond 200 miles, the price is reduced an additional 1.0 cent for each additional 10 miles.

NDA proposed that the basic formula price now used under the separate orders be continued as an appropriate basis for Class I pricing under the merged order. There was no opposition to this proposal.

The present basic formula price of the Puget Sound and Inland Empire orders is based on pay prices for manufacturing grade milk at plants in the heavy production States of Minnesota and Wisconsin. This price is used as a basis in establishing Class I prices under all Federal orders. Its continued use under the merged order will implement interorder price alignment by insuring that Class I price changes under this order will remain coordinated with those under all other orders. Additionally, because the Minnesota-Wisconsin manufacturing pay price is a competitive pay price reflecting supply-demand conditions for milk produced by dairy farmers who incur about the same changes in production costs as producers for this market, the use of this price will tend to insure an appropriate price level necessary to an adequate supply of milk.

The proponent cooperative also proposed that the Class I price for the Puget Sound-Inland order be established at $1.95 over the basic formula price for the second preceding month. Under its proposal, this price would apply at all plants located in the proposed marketing area and also at plants located in the nearby Washington counties of Benton, Franklin, Walla Walla, and Yakima and in the Idaho county of Nez Perce.

The principal reason cited by NDA in support of its Class I price proposal was that the 10-cent lower Class I price under the present Puget Sound order relative to the Class I price in the major population areas of the Inland Empire and Oregon-Washington markets is no longer needed to provide an incentive for the movement of supplemental milk supplies by Puget Sound handlers to plants under the two higher priced order markets. In support of its position, the cooperative's witness claimed that marketing conditions have changed since the Inland Empire and the Oregon-Washington orders were first promulgated. In this regard, he testified that in the early years of the operation of both orders, bulk milk moved regularly from the Puget Sound area during the fall and winter months to Spokane and Portland distributing plants to supplement local supplies. According to the witness, such milk movements have not occurred in recent years since milk supplies for the Inland Empire and Oregon-Washington markets have become adequate to satisfy the requirements for Class I uses. As a result of this changed marketing situation, he reasoned that the level of the Class I price in the Puget Sound area of the merged and expanded order should now be the same as the Class I price in the nearby Spokane and Portland markets.

Proponent cooperative also contended that the present 10-cent lower Class I price in the Puget Sound area is not needed to facilitate movements of packaged fluid milk to the higher priced Spokane or Portland markets. He claimed that because packaged fluid milk products are distributed in all directions from distributing plants located in the region, "the concept of using location adjustments to move packaged products toward a 'market center' is inappropriate, and it is desirable that the plants all have the same cost for Class I milk under the provisions of the Federal order for the area."

Additionally, NDA's witness testified that the proposed 10-cent per hundredweight increase in the Class I price at plants located in the Puget Sound area would partially offset the other proposed changes in the merged order that would tend to reduce returns to producers. These proposed changes relate to the reclassification of fluid cream items from Class I to Class II and the elimination of location adjustments at plants located within the proposed marketing area.

In further support of its proposal that no location adjustment apply at any plant located within the proposed marketing area and adjacent nearby

VOL
48
ISS
87
MY
4
1983
UMI

territory, the proponent cooperative claimed that milk production data indicate that ample supplies of milk are produced within short distances of each of the distributing plants located in the area. Under this supply situation, according to proponent's spokesman, there is no need to assemble milk at a supply plant and transship it great distances in order to meet handlers' Class I requirements. In view of this, the witness concluded that no location adjustments are needed under the merged order to compensate for hauling milk from distant supply plants to distributing plants located in the proposed marketing area.

Foremost originally proposed a Class I differential of $1.88 that would apply to the areas that are now the "base zones" of the present Puget Sound and Inland Empire orders. At the hearing and in its post-hearing brief, the handler did not support the proposal. Instead, the handler urged that the present $1.85 and $1.95 Class I differentials that now apply in the base zones to the Puget Sound and Inland Empire orders, respectively, be retained under a combined and expanded order. Under its revised proposal, a location adjustment would apply to plants located outside of the base zones at the rate of 1.5 cents per 10 miles from the nearest of Spokane or Seattle. The handler stated that its alternative recommendations were intended to maintain the same general historcial competitive price relationships among Seattle, Spokane, and Portland handlers that now exist under the present Class I price stuctures of the separated orders.

At the hearing, a spokesman for Vitamilk Dairy, a pool distributing plant in Seattle, opposed any change in the Class I price structure for a combined and expanded order that would have the effect of increasing prices at any plant location. The witness for the handler held that location adjustments are needed for the maintenance of adequate milk supplies at distributing plants in the Seattle areas. He also maintained that any change in the price structure would distrupt the competitive relationship between handlers serving the region.

The president of a group of independent producers supplying Vitamilk Dairy supported the handler's position regarding the price structure for the proposed merged and expanded order.

A proposal of Dairy-Marketing Service, as set forth in the hearing notice, would modify NDA's pricing proposal to provide for location adjustments under the combined and expanded order. As proposed, a minus location adjustment would apply at plants located more than 75 miles from the nearer of Seattle or Spokane at a rate of 1.5 cents per each 10 miles. At the hearing, however, the federation of cooperatives strongly urged the adoption of a 2.5 cents per 10-mile distance rate.

In support of its location adjustment proposal, DMS indicated that NDA's pricing proposal would not encourage the movement of milk when needed from outlying reserve milk supply areas to the market centers of the proposed marketing areas. It claimed that its location pricing proposal would provide more attractive prices to producers supplying distributing plants in the Seattle area of the proposed marketing area relative to reserve milk supply areas north of the Seattle area.

DMS, in recommending a rate of 2.5 cents per 10 miles, contended that the present 1.5-cent location adjustment rate, which has been in use a number of years, does not reflect the present cost of transporting milk from distant areas to the populated centers of the marketing area. In support of this position, data were introduced into the record by DMS's witness showing the average variable costs incurred by DMS and NDA to transport bulk milk from Whatcom County, Washington farms to the Seattle areas. These data showed hauling rates varying from 3.7 cents to 4.4 cents for each 10-mile distance. While conceding that its proposed 2.5-cent location adjustment rate is still less than the actual cost of hauling milk from farms to the market center, DMS's witness held that its proposed rate is more equitable than the present location adjustment rate of 1.5 cents for each 10 miles. He also maintained that unless location adjustment rates are increased, proper alignment of producer prices at various locations cannot be achieved.

The hearing notice included a proposal by Carnation which would retain the present pricing districts of the Puget Sound order. In addition, the proposal would modify the location adjustment applicable to each district to more properly reflect the current cost of moving milk to the market center. The proposal also would apply a location adjustment to any plant located outside of a pricing district based on mileage from the nearer of Seattle or Spokane.

The handler at the hearing, however, abandoned his proposal. Instead, the handler recommended that the location pricing proposal, as amended, by DMS be adopted for the merged order.

In considering an appropriate price structure for the proposed merged market, the Class I price must be established at a level which, in conjunction with other class prices, results in returns to producers sufficient to assure an adequate supply of quality milk to meet the fluid requirements at various locations throughout the combined and expanded market. Additionally, the Class I price structure under the merged order must be properly aligned with prices under the neighboring Oregon-Washington order.

Concerning the adequacy of milk supplies in the region, the record clearly demonstrates that the proposed marketing area is in a heavy milk-producing area. In 1980, more than 2.3 billion pounds of producer milk were pooled under the two orders proposed to be merged. Of this total, only 956 million pounds, or 41 percent, were used in Class I products. Moreover, the percentage of Class I utilization for the two markets involved has declined over the years.[4] In 1970, the weighted average Class I utilization for the markets was over 49 percent compared to 41 percent in 1980. Hence, the amount of milk available in this area relative to demand has been increasing.

Under this supply-demand situation, there is no basis for increasing the Class I level in the combined and expanded marketing area. The adopted $1.85 Class I differential, in conjunction with the location adjustments as described, will provide essentially the same Class I returns under the merged market as presently exists for the two separate markets. This price level can be expected to assure adequate supplies to meet the fluid requirements for the combined marketing area.

Neither is there any basis for establishing a price level in the Puget Sound area of the proposed marketing area above that which now exists under the present Puget Sound order. As noted elsewhere, this area is by far the largest segment of the combined market, both in terms of producer receipts and Class I sales. The amount of milk available for this area has been increasing relative to demand, as indicated by the market's declining Class I utilization. In fact, the major supply of reserve milk for the proposed marketing area as well as for the entire northwest region is in the Puget Sound area. Hence, there is no justification for increasing the Class I differential in this area above its present level since the area has ample supplies to meet the demands of the fluid market.

To assure an adequate milk supply throughout the combined and expanded market, it is essential that Class I prices under the Puget Sound-Inland order be closely aligned with Class I prices of the nearby Oregon-Washington order which represents an alternative source of supply. Also, it is necessary that milk for Class I use in this market be competitively priced with milk supplies for the Oregon-Washington market that are distributed in the Puget Sound-Inland area in competition with local producer milk.

[4] Official notice is taken of Federal Milk Market Statistics, Annual Summaries for 1971, 1973, 1975, and 1977, Agricultural Marketing Service, U. S. Department of Agriculture.

The proposed Puget Sound-Inland marketing area borders the Oregon-Washington order's marketing area. As indicated previously, the distribution areas of handlers that would be regulated by the merged order overlap with those of Oregon-Washington handlers distributing in the Puget Sound-Inland area. Additionally, various segments of the area from which handlers under the proposed merged order obtain milk supplies overlap extensively with the area from which the Oregon-Washington market draws milk supplies. Under such circumstances, it is essential for orderly marketing that Class I prices in the Puget Sound-Inland area be closely aligned with such prices in the nearby market.

It is quite apparent that Class I prices under the present two markets here under consideration and the adjacent Oregon-Washington market were established to reflect such intermarket relationships. The Class I price structure herein adopted will continue essentially the same historical interorder price relationships.

The following table shows a comparison of the Class I price differential at various locations for the proposed Puget Sound-Inland order and the Oregon-Washington order:

Order	Class I price differential
Proposed Puget Sound-Inland:	
Seattle (zone 1)	$1.85
Spokane (zone 2)	1.95
Moses Lake (zone 5)	1.75
Oregon-Washington:	
Portland	$1.95
Sunnyside-Toppenish-Yakima	1.75

Except for the testimony of NDA who proposed that the same Class I price apply throughout the proposed marketing area, the testimony presented at the hearing supported the continuance and need for a location pricing scheme under the combined and expanded order. The cooperative's proposal for a single Class I price throughout the proposed marketing area would have the effect of increasing Class I prices at several plant locations. It would also disrupt the historical price relationship between the Puget Sound and Inland Empire markets and the nearby Oregon-Washington market.

Under the proponent cooperative's proposed flat pricing scheme, producers would want to deliver their milk only to the plants located nearest their farms. This is because they would not be reimbursed through higher prices for the higher hauling costs involved in moving milk greater distances to plants at the market centers where milk is needed for fluid processing. The likely result of this would be to increase the total handling and transportation costs for some handlers as opposed to others in obtaining adequate supplies. Accordingly, a single uniform Class I price applicable throughout the proposed expansive marketing area would be inappropriate and could contribute to disorderly marketing conditions.

The present location pricing structures of the two orders proposed to be combined were designed to encourage the movement of milk from supply areas to the principal population centers where it is processed for fluid use. Additionally, they were developed to maintain a reasonable price alignment with nearby markets, which is essential to the attraction of milk supplies to various locations where needed.

The record evidence does not demonstrate that the present location pricing structures for the Puget Sound and Inland empire markets are inappropriate or are contributing to disorderly marketing conditions. To the contrary, it appears that the present location pricing structure under each order involved is providing adequate milk supplies at all locations at which milk is delivered by producers. It also is providing a reasonable alignment of prices not only with other markets but also among the various segments within each market. Accordingly, the Class I location price structure now applicable under the separate orders should be retained insofar as possible under the combined and expanded area.

In view of this conclusion, it is necessary then to provide under the merged order a pricing structure that will essentially retain the same interplant price relationships which have existed under the separate orders. The most feasible method of accomplishing this is to establish six pricing zones. These zones would apply to the entire combined and expanded marketing area with two of them extending into the neighboring Oregon-Washington marketing area. The territory to be included in each zone was set forth at the outset of this discussion on the Class I and location adjustment issue.

Aside from retaining essentially the same price structure that now exists under the separate orders, the zone pricing structure adopted herein reflects several other considerations. With the exception of the prices that would be applicable in the Columbia River Basin area, the adopted zone pricing scheme provides a minimum of price differences among the various segments of the market to encourage only the movement of milk from the closest sources of production. This recognizes the availability of ample milk supplies within a short distance from the principal population centers of the proposed marketing area. Under this situation, there is no need to encourage the movements of milk from more distant areas.

Each of the zones adopted herein includes additional territory that might reasonably be considered a part of a pricing zone even though at present no plants are located there. This will assure that the same price that would apply to an existing plant would also apply to any new plant in the same general area. This is necessary since it would be expected that such plants (established or new plants) would be in substantial competition with each other.

Most of the southern border of the proposed marketing area abuts the Oregon-Washington marketing area. As herein adopted, the applicable Class I prices established for Zones 2 and 5 are coordinated and closely aligned with the Class I price structure that applies to these areas under the Oregon-Washington order. This will tend to insure Puget Sound-Inland handler equal access to the milk supply in the region in competition with Portland and Yakima County, Washington handlers and vice versa. It will also assure that all plants similarly located will have similar minimum order prices irrespective of the order under which a plant is regulated. Finally, a coordinated zone pricing structure would reflect the historical pricing relationship among competing plants that now exists in this area under the separate orders.

Under the location pricing structure adopted herein for the Puget Sound segment of the proposed marketing areas, Class I prices at the Mt. Vernon and Raymond, Washington, pool plants would be increased by six cents and nine cents per hundredweight, respectively. The basis for these increases were to obtain essentially the same return to producers for milk under

VOL
48
ISS
87
MY
4
1983
UMI

the merged order that they now receive under the Puget Sound order, after giving consideration to the effect that would result from applying location adjustments to total producer milk rather than to only base milk. In this regard and as discussed later in the decision, the proposed merged order does not provide for continuing the Class I base plan now contained in the Puget Sound order.

Another change that should be made in Class I prices that now apply at regulated plants under the separate order is a two-cent increase in the price at Moses Lake. At the time of the hearing, a plant at this location was regulated under the Inland Empire order and had a Class I differential of $1.73. As a result of the zone pricing structure adopted herein, the Class I differential at the Moses Lake Plant would be increased to $1.75.

The record evidence shows that the Moses Lake plant has substantial distribution in the Oregon-Washington marketing area in competition with nearby Yakima County plants that are regulated under the Oregon-Washington order. Moreover, this plant, because of its extensive distribution in the nearby Oregon-Washington marketing area, has been a pool plant at times under the Oregon-Washington order. When this occurs, the applicable, Class I differential at the Moses Lake plant is $1.75, which is identical to the prices applicable at the nearby Yakima County pool plants under the Oregon-Washington order. Hence, the adopted two-cent higher price for this portion of the marketing area would provide the same Class I prices at plants located in Moses Lake and Yakima County.

At a plant located outside of any area included in a zone as described above, the location adjustment should be minus 1.5 cents per hundredweight for each 10 miles or fraction thereof that such plant is located from the nearer of the County-City Building in Seattle or the County Courthouse in Spokane. Such distance should be based on the shortest hard-surfaced highway distance as determined by the market administrator. Essentially, intermarket price relationships are based on this transportation rate. The use of this rate under the merged order will assure the continuance of interorder price alignment.

Plants that would be subject to such adjustment generally will be located east and south of the marketing area in Idaho, Montana, California, and southern Oregon. Location adjustments at this rate for plants so situated will reflect the lesser location value of milk for this market at more distant plants relative to plants nearer the marketing area. Further, such location adjustments will implement uniformity of pricing among handlers for both milk received at the market centers from distant plant locations and milk received at the market centers direct from farms.

DMS's proposal to apply a location adjustment at plants located beyond 70 miles from the nearer of Seattle or Spokane at a rate of 2.5 cents per 10 miles should not be adopted. Any greater location adjustment rate for plants located outside of the market centers would not maintain the satisfactory alignment of prices that now exists in various segments of the proposed marketing area with prices in the nearby Oregon-Washington market. As indicated earlier in this decision, a series of price zones are established that essentially retain the same interplant and interorder price relationships which existed under the separate orders. The adoption of DMS's proposal would unduly distort interplant and interorder price relationships, particularly in the major areas of competition.

Application of location adjustment credits. Both of the orders proposed to be merged contain provisions that limit the amount of Class I location adjustment credits that may be allowed on bulk transfers between pool plants. The basic concept of this limitation should be continued under the merged order.

The basic intent of this limitation on location adjustment credits is to insure that producers on the market do not have their returns lowered by bearing the costs of unnecessary movements of milk to the market centers for other than Class I use. Under the present Puget Sound order, this is done through the allocation procedure in the assignment of milk receipts to classes of utilization. In the Inland Empire market, the limitation is determined through the application of location adjustments, which is the procedure used under most Federal orders.

For purposes of clarity and simplicity, the present technique used under the Inland Empire order is adopted as the appropriate procedure under the merged order in limiting location credits on transfers between pool plants. However, to fully integrate this procedure with the zone pricing structure adopted herein (which includes an announced Class I price for Zone 1 with a plus or minus price adjustment for other locations), it is necessary that the present Inland Empire location adjustment credit provisions be revised.

In this regard, location adjustment credits should not apply to Class I transfers of bulk milk shipped by pool plants to lower-priced zones. Under normal circumstances, this would not be an usual movement of milk. However, it could occur, for instance, in situations where a plant in Seattle or Spokane received milk in excess of its fluid requirements and marketed such excess to a plant in Mt. Vernon or Moses Lake. As indicated elsewhere, the higher Class I price levels provided in Seattle and Spokane were determined to be necessary to attract milk to these areas for Class I use and not for reshipment to lower-price zones. The latter should not be encouraged through the granting of a location adjustment credit on such milk movements, which would have the effect of requiring the pool to bear the cost of such movements.

The location pricing structure adopted herein requires a further modification in the application of Class I location adjustments. The merged order should specifically provide that when a location adjustment credit is not allowed on transferred milk, the transferor-handler should only be required to account for such milk at the Class I price at the transferee-plant. Absent this modification, a disallowed location adjustment credit could result in a Class I price to a transferor-handler that is higher than the value of the milk at the transferee-plant.

Additionally, the location adjustment credit provisions as adopted herein provide greater specificity in computing location adjustment credits as they apply to transfers between pool plants. As provided, Class I location adjustment credits would be determined by first subtracting receipts from unregulated supply plants and other order plants that are assigned a Class I classification and then subtracting from the remaining Class I use at the transferee-plant receipts from producers and cooperative associations as handlers on bulk tank milk. Location adjustment credits would then be assigned to the remaining Class I milk received from the transferor plants at which the least location adjustment applies and then in sequence to plants having the next least location adjustments, etc.

Class II and Class III prices. The Class II price under the merged order should be the Class III price for the month plus 25 cents. The Class III price should be the lower of either the Minnesota-Wisconsin price for the month or a butter-nonfat dry milk formula price (commonly referred to as the butter-powder "snubber" price).

These forumlas are now used in pricing milk not needed for Class I use under each of the orders to be merged.

They are also presently used under the Oregon-Washington order.

The merger proponent proposed that Class II and Class III prices for the merged order be established on the same basis that is applicable under the separate orders. The cooperative contended that the retention of this pricing scheme in determining Class II and Class III prices under the merged order is essential for the maintenance of appropriate price alignment with the Oregon-Washington market. Also, it held that continuing the use of the "butter-powder snubber formula price" as part of the Class III price formula provides handlers with assurance against undue reductions in their operating margins when butter values are abnormally low relative to prevailing pay prices for manufacturing grade milk. In further support of this position, the cooperative stated that the use of the snubber in the Class III price foumula is particularly suited for this area since a large percentage of the reserve milk supplies in the region in utilized in the production of butter and nonfat dry milk.

Foremost proposed that the Class III price under the merged order be based only on the Minnesota-Wisconsin price each month. The basis of the handler's proposal was that because the butter-powder snubber formula has not had an effect for a number of years in determining class prices under the separate orders, there is no longer a basis for continuing its use. The handler's witness, however, testified that if the butter-powder snubber is retained, then the present "make allowance" of 48 cents contained in the butter-powder formula should be adjusted to reflect the increase in costs of receiving and processing reserve milk that has occured since its adoption. He conceded, however, that either the removal of the butter-powder price formula or retaining it with a higher "make allowance" under the merged order could result in significant competitive inequities among handlers in the several markets involved.

The testimony given by the handler witness raises some questions regarding the appropriateness of continuing the use of the present butter-powder snubber in conjuction with the Minnesota-Wisconsin price. It might well be that the Class II and Class III prices should be based entirely on the Minnesota-Wisconsin price. However, in view of the close relationship of the Puget Sound and Inland Empire markets with the adjacent Oregon-Washington market, it appears that the Class III price formula should not be changed without a similar change in the Oregon-Washington order. This would be so whether the snubber were eliminated or whether the snubber's make-allowance were changed.

As proposed by the merger proponent, no location adjustments should apply on Class II milk under the merged order. Presently, the Inland Empire order does not provide location adjustments for Class II milk. However, the present Puget Sound order provides a Class II location adjustment of one-half of the rate specified in Class I milk, but not to exceed 20 cents per hundredweight.

The original purpose of such adjustments under the Puget Sound order was to compensate distant supply plant operators for the delivery of milk to plants in the base zone (Seattle-Tacoma-Everett area) where it was used in Class II products. On the basis of the present record, there is no reason under current marketing conditions to maintain such incentive to encourage the delivery of milk from distant plants to the Seattle area for use in Class II. There was no indication on the record that the supply of milk for Class II uses in the Puget Sound market will be jeopardized if no location adjustments on Class II milk apply under the merged order.

The attached proposed order adopts the procedure now applicable under each of the two orders for announcing Class II prices. This procedure is based on a proceeding, which was initiated after the close of this hearing, that considered industry proposals with respect to the issue of advance Class II price notice for 14 orders, including the two orders proposed to be merged. The hearing, which was held on February 3, 1982, was a reopening of this proceeding as it related to the Class II pricing issue. Each of the two orders have subsequently been amended on the basis of this 14-market hearing. It is concluded that the Class II pricing procedure under each of the two orders is equally appropriate for the merged order for the identical reasons as set forth in the Assistant Secretary's decision of August 17, 1982 (47 FR 37178). The findings, conclusions and proposed provisions of that decision are adopted as part of this decision as if set forth in full herein.

Butterfat differential. The merged order should provide for a single butterfat differential for adjusting order prices to the butterfat content of the milk being priced. The differential should be the Chicago 92-score butter price for the month multiplied by a factor of 0.115, rounded to the nearest 0.1 cent. Such differential should be announced on the fifth day after the end of the month to which it applies.

This differential is now used under the present Puget Sound order. However, the Inland Empire order provides for three separate butterfat differentials. The Class I butterfat differential for handlers is determined by multiplying the Chicago butter price for the preceding month by 0.123, while the handler Class II and III differentials are determined by multiplying the butter price for the current month by 0.115. The butterfat differential applicable in adjusting the uniform price to producers is the average of the Class I, and Class II, and Class III butterfat differentials weighted by the proportion of butterfat in producer milk in each class.

Presently, the Class I, Class II, and Class III differentials for the Inland Empire order are announced on the fifth day of the month. The Class I differential applies to the month in which announced, while the Class II and Class III differentials apply to the preceding month. The producer butterfat differential is announced on the 14th day of each month and applies to milk received during the preceding month.

The merger proponent proposed that all class prices and uniform prices under the merged order be subject to an adjustment by a butterfat differential based on the Chicago butter price times the factor of 0.115. No opposition to the use of this single factor was presented at the hearing.

As proposed and as herein adopted, using a single factor of 0.115 for computing class butterfat differentials will change the relationship of Class I skim milk and butterfat values of those handlers that are presently regulated by the Inland Empire order. The impact of this change will increase such handlers' cost of skim milk since less value will be assigned to the butterfat component of Class I milk. However, the absolute effect on a handler's cost for Class I milk is dependent on the average test of his Class I products.

Nevertheless, adopting a lower Class I butterfat differential for the Inland Empire segment of the proposed merged marketing area gives recognition to the reduce demand and the related lower market value of butterfat in fluid milk products in Class I. This lower value for Class I butterfat will be reflected in returns to producers which, in turn, should provide less incentive to produce high-test milk that consumers do not want.

Proposals of Carnation and Foremost providing for the advance announcement of Class I and Class II butterfat differentials and corollary

VOL 48 ISS 87 MAY 4 1983 UMI

separate Class III and producer butterfat differentials are denied. Proponent handlers contended that under the present Puget Sound order's announcement procedure they are often at a disadvantage in not knowing the costs of the component parts of producer milk for Class I and Class II uses until five days after the end of the month in which the milk is processed. They claimed that when there is a significant change in butter values, as reflected in Chicago butter prices, the present delayed notice of such increases in butter values prevents them from making corresponding adjustments in their resale prices on a timely basis.

Although NDA did not oppose the proposals at the hearing for the advance announcement of Class I and Class II butterfat differentials, it argued in its post-hearing brief, that handlers can "quite accurately predict the level of butterfat differential under the current supply-demand situation for butterfat." It concluded that there is no need to announce separate class butterfat differentials or to announce them in advance of the date that it proposed for announcing the producer butterfat differential.

The record did not provide a compelling basis for adopting an advance announcement procedure for Class I and Class II butterfat differentials. There was no indication by proponent handlers that disorderly marketing conditions have occurred as a result of the present procedure of announcing a single butterfat differential after the end of the month based on the butter prices for that month. Moreover, and contrary to proponent handlers' contention, month to month changes in average monthly butter quotations that normally do occur have not usually resulted in significant changes in the value of differential butterfat used in Class I and Class II. Finally, the practical effect of the need for advance Class I and Class II butterfat differentials is negated to a large extent by the frequency in which butter prices are announced. In this connection, such prices are available on a three-times per week basis which appears adequate for handlers to determine trends in butter prices and thus adjust their resale price structure accordingly. The proposal is, therefore, denied.

4. (d) *Distribution of proceeds to producers.* Marketwide pooling of producer returns should be provided under the merged order as the basis of distributing among producers the proceeds from the sale of their milk. This type of pooling is now being used in each of the individual markets to be merged and was supported by all parties of interest for use under the merged order.

A single marketwide uniform price, adjusted for butterfat content and for location of the plant to which the milk is delivered, should be the basis of distributing total pool proceeds from producer milk in making payments to individual producers. Under this payment arrangement, each producer would share equally in the higher-valued Class I milk of the market as well as in the lower-valued Class II and Class III uses of milk. A single uniform price to producers is now applicable under the Inland Empire order.

The present Puget Sound order provides for a Class I base plan, which is another method of distributing the total proceeds from handlers to producers. This plan provides for an allotment system under which a producer supplying the market is assigned a proportion of the higher-valued Class I sales within the market on the basis of his past deliveries of milk. For deliveries within his base, a producer receives a "base" price that is substantially higher than the market's weighted average value of all producer milk in the pool. For marketings in excess of his base, the producer receives an "excess" price which is comparable to the lower manufacturing price (Class III price). This method of distributing pool proceeds to producers has been in use under the order since September 1, 1967.

The proponent cooperative proposed through its merger proposal included in the hearing notice that a single marketwide uniform price be paid to producers under the merged order. The president of NDA testified though, that his cooperative really was neither a proponent or opponent of the Class I base plan. He indicated that NDA nevertheless submitted a proposed merged order without a Class I base plan because the cooperative had concluded on the basis of a survey that a majority of the market's producers no longer supported the Class I base plan and that it would not be approved in producer referendum of individual producers. The witness testified that this was supported by the fact that its Inland Empire member producers continue to reject a Class I base plan, which producers in that market initially disapproved in 1972. The witness stated, however, that the cooperative has no objection to including a Class I base plan under the proposed merged order so that individual producers would have the opportunity to vote on whether or not they favor the continuance of the present plan under the merged order.

The Producer Base Committee and Dari-Marketing Service proposed that the present Puget Sound Class I base plan be continued under any amended order which would combine and expand the marketing areas of the two orders. In this connection, the proponents strongly urged that producers be given the opportunity through a referendum to vote on whether they desire a Class I base plan under a combined order. A limited number of individual producers who are now covered by the plan testified in support of this position.

Proponents of continuing the Class I base plan testified that the base plan is popular among producers in the Puget Sound market. They reasoned that absent a Class I based plan in a combined order, Puget Sound producers would be denied the benefits that the Class I base plan has provided for many years. In this connection, it was proponents' position that a blend price system fails to tailor production to the Class I requirements of the market. They argued that the present disproportionate increase in milk receipts in relation to Class I sales under the Inland Empire order is a result of the absence of a Class I base plan in that market.

This issue primarily concerns producers in that it involves how pool proceeds would be divided among producers supplying the combined and expanded market. In such case, the views of producers are an important consideration.

The preseqt Class I base in the Puget Sound market was based on evidence received at a public hearing and was placed into effect after a referendum in which the required two-thirds of the producers on the market, voting individually, approved the plan. The record in this proceeding indicates that the majority of the producers (largely Puget Sound producers) who would be associated with the merged market have changed their view in this matter. In this regard, the merger proponent's testimony shows that a majority of producers perfer a uniform blend price system to a Class I base plan in distributing pool proceeds among producers associated with the merged market. In view of this situation, no useful purpose would be served in providing affected producers the opportunity to decide through a referendum whether or not they desire a Class I base plan under the merged order.

Moreover, the hearing did not deal in any way with how producers currently delivering to the Inland Empire market

should be integrated into the present Puget Sound Class I base plan. Without special consideration given to this block of producers, bases that would be assigned to them for the first time under the present base plan would not necessarily promote uniformity of regulation or price equity among all producers that would be associated with the merged market. For example, under the terms of the present Puget Sound Class I base program, the most that an Inland Empire producer could receive would be a base computed on his production history during the last three-year period. Moreover, if an Inland Empire producer was on the market for less than three years from the effective date of the merged order, he would have a production history equal to 60 percent of his shipments after one year and equal to 80 percent of his shipment after the second year. In contrast, an established Puget Sound producer has had the opportunity to develop a base reflecting his production history over a period of years in order to maximize the benefits accruing from the Class I base plan.

It should be noted that the Class I base committee, in its post-hearing brief, did suggest that certain provisions of the present Puget Sound Class I base plan be revised to remove certain inequities to the Inland Empire producers during the transition from a blend price system to a Class I base plan. However, this would be a very complex undertaking and the record of this hearing does not provide an adequate basis for such action.

Under the Agriculture and Food Act of 1981, the authority for Class I base plans in Federal order markets was not extended and it expired on December 31, 1981.[8] However, the Act provided that any Class I base plan in operation at the end of the present Puget Sound Class I base plan to continue to operate under the merged order until the end of 1984.

The limited time that the plan is authorized to operate before its termination raises a serious question about the practical effect that the plan would have in encouraging all producers under the merged order to adjust their production to the Class I utilization of the combined markets. Adjustments in milk production by producers, to realize the benefits of the Class I plan, require long-range economic planning which cannot be achieved within the limited time period that the plan could legally be effective. Hence, if the Class I base plan were extended to the current Inland Empire producers, such producers could not earn bases comparable to those of other producers who have been under the plan over a period of years.

Contrary to the base proponents' contention, the record evidence and current available data indicate that in recent years the plan has had little effect in encouraging producers to tailor their production to the market's Class I usage. During the past several years, producers under the base plan have increased their production history bases at a faster rate than the market's increase in Class I usage. Consequently, the average Class I base percentage has declined (45.7 percent for the year beginning February 1, 1982) to its lowest percentage level since the base plan became effective.[9] These trends suggest that Puget Sound producers are gearing their production to a blend of the prices that they receive for all milk rather than adjusting their production to take advantage of the higher base prices. This may be the principal factor contributing to the declining support of the plan that was indicated on the record.

In view of the foregoing considerations, it is concluded that the proposed merged order should not provide for a Class I base plan.

As an adjunct to its base proposal, the Class I base committee proposed and supported combining and expanding the marketing areas of the two orders by amending the present Puget Sound order rather than a merger and expansion of the two orders as NDA proposed. The committee took this position on the belief that if NDA's proposed merged order were adopted, it would be considered a new order and thus remove the legal authority to continue the present Puget Sound Class I base plan until the end of 1984. Since the Class I base plan is not being continued, this point is a moot issue in terms of the committee's concerns.

Payments to producers and cooperative associations. The merged order should provide for a partial payment to producers on or before the last day of the month and for a final payment on or before the 19th of the following month. The partial payment should be for milk received during the first 15 days of the month and should be at not less than the Class III price for the preceding month. The final payment to each producer should be the applicable uniform price for milk received in the preceding month less any partial payment made and any proper deductions authorized by the producer. When payments are made to a cooperative association in lieu of payments to individual producers, both the partial and final payments should be made at least two days prior to the date payments are due to individual producers.

As adopted herein, the payment schedule is the same as now provided in the Inland Empire order. This was proposed by the merger proponent. The Puget Sound order also provides for final payment at the same time here provided. However, this order provides for a partial payment on the 25th day of the month rather than at the end of the month, which would apply under the merged order.

The proponent cooperative states that the intent of its proposal to delay partial payments by 5–6 days to the present Puget Sound producers is to narrow the time intervals between partial and final payments. According to the spokeman for the cooperative, this would improve the cash flow position of handlers since it relieves them of the burden of making a partial payment and a final payment that is now only one week apart. Also, he said, its proposed payment schedule to producers and cooperatives is identical to the payment schedule that now exists under the nearby Oregon-Washington order. In this regard, he argued that since some of the handlers operate plants that are now regulated by the separate orders herein considered and by the Oregon-Washington order, it is desirable to have the same payment dates under both orders to accommodate for centralized accounting practices used by the handlers involved.

At the hearing, Dari-Marketing Service opposed any modifications in the payment schedule to producers and cooperative associations that would result in payment dates later than exist under the present Puget Sound order. The federation argued that it would not be reasonable to further delay the date when producers receive payments for their milk in view of the rising cost of interest and other costs associated with producing milk.

While the payment schedule adopted herein changes only the date when partial payments would be due to those producers whose milk is currently priced under the Puget Sound order, such change should present no substantial problems. In fact, the impact of this change would delay partial payments to the present Puget Soung producers only during the initial month that the merged order would become effective. Thereafter, all producers would be due a

[8] Official notice is taken of the Agriculture and Food Act of 1981, Public Law 97–98, 97th Congress.

[9] Official notice is taken on the monthly Market Administrator's Report for Federal Orders 124, 125, 133, and 135, Vol. 7 No. 2, issued for February 1982.

1983

partial payment on the same date of each month. In view of this, it is not apparent what advantage would accrue to producers under the merged order of continuing a partial payment schedule that would be only one week apart from the final payment date which is now the case under the Puget Sound order. It should be noted that the attached order would not prevent a handler from paying producers or cooperative associations a partial payment before the due date specified so long as he has paid at least the Class III price for the previous month.

The merger proponent also proposed that the date for payment to a cooperative association for milk received by a pool handler from a pool plant operated by the cooperative be advanced two days (from 17th to 15th). The proponent argued that this change is necessary because a cooperative thus involved should have the monies due it from the handler prior to when the cooperative must make payment to the producer settlement fund. As herein provided, the cooperative would be required to make payment to the producer settlement fund on or before the 16th day of the month on any milk for which it is accountable to the producer settlement fund.

It was not established that this proposal would have any value under the proposed order. As indicated previously, there are no cooperative associations operating pool plants under either of the present orders that is proposed to be merged. In view of this, the proposal is not necessary or warranted under present marketing conditions.

4(e) *Administrative provisions—Administrative assessment.* The maximum rate of payment by handlers for the cost of administering the merged order should be 4 cents per hundredweight. Such payments are required if the market administrator is to perform the necessary function of administering the merged order.

Currently, the maximum rates under the separate orders are 4 cents under the Puget Sound order and 5 cents under the Inland Empire order. A 4-cent rate, which was proposed at the hearing without objection, should enable the market administrator to effectively administer the merged order. If experience indicates that the merged order can be administered at a lesser rate, the order provides that the Secretary may adjust the rate downward without the necessity of a hearing.

Order format. The uniform format of order provisions that was incorporated into the 39 other Federal milk orders in 1974 also should be adopted for the merged order. Except for those specific changes in several provisions of the merged order that were specifically discussed above, the adoption of this order format does not affect the scope or substance of the Puget Sound order, renamed the Puget Sound-Inland order, or its application to any handler subject thereto.

Merger of the administrative expense, marketing service, and producer-settlement funds. To accomplish the merger of the two orders effectively and equitably, the reserves in the administrative expense funds that have resulted under the individual orders should be combined. Similar procedures should be followed with respect to the marketing service and producer-settlement fund reserves of the individual orders. Any liabilities of such funds under the individual orders should be paid from the appropriate new funds established under the merged order. Similarly, obligations that are due the several funds under the individual orders should be paid to the appropriate combined fund under the merged order.

The money paid to the administrative expense fund is each handler's proportionate share of the cost of administering the order. It is anticipated that all handlers currently regulated under the two orders will continue to be regulated under the merged order. In view of this, it would be an unnecessary administrative and financial burden to allocate back to handlers the reserve funds under the individual orders and then accumulate an adequate reserve for the merged order. It is equally equitable and more efficient to combine the administrative monies accumulated under the individual orders and to pay any liabilities against such funds from the consolidated fund of the merged order.

The money accumulated in the marketing service funds of the individual orders is that which has been paid by producers for whom the market administrator is performing services. The producers who have contributed to the marketing service fund of each order are expected to continue to supply milk for the Puget Sound-Inland market. The consolidation of the reserves in the individual marketing service funds is therefore appropriate in view of the continuation of the marketing service program for these producers under the merged order.

The producer-settlement fund balances in the two orders should be combined so that the producer-settlement fund under the merged order may be continued without interruption. The producers currently supplying the individual markets are expected to continue to supply milk for the merged Puget Sound-Inland market. Thus, monies now in the producer-settlement funds of the individual orders would be reflected in the uniform prices of the producers who will benefit from the merged order. The combined fund would also serve as a contingency fund from which money would be available to meet obligations (resulting from audit adjustments and otherwise) accruing under one or the other of the separate funds.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General Findings

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of each of the aforesaid orders and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement, the Puget Sound-Inland order which amends and merges the Puget Sound, Washington, and Inland Empire orders, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the Puget Sound-Inland marketing area and the minimum prices specified in the tentative marketing agreement and the Puget Sound-Inland order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(c) The tentative marketing agreement and the Puget Sound-Inland order will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, marketing agreements upon which a hearing has been held;

(d) All milk and milk products handled by handlers, as defined in the tentative marketing agreement and the Puget Sound-Inland order are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(e) It is hereby found that the necessary expense of the market administrator for the maintenance and functioning of such agency will require the payment by each handler, as his pro rata share of such expense, 4 cents per hundredweight or such lesser amount as the Secretary may prescribe, with respect to milk specified in § 1125.85 of the tentative marketing agreement and the Puget Sound-Inland order.

Recommended Marketing Agreement and Order Amending the Orders

The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be the same as those contained in the merged Puget Sound-Inland order. The following order regulating the handling of milk in the Puget Sound-Inland marketing area is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out.

List of Subjects in 7 CFR Parts 1125 and 1133

Milk marketing orders, Milk, Dairy products.

In Title 7 of the Code of Federal Regulations, it is proposed that Part 1125 be revised to read as follows:

Subpart—Order Regulating Handling

General Provisions

§ 1125.1 General provisions.

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

Definitions

§ 1125.2 Puget Sound-Inland marketing area.

"Puget Sound-Inland marketing area" (hereinafter called the "marketing area") means all territory geographically within the places listed below, including all territory wholly or partly therein occupied by government (Municipal, State or Federal) reservations, facilities, installations, or institutions:

Idaho Counties

Benewah, Bonner, Boundary, Kootenai, Latah, Shoshone.

Washington Counties

Adams, Chelan, Douglas, Ferry, Grant, Grays Harbor, Island, King, Kittitas, Lewis (except the town of Vader), Lincoln, Okanogan, that portion of Pacific county north of township 11N (except Long Island and North Beach Peninsula) Pend Orielle, Pierce (except Fox, McNeil, and Anderson Islands and the peninsulas adjacent to Kitsap County), San Juan, Skagit, Snohomish, Spokane, Stevens, Thurston, Whatcom, and Whitman.

§ 1125.3 Route disposition.

"Route disposition" means any delivery of a fluid milk product classified as Class I milk from a plant to a retail or wholesale outlet (including any delivery through a distribution point as provided by this section, by a vendor, from a plant store or through a vending machine). The term "route disposition" does not include:

(a) A delivery to a plant. However, packaged fluid milk products that are transferred to a pool distributing plant from pool distributing plant, and classified as Class I under § 1125.42(a), shall be considered route disposition from the transferor-plant for the sole purpose of qualifying it as a pool distributing plant under § 1125.7(a), and the transferor-plant shall be assigned in-area dispositions but not in excess of the in-area dispositions of the transferee plant;

(b) A delivery in bulk to a commercial food processing establishment pursuant to § 1125.40(b)(3); or

(c) A delivery to a military or other ocean transport vessel leaving the marketing area, of fluid milk products which originated at a plant located outside the marketing area and were not received or processed at any pool plant.

§ 1125.4 Plant.

"Plant" means the building, facilities and equipment, whether owned or operated by one or more persons, constituting a single operating unit or establishment, which is maintained and operated primarily for the receiving,

UMI

VOL
48
ISS
87
MY
4
1983
UMI

handling and/or processing of milk or milk products (including filled milk). Separate facilities used only as a distribution point for storing packaged fluid milk products in transit for route disposition or separate facilities used only as a reload point for transferring bulk milk from one tank truck to another shall not be a "plant" under this definition.

§ 1125.5 Distributing plant.

"Distributing plant" means a plant in which a fluid milk product approved by a duly constituted regulatory agency for fluid consumption, or filled milk, is processed or packaged and that has route disposition in the marketing area during the month.

§ 1125.6 Supply plant.

"Supply plant" means a plant from which a fluid milk product approved by a duly constituted regulatory agency for fluid consumption, or filled milk, is transferred during the month to a pool distributing plant.

§ 1125.7 Pool plant.

Except as provided in paragraph (c) of this section, "pool plant" means:

(a) A distributing plant from which there is route disposition (except filled milk) in the marketing area during the month equal to not less than 10 percent of Grade A milk at such plant (exclusive of transfers of packaged fluid milk products from plants qualifying as pool plants pursuant to this paragraph) or diverted therefrom pursuant to § 1125.13.

(b) A supply plant from which there is transferred to a pool distributing plant fluid mild products that represent not less than the following percentages of the total quantity of Grade A milk that is physically received at such plant directly from dairy farmers, or a cooperative association pursuant to § 1125.9(c) or diverted therefrom as producer milk pursuant to § 1125.13:

Months and Applicable Percentage

January, February, or September—40
March through August—30
October through December—50

Any such plant that has transferred the applicable percentage of its receipts during the entire September through February period shall be a pool plant for the months of March through August immediately following. Any plant which otherwise meets the requirements of this paragraph may withdraw from pool supply plant status in the March through August period if the operator of the plant files with the market administrator prior to the first day of such month a written request for such withdrawal. The plant may regain pool status during such period only by meeting the applicable qualifying percentage.

(c) The term "pool plant" shall not apply to the following plants;

(1) A producer-handler plant;

(2) A plant qualified pursuant to paragraph (a) of this section which also meets the pooling requirements of another Federal order and from which, the Secretary determines, there is a greater quantity of route disposition during the month in such other Federal order marketing area than in this marketing area, except that if such plant was subject to all the provisions of this part in the immediately preceding month it shall continue to be subject to all the provisions of this part until the fourth consecutive month in which a greater proportion of its route disposition is made in such other marketing area unless, notwithstanding the provisions of this paragraph, it is regulated under such other order;

(3) A plant qualified pursuant to paragraph (a) of this section which also meets the pooling requirements of another Federal order on the basis of route disposition in such other marketing area and from which, the Secretary determines, there is a greater quantity of route disposition in this marketing area than in such other marketing area but which plant maintains pooling status for the month under such other Federal order; or

(4) A plant pursuant to paragraph (b) of this section which also meets the pool plant requirements of another Federal order and from which greater shipments are made during the month to plants regulated under such other order than are made to plants regulated under this order;

(5) A distributing plant from which total route disposition (except filled milk) in the marketing area during the month averages 300 pounds or less per day; or

(6) That portion of a plant that is physically separated from the Grade A portion of such plant, is operated separately, and is not approved by any regulatory agency for the receiving, processing, or packaging of any fluid milk products for Grade A disposition.

§ 1125.8 Nonpool plant.

"Nonpool plant" means any plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which during the month an average of more than 300 pounds daily of fluid milk products is disposed of as route disposition in the marketing area.

(d) "Unregulated supply plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which fluid milk products are moved to a pool plant, during the month.

(e) "Exempt distributing plant" means a plant, other than a pool supply plant or regulated plant under another Federal order that meets all the requirements for status as a pool distributing plant except that its route disposition (exclusive of filled milk) in the marketing area in the month does not exceed an average of 300 pounds daily and is also less than 10 percent of receipts of Grade A milk at such plant. For purposes of this paragraph, route disposition shall not include receipts from a transferor-plant pursuant to the proviso of § 1125.3(a).

§ 1125.9 Handler.

"Handler" means:

(a) The operator of one or more pool plants;

(b) Any cooperative association with respect to producer milk which it caused to be diverted for the account of such cooperative association from a pool plant to a nonpool plant, or pursuant to § 1125.40(b)(3);

(c) Any cooperative association with respect to milk that it receives for its account from the farm of a producer for delivery to a pool plant of another handler in a tank truck owned and operated by, or under the control of, such cooperative assocation, unless both the cooperative association and the operator of the pool plant notify the market administrator prior to the time that such milk is delivered to the pool plant that the plant operator will be the handler for such milk and will purchase such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples. Milk for which the cooperative association is the handler pursuant to this paragraph shall be deemed to have been received by the cooperative association at the location of the pool plant to which such milk is delivered;

(d) The operator of a partially regulated distributing plant;

(e) A producer-handler;

(f) The operator of an other order plant from which route disposition is made in the marketing area during the month;

(g) The operator of an unregulated supply plant; and

(h) The operator of an exempt distributing plant.

§ 1125.10 Producer-handler.

"Producer-handler" means a person who is engaged in the production of milk and also operates a plant from which during the month an average of more than 300 pounds daily of fluid milk products, except filled milk, is disposed of as route disposition within the marketing area and who has been so designated by the market administrator upon his determination that all of the requirements of this section have been met, and that none of the conditions therein for cancellation of such designation exists. All designations shall remain in effect until canceled pursuant to paragraph (c) of this section. Any state institution shall be a producer-handler exempt from the provisions of this section and §§ 1125.30 and 1125.32 with respect to milk of its own production and receipts from pool plants processed or received for consumption in State institutions and with respect to movements of milk to or from a pool plant.

(a) *Requirements for designation.*—(1) The producer-handler has and exercises (in his capacity as a handler) complete and exclusive control over the operation and management of a plant at which he handles and processes milk received from his milk production resources and facilities (designated as such pursuant to paragraph (b)(1) of this section), the operation and management of which are under the complete and exclusive control of the producer-handler (in his capacity as a dairy farmer).

(2) The producer-handler neither receives at his designated milk production resources and facilities nor receives, handles, processes or distributes at or through any of his milk handling, processing or distributing resources and facilities (designated as such pursuant to paragraph (b)(2) of this section) milk products for reconstitution into fluid milk products, or fluid milk products derived from any source other than (i) his designated milk production resources and facilities, (ii) pool plants within the limitation specified in paragraph (c)(2) of this section, or (iii) nonfat milk solids which are used to fortify fluid milk products.

(3) The producer-handler is neither directly nor indirectly associated with the business control or management of, nor has a financial interest in, another handler's operation; nor is any other handler so associated with the producer-handler's operation.

(4) Designation of any person as a producer-handler following a cancellation of his prior designation shall be preceded by performance in accordance with paragraphs (a) (1), (2), and (3) of this section for a period of 1 month.

(b) *Resources and facilities.* Designation of a person as a producer-handler shall include the determination and designation of the milk production, handling, processing and distributing resources and facilities, all of which shall be deemed to constitute an integrated operation, as follows:

(1) As milk production resources and facilities: All resources and facilities (milking herd(s), buildings housing such herd(s), and the land on which such buildings are located) used for the production of milk:

(i) Which are directly, indirectly or partially owned, operated or controlled by the product-handlers;

(ii) In which the producer-handler in any way has an interst including any contractual arrangement; and

(iii) Which are directly, indirectly or partially owned, operated or controlled by any partner or stockholder of the producer-handler. However, for purposes of this paragraph any such milk production resources and facilities which the producer-handler proves to the satisfaction of the market administrator do not constitute an actual or potential source of milk supply for the producer-handler's operation as such shall not be considered a part of his milk prodcution resources and facilities; and

(2) As milk handling, processing and distributing resources and facilities: All resources and facilities (including store outlets) used for handling, processing and distributing any fluid milk product:

(i) Which are directly, indirectly or partially owned, operated or controlled by the producer-handler; or

(ii) In which the producer-handler in any way has an interest, including any contractural arrangement, or with respect to which the producer-handler directly or indirectly exercises any degree of management or control.

(c) *Cancellation.* The designation as a producer-handler shall be canceled under any of the conditions set forth in paragraphs (c) (1) and (2) of this section or upon determination by the market administrator that any of the requirements of paragraphs (a) (1), (2), and (3) of this section are not continuing to be met, such cancellation to be effective on the first day of the month following the month in which the requirements were not met, or the conditions for cancellation occurred.

(1) Milk from the designated milk production resources and facilities of the producer-handler is delivered in the name of another person as producer milk to another handler.

(2) The producer-handler handles fluid milk products derived from sources other than the designated milk production facilities and resources, with the exception of purchases from pool plants in the form of fluid milk products which do not exceed in the aggregate a daily average during the month of 100 pounds.

(d) *Public Announcement.* The market administrator shall publicly announce the name, plant location and farm location(s) of persons designated as producer-handlers, of those whose designations have been canceled and the effective dates of producer-handler status or loss of producer-handler status for each. Such annoucements shall be controlling with respect to the accounting at plants of other handlers for fluids milk products received from any producer-handler.

(e) *Burden of establishing and maintaining producer-handler status.* The burden rests upon the handlers who is designated as a producer-handler to establish through records required pursuant to § 1000.5 of this chapter that the requirements set forth in paragraph (a) of this section have been and are continuing to be met, and that the conditions set forth in paragraph (c) of this section for cancellation of designation do not exist.

§ 1125.11 [Reserved]

§ 1125.12 Producer.

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk approved by a duly constituted regulatory agency for disposition as Grade A milk and whose milk is:

(1) Received at a pool plant directly from such person;

(2) Received by a handler described in § 1125.9(c); or

(3) Diverted from a pool plant in accordance with § 1125.13;

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk producer by him that is diverted to a pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1125.44(a)(9)(iii)

VOL
48
ISS
87
MAY
4
1983
UMI

and the corresponding step of § 1125.44(b);

(3) Any person with respect to milk produced by him that is reported as diverted to an other order plant if any portion of such person's milk so moved is assigned to Class I under the provisions of such order;

(4) Any person who during the month has disposed of as route disposition or to consumers at the farm an average of more than 110 pounds daily of fluid milk or fluid cream products; and

(5) Any person (to known as a dairy farmer for other markets) who during the month deliveries milk to a nonpool plant (except an other order plant) other than by diversion from a pool plant of this or another order.

§ 1125.13 Producer milk.

"Producer milk" or "milk received from producers" means skim milk and butterfat in milk produced by produced which is received for the account of a handler as follows:

(a) With respect to receipts at a pool plant, producer milk shall include:

(1) Milk received at such plant directly from producer;

(2) Milk diverted from such pool plant to a nonpool plant or pursuant to § 1125.40(b)(3) for the account of the operator of the pool plant, subject to the conditions set forth in paragraph (c) of this section; and

(3) Milk received at such pool plant from a cooperative association in its capacity as a handler pursuant to § 1125.9(c) for all purposes other than those specified in paragraph (b)(2)(i) of this section;

(b) With respect to milk for which a cooperative association is a handler in a capacity other than as the operator of a pool plant, producer milk shall include:

(1) Milk diverted from a pool plant to a nonpool plant or pursuant to § 1125.40(b)(3) for the account of the cooperative association, subject to the conditions set forth in paragraph (c) of this section; and

(2) Milk for which the cooperative association is a handler pursuant to § 1125.9(c) to the following extent:

(i) For purposes of reporting pursuant to §§ 1125.30(c) and 1125.31(a) and making payments to producers pursuant to § 1125.73(a); and

(ii) For all purposes, with respect to any such milk which is not delivered to the pool plant of another handler;

(c) With respect to diversions to nonpool plants or pursuant to § 1125.40(b)(3):

(1) Milk of any producer may be diverted by a cooperative association or its agent for its account pursuant to § 1125.9(b) from pool distributing plants to nonpool plants or pursuant to § 1125.40(b)(3). The total quantity of milk diverted may not exceed 80 percent during the months of September through April of the producer milk which the association or its agent causes to be delivered to pool distributing plans, or diverted therefrom. No percentage limit shall apply during the months of May through August;

(2) Milk of any producer may be diverted by a cooperative association or its agent for its account pursuant to § 1125.9(b) from pool supply plants to nonpool plants or pursuant to § 1125.40(b)(3). The total quantity of milk so diverted may not exceed 50 percent of the producer milk which the association or its agent causes to be delivered to all such pool supply plants or diverted therefrom during the month;

(3) A handler, other than a cooperative association, operating a pool distributing plant may divert therefrom for his account to nonpool plants or pursuant to § 1125.40(b)(3). The total quantity of milk diverted may not exceed 80 percent during the months of September through April of the milk received at or diverted from such handler's pool distributing plant from any producer other than a member of a cooperative association which markets milk under paragraph (c)(1) or (c)(2) of this section and for which the operator of such plant is the handler during the month. No percentage limit shall apply during the months of May through August;

(4) A handler, other than a cooperative association, operating a pool supply plant may divert thereform for his account to nonpool plants or pursuant to § 1125.40(b)(3). The total quantity of milk so diverted may not exceed 50 percent of the total milk received at or diverted from such pool plant during the month from any producer other than a member of a cooperative association which markets milk under paragraph (c)(1) or (c)(2) of this section and for which the operator of such plant is the handler during the month;

(5) Milk diverted in excess of the limits specified shall not be considered producer milk, and the diverting handler shall specify the producers whose milk is ineligible as producer milk. If a handler fails to designate such producers, producer milk status shall be forfeited with respect to all milk diverted by the handler during the month;

(6) Two or more cooperative associations may have their allowable diversions computed on the basis of their combined deliveries of producer milk which the associations cause to be delivered to pool plants or diverted from pool plants during the month if each association has filed a request in writing with the market administrator on or before the first day of the month the agreement is to be effective. This request shall specify the basis for assigning overdiverted milk to the producer deliveries of each cooperative according to a method approved by the market administrator;

(7) For purposes of location adjustments pursuant to §§ 1125.52 and 1125.75, milk diverted to a nonpool plant or pursuant to § 1125.40(b)(3) shall be priced at the location of the plant or commercial food processing establishment to which diverted; and

(d) In the case of any bulk tank load of milk originating at farms and subsequently divided among plants, the proportion of the load received at each plant shall be prorated among the individual producers involved on the basis of their respective percentage of the total load.

§ 1125.14 Other source milk.

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products specified in § 1125.40(b)(1) from any source other than producers, handlers described in § 1125.9(c), or pool plants;

(b) Receipts in packaged form from other plants of products specified in § 1125.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1125.40(b)(1), and products produced at the plant during the same month) from any source wihich are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1125.40(b)(1)) for which the handler fails to establish a disposition.

§ 1125.15 Fluid milk product.

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form: milk, skim milk, lowfat milk, milk drinks, buttermilk, mixtures of cream and milk or skim milk containing less than 18 percent butterfat (including those which are sterilized or aseptically packaged), filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

§ 1125.16 Fluid cream product.

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 18 percent or more butterfat, with or without the addition of other ingredients.

§ 1125.17 Filled milk.

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product; and contains less than 6 percent nonmilk fat (or oil).

§ 1125.18 Cooperative association.

"Cooperative association" means any cooperative marketing association of producers, which the Secretary determines, after application by the cooperative association:

(a) To be qualified under the provisions of the Act of Congress of February 18, 1922, known as the "Capper-Volstead Act".

(b) To have full authority in the sale of milk of its members and to be engaged in making collective sales of or marketing milk for its members; and

(c) To have its entire activities under the control of its members.

§ 1125.19 Product prices

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1125.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday, except national holidays.

Handler Reports

§ 1125.30 Reports of receipts and utilization.

On or before the 9th day of each month each handler shall report to the market administrator, in the detail and on forms prescribed by the market administrator, the following information for the preceding month:

(a) Each handler operating a pool plant(s) shall report separately for each pool plant:

(1) The quantities of skim milk and butterfat contained in:

(i) Milk received directly from producers, showing separately any milk of own-farm production;

(ii) Milk received from a cooperative association pursuant to § 1125.9(c);

(iii) Fluid milk products and bulk fluid cream products received from other pool plants showing filled milk separately;

(iv) Other source milk showing filled milk separately; and

(v) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1125.40(b)(1).

(2) The utilization of all skim milk and butterfat required to be reported, including separate statements of quantities in route disposition inside and outside the marketing area.

(b) Each producer-handler shall report:

(1) The quantities of skim milk and butterfat contained in:

(i) Milk of own-farm production;

(ii) Receipts of fluid milk products and fluid cream products from pool plants, showing separately receipts in packaged form and in bulk; and

(iii) Other source milk, showing separately any receipts from another dairy farmer.

(2) As specified in paragraph (a)(2) of this section.

(c) Each cooperative association shall report with respect to milk for which it is the handler pursuant to either § 1125.9 (b) or (c):

(1) The quantities of skim milk and butterfat received from producers;

VOL
48
ISS
87
MY
4
1983
UMI

(2) The utilization of skim milk and butterfat for which it is the handler pursuant to § 1125.9(b); and

(3) The quantities of skim milk and butterfat delivered to each pool plant pursuant to § 1125.9(c).

(d) Each handler who operates a partially regulated distributing plant shall report as specified in paragraphs (a) (1) and (2) of this section except that receipts from dairy farmers in Grade A milk shall be reported in lieu of those in producer milk. Such report shall include separate statements, respectively, showing the respective amounts of skim milk and butterfat disposed of as route disposition in the marketing area as Class I milk and the quantity of reconstituted skim milk in fluid milk products disposed of as route disposition in the marketing area.

(e) Each handler who operates an other order plant with route disposition of fluid milk products in the marketing area shall report the quantities of skim milk and butterfat in such disposition.

§ 1125.31 Payroll reports.

On or before the 22nd day of each month handlers shall report to the market administrator as follows:

(a) Each handler with respect to each of his pool plants and each cooperative association which is a handler pursuant to §1125.9 (b) or (c) shall submit his producer payroll for deliveries (other than his own-farm production) in the preceding month which shall show:

(1) The total pounds of milk received from each producer, the pounds of butterfat contained in such milk, and the number of days on which milk was delivered by such producer in such month;

(2) The amount of payment to each producer and cooperative association; and

(3) The nature and amount of any deduction or charges involved in such payments; and

(b) Each handler operating a partially regulated distributing plant who wishes computations pursuant to § 1125.76(a) to be considered in the computation of his obligation pursuant to § 1125.76 shall submit his payroll for deliveries of Grade A milk by dairy farmers which shall show:

(1) The total pounds of milk and the butterfat content thereof received from each dairy farmer;

(2) The amount of payment to each dairy farmer (or to a cooperative association on behalf of such dairy farmer); and

(3) The nature and amount of any deductions or charges involved in such payments.

§ 1125.32 Other reports.

At such time and in such manner as the market administrator may prescribe, each handler shall report to the market administrator such information in addition to that required under §§ 1125.30 and 1125.31 as may be requested by the market administrator with respect to milk and milk products (including filled milk) handled by him.

Classification of Milk

§ 1125.40 Classes of utilization.

Except as provided in § 1125.42 all skim milk and butterfat required to be reported by a handler pursuant to § 1125.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section;

(2) In packaged inventory of fluid milk products at the end of the month; and

(3) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more non-milk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In all bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment, or in producer milk diverted to a commercial food processing establishment in Pacific County, Washington, subject to the conditions of § 1125.42(e), (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer type packages; and

(4) Used to produce:

(i) Cottage cheese, lowfat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk fluid form other than that specified in paragraph (c)(1)(iv) of this section.

(iv) Plastic cream, frozen cream and anhydrous milkfat.

(v) Custards, puddings, and pancake mixes;

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers; and

(vii) Any milk or milk products sterilized and packaged in hermetically sealed metal or glass containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Any concentrated milk product in bulk fluid form that is used to produce a Class III product;

(v) Evaporated of condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(vi) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1125.15; and

(6) In shrinkage assigned pursuant to § 1125.41(a) to the receipts specified in § 1125.41(a)(2) and in shrinkage specified in §§ 1125.41 (b) and (c).

§ 1125.41 Shrinkage.

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1125.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraphs (b)(1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraphs (b) (1) through (6) of this section which was received in the form of a bulk fluid milk product or a bulk fluid cream product.

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a)(1) of this section that is in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to a nonpool plant and milk received from a handler described in § 1125.9(c));

(2) Plus 1.5 percent of the skim milk and butterfat, respectively, in milk received from a handler described § 1125.9(c), except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph shall be 2 percent;

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to a nonpool plant or to a commercial food processing establishment pursuant to § 1125.40(b)(3), except that if the operator of the plant or establishment to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operator of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraphs (b) (1), (2), (4), (5), and (6) of this section.

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1125.9 (b) or (c) but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of a plant or a commercial food processing establishment pursuant to § 1125.40(b)(3) to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

§ 1125.42 Classification of transfers and diversions.

(a) *Transfer to pool plants.* Skim milk or butterfat transferred in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant shall be classified as Class I milk unless the operators of both plants request the same classification in another class. In either case, the classification of such transfers shall be subject to the following conditions:

(1) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant after the computation pursuant to § 1125.44(a)(13) and the corresponding step of § 1125.44(b);

(2) If the transferor-plant received during the month other source milk to be allocated pursuant to § 1125.44(a)(8) or the corresponding step § 1125.44(b), the skim milk or butterfat so transferred shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor-handler received during the month other source milk to be allocated pursuant to § 1125.44(a) (12) or (13) or the corresponding steps of § 1125.44(b), the skim milk or butterfat so transferred up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant.

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to an other order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and buld fluid cream products, respectively, that are in the same category as described in paragraphs (b) (1), (2), or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk from shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustments when such information is available;

(5) For purposes of this paragraph, if the other provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1125.40.

(c) *Transfers and diversions of producer-handlers.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a producer-handler under this or any other Federal order shall be classified:

(1) As Class I milk if transferred or diverted in the form of a fluid milk product; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the transferee's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to his receipts of skim milk and butterfat,

VOL

UMI

respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant or a producer-handler plant shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the condition described in paragraphs (d)(2)(i) (*a*) and (*b*) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraphs (d)(2) (ii) through (viii) of this section:

(*a*) The transferor-handler or diverter-handler claims such classification in his report of receipts and utilization filed pursuant to § 1125.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route disposition in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(*c*) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence;

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at the second plant that are set forth in this subparagraph.

(e) *Transfers and diversions to a commercial food processing establishment.* Skim milk and butterfat transferred or diverted to a commercial food processing establishment shall be classified:

(1) Subject to the provisions of § 1125.13(c) and, except as provided in paragraph (e)(2) of this section, as Class II milk if diverted pursuant to § 1125.40(b)(3); or

(2) Transfers or diversions shall be classified as Class I milk unless the market administrator is permitted to audit the records of the commercial food processing establishment for the purpose of verification.

§ 1125.43 General classification rules.

In determining the classification of producer milk pursuant to § 1125.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to §1125.30 and shall compute separately for each pool plant and for each cooperative association with respect to milk for which it is the handler pursuant to § 1125.9 (b) or (c) the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1125.40, 1125.41, and 1125.42;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equvalent to the nonfat milk solids contained in such product plus all of the water originally associated with solids;

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1125.9 (b) or (c) shall be determined separately from the operations of any pool plant operated by such cooperative association; and

(d) For classification purposes, pursuant to §§ 1125.40 through 1125.45, butterfat in skim milk, either disposed of to others or used in the manufacture of milk products shall be accounted for at a butterfat content of 0.060 percent unless the handler has adequate records of the actual butterfat content of such skim milk.

§ 1125.44 Classification of producer milk.

For each month the market administrator shall determine the classification of producer milk of each handler described in § 1125.9(a) for each of his pool plants separately and of each handler described in § 1125.9 (b) and (c) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1125.41(b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(8)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the remaining pounds of skim milk in Class I the pounds of skim milk in packaged fluid milk products in inventory at the beginning of the month. This paragraph shall apply only if the pool plant was subject to the provisions of this paragraph or comparable provisions of another Federal milk order in the immediately preceding month;

(5) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1125.40(b)(1) that were received in packaged from other plants (other than from a producer-handler plant), but not in excess of the pounds of skim milk remaining in Class II;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1125.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II. This paragraph shall apply only if the pool plant was subject to the provisions of this paragraph or comparable provisions of another Federal milk order in the immediately preceding month;

(7) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to any product specified in § 1125.40(b) but not in excess of the pounds of skim milk remaining in Class II;

(8) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(6) of this section applies, packaged inventory at the beginning of the month of products specified in § 1125.40(b)(1) that was not subtracted pursuant to paragraphs (a)(5), (6), and (7) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order;

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section;

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that reconstituted skim milk is allocated to Class I at the transferor-plant; and

(vii) Receipts of fluid milk products from a person described in § 1125.12(b)(5);

(9) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a) (2) and (8)(v) of this section for which the handler requests a classification other than Class I, but not in excess of pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraphs (a)(2), (8)(v), and (9)(i) of this section which are in excess of the pounds of skim milk determined pursuant to paragraphs (a)(9)(ii) (a) through (c) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount:

(*a*) Multiply by 1.25 the sum of the pounds of skim milk remaining in Class I at this allocation step at all pool plants of the handler (excluding any duplication of Class I utilization resulting from reported Class I transfers between pool plants of the handler);

(*b*) Subtract from the above result the sum of the pounds of skim milk in receipts at all pool plants of the handler of producer milk, fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(8)(vi) of this section; and

(*c*) Multiply any plus quantity resulting above by the percentages that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant is of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(8)(vi) of this section, if Class II or Class III classification is requested by the operator of the other order plant and the handler but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(10) Subtract from the pounds of skim milk remaining in each class, in series, beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1125.40(b)(1) in inventory at the beginning of the month that were not subtracted pursuant to paragraphs (a) (4), (6), and (8)(i) of this section;

(11) Add the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(12) Subject to the provisions of paragraphs (a)(12) (i) and (ii) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step at all pool plants of the handler (excluding any duplication of utilization in each class resulting from transfers between pool plants of the handler, with the quantity pro rated, to Class II and Class III combined being subtracted first from Class III and then

VOL 48 ISS 87 MAY 4 1983 UMI

from Class II, the pounds of skim milk receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraphs (a)(2), (8)(v), (9)(i), and (ii) of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received;

(i) Should the pounds of skim milk to be subtracted from Class II and Class III combined pursuant to this paragraph exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount; and

(ii) Should the pounds of skim milk to be subtracted from Class I pursuant to this paragraph exceed the pounds of skim milk remaining in such class, the pounds of skim milk in Class I shall be increased by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class II and Class III combined shall be decreased by a like amount (decreasing as necessary Class III and then Class II). In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount, beginning with the nearest plant at which Class I utilization is available;

(13) Subtract in the manner specified below from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtacted pursuant to paragraphs (a) (8)(vi) and (9)(iii) of this section;

(i) Subject to the provisions of paragraphs(a)(13) (ii), (iii), and (iv) of this section, such subtraction shall be pro rata to the pounds of skim milk in Class I and in Class II and Class III combined, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, with respect to whichever of the following quantities represents the lower proportion of Class I milk:

(*a*) The estimated utilization of skim milk of all handlers in each class as announced for the month pursuant to § 1125.45(a); or

(*b*) The total pounds of skim milk remaining in each class at this allocation step at all pool plants of the handler (excluding any duplication of utilization in each class resulting from transfers between pool plants of the handler);

(ii) Should the proration pursuant to paragraph (a)(13)(i) of this section result in the total pounds of skim milk at all pool plants of the handler that are to be subtracted at this allocation step from Class II and Class III combined exceeding the pounds of skim milk remaining in Class II and Class III at all such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which such other source milk was received;

(iii) Except as provided in paragraph (a)(13)(ii) of this section should the computations pursuant to paragraph (a)(13) (i) and (ii) of this section result in a quantity of skim milk to be subtracted from Class II and Class III combined that exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and the Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount; and

(iv) Except as provided in paragraph (a)(13) (ii) of this section, should the computations pursuant to paragraph (a)(13) (i) and (ii) of this section result in a quantity of skim milk to be subtracted from Class I that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in Class I shall be increased by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class II and Class III combined shall be decreased by a like amount (decreasing as necessary Class III and then Class II). In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount beginning with the nearest plant at which Class I utilization is available;

(14) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from another pool plant according to the classification of such products pursuant to § 1125.42(a); and

(15) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to paragraph (a)(15) of this section and the corresponding step of paragraph (b) of this section.

§ 1125.45 Market administrator's reports and announcements concerning classification.

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1125.44(a)(13) and the corresponding step of § 1125.44(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from an other order plant, the class to which such receipts are allocated pursuant to § 1125.44 on the basis of such report, and thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant the class to which such shipments were allocated by the market administrator of the other order on the basis of the report by the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

(d) On or before the 14th day after the end of each month, report to each cooperative association which so requests the amount and class utilization of producer milk delivered by members of such cooperative association to each handler receiving such milk. For the purpose of this report the milk so received shall be prorated to each class in accordance with the total utilization of producer milk by such handler.

Class Prices

§ 1125.50 Class prices.

Subject to the provisions of § 1125.52, the class prices for the month, per hundredweight of milk containing 3.5 percent butterfat, shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $1.85.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that in no event shall the final Class II price be less than the Class III price. If the Class III price for the month is computed pursuant to paragraphs (c) (1) through (3) of this section, the final Class II price shall be reduced by the amount that the Class III price is less than the basic formula price to the extent such reduction does not cause the Class II price to be less than the Class III price.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1125.51 and add 25 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1125.51a.

(c) *Class III price.* The Class III price shall be the basic formula price for the month but not to exceed the price computed as follows:

(1) Multiply the Chicago butter price pursuant to § 1125.51 by 4.2;

(2) Multiply by 8.2 the weighted average of carlot prices per pound for nonfat dry milk solids, spray process, for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the Department; and

(3) From the sum of the results arrived at under paragraphs (c) (1) and (2) of this section subtract 48 cents, and round to the nearest cent.

§ 1125.51 Basic formula price.

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent— per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92–score) bulk butter per pound at Chicago, as reported by the Department for the month.

§ 1125.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1125.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1125.19 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Mulitply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraphs (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the third preceding month, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

§ 1125.52 Plant location adjustment for handlers.

(a) The following zones are defined for the purpose of determining location adjustments:

(1) Zone 1 shall include the Washington counties of King, Kitsap, Pierce, and Snohomish;

(2) Zone 2 shall include:

VOL
48
ISS
87
MAY
4
1983

(i) The Idaho counties of Benewah, Bonner, Boundary, Kootenai, Latah, and Shoshone;

(ii) The Oregon counties of Benton, Clackamas, Columbia, Hood River, Linn, Marion, Multnomah, Polk, Wasco, Washington, and Yamhill; and

(iii) The Washington counties of Clark, Cowlitz, Ferry, Lincoln, Pend Oreille, Skamania, Spokane, Stevens, Wahkiakum, and Whitman;

(3) Zone 3 shall include the Washington counties of Island, Mason, Skagit, and Thurston.

(4) Zone 4 shall include the Washington counties of Grays Harbor, Lewis, Pacific, and Whatcom; and

(5) Zone 5 shall include:

(i) The Idaho counties of Lewis and Nez Perce;

(ii) The Oregon counties of Gilliam, Morrow, Sherman, and Umatilla; and

(iii) The Washington counties of Adams, Asotin, Benton, Chelan, Columbia, Douglas, Franklin, Garfield, Grant, Kittitas, Klickitat, Okanogan, Walla Walla, and Yakima;

(6) Zone 6 shall include the Washington counties of Clallam, Jefferson, and San Juan.

(b) For milk received at a plant from producers and which is classified as Class I milk, the price specified in § 1125.50(a) shall be adjusted by the amount stated in paragraphs (b) (1) and (2) of this section for the location of such plant:

(1) For a plant located within one of the zones described in paragraphs (a) (1) through (6) of this section, the adjustment shall be as follows:

	Adjustment per hundredweight
Zone 1	No adjustment.
Zone 2	Plus 10 cents.
Zone 3	Minus 4 cents.
Zone 4	Minus 6 cents.
Zone 5	Minus 10 cents.
Zone 6	Minus 16 cents.

(2) For a plant located outside of one of the zones described in paragraph (a) (1) through (6) of this section, the adjustment shall be minus 1.5 cents per hundredweight for each 10 miles or fraction thereof by shortest hard-surfaced highway distance that the plant is located from the nearer of the County Courthouse in Spokane or the County-City Building in Seattle;

(c) The Class I price applicable to other source milk shall be adjusted at the rates set forth in paragraph (b) of this section, except that the price when adjusted for location shall not be less than the Class III price.

(d) For fluid milk products transferred in bulk from a pool plant to another pool plant at which a higher Class I price applies and which is classified as Class I, the price shall be the Class I price applicable at the location of the transferee-plant subject to a location adjustment credit for the transferor-plant determined by the market administrator as follows:

(1) Subtract from the pounds of Class I remaining at the transferee-plant after the computation pursuant to § 1125.44 (a)(13) and (b) the pounds of packaged fluid milk products from other pool plants;

(2) Subtract the pounds of bulk fluid milk products received at the transferee-plant from the following sources:

(i) Producers;

(ii) Handlers described in § 1125.9(c); and

(iii) Pool plants at which the same or a higher Class I price applies.

(3) Assign any pounds remaining to transferor-plants in sequence beginning with the plant at which the least adjustment would apply; and

(4) Multiply the pounds so computed for each transferor-plant by the difference in the Class I prices applicable at the transferee-plant and transferor-plant.

§ 1125.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and the final Class II price for the preceding month; and on or before the 15th day of each month the tentative Class II price for the following month.

§ 1125.54 Equivalent price.

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the pricing constituent that is required.

Uniform Price

§ 1125.60 Handler's value of milk for computing uniform price.

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1125.9 (b) and (c) with respect to milk that was not received at a pool plant as follows:

(a) Multiply the quantity of producer milk in each class, as computed pursuant to § 1125.44(c), by the applicable class prices (adjusted pursuant to § 1125.52) and add together the resulting amount;

(b) Add the amount obtained from multiplying the pounds of coverage deducted from each class pursuant to § 1125.44(a)(15) and the corresponding step of § 1125.44(b) by the class prices applicable at the location of the pool plants, as adjusted by the butterfat differential specified in § 1125.74. In case overage occurs in a nonpool plant located on the same premises as a pool plant, such overage shall be prorated between the quantity transferred from the pool plant and other source milk in such nonpool plant, add an amount equal to the value of overage allocated to the transferred quantity at the class price applicable at the pool plant;

(c) Add the amount equal to the difference between the value at the Class I price applicable at the pool plant and the value at the Class III price, with respect to skim milk and butterfat in other source milk subtracted from Class I pursuant to § 1125.44(a)(8) (i) through (iv) and (vii) and the corresponding step of § 1125.44(b) excluding receipts of bulk fluid cream products from an other order plant;

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1125.44(a)(8) (v) and (vi) and the corresponding step of § 1125.44(b);

(e) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price adjusted pursuant to § 1125.52, or the Class II price as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1125.44(a)(10) and the corresponding step of § 1125.44(b); and

(f) Add the amount equal to the value at the Class I price, adjusted for location of the nearest nonpool plant(s) from which an equivalent volume was received, with respect to skim milk and butterfat subtracted from Class I pursuant to § 1125.44(a)(12) and the corresponding step of § 1125.44(b), excluding such skim milk or butterfat in bulk receipts of fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by a handler fully regulated under this or any other order issued pursuant to the Act is classified and priced as Class I milk and is not used as an offset on any payment obligation under this or any other order; and

(g) Add or subtract as the case may be, the amount necessary to correct errors as disclosed by the verification of reports of such handler of his receipts and utilization of skim milk and butterfat in previous months for which payment has not been made.

§ 1125.61 Computation of uniform price.

For each month the market administrator shall compute the "uniform price" per hundredweight for milk of 3.5 percent butterfat content received from producers as follows:

(a) Combine into one total the values computed pursuant to § 1125.60 for all handlers who filed the reports prescribed by § 1125.30 for the month and who made the payments pursuant to § 1125.71 for the preceding month;

(b) Add the amount equal to the sum of the deductions for location adjustments computed pursuant to § 1125.75;

(c) Add the amount equal to not less than one-half of the unobligated balance in the producer-settlement fund;

(d) Divide the resulting amount by the sum of the following for all handlers included in these computations:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is computed pursuant to § 1125.60(f); and

(e) Subtract not less than 4 cents nor more than 5 cents per hundredweight. The result shall be the "uniform price" for milk received from producers.

§ 1125.62 Announcement of uniform price and butterfat differential.

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 14th day after the end of each month the uniform price for such month.

Payments for milk

§ 1125.70 Producer-settlement fund.

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund," into which he shall deposit all payments made by handlers pursuant to §§ 1125.71 and 1125.76 and out of which he shall make all payments to handlers pursuant to § 1125.72. However, the market administrator shall offset the payment due to a handler for such fund against payments due from such handler.

§ 1125.71 Payments to the producer-settlement fund.

(a) On or before the 16th day after the end of month during which the skim milk and butterfat were received each handler shall pay to the market administrator the amount, if any, by which the total amount specified in paragraph (a)(1) of this section exceeds the total amount specified in paragraph (a)(2) of this section:

(1) The sum of:

(i) The total value of milk of the handler for such month as determined pursuant to § 1125.60; and

(ii) For a cooperative association handler, the amount due from other handlers pursuant to § 1125.73(d) but without adjustment for butterfat;

(2) The sum of:

(i) The value of milk received by such handler from producers at the applicable uniform price pursuant to § 1125.73(a)(2) but without adjustment for butterfat;

(ii) The amount to be paid to cooperative associations pursuant to § 1125.73(d) but without adjustment for butterfat; and

(iii) The value at the uniform price for all skim milk and butterfat applicable at the location of the plant(s) from which received (not to be less than the value at the Class III price) with respect to other source milk for which a value is computed pursuant to § 1125.60(f); and

(b) On or before the 25th day after the end of the month, each handler operating a plant specified in § 1125.7(c) (2) and (3), if such plant is subject to the classification and pricing provisions of another order which provides for individual handler pooling, shall pay to the market administrator for the producer-settlement fund an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk disposed of as route disposition in the marketing area which was allocated to Class I at such other order plant. If reconstituted skim milk in filled milk is disposed of from such plant as route disposition in the marketing areas regulated by two or more market pool orders, the reconstituted skim milk assigned to Class I shall be prorated according to such disposition in each area.

(2) Compute the value of the quantity assigned in paragraph (b)(1) of this section of Class I disposition in this area, at the Class I price under this part applicable at the location of the other order plant (but not to be less than the Class III price) and subtract its value at the Class III price.

§ 1125.72 Payments from the producer-settlement fund.

On or before the 18th day after the end of the month during which the skim milk and butterfat were received, the market administrator shall pay to each handler the amount, if any, by which the amount computed pursuant to § 1125.71(a)(2) exceeds the amount computed pursuant to § 1125.71(a)(1), and less any unpaid obligations of such handler to the market administrator pursuant to §§ 1125.71(a), 1125.77, 1125.85, and 1125.86. However, if the balance in the producer-settlement fund is insufficient to make all payments pursuant to this section, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds are available.

§ 1125.73 Payments to producers and to cooperative associations.

(a) Each handler shall make payment to each producer for milk received from such producer during the month:

(1) On or before the last day of the month to each producer who had not discontinued shipping milk to such handler before the 18th day of the month, at not less than the Class III price for the preceding month per hundredweight of milk received during the first 15 days of the month, less proper deductions authorized in writing by such producer; and

(2) On or before the 19th day after the end of each month for milk received from such producers during such month:

(i) At not less than the uniform price for the quantity of milk received, adjusted by the butterfat differential computed pursuant to § 1125.74 and by any location adjustments applicable under § 1125.75;

(ii) Minus payments made pursuant to paragraph (a)(1) of this section. However, if by such date such handler has not received full payment for such month pursuant to § 1125.72, he shall not be deemed to be in violation of this paragraph if he reduced uniformly for all producers his payments per hundredweight pursuant to this paragraph by a total amount not in excess of the reduction in payment from the market administrator, however, the handler shall make such balance of payment uniformly to those producers to whom it is due on or before the date for making payments pursuant to this paragraph next following that on which such balance of payments is received from the market administrator.

(b) The payments required in paragraph (a) of this section shall be made, upon request, to a cooperative

UMI

VOL 48 ISS 87 MAY 4 1983

association qualified under § 1125.16, or its duly authorized agent, with respect to milk received from each producer who has given such association authorization by contract or by other written instrument to collect the proceeds from the sale of his milk, and any payment made pursuant to this paragraph shall be made on or before 2 days prior to the dates specified in paragraph (a) of this section.

(c) Each handler shall pay to each cooperative association or its duly authorized agent which operates a pool plant for skim milk and butterfat received from such plant:

(1) On or before the 2nd day prior to the date specified in paragraph (a)(1) of this section for skim milk and butterfat received during the first 15 days of that month at not less than the Class III price for the preceding month; and

(2) On or before the 17th day after the end of such month, an amount of money computed by multiplying the total pounds of such skim milk and butterfat in each class pursuant to § 1125.42(a) by the class price adjusted by the butterfat differential and taking into account any location adjustments as provided by § 1125.52 applicable at the pool plant of the cooperative association or its agent, minus payment made pursuant to paragraph (c)(1) of this section.

(d) Each handler who received milk for which a cooperative association is the handler pursuant to § 1125.9(c) shall pay such cooperative association for such milk received:

(1) On or before the 2nd day prior to the date specified in paragraph (a)(1) of this section for such milk received during the first 15 days of that month at not less than the Class III price for the preceding month; and

(2) On or before the 18th day after the end of each month, for the milk received at not less than the uniform price for all milk adjusted pursuant to §§1125.74 and 1125.75(b), minus payments made pursuant to paragraph (d)(1) of this section.

(e) None of the provisions of this section shall be construed to restrict any cooperative association qualified under section 8c(5)(F) of the Act from making payment for milk to its producers in accordance with such provision of the Act.

(f) In making payments to producers pursuant to this section, each handler, on or before the 19th day of each month shall furnish each producer with a supporting statement in such form that it may be retained by the producer, which shall show for the preceding month:

(1) The identity of the handler and the producer;

(2) The total pounds of milk delivered by the producer and the average butterfat test thereof and the pounds per shipment if such information is not furnished to the producer each day of delivery;

(3) The minimum rate at which payment to the producer is required under the provisions of this section;

(4) The rate per hundredweight and amount of any premiums or payments above the minimum price provided by the order;

(5) The amount or rate per hundredweight of each deduction claimed by the handler, together with a description of the respective deductions; and

(6) The net amount of payment to the producer.

(g) In making payments to a cooperative association in aggregate pursuant to this section, each handler upon request shall furnish to the cooperative association, with respect to each producer for whom such payment is made, any or all of the above information specified in paragraph (f) of this section.

§ 1125.74 Producer butterfat differential.

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago as reported by the Department for the month.

§ 1125.75 Plant location adjustments for producers and on nonpool milk.

(a) In making payment to producers pursuant to § 1125.73(a) subject to the application of § 1125.13(c)(6) deduction may be made per hundredweight of milk received from producers at respective plant locations at the same rate as specified for Class I milk set forth in § 1125.52.

(b) In making payments to a cooperative association pursuant to § 1125.73(d) deductions may be made at the rates specified for Class I milk in § 1125.52 for the location of the plant at which the milk was received from the cooperative association.

(c) For purposes of computations pursuant to §§ 1125.71(a) and 1125.72 the uniform price for all milk shall be adjusted at the rates set forth in § 1125.52 for Class I milk applicable at the location of the nonpool plant from which the milk or filled milk was received, except that the adjusted uniform price shall not be less than the Class III price.

§ 1125.76 Payments by a handler operating a partially regulated distributing plant.

Each handler who operates a partially regulated distributing plant shall pay to the market administrator for the producer-settlement fund on or before the 25th day after the end of the month either of the amounts (at the handler's election) calculated pursuant to paragraph (a) or (b) of this section. If the handler fails to report pursuant to §§ 1125.30(d) and 11.2531(b) the information necessary to compute the amount specified in paragraph (a) of this section, he shall pay the amount computed pursuant to paragraph (b) of this section:

(a) An amount computed as follows:

(1)(i) The obligation that would have been computed pursuant to § 1125.60 at such plant shall be determined as though such plant were a pool plant. For purposes of such computation, receipts at such nonpool plant from a pool plant, or an other order plant shall be assigned to the utilization at which classified at the pool plant or other order plant and transfers from such nonpool plant to a pool plant or an other order plant shall be classified as Class II or Class III milk if allocated to such class at the pool plant or other order plant and be valued at the uniform price of the respective order is so allocated to Class I milk, except that reconstituted skim milk in filled milk shall be valued at the Class III price. No obligation shall apply to Class I milk transferred to a pool plant or another order plant if such Class I utilization is assigned to receipts at the partially regulated distributing plant from pool plants and other order plants at which an equivalent amount of milk was classified and priced as Class I milk. There shall be included in the obligation so computed a charge in the amount specified in § 1125.60(f) and a credit in the amount specified in § 1125.71(a)(2)(iii) with respect to receipts from an unregulated supply plant, except that the credit for receipts of reconstituted skim milk in filled milk shall be at the Class III price, unless an obligation with respect to such plant is computed as specified in paragraph (a)(1)(ii) of this section; and

(ii) If the operator of the partially regulated distributing plant so requests, and provides with his reports pursuant to §§ 1125.30(d) and 1125.31(b) similar reports with respect to the operations of any other nonpool plant which serves as a supply plant for such partially regulated distributing plant by shipments to such plant during the month equivalent to the requirements of § 1125.7(b), with agreement of the operator of such plant that the market administrator may examine the books and records of such plant for purposes of verification of such reports, there will be added the amount of the obligation computed at such nonpool supply plant in the same manner and subject to the same conditions as for the partially regulated distributing plant.

(2) From this obligation there will be deducted the sum of (i) the gross payments made by such handler for Grade A milk received during the month from dairy farmers at such plant adjusted to a 3.5 percent butterfat basis by the butterfat differential pursuant to § 1125.74, and like payments made by the operator of a supply plant(s) included in the computations pursuant to paragraph (a)(1) of this section and (ii) any payments to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant.

(a) An amount computed as follows:

(1) Determine the respective amounts of skim milk and butterfat disposed of as route disposition of Class I milk within the marketing area;

(2) Deduct the respective amount of skim milk and butterfat received at the plant:

(i) As Class I milk from pool plants and other order plants, except that deducted under a similar provision of another order issued pursuant to the Act; and

(ii) From a nonpool plant that is not an other order plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such nonpool plant by handlers fully regulated under this or any other order issued pursuant to the Act is classified and priced as Class I milk and is not used as an offset on any payment obligation under this or any other order;

(3) Deduct the quantity of reconstituted skim milk in fluid milk products disposed of as route disposition in the marketing area;

(4) [Reserved]

(5) From the value of such milk at the Class I price applicable at the location of the nonpool plant, subtract its value at the uniform price applicable at such location (not to be less than the Class III price), and add for the quantity of reconstituted skim milk specified in paragraph (b)(3) of this section its value computed at the Class I price applicable at the location of the nonpool plant (but not to be less than the Class III price) less the value of such skim milk at the Class III price.

§ 1125.77 Adjustments of accounts.

Whenever verification by the market administrator of reports or payments of any handler discloses errors resulting in money due:

(a) The market administrator from such handler;

(b) Such handler from the market administrator; or

(c) Any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made on or before the next date for making payments set forth in the provisions under which such error occurred following the 5th day after such notice.

Administrative Assessment and Marketing Service Deduction

§ 1125.85 Assessment for order administration.

As his pro rata share of the expense of administration of the order, each handler shall pay to the market administrator on or before the 16th day after the end of the month 4 cents per hundredweight, or such lesser amount as the Secretary may prescribe, with respect to:

(a) Producer milk (including such handler's own production);

(b) Other source milk allocated to Class I pursuant to § 1125.44(a) (8) and (12) and the corresponding steps of § 1125.44(b), except such other source milk on which no handler obligation applies pursuant to § 1125.60(f); and

(c) Route disposition in the marketing area from a partially regulated distributing plant that exceeds the Class I milk:

(1) Received during the month at such plant from pool plants and other order plants that is not used as an offset under a similar provision of another order issued pursuant to the Act; and

(2) Specified in § 1125.76(b)(2(ii).

§ 1125.86 Deduction for marketing services.

(a) Except as set forth in paragraph (b) of this section, each handler, in making payments to producers (other than with respect to milk of such handler's own production) pursuant to § 1125.73(a)(2), shall make a deduction of 5 cents per hundredweight of milk or such amount not exceeding 5 cents per hundredweight as the Secretary may prescribe, with respect to the following:

(1) All milk received from producers at a plant not operated by a cooperative association.

(2) [Reserved]

(3) All milk received at a plant operated by a cooperative association from producers for whom the marketing services set forth below in this subparagraph are not being performed by the cooperative association as determined by the market administrator. Such deduction shall be paid by the handler to the market administrator on or before the 16th day after the end of the month. Such moneys shall be expended by the market administrator for the verification of weights, sampling and testing of milk received from producers, and in providing for market information to producers; such services to be performed in whole or in part by the market administrator or by an agent engaged by and responsible to him.

(b) In the case of each producer;

(1) Who is a member of, or who has given written authorization for the rendering of marketing service and the taking of deduction therefore to, a cooperative association;

(2) Whose milk is received at a plant not operated by such association; and

(3) For whom the market administrator determines that such association is performing the services described in paragraph (a) of this section, each handler shall deduct, in lieu of the deduction specified under paragraph (a) of this section, from the payments made pursuant to § 1125.73(a)(2) the amount per hundredweight on milk authorized by such producer and shall pay, on or before the 18th day after the end of the month, such deduction to the association entitled to receive it under this paragraph.

Signed at Washington, D.C., on April 28, 1983.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

DEPARTMENT OF ENERGY

Office of the Secretary

10 CFR Part 1017

Identification and Protection of Unclassified Controlled Nuclear Information

AGENCY: Department of Energy.

ACTION: Proposed rule; Extension of the comment period.

SUMMARY: The Department of Energy (DOE) hereby extends the comment period thirty days from the date of this publication on proposed rules regarding

1983 UMI

VOL
48
ISS
87
MY
4
1983
UMI

identification and protection of unclassified controlled nuclear information. This action is in response to a number of requests that an extension be granted to provide additional time to review the proposed rule of April 1, 1983 (48 FR 13988), and to develop comments for admission to DOE.

DATE: Comments in connection with the proposed rule must be received on or before June 3, 1983.

ADDRESSES: Written comments should be sent to the Assistant Secretary for Defense Programs, U.S. Department of Energy, Room 4A–038, Washington, DC 20585, Attention: Ms. Trisha Dedik Chico. Six copies should be submitted. Copies of comments received may be examined at the DOE Reading Room, 1E–190, James Forrestal Building, 1000 Independence Ave., S.W., Washington, DC 20585, between the hours of 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Ms. Trisha Dedik Chico, Office of Policy, Planning, and Coordination, DP–3, Office of the Assistant Secretary for Defense Programs, Room 4B–014, U.S. Department of Energy, Washington, DC 20585, (202) 252–1870;

Ms. Amy Shimamura, Office of the Assistant General Counsel for International Development and Defense Programs, GC–32, Room 6B–256, U.S. Department of Energy, Washington, DC 20585, (202) 252–6975.

Issued in Washington, DC, May 2, 1983.

Donald Paul Hodel,

Secretary of Energy.

BILLING CODE 6450–01–M

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Parts 304 and 309

Disclosure of Deposit Information

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Proposed rule.

SUMMARY: The Federal Deposit Insurance Corporation (the "FDIC") invites comment on a proposal to discontinue confidential treatment of information filed by insured banks with the FDIC on the size and number of the banks' deposit accounts. The FDIC has withheld such information from public access on the belief that the reporting bank could possibly suffer financial harm from the disclosure of such information to an existing or potential competing institution. It appears that confidential treatment is no longer needed to protect the reporting banks, because the general and highly summarized data which is now reported no longer contains the degree of detail that a competitor could act on.

The FDIC would also make several related technical changes which would not effect the substance of the regulations.

DATE: Comments should be submitted by June 3, 1983.

ADDRESSES: Comments should be addressed to Hoyle L. Robinson, Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street, N.W., Washington, D.C. 20429.

FOR FURTHER INFORMATION CONTACT: William P. Carley, Planning and Program Development Specialist, Division of Bank Supervision, Federal Deposit Insurance Corporation, 550 17th Street, N.W., Washington, D.C. 20429; telephone 202/389–4141.

SUPPLEMENTARY INFORMATION: Section 309.4 of the FDIC's regulations identifies information available to the public upon request. Paragraph (e)(2) of § 309.4 states that the Summary of Accounts and Deposits filed by insured banks will be made available at the discretion of the FDIC, except that information on the size and number of accounts is not available. The confidentiality afforded the number and size of accounts was added to the regulations at a time when total balances and number of accounts were reported by two size breaks for six classifications of deposit accounts held by commercial banks and three classifications by mutual savings banks. The FDIC was of the opinion that the information on the size and number on these several deposit classifications was sufficiently detailed to constitute proprietary information of the reporting banks. Accordingly, the FDIC decided to withhold this information from public disclosure.

In 1982, the FDIC greatly reduced the required information pertaining to size and number of accounts by eliminating the requirement to provide such information for each of the several types of deposit accounts. Instead, beginning in 1982, each June 30 the banks report a single aggregate total for all deposit accounts within the banking entity with balances exceeding $100,000 and the number of such accounts and a single aggregate total of deposit accounts with balances of less than $100,000. By replacing the requirement for detailed information on the various deposit categories with the requirement to report highly summarized data, it now appears that the reported information no longer represents proprietary financial data. Accordingly, the FDIC proposes to remove from paragraph (e)(2) of § 309.4 the provision that the size and number of accounts are not available.

Several technical amendments to the FDIC's regulations are also proposed. Detailed information on the number and size of accounts had been collected as part of the Summary of Accounts and Deposits reports filed by banks. Beginning in 1982, the information on size and number of accounts was removed from the Summary of Accounts and Deposits report and replaced by a collection of the more generalized information described in the preceding paragraph as part of the June Report of Condition filed by each insured bank. In connection with this change in the way information is collected, the separate Summary of Accounts and Deposits forms that had been used to collect information from mutual banks and commercial banks were combined into a single form beginning with June 1982, at which time the form was retitled Summary of Deposits. These changes have not been reflected in the descriptive material contained in the FDIC's regulations. Accordingly, several technical changes would be made to the regulations as follows:

Paragraph (q) of § 304.3, which defines the contents of the Summary of Accounts and Deposits reporting form used by commercial banks, would be changed to remove statements to the effect that the report contains information pertaining to the number and size of accounts. Also, this paragraph would be changed to make it applicable to the single report that is now used by both commercial and mutual savings banks. Additionally, paragraph (r) to § 304.3, which describes the contents of the Summary of Accounts and Deposits form filed by mutual banks, would be removed.

Paragraphs (e) and (e)(2) of § 309.4, which describe how to obtain information contained in the Summary of Accounts and Deposits, would be changed to reflect recent organizational changes within the FDIC and the change in the title from Summary of Accounts and Deposits to Summary of Deposits.

Regulatory Analysis

For the reasons stated in the preamble, the Board of Directors of the FDIC hereby certifies that if this proposed regulation were to be promulgated in final form, it would not have a significant economic impact on a substantial number of small entities. For the same reasons, the Board has determined that a small bank impact statement, as otherwise required by the FDIC's statement of policy entitled "Development and Review of FDIC Rules and Regulations," is not appropriate in these circumstances.

List of Subjects

12 CFR Part 304

Administrative practices and procedure, Bank deposit insurance, Banks, Banking, Foreign banks, Banking, Reporting and recordkeeping requirements.

12 CFR Part 309

Authority delegations, Disclosure requirements, Freedom of information, Privacy.

For the reasons stated in this preamble, the FDIC proposes to amend chapter III, title 12 of the Code of Federal Regulations as follows:

PART 304—FORMS, INSTRUCTIONS, AND REPORTS

1. The authority citation for Part 304 reads as follows:

Authority: 12 U.S.C. 1819.

2. Section 304.3 is amended by removing paragraph (r), redesignating paragraphs (s) through (aa) as paragraphs (r) through (z), and revising paragraph (q) to read as follows:

§ 304.3 Forms and instructions.

* * * * *

(q) *Form 8020/05: Summary of Deposits (Commercial and Mutual Savings Banks).* Form 8020/05 is a report on the amount of deposits in various types of categories for each authorized office of an insured bank with branches; unit banks do not report. Reports as of June 30 of each year must be submitted no later than the immediately succeeding August 1. Upon written request to the Assistant Director, Division of Accounting and Corporate Services, Management Information Services Branch, the Assistant Director may extend the deadline of the reporting bank for submitting the forms to no later than the immediately succeeding September 30.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 821 0100]

The Coca-Cola Co.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require a major soft drink manufacturer to timely divest to a Commission-approved buyer, Doric Foods Corporation. The company would be barred from acquiring any concern engaged in the manufacture of drinks, punches and ades, without prior Commission approval for a period of ten years.

DATE: Comments must be received on or before July 5, 1983.

ADDRESS: Comments should be directed to: FTC/S, Office of the Secretary, Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: FTC/CS–6, Paul R. Zamolo, Washington, D.C. 20580. (202) 724–1256.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with Section 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

List of Subjects in 16 CFR Part 13

Soft drinks.

In the matter of The Coca-Cola Company, a corporation; file No. 821 0100; Agreement containing consent order to divest and other relief.

The Federal Trade Commission, having initiated an investigation of the proposed acquisition by The Coca-Cola Company, a corporation, of Associated Coca-Cola Bottling Co., Inc. ("Associated"), a corporation, and its subsidiaries, including Doric Foods Corporation, and it now appearing that The Coca-Cola Company, hereinafter sometimes referred to as Coca-Cola, is willing to enter into an agreement containing an Order to Divest and Other Relief:

It is hereby agreed by and between The Coca-Cola Company, a corporation, by its duly authorized officer and its attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent The Coca-Cola Company is a Delaware corporation with its principal offices located at 310 North Avenue, Atlanta, Georgia 30313.

2. Coca-Cola admits all of the jurisdictional facts set forth in the draft of the complaint here attached.

3. Coca-Cola waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become a part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of the complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify Coca-Cola in which event it will take such action as it

VOL
48
ISS
87
MAY
4
1983
UMI

may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by Coca-Cola that the law has been violated as alleged in the draft of the complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to Coca-Cola, (1) issue its complaint corresponding in form and substance with the draft of the complaint here attached and its decision containing the following Order to Divest and Other Relief in disposition of the proceeding, and (2) make information public in respect thereto. When so entered, the Order to Divest and Other Relief shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to Coca-Cola's address as stated in this agreement shall constitute service. Coca-Cola waives any right it might have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or to contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby. It understands that once the order as been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

8. This agreement is conditioned in its entirety on the consummation of the acquisition by Coca-Cola of Associated Coca-Cola Bottling Co., Inc. If for any reason such acquisition shall be cancelled and not occur this agreement shall thereafter be of no effect.

9. Coca-Cola agrees that nothing contained in this agreement shall in any way limit the Commission's ability to investigate and, if appropriate, challenge any other aspects of Coca-Cola's acquisition of Associated, including but not limited to Coca-Cola's acquisition of Associated's carbonated soft drink bottling business.

Order to Divest and Other Relief

I

As used in this order:

(A) "Coca-Cola" means The Coca-Cola Company, a Delaware corporation with its principal offices located at 310 North Avenue, Atlanta, Georgia 30313, as well as its directors, officers, agents and employees, and its divisions, subsidiaries, controlled affiliates, successors and assigns.

(B) "Doric" means Doric Foods Corporation, a Florida corporation and wholly owned subsidiary of Associated Coca-Cola Bottling Co., Inc., with its principal offices at Robie Avenue, P.O. Box 986, Mount Dora, Florida 32757, as well as its directors, officers, agents and employees, and its divisions, subsidiaries, successors and assigns.

(C) "Drinks, punches and ades" means non-carbonated, ready to serve, naturally or artificially flavored fruit drinks, fruit punches or fruit ades which contain 50% or less fruit juice and are customarily sold under refrigeration to the consumer.

II

It is ordered, That within one year from the date on which this Order becomes final, Coca-Cola shall divest itself absolutely and in good faith of all of its right, title and interest in Doric including any additions to Doric that may have occurred since its acquisition by Coca-Cola. Divestiture shall be made only to an acquiror approved in advance by the Federal Trade Commission. The purpose of the divestiture required by this paragraph is to assure the continued operation of Doric as a drink, punch and ade manufacturer. Pending divestiture, Coca-Cola shall take all measures necessary to maintain Doric in its present condition and prevent any deterioration except for normal wear and tear of any of the assets to be divested which may impair their present operating abilities or market value.

III

It is further ordered, That for a period of ten (10) years from the date on which this Order becomes final, Coca-Cola shall not acquire, directly or indirectly, without the prior approval of the Federal Trade Commission, the whole or any part of the stock or assets of, or any other interest in, any individual, firm, partnership, corporation or other legal or business entity which is engaged directly or indirectly in the manufacture and sale of drinks, punches and ades.

IV

It is further ordered, That within ninety (90) days from the date on which this Order becomes final and every ninety (90) days thereafter until the divestiture required by paragraph II of this Order is completed, Coca-Cola shall submit to the Federal Trade Commission a written report setting forth in detail the manner and form in which Coca-Cola intends to comply, is complying, and has complied with the terms of this Order and such additional information relating thereto as may from time to time be required. All compliance reports shall include, among other things that may be required, a summary of all contacts and negotiations with potential acquirors, the identity of all such potential acquirors and copies of all documents reflecting communications to and from such potential acquirors. In addition, upon written request of the staff of the Federal Trade Commission, Coca-Cola shall submit such reports in writing with respect to the other requirements of this Order.

V

It is further ordered, That Coca-Cola notify the Federal Trade Commission at least thirty (30) days prior to any proposed corporate changes, such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation which may affect compliance with the obligations arising out of this order.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement containing a proposed consent order from The Coca-Cola Company.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The Commission's investigation in this matter concerned the May 28, 1982, tender offer by The Coca-Cola Company ("Coca-Cola") for all of the shares of Associated Coca-Cola Bottling Co., Inc., and its wholly-owned subsidiary, Doric Foods Corporation ("Doric"). Coca-Cola and Doric are the two leading competitors in the chilled fruit drink business.

Since the proposed consent order was negotiated early during the investigational stage of the proceedings, the complaint proposed by Commission attorneys was not issued. That complaint charges that Coca-Cola's acquisition of Doric violates Section 7 of the Clayton Act and Section 5 of the Federal Trade Commission Act because the acquisition may substantially lessen competition between the two former competitors or tend to create a monopoly.

The proposed complaint does not identify any single product market as the appropriate unit of analysis for antitrust purposes. While the Commission's normal practice is to identify the relevant market in the complaint, in some cases an early settlement may preclude the investigation that would be required to finally resolve questions of market definition. In this case, there were sufficient competitive concerns to raise questions about the acquisition however the relevant market was defined. Thus, while the remedial provisions of the proposed order are narrowly tailored ones applying only to future acquisitions of makers of "drinks, punches and ades" (as those terms are defined in the order), in examining the acquisition in this case the Commission also considered the possible effects on broader product markets.

The proposed order provides that Coca-Cola must: (1) divest Doric to a purchaser approved by the Commission within one year; (2) refrain for ten years from acquiring any manufacturer of drinks, punches, and ades without prior Commission approval; (3) file periodic verified written compliance reports setting forth its compliance with the provisions of the order; and (4) provide the Commission at least 30 days notice of any changes in the corporation which may affect its compliance obligations arising from the order.

The proposed order, by requiring Coca-Cola to divest Doric to a Commission-approved purchaser, should ameliorate any possible anticompetitive effects resulting from the acquisition of Doric. Before the acquisition, Doric and Coca-Cola were the two largest competitors in the chilled fruit drink business. The proposed order is intended to assure that Doric remains a viable, independent competitor, and to restore competition to its pre-acquisition level.

The proposed order also prohibits Coca-Cola from acquiring, without prior Commission approval, any manufacturer of drinks, punches and ades. For the reasons given above, this should not be construed as taking any position as to whether "drinks, punches and ades" (as defined in the order) would constitute a relevant product market for purposes of antitrust analysis. The purpose of this definition is simply to identify those acquisitions which require prior approval by the Commission. This prior approval requirement will expire ten years after the order becomes final.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Emily H. Rock,

Secretary.

Separate Statement of Commissioner George W. Douglas in the Matter of Coca-Cola, File No. 821 0100 [1]

In resolving this matter the Commission faced three choices: request the staff to complete its investigation and only then assess the competitive effects of the acquisition, reject the prior approval provision in the consent because of a lack of evidence and close the investigation following divestiture of Doric, or enter the existing complaint and consent agreement. I would have preferred either of the first two alternatives. Unfortunately, a majority of the Commission has chosen the one course that is likely to create serious problems while solving none.

While I do not question the preferred divestiture, I have three reservations concerning the wisdom of accepting the existing complaint and consent agreement. First, the complaint states only that the respondent's acquisition of Associated Coca-Cola Bottling Co. "may have had the effect of substantially lessening competition or tending to create a monopoly in a line of commerce in a section of the country." This approach, which does not define a relevant market or specify the precise violation, represents a significant and inappropriate departure from Commission procedures and suggests that the Commission will hold itself to a separate standard, divorced from legal or economic justification, for drawing up complaints that accompany consent agreements.

The only apparent reason for relying on the statutory language of Section 7 of the Clayton Act in this complaint is that the Commission has neither a sufficient reason to believe the respondent violated the antitrust laws in any market, however defined, nor the necessary evidence to support such a charge. Here, prior to issuance of a second request for information, the respondent offered to divest the subsidiary that posed the most obvious antitrust concern and to sign a consent agreement if the staff would end its investigation. Both the staff and respondent sought to avoid the costs associated with a lengthy investigation, and so the consent was accepted. While the staff has an obligation to conduct its investigations expeditiously so as to conserve Commission resources and avoid undue costs for respondents, this concern does not relieve the staff of its obligation to provide legal and economic justification for the agreed-upon relief.[2]

Attempting to issue a complaint without this sound legal and economic basis, as is being done in this case, raises a number of troubling issues that the Commission simply need not face.[3] If divestiture would resolve the antitrust concerns posed by this acquisition, the Commission should direct the staff to close its investigation following respondent's divestiture of Doric. On the other hand, if the Commission has reason to believe that completion of the investigation would support a specific complaint and associated relief, the staff should be instructed to complete its investigation.[4]

A second concern with the decision taken today involves the inherent inconsistency of the majority's approach. Although the complaint lacks any market definition, the prior approval provision in the consent order is limited to acquisitions of firms engaged in the manufacture of "drinks, punches and ades," defined as chilled, ready-to-serve, non-carbonated, naturally or artificially flavored drinks with between 20–50 percent fruit juice content. This product grouping is so contrived and devoid of empirical content that the Commission found it necessary to explain in its "Analysis to Aid Public Comment" that it did not represent a relevant market finding and should not be so construed. The "Analysis," however, does not attempt to reconcile the obvious inconsistency between the extremely narrow product group specified in the consent order and the extraordinarily broad violation detailed in the complaint.

The third and perhaps most serious concern raised by the majority's decision involves the relationship between the ancillary relief provision and the nature of the purported violation. The preliminary evidence gathered in this matter provides no justification or support for the prior approval provision. Normally, relief provisions are imposed to correct the violations identified in the complaint. Here, however, the complaint is silent, making it impossible to evaluate either relevant public interest considerations or the appropriateness of the relief. Based on the available evidence, there is nothing to suggest that the respondent engaged in, attempted to engage in, or intended to engage in any anticompetitive activity in the identified market. When one asks, "What did respondent do that requires the prior

[1] Chairman James C. Miller III joins this dissenting statement.

[2] The Commission's unease with its ultimate choice is suggested by the amount of time consumed in the consideration of this matter.

[3] In deciding whether to accept a consent, the Commission need not fully answer every possible question that could arise in litigation. At the least, however, we need a coherent theory of the violation (including a plausible market definition), and significant evidence that a violation has occurred and that the remedy is appropriate. This case does not meet these minimum requirements.

[4] Indeed, the limited evidence gathered in this and other related matters suggests that the relief provisions in the existing consent order may not go far enough if, in fact, there is a violation.

approval provision?", neither the complaint nor staff's investigation provides an answer.

Because antitrust enforcement under Section 7 of the Clayton Act and Section 5 of the Federal Trade Commission Act is intended to be remedied rather than punitive,[1] I find the tandem combination of a vague complaint and an unsupported prior approval provision to be extremely troubling in its ramifications both for the public and the Commission in its future actions. The majority's decision would seem to establish a dangerous precedent by allowing the Commission to draw up vague, overly-broad charges and then permit or coerce respondents to agree to unrelated and unjustified relief. Clearly, no matter how a consent order is obtained, the Commission should not be relieved of its duties to specify the actual nature of the violation and to gather sufficient evidence to support a finding that there is reason to believe that a violation occurred. Without this foundation, the Commission would be unable to fulfill its obligation to impose the appropriate relief.

Thus, I strongly dissent from the majority's decision. The Commission engaged in a lengthy and protracted debate in bringing this matter to a conclusion, and the unfortunate outcome has all the appearances of a product of compromise and accommodation that is devoid of sound legal or economic theory. Ironically, by taking this purported path of least resistance, the majority has succeeded only in arriving at a decision that is internally inconsistent, unsupported by the evidence, and at odds with established and respected policies and procedures. Unless quickly repudiated, this decision may haunt us for years to come.

16 CFR Part 444

Credit Practices Trade Regulation Rule; Oral Presentation and Availability of Staff Documents

AGENCY: Federal Trade Commission.

ACTION: Oral presentation and availability of staff documents.

SUMMARY: The Federal Trade Commission has decided to afford interested parties the opportunity to make oral presentations before the Commission. Twelve prior participants have been invited to appear before the Commission and other prior participants are invited to request an opportunity to address the Commission. The participants in this meeting will be limited to persons who have participated in earlier stages of this proceeding.

The Federal Trade Commission has placed on the rulemaking record for the proposed Trade Regulation Rule concerning Credit Practices the final recommendations of the rulemaking staff and the Director of the Bureau of Consumer Protection and the final recommendations of the Bureau of Economics. A staff summary of the comments filed by the public on the reports of the staff and the presiding officer is also on the rulemaking record.

DATES: Oral presentations before the Commission will be heard at the Commission's open meeting on June 7, 1983, at 10 a.m. Requests to appear at the Commission's open meeting must be received by May 6, 1983. Summaries of presentations must be received no later than May 27, 1983.

ADDRESSES: Requests to make oral presentations and written summaries of oral presentations should be sent to: Secretary, Federal Trade Commission, 6th Street and Pennsylvania Avenue, N.W., Washington, D.C. 20580.

The meeting will be held in Room 432, Federal Trade Commission, 6th Street and Pennsylvania Avenue, N.W. Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: Christopher Keller, (202) 724–1580, or Norman Oliver, (202) 724–1183; Division of Credit Practices, Federal Trade Commission, Washington, D.C. 20580.

SUPPLEMENTARY INFORMATION: Pursuant to § 1.13(h) of the Commission's Rules of Practice, comments were invited from the public on the final reports of the staff and the presiding officer in the rulemaking proceeding concerning the proposed Trade Regulation Rule on Credit Practices, and interested parties who had previously participated in the proceeding were invited to submit requests to participate in oral presentations (45 FR 56070; August 22, 1980). Comments and requests were received until January 16, 1981 (45 FR 85076; December 24, 1980).

All comments received were placed on the rulemaking record and the rulemaking staff prepared a summary of those comments. That summary is available for public inspection on the rulemaking record in this proceeding.

The Federal Trade Commission has directed that the final recommendations of the rulemaking staff and the Director of the Bureau of Consumer Protection submitted to the Commission after the conclusion of the post-record comment period specified in §1.13(h) of the Commission's Rules of Practice be placed on the rulemaking record in this proceeding for public inspection.

The Federal Trade Commission has also placed on the rulemaking record memoranda incorporating the final recommendations of the Bureau of Economics.

The Federal Trade Commission has decided to allow interested parties to make oral presentations and to invite further requests to make oral presentations. Participation in this meeting before the Commission shall be restricted to persons who have participated in the proceeding to date. Participants will be permitted no more than thirty minutes to address comments to the Commission. The Commission reserves the right to limit the number of persons who may participate, as well as the amount of time allotted for comments, should such a need develop.

The prior participants in the proceeding who have been invited to appear include: (1) the American Bankers Association, Consumer Bankers Association, California Bankers Association, and Independent Bankers Association of America; (2) American Financial Service Association; (3) National Consumer Law Center; (4) National Automobile Dealers Association; (5) Professor George J. Wallace, Rutgers School of law; (6) Credit Union National Association; (7) The Legal Aid Society of Cleveland; (8) New Orleans Legal Assistance Corp.; (9) Consumer Protection Division, Department of the Attorney General, Commonwealth of Massachusetts; (10) Professor Steven Lubet, Northwestern School of Law; (11) American Retail Federation and National Home Furnishing Association; and (12) California Consumer Finance Association.

The Commission has also decided to further extend an opportunity for prior participants to request to participate in the open meeting for oral presentations. Any party who has participated in this proceeding may submit to the Secretary, no later than May 6, 1983, a request to appear before the Commission and make an oral presentation.

Persons who make oral presentations to the Commission should submit a written summary of their presentation, not to exceed 25 pages, to the Secretary, Federal Trade Commission, 6th Street and Pennsylvania Avenue, NW., Washington, D.C. 20580 not later than May 27, 1983. If feasible and not burdensome, persons filing such summaries should submit 8 copies.

No additional written comments may be submitted to the Commission. Oral presentations at the meeting must be restricted to the evidence already in the rulemaking record in this proceeding.

The meeting before the Commission will commence at 10 a.m., on June 7, 1983, in Room 432, Federal Trade Commission, 6th Street and

BILLING CODE 6750-01-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 1

General Regulations Under Commodity Exchange Act; Request for Public Comment in Conjunction With Similar Action by Securities Exchange Commission

AGENCY: Commodity Futures Trading Commission.

ACTION: Request for Comments.

SUMMARY: The Commodity Futures Trading Commission ("Commission") is seeking public comment on ways to streamline or simplify operational requirements prescribed by the Commission for commodity professionals that are also registered with the Securities and Exchange Commission ("SEC") and, as such, must meet similar requirements imposed by the SEC. In addition, the Commission is seeking comment on ways to improve the coordination of commodity self-regulatory organizations with securities industry self-regulators.

DATE: Comments must be received on or before July 5, 1983.

ADDRESS: Interested persons should submit comments to: Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581. Attention: Office of the Secretariat. Telephone: (202) 254–6314.

FOR FURTHER INFORMATION CONTACT: Jeri E. Ruscoll, Esquire, Office of the General Counsel. Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581. Telephone: (202) 254–9880.

SUPPLEMENTARY INFORMATION: The Commission and SEC have cooperated in the past to develop programs designed to reduce the burdens imposed on those industry professionals registered with both agencies. For example, in 1979, the Commission allowed futures commission merchants, which are also registered with the SEC as securities brokers or dealers, to comply with the Commission's financial reporting requirements by filing copies of the SEC's FOCUS Report, Part II, in lieu of the Commission's Form 1–FR. [17 CFR 1.10, 1.12, 1.16, 1.18, 1.52].

Continuing dialogue beween the Commission and SEC has led to an effort to consider ways to streamline or simplify other requirements imposed by each agency that may be overlapping or redundant.

The Commission hereby invites interested persons, particularly those futures commission merchants, associated persons, commodity trading advisors and commodity pool operators that are also registered with the SEC in connection with their securities activities, to submit comments and suggestions on suitable ways to achieve this objective. The Commission is especially interested in receiving comments concerning testing programs, disclosure rules, recordkeeping requirements, reporting duties, registration procedures, and financial (e.g., capital, segregation) requirements.

List of Subjects in 17 CFR Part 1

Commodities exchanges, Reporting and recordkeeping requirements.

Issued in Washington, D.C. on April 28, 1983.

AGENCY: Securities and Exchange Commission.

ACTION: Request for comment.

SUMMARY: The SEC, in conjunction with similar action by the CFTC, is seeking public comment on how regulatory obligations imposed by either the SEC or the CFTC upon persons and organizations subject to regulation by both Commissions might, through cooperative action by the Commissions, be coordinated or streamlined to eliminate wasteful overlap, duplication of effort or unnecessary burden on regulated entities. Suggestions for coordinating the efforts of securities and commodities self-regulatory organizations are also requested.

DATE: Comments should be submitted on or before July 5, 1983.

ADDRESSES: Interested persons should submit three copies of their written data, views and arguments to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and shall refer to File No. 4–254. All submissions will be available for public inspection at the SEC's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Kevin Fogarty, Esq. (202) 272–2416 or Thomas Lovett, Esq. (202) 272–2913, Division of Market Regulation, SEC, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The SEC and CFTC are seeking to expand their regulatory coordination in order to minimize the compliance burden borne by regulated entities without compromising regulatory standards or effectiveness. Accordingly, the SEC is soliciting comments regarding how regulatory or self-regulatory requirements as to registration, reporting, recordkeeping, disclosure, testing, financial or other matters which may result in regulatory overlaps or inefficiency can be simplified or integrated. The SEC particularly welcomes the comments of broker-dealers, self-regulatory organizations with extensive day-to-day experience with dual or multiple regulation.

All interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written comments should submit three copies thereof to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549, not later than July 5, 1983. Reference should be made to File No. 4–254. All submissions will be made available for public inspection at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

DEPARTMENT OF COMMERCE

National Marine Fisheries Service, NOAA

50 CFR Parts 17 and 227

Endangered and Threatened Wildlife and Plants

AGENCIES: Fish and Wildlife Service, Interior; National Marine Fisheries Service, Commerce.

ACTION: Proposed rule.

SUMMARY: The Services propose to amend the Special Rules for Sea Turtles under the Endangered Species Act to allow transshipment of certain green sea turtle products through the port of Miami.

The Special Rules currently prohibit import and export of commercial shipments of green sea turtle products, regardless of final destination. An exemption under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), however, allows transshipment of listed specimens through a country that is a Party to CITES provided the specimens remain in Customs control. The Cayman Islands Government has requested that the Secretary of the Interior and the Secretary of Commerce amend the Special Rules to allow shipments of green sea turtle products to transit the United States according to the CITES exemption. As proposed, these rules would grant that request under certain restrictions that would enable the Services to monitor traffic in such shipments.

DATE: Comments on this proposal must be received by June 3, 1983.

ADDRESS: Please address correspondence to the U.S. Fish and Wildlife Service, Federal Wildlife Permit Office, P.O. Box 3654, Arlington, VA 22203, or the National Marine Fisheries Service, Office of Marine Mammals and Endangered Species, U.S. Department of Commerce, Washington, D.C. 20235. Comments received on this proposed rule will be available for review during the hours of 7:45 a.m. to 4:15 p.m., Monday through Friday except holidays at the Federal Wildlife Permit Office in Room 601, 1000 N. Glebe Road, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Mr. Richard K. Robinson, Acting Chief, Federal Wildlife Permit Office, P.O. Box 3654, Arlington, Virginia 22203 (703/235–1938) or Mr. Charles Karnella, National Marine Fisheries Service, Office of Marine Mammals and Endangered Species, U.S. Department of Commerce, Washington, D.C. 20235 (202/634–7471).

SUPPLEMENTARY INFORMATION: The U.S. Fish and Wildlife Service (FWS) and the National Marine Fisheries Service (NMFS) share responsibility for sea turtles listed under the Endangered Species Act (ESA). The loggerhead (*Caretta caretta*) and certain populations of green (*Chelonia mydas*) and olive ridley (*Lepidochelys olivacea*) sea turtles are listed as Threatened species under the ESA. The Services have adopted Special Rules, 50 CFR 17.42(b) and 50 CFR 227 Subpart D (43 FR 32800, July 28, 1978), for the conservation of these species. These rules currently allow the Services to issue permits to take, import and export such species only for scientific research, zoological exhibition or educational purposes or to enhance the propagation or survival of these species. The rules currently prohibit trade in these species, including importation, for commercial purposes. As described below, the Services are proposing to amend the Special Rules to allow transshipment, but not general commercial trade or importation, of green sea turtle products.

Under Section 3(10) of the ESA and 50 CFR 10.12, any entry into the United States is defined as an import regardless of the final destination of the shipment and regardless of the issue of Customs control. Consequently, transshipment, shipment between a named importer and a named exporter outside the United States but made through the United States because of shipping arrangements, is prohibited by the current Special Rules.

Commercial imports of sea turtles are also generally prohibited under CITES. All species of sea turtles (family Cheloniidae) are listed in Appendix I of CITES. According to CITES, Appendix I species cannot be imported for commercial purposes unless the specimens qualify under one of the following exemptions: (1) Article VII.1 of CITES allows transshipment of specimens listed on any Appendix through a Party country provided the specimens remain in Customs control. No CITES documents are required in the country where transshipment occurs; (2) Article VII.2 of CITES provides that Pre-Convention specimens may be traded when the Management Authority of the country of export or reexport issues a certificate to support the Pre-Convention status of those specimens; (3) Conference Resolution 3.15 provides that those populations deemed by the Parties to be no longer endangered and to benefit by ranching (rearing in a controlled environment specimens taken from the wild) with the intention of trade could be transferred to Appendix II; and (4) Article VII.4 of CITES provides that those animals which are "bred in captivity" (as further defined in Conference Resolution 2.12) for commercial purposes are to be treated as if listed in Appendix II. Appendix II specimens can be traded internationally when the Management Authority of the country of export or reexport issues a proper CITES document.

On January 3, 1983, the Services published a Notice of Intent to review the Special Rules on sea turtles with particular attention to whether or not to allow U.S. trade in certain sea turtle products according to CITES (48 FR 42). The Services requested comments on possible changes to the Special Rules, information on environmental and economic impacts on small entities and information on possible alternative actions. The Services decided to review the rules because:

(1) Suriname and France (on behalf of Reunion) have submitted proposals to ranch green sea turtles for consideration at the fourth regular meeting of the Conference of the Parties to CITES to be held in Botswana during April 1983 (47 FR 34043, August 5, 1982). These populations might be transferred to Appendix II, making them eligible for international trade under permits.

(2) The definition of "bred in captivity" as it applies to sea turtles will be discussed at the CITES Conference. Appendix I animal specimens which are "bred in captivity" for commercial purposes are to be treated as if listed in Appendix II, making them eligible for international trade under permit.

(3) On January 22, 1982, the Pacific Legal Foundation and the Association for Rational Environmental Alternatives filed a petition with the Services (47 FR 13917, April 1, 1982) to exempt mariculture products from the trade prohibition provisions of the Special Rules.

(4) The Cayman Islands Government has requested the Services to amend their rules to lift the import restrictions. On November 10, 1982, Mr. John B. McLean, member of the Cayman Islands Agriculture and Natural Resources agency, wrote letters to the Secretaries of Interior and Commerce regarding the Special Rules on Sea Turtles. He wrote, in part:

"• • • As you are no doubt aware, this rule has adversely affected the Cayman Turtle Farm and been a hardship to the Cayman Islands ever since it took effect in 1979. At present, the Farm's survival hinges on reestablishment of access for its products to the U.S. market, which previously represented about 75% of its total sales.

"Although to remain commercially viable, the Farm will require access to the U.S. market for all its products, the most acute and immediate need for relief is in the areas of • • • transshipment (CITES Article VII(1) exemption) • • •."

This request has the full support of the British Government, of which the Cayman Islands are a Crown Colony.

Approximately 250 commenters submitted letters to the Services. Many believed the 30-day comment period originally announced (January 3 to February 2) was too short. The comment period subsequently was extended to February 17 by FWS (48 FR 5284, February 4, 1983), to February 22 by NMFS (48 FR 5285, February 4, 1983) and finally to March 9 by both NMFS (48 FR 8096, February 25, 1983) and FWS (48 FR 8514, March 1, 1983).

Most of the substantive comments addressed the issues of ranching and captive-breeding, which could result in both commercial shipments and tourist items entering the United States, and the potential impacts on law enforcement, education programs for the general public and shrimping industry, stimulation of trade in sea turtle products both within the United States and internationally, international cooperation in protecting sea turtles in the wild and effects on the U.S. economy.

The issues of ranching and captive-breeding will be discussed during the CITES Conference during April 1983. Information from those discussions will be necessary to make a decision on whether to allow either commercial shipments or tourist items of sea turtle products to be imported into the United States. Therefore, no regulatory action that would allow import of sea turtle products, where the United States is the final destination, will be taken by the Services until after the CITES Conference. Comments received on those issues will be considered during development of the United States' position on them (48 FR 9545).

Transshipment

Section 4(d) of the ESA requires the Secretary to adopt, with respect to any threatened species, regulations that are "necessary and advisable to provide for the conservation of such species." There are two primary reasons why this proposal is necessary and advisable to provide for the conservation of green sea turtles:

(1) The current U.S. regulatory stance on transshipment of green sea turtle products under the ESA is stricter than that taken by the Parties to CITES. Although this is technically permissible under Article XIV of CITES, the U.S. regulatory scheme is inconsistent with the judgment of the Parties to CITES that transshipment of species protected under CITES should be allowed and that the prohibition of transshipments is not necessary for the conservation of listed species. By lifting its ban on transshipment, the U.S. would come into conformance with CITES standards, thus allowing more uniform world trade regulations regarding transshipment of green sea turtle products. From a conservation standpoint, this is important because the United States has taken a consistent and strong position in favor of conservation measures like "ranching" and captive bred "farming" operations under CITES. In the case of the green sea turtle, the current ban on transshipments effectively cuts off the Grand Cayman green sea turtle breeding operation from most of the potential market for its products. A continuation of this situation will seriously impair the ability of the Grand Cayman turtle operation from continuing its breeding program. Cessation of an operation like the one of Grand Cayman will discourage others from developing captive breeding and ranching operations for sea turtles, thereby continuing commercial pressures on populations of the turtles in the wild. If transshipment were allowed, products from the Grand Cayman Islands could displace demand for products from wild green sea turtles. Data available to FWS from comments and other sources indicate that there is presently both legal and illegal international trade in wild sea turtle products, indicating a continuing demand for sea turtle products. Any demand for green sea turtle products that can be met from captive stocks could reduce pressures on wild stocks.

(2) Research necessary to enhance the survival of green sea turtles would continue. The Grand Cayman operation has invited scientists from many different specialty fields to use its facilities to work with sea turtles. Much has been learned about the physiology of sea turtles; techniques have been developed that may allow the species from which sea turtle products are derived to be identified, thus providing an important law enforcement tool; tagging techniques have been developed which may prove useful to studies of wild sea turtle populations. The Grand Cayman Turtle Farm (CTF) has stated its willingness to continue to make its facilities available to the scientific community for as long as the mariculture operation remains viable. By increasing the ability of CTF to market its products by transshipment through the United States, the proposed amendment would enable CTF to continue to work cooperatively with the scientific community on sea turtle research, all to the betterment of the species.

No one commented specifically on the issue of transshipment of sea turtle products. The Aviation Department of Metropolitan Dade County did offer that "Miami airport is ready and willing to handle the processing that is required to permit the importation of these products again."

The Services believe that the issues relating to transshipment are sufficiently different from those involving importation (both commercial shipments and tourist items) where the United States is the final destination to warrant its separation from those other issues. In an effort to focus the public's attention on the issue of transshipment, the Services propose to amend the Special Rules for sea turtles to allow transshipment through the United States under strict control at the port of Miami of green sea turtle products from the Cayman Islands. Consideration of this amendment has been limited to the Cayman Islands because the Cayman Islands Government has indicated willingness to accept restrictions that will avoid abuses of the exception.

Representatives of CTF and the British Government have given assurances to U.S. Government representatives that sea turtles will not be taken from wild stock and that any need for additional breeding stock could be filled by sea turtle ranches, such as that being developed in Suriname. Moreover, any wild stock that Suriname made available would only be used as breeding stock; products from those green sea turtles could not be transshipped through the United States.

During direct discussions between officials of the Cayman Islands and U.S. Government officials, and at hearings before the Subcommittee on Fisheries and Wildlife Conservation and the Environment of the Committee on Merchant Marine and Fisheries of the House of Representatives, the Cayman Islands Government gave assurances that it would impose a numbering and documentation system on traded items. All packages of sea turtle products being shipped from the Cayman Turtle Farm would be serially numbered. Each shipment would be specifically identified on a CITES document issued by the Cayman Islands Government. All transshipments would have to proceed directly from the Cayman Islands to Miami. This eliminates the opportunity to tamper with shipments in foreign countries before they enter the United States. In addition, while in the United States, any transshipment of green sea

VOL
48
ISS
87
MY
4
1983
UMI

turtle products would have to remain in Customs custody at the port of Miami.

The exemption for transshipment is intended only for shipments proceeding from the Cayman Islands to a previously specified importer in a foreign country where the completed shipping arrangements necessitate transit through the United States. The proposed regulations would not allow any point in the United States to be used as a warehouse where green sea turtle products from the Cayman Islands could be stored while awaiting future shipping arrangements to be made. Before a transshipment could leave Miami, an agent of the shipper would have to file the following with the U.S. Fish and Wildlife Service: (1) a completed Declaration for Importation or Exportation of Fish or Wildlife (Form 3–177) which includes serial numbers assigned by the Cayman Islands Management Authority, (2) a copy of the Cayman Islands CITES document, and (3) a copy of the invoice which includes the name and address of the consignee. Federal law enforcement officers would use this information to verify and monitor shipments of turtle products from the Cayman Islands. Entry of the names and addresses of foreign consignees into the law enforcement data bank should act as a deterrent to anyone who might consider disguising the nature of such products for attempted shipment back into the United States.

The proposed amendment would also allow soup or other products made from green sea turtles from CTF to be served on aircraft leaving from and returning to the Cayman Islands. All loading and unloading of meals would have to be done outside the United States. All turtle products would have to remain on the aircraft under Customs control while in the United States for the transshipment exemption to apply.

Required Determinations

The Services have prepared a draft Environmental Assessment according to the National Environmental Policy Act for this proposed rule. It is on file at the Federal Wildlife Permit Office (see address section) and may be examined during normal business hours. This assessment will form the basis for a decision at the time of any final rule as to whether this is a major Federal action which would significantly affect the quality of the human environment within the meaning of Section 102(2)(c) of the National Environmental Policy Act of 1969 (implemented by 40 CFR Parts 1500–1508).

The Department of the Interior and the Department of Commerce have determined that this is not a major rule under Executive Order 12291, nor does it have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act. The Determination of Effects on this proposed rule is available from the individuals identified under the section: "For further information contact."

Information Collection

The information collection requirements contained in Parts 17 and 227 have been approved by the Office of Management and Budget (OMB) under U.S.C. 3507 and assigned clearance number 1018–0012. This information will be used to monitor transshipment traffic in green sea turtle parts and products and is required to obtain transshipment benefits.

List of Subjects

50 CFR Part 17

Endangered and threatened wildlife, Fish, Marine mammals, Plants (agriculture).

50 CFR Part 227

Threatened fish and wildlife.

Regulation Promulgation—

Accordingly, under the authority of 16 U.S.C. 1538–9, it is hereby proposed to amend Part 17 and Part 227 Title 50 of the Code of Federal Regulations, as set forth below:

CHAPTER I—[AMENDED]

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

1. A new paragraph (vii) is added to § 17.42(b)(1) to read as follows:

§ 17.42 Special rules—reptiles.

* * * * *

(b) * * *

(1) * * *

(vii) The prohibitions against import and export shall not apply to green sea turtles (*Chelonia mydas*) that are being transshipped from the Cayman Islands through the United States PROVIDED THAT (A) the turtles were hatched at the Cayman Turtle Farm from eggs produced by turtles which mated at the Cayman Turtle Farm, (B) shipments proceed directly from the Cayman Turtle Farm to the port of Miami, Florida, (C) a completed Declaration for Importation or Exportation of Fish or Wildlife (Form 3–177) which includes serial numbers assigned by the Cayman Islands Management Authority, a copy of the accompanying Cayman Islands CITES document, and a copy of the invoice which includes the name and address of the consignee is filed with the Service upon arrival of the shipment at Miami, and (D) such wildlife remains in Customs custody at the port of Miami while in the United States.

* * * * *

CHAPTER II—[AMENDED]

PART 227—[AMENDED]

2. A new paragraph (g) is added to 50 CFR 227.72 to read as follows:

§ 227.72 Exceptions to prohibitions.

* * * * *

(g) The prohibitions against import and export shall not apply to green sea turtles (*Chelonia mydas*) that are being transshipped from the Cayman Islands through the United States PROVIDED THAT (1) the turtles were hatched at the Cayman Turtle Farm from eggs produced by turtles which mated at the Cayman Turtle Farm, (2) shipments proceed directly from the Cayman Turtle Farm to the port of Miami, Florida, (3) a completed Declaration for Importation or Exportation of Fish or Wildlife (Form 3–177) which includes serial numbers assigned by the Cayman Islands Management Authority, a copy of the accompanying Cayman Islands CITES document, and a copy of the invoice which includes the name and address of the consignee if filed with the Service upon arrival of the shipment at Miami, and, (4) such wildlife remained in Customs custody at the port of Miami while in the United States.

This proposed rule was prepared by Robert J. Batky, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240.

Dated: April 8, 1983.

G. Ray Arnett,

Assistant Secretary for Fish and Wildlife and Parks.

Dated: April 13, 1983.

William G. Gordon,

Assistant Administrator for Fisheries.

[FR Doc. 83–11984 Filed 5–3–83; 8:45 am]
BILLING CODE 4310–55–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 32

Washita National Wildlife Refuge; Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed special regulations; request for comment.

SUMMARY: This document proposes special hunting regulations for certain migratory birds on the Washita National Wildlife Refuge, Oklahoma, to insure that the activities permitted are consistent with refuge purposes. These regulations are necessary to supplement the existing regulations in Title 50 which are general in nature. The intended effect is to implement a regulatory framework for the waterfowl hunt.

DATES: Comments on this proposed rule must be submitted on or before July 5, 1983.

ADDRESSES: Send comments to Associate Director, Wildlife Resources, U.S. Fish and Wildlife Service, 18th and C Streets, NW., Washington, DC 20240. The addresses and telephone numbers of the Regional Director and Refuge Manager can be found in the Supplementary Information section of this document.

FOR FURTHER INFORMATION CONTACT: Michael J. Spear, Regional Director, U.S. Fish and Wildlife Service, Box 1306, Albuquerque, NM 87103 (Telephone 505–766–2321); or James F. Gillett, Chief, Division of Refuge Management, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (Telephone 202–343–4311).

SUPPLEMENTARY INFORMATION: The addresses and telephone numbers of the Regional Director and Refuge Manager are as follows: Mr. Michael J. Spear, Regional Director, U.S. Fish and Wildlife Service, Box 1306, Albuquerque, NM 87103 (Telephone 505–766–2321); Mr. Kenneth O. Butts, Refuge Manager, Washita National Wildlife Refuge, Route 1, Box 68, Butler, OK 73625 (Telephone 405–473–2205). Ronald L. Fowler, Division of Refuge Management, U.S. Fish and Wildlife Service, 18th and C Streets, NW, Washington, DC 20240 (Telephone 202–343–4306), is the primary author of this document.

General

In 50 CFR 32.11 the Service has established lists fo refuges which have been opened to the hunting of migratory game birds. In a final rulemaking issued on November 19, 1982 (47 FR 52178), the Washita National Wildlife Refuge was added to the list of open areas; migratory game birds. Special hunting regulations are issued only after determination and publication of the opening of an area. This rule proposes special hunting regulations which are more restrictive than those set by the State of Oklahoma. The Fish and Wildlife Service solicits public comment on these proposed waterfowl hunting regulations for the Washita National Wildlife Refuge. Comments received will be taken into consideration before a final rule is issued.

Special regulations are limited to one season. However, the Service also proposes to issue revisions to Title 50, Code of Federal Regulations, later this year which would make the regulations permanent in nature. Permanent regulations will be a part of 50 CFR 32.12

Conformance With Statutory Authorities

The opening of any refuge to hunting requires compliance with two laws, the National Wildlife Refuge System Administration Act (NWRSAA) and the Refuge Recreation Act. Section 4(d)(1)(A) of NWRSAA authorizes the Secretary, under such regulations as he may prescribe, to permit the use of any area within the System for any purpose, including but not limited to hunting, whenever he determines that uses are compatible with the major purposes for which such areas were established.

The Washita National Wildlife Refuge was established on April 15, 1961 by Cooperative Agreement with the Bureau of Reclamation for the conservation, maintenance, and development of the area for public use in accordance with a Fish and Wildlife Service approved plan of operation. The General Plan specifies that the lands, comprising about 8,000 acres, shall be made available for wildlife conservation and management by the U.S. Fish and Wildlife Service. The primary objective of the Refuge is to provide protection and food for migratory populations of geese and ducks.

Restrictions are being proposed to insure that the waterfowl hunting will be consistent with the purposes for which the refuge was established. The hunting area is limited to 300 acres and the remainder of the 8,084–acre refuge will provide food and protection for waterfowl. The regulations also provide for hunting from specified blinds, limited shooting hours, hunting only on Saturdays and Sundays during the last half of the season, and limitations on the number of shells permitted to be carried into the area.

The Refuge Recreation Act of 1962 (16 U.S.C. 460k) authorizes the Secretary of the Interior to administer areas within the National Wildlife Refuge System for public recreation as an appropriate use to the extent that it is feasible and not inconsistent with the primary objectives for which the area was established. In additions, the Act requires "that such recreational use(s) will not interfere with the primary purposes for which the areas were established, and that funds are available for the development, operation, and maintenance of these permitted forms of recreation." Time and space restrictions on hunting are being instituted to insure that the permitted activities will not interfere with refuge purposes.

In 1983, $24,000 has been allocated in the Interpretation and Recreation Program for the Washita Refuge, a portion of which will be used to administer this hunting program. It is also the policy of the Service that "special hunting regulations will not liberalize existing State laws or regulations." The regulations contained in this rulemaking are either concurrent with or more restrictive than State hunting laws and regulations.

Information Collection Requirements

The Service has received approval from the Office of Management and Budget (OMB) for the information collection requirements of these regulations pursuant to the Paperwork Reduction Act (Pub. L. 96–511). These requirements are presently approved by the Office of Management and Budget under the OMB approval number cited below and codified at 50 CFR 32.41.

Type of information collection	OMB approval No.
Hunter reservation/application/blind assignment	1018–0047

These regulations impose no new reporting or recordkeeping requirements that must be cleared by the Office of Management and Budget. The information is being collected to assist the Service in administering drawings for blind assignments. The information will be used to award blind assignments. Response is mandatory to obtain a blind assignment.

NEPA Consideration

The "Final Environmental Statement for the Operation of the National Wildlife Refuge System" (FES 76–59) was filed with the Council on Environmental Quality on November 12, 1976, and a notice of availability was published in the **Federal Register** on November 19, 1976 (41 FR 51131). An environmental assessment was prepared for this proposed action and is available for public inspection and copying in room 2341, Department of the Interior, 18th and C Streets, NW., Washington, D.C. 20240 or my mail, addressing the Director at the address above.

Statement of Effects and Certification of Effects on Small Entities

This regulation will have a positive secondary economic effect on local filling stations, sporting goods stores, providers of meals, and overnight

VOL 48 ISS 87 MAY 4 1983 UMI

accommodations. It is estimated that the annual gross effect of the rule on the local economy will be $5,400. This rule will impose no costs on small entities; the exact number and the amount of business that will result from this refuge-related recreation is unknown, but the fact that the positive effects will be seasonal in nature and limited in area indicates that they will not be significant.

Because of the foregoing, the Department of the Interior has determined that this rulemaking is not a "major rule" within the meaning of Executive Order 12291 (46 FR 13192), and that the rulemaking would not have a "significant economic effect on a substantial number of small entities" within the meaning of the Regulatory Flexibility Act (Pub. L. 96–354).

List of Subjects in 50 CFR Part 32

Hunting, National Wildlife Refuge System, Wildlife, Wildlife refuges.

PART 32—HUNTING

A list of special conditions applying to the individual refuge hunt and a map of the hunt area(s) are available at refuge headquarters. In instances where permits may be required or additional restrictions may be in effect, prospective hunters should contact the refuge manager for further information. Generally, portions of refuges which are open to hunting are designated by signs and/or delineated on maps. Hunting is permitted on the Washita National Wildlife Refuge in accordance with 50 CFT Part 32, State regulations, and the following special regulations. Accordingly, it is proposed to amend 50 CFR Part 32 by adding the following to §32.12 as follows:

§32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Oklahoma

Washita National Wildlife Refuge

Waterfowl hunting is permitted only on a 300-acre area designated by signs as being open to hunting. Waterfowl hunting shall be in accordance with all applicable State and Federal regulations subject to the following special conditions:

(a) A refuge permit will be required to participate in the goose hunt. Permit application, selection and issuance will be administered by the Oklahoma Department of Wildlife Conservation, P.O. Box 53465, Oklahoma City, OK 73105.

(b) Interested individuals should submit their applications as a group, not to include more than three names. Applications will be accepted from single individuals as well as groups of two or three. If only one individual from a selected group is able to make the hunt, he will be assigned a blind. Ten blinds will be available. No more than three hunters will be allowed in a blind.

(c) To insure that all applicants will have a chance to hunt on the refuge, no applicant or group of applicants will be awarded more than one hunting date.

(d) Permits will not be transferable.

(e) Hunters are required to be present at the check station at the entrance to the hunt area one and one-half hours before sunrise. Blind assignments will be drawn at that time.

(f) Shooting hours will be from official sunrise until 11:30 a.m. All hunters must be in the hunt area by 7:00 a.m. Late hunters will not be permitted to enter. Hunters must be out of the area by 12:00 noon.

(g) Admission to the hunt will require each hunter to have in their possession: (1) A valid Oklahoma hunting license; (2) a valid Migratory Bird Hunting and Conservation Stamp; (3) a valid Oklahoma Waterfowl Hunting Stamp; and (4) a special refuge goose hunting permit for that day.

(h) Hunting will be restricted to Saturdays and Sundays during the last half of the established Oklahoma Canada goose hunting season.

(i) Each hunter will be allowed to take no more than 10 shotgun shells into the hunt area per day.

(j) Hunters may not leave the assigned blinds except to reposition decoys, if they brought them, to retrieve dead or wounded geese, or to leave the area at the end of the day's hunting.

(k) Dogs will be allowed in the hunt area if they are kept under control and are not allowed to roam.

(l) A "Special Hunter Services Recreation Fee" of $3.00 will be collected from each hunter for each hunting trip. Holders of "Golden Age Permits" will pay only $1.50.

(m) Information collection. The Service has received approval from the Office of Management and Budget for the information collection requirements of these regulations pursuant to the Paperwork Reduction Act (Pub. L. 96–511). These requirements have been approved by the Office of Management and Budget under OMB Approval No. 1018–0047. Information is being collected to assist the Service in administering these programs in accordance with statutory authorities which require that recreational uses be compatible with the primary purposes for which the areas were established. The information will be used to award benefits. Response is mandatory to obtain a benefit.

BILLING CODE 4310–55–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 628

Bluefish Fishery Management Plan; Public Hearing

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public hearings.

SUMMARY: The Mid-Atlantic Fishery Management Council will hold public hearings for input on the Bluefish Fishery Management Plan.

DATES: Written comments will be accepted until June 24, 1983. See Supplementary Information for times and locations of hearings.

ADDRESS: Send comments to: John C. Bryson, Executive Director of the Mid-Atlantic Fishery Management Council, Room 2115, Federal Building, 300 South New Street, Dover, Delaware 19901. See Supplementary Information for times and locations of hearings.

FOR FURTHER INFORMATION CONTACT: John C. Bryson, (302–674–2331) Executive Director of the Mid-Atlantic Fishery Management Council, Room 2115, Federal Building, 300 South New Street, Dover, Delaware 19901.

SUPPLEMENTARY INFORMATION: The hearings will deal with a fishery management plan which establishes a management regime for the bluefish fishery in the fishery conservation zone (from 3 to 200 miles offshore) in the western Atlantic Ocean, excluding the Gulf of Mexico.

The Mid-Atlantic Council has adopted two specific objectives for this plan:

1. Increase understanding of the condition of the stock and fishery.

2. Provide the highest availability of bluefish to U.S. recreational fishermen while maintaining, within limits, traditional uses of bluefish recognizing some natural stock fluctuations are inevitable.

The preferred alternative would restrict the use of all gear except hook and line, conventional gill nets, traps, haul seines, and pound nets to conduct a directed fishery for bluefish in the fishery conservation zone.

The U.S. fishermen using hook and line, conventional gill nets, traps, haul seines, and pound nets to conduct a directed fishery for bluefish in the fishery conservation zone would be allowed to harvest bluefish without limit. To conduct a directed fishery for bluefish in the fishery conservation zone, the use of all other gear would be prohibited unless a waiver of the prohibition were granted by the National Marine Fisheries Service.

The National Marine Fisheries Service could grant waivers to the gear prohibition if the granting of waivers was consistent with the objectives of the plan. Specifically, the National Marine Fisheries Service would be required to attempt to maintain the historical catch distribution in granting such waivers, both between sectors (8 percent of the total catch for the fishery conservation zone commercial fishery) and geographically (11 percent of the fishery conservation zone commercial catch landed in New England, 37 percent of the fishery conservation zone commercial catch landed in the Mid-Atlantic, and 52 percent of the fishery conservation zone commercial catch landed in the South Atlantic). It is recognized that these relationships cannot be maintained absolutely, but it is the Council's intent that the National Marine Fisheries Service grant waivers for the use of the restricted gear types so as to minimize the chances of major changes in these relationships. The National Marine Fisheries Service would be allowed to specify the amount of bluefish that could be caught with permits granted through waivers.

The catch distribution was arrived at by examining historical data. The distribution between the recreational and commercial fisheries has been about 88 percent and 12 percent, respectively. In order to provide some growth for the commercial fishery while still protecting the recreational fishery, it was determined to use a distribution of 80 percent recreational and 20 percent commercial. In 1981, the fishery conservation zone commercial fishery accounted for 37 percent of the total commercial catch. This was adjusted to 40 percent. If that 40 percent is applied to the overall 20 percent commercial share, the result is that the fishery conservation zone commercial fishery share is 8 percent of the total catch. The geographical distribution of the fishery conservation zone commercial catch (11 percent New England, 37 percent Mid-Atlantic, and 52 percent South Atlantic) is the average distribution for 1976–1981.

To provide a basis for granting any waivers to the gear prohibition, it would be necessry to estimate annually landings. Before the start of each fishing year (January 1) the National Marine Fisheries Service, in consultation with the Council, would be required to project the total bluefish catch: recreational catch, commercial catch by the permitted gear types, and incidental catch in fisheries using prohibited gear types. From these projections, the amount of bluefish available for catch by the prohibited gear types could be estimated, thus providing a basis for granting waivers from the gear prohibition.

The National Marine Fisheries Service would be required to establish the procedures for the waiver system. The Council suggests that persons desiring to obtain waivers from the gear prohibition file their applications by a particular date prior to the beginning of the fishing year. All of those applications could be evaluated together relative to the specified criteria with appropriate decisions made prior to the beginning of the fishing year. Fishermen could be required to specify the amount of bluefish they caught in the most recent year using the gear for which a waiver is being sought and the amount of bluefish requested to be harvested with the waiver. The National Marine Fisheries Service could evaluate these applications against the amount of bluefish available for harvest by the prohibited gear types. This would be done through a series of iterations, initially giving all fishermen what they caught in the most recent year. If there is not enough bluefish available, all fishermen would be reduced a proportional amount. If there is more than last year's catch, the excess could be granted to those fishermen who want an increase. If after those requests are filled, there is any remaining amount, it would be saved for applications submitted later in the year. Applications could be considered after that date, i.e., any time during the year, but such applications would necessarily be evaluated in light of waivers previously granted.

Bluefish can be an incidental catch in other fisheries. Therefore, this alternative provides that incidental catches of bluefish in directed fisheries for other species by fishermen without waivers using other than permitted gear types would be limited to 10 percent of the total catch on board a vessel at the end of a fishing trip.

Foreign fishermen would not be permitted to retain bluefish.

Operators of party and charter boats and persons selling bluefish would be required to have permits and submit reports, but the National Marine Fisheries Service could eliminate the reporting requirement as soon as an alternative method of obtaining the required data has been implemented. Vessels are exempt from this requirement if they catch no more than 100 pounds of bluefish per trip.

Other alternatives considered by the Council are:

- Take no action at this time.
- Allow U.S. fishermen unrestricted catches of bluefish.
- Allow U.S. fishermen unrestricted catches of bluefish, but impose a 14 inch size limit.
- Restrict bluefish catches by commercial and recreational fishermen.
- Allow U.S. recreational fishermen unrestricted catches of bluefish and restrict commercial landings.
- Prohibit the use of purse seines and pair trawls in the directed commercial fishery for bluefish.

Public Hearing

The scheduled public hearings are as follows:

May 9—Sheraton Salisbury Inn, 300 S. Salisbury Blvd., Salisbury, MD (7:00 p.m.)

May 12—Golden Eagle Inn, Beach Drive, Cape May, NJ (7:00 p.m.)

May 16—Quality Inn Lake Wright, 6280 Northhampton Blvd., Norfolk, VA (7:00 p.m.)

May 16—City Council Chambers, Stuart City Hall, 121 S. Flagler Street, Stuart, FL (7:30 p.m.)

May 17—Brunswick-Glynn County Regional Library, 208 Gloucester Street, Brunswick, GA (7:30 p.m.)

May 18—National Marine Fisheries Service Laboratory, 217 Ft. Johnson Rd., Charleston, SC (7:30 p.m.)

May 18—Travel Lodge—Route 73 at NJ Turnpike—Exit 4, Mt. Laurel, NJ (7:00 p.m.)

May 19—University of North Carolina, 601 S. College Rd., Wilmington, NC (7:30 p.m.)

May 19—Holiday Inn, Route 36, West Long Branch, NJ (7:00 p.m.)

May 20—Marine Resources Center, Bogue Banks, Morehead City/Atlantic Beach, NC (7:30 p.m.)

May 21—North Carolina Marine Resources Center, Manteo, NC (1:00 p.m.)

May 24—Legislative Services Building, 90 State Circle, Annapolis, MD (7:00 p.m.)

May 24—Room 100, Lecture Center, State University of New York at Stony

Notices

Federal Register
Vol. 48, No. 87
Wednesday, May 4, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

April 29, 1983.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96-511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Marshall L. Dantzler, Acting Department Clearance Office, USDA, OIRM, Room 108-W Admin. Bldg., Washington, D.C. 20250 (202) 447-6201.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, ATTN: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

ARMS CONTROL AND DISARMAMENT AGENCY

General Advisory Committee; Closed Meeting

In accordance with the Federal Advisory Committee Act, as amended, the U.S. Arms Control and Disarmament Agency announces the following meeting:

Name: General Advisory Committee on Arms Control and Disarmament.

Date: May 19 and 20, 1983.

Time: 9:00 a.m. each day.

Place: State Department Building, Washington, D.C.

Type of meeting: Closed.

Contact Person: Dr. Charles M. Kupperman, Executive Director of the General Advisory Committee, Room 5927, U.S. Arms Control and Disarmament Agency, Washington, D.C. 20451, telephone (202) 632-5176.

Purpose of advisory committee: To advise the Director of U.S. Arms Control and Disarmament Agency on arms control and disarmament policy and activities, and from time to time to

UMI

advise the President and the Secretary of State respecting matters affecting arms control, disarmament, and world peace.

Agenda

Will include the following discussions and presentations:

May 19

A.M. Status of the START Negotiations
P.M. Status of U.S. Strategic Modernization Programs

May 20

A.M. Chemical and Biological Weapons Issues
P.M. Discussions of the foregoing and possibly other similar matters.

REASON FOR CLOSING: The GAC members will be reviewing and discussing matters specifically required by Executive Order to be kept secret in the interest of national defense and foreign policy.

AUTHORITY TO CLOSE MEETING: The closing of this meeting is in accordance with a determination by the Acting Director of the U.S. Arms Control and Disarmament Agency dated April 11, 1983, made pursuant to the provisions of Section 10(d) of the Federal Advisory Committee Act, as amended.

John E. Grassle,
Committee Management Officer.

DEPARTMENT OF COMMERCE

Agency Forms Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of the Census
Title: Survey of Income and Program Participation—Wave 1
Form Numbers: Agency—4100, 4001, 4103, 4105, OMB-0607-0425
Type of Request: Revision
Burden: 300 respondents; 150 reporting hours
Needs and Uses: This survey is needed to improve and expand the data that are currently available on the income and general economic and financial situation of the U.S. population.
Affected Public: Individuals and households
Frequency: Three times a year
Respondent's obligation: Voluntary
OMB desk officer: Tim Sprehe, 395-4814

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals (202) 377-4217, Department of Commerce, Room 6622, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Written comments and recommendations for the proposed information collections should be sent to the respective OMB Desk Officer, Room 3235, New Executive Office Building, Washington, D.C. 20503.

Edward Michals,
Department Clearance Officer.

International Trade Administration

Preliminary Determination of Sales at Less Than Fair Value: Carbon Steel Wire Rod From Brazil

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Preliminary Determination of Sales at Less than Fair Value: Carbon Steel Wire Rod from Brazil.

SUMMARY: We preliminarily determine that carbon steel wire rod from Bazil is being sold, or is likely to be sold, in the United States at less than fair value. Therefore, we have notified the United States International Trade Commission (ITC) of our determination, and we have directed the United States Customs Service to suspend liquidation of all entries of the subject merchandise. We have directed the U.S. Customs Service to require a cash deposit or the posting of a bond for each such entry in an amount equal to the estimated dumping margin as described in the "Suspension of Liquidation" section of this notice. If this investigation proceeds normally, we will make our final determination by July 12, 1983.

EFFECTIVE DATE: May 4, 1983.

FOR FURTHER INFORMATION CONTACT: John R. Brinkmann, Jr., Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230; telephone: (202) 377-4929.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

We preliminarily determine that there is a reasonable basis to believe or suspect that carbon steel wire rod from Brazil is being sold, or is likely to be sold, in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (19 U.S.C. 1673) (the Act).

We found that the foreign market value of carbon steel wire rod from Brazil exceeded the United States price on 100 percent of sales. These margins ranged from 51.50 percent to 79.57 percent. The overall weighted-average margin on all sales compared is 65.67 percent. The weighted-average margins for individual companies investigated are presented in the "Suspension of Liquidation" section of this notice.

Case History

On September 30, 1982, we received a petition from counsel for Atlantic Steel Company, Continental Steel Corporation, Georgetown Steel Corporation, Georgetown Texas Steel Corporation, and Raritan River Steel Company on behalf of the domestic wire rod industry. In accordance with the filing requirements of 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleged that imports of carbon steel wire rod from Brazil are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act and that these imports are materially injuring, or threaten to injure, a United States industry. Petitioners also alleged that "critical circumstances" exist, as defined in section 733(e) of the Act.

After reviewing the petition, we determined that it contained sufficient grounds to initiate an antidumping investigation. We notified the ITC of our action and initiated the investigation on October 20, 1982 (47 FR 47452). On November 15, 1982, the ITC found that there is a reasonable indication that imports of carbon steel wire rod are materially injuring a United States industry. Questionnaires were presented to the Companhia Siderurgica Da Guanabara (COSIGUA) and Companhia Siderurgica Belgo-Mineira (Belgo-Mineira) on October 27, 1982. The responses were received in December, 1982.

The preliminary determination in this investigation was originally due by March 9, 1983. We subsequently determined that this investigation was "extraordinarily complicated" as defined in section 733(c)(1)(B) of the Act, and we extended the deadline for making our preliminary determination to April 28, 1983 (48 Fed. Reg. 7610).

Scope of Investigation

The merchandise covered by this investigation is carbon steel wire rod, a coiled, semi-finished, hot-rolled, carbon steel product to approximately round solid cross section, not under 0.20 inch nor over 0.74 inch in diameter, not tempered, not treated, not partly manufactured, and valued over 4 cents per pound. Wire rod is currently classifiable under item 607.17 of the *Tariff Schedules of the United States (TSUS)*.

This investigation covers the period from February 1 to July 31, 1982. COSIGUA and Belgo-Mineira are the only known Brazilian producers who export the subject merchandise to the United States. We examined 100 percent of United States sales made during the period of investigation.

Fair Value Comparison

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value.

Since we found that the Brazilian home market prices were constantly adjusted upward to reflect the high rate of inflation in Brazil during the period of investigation, we calculated, for each United States sale, a foreign market value based on home market sales which occurred immediately prior to and subsequent to the date of the United States sale. For 4 of the 5 United States sales, foreign market value was based on a weighted-average of home market sales occurring 15 days before and 15 days after the appropriate United States sale. The remaining United States sale occurred on February 2, the second day of the period of investigation. For that sale, we calculated foreign market value based on home market sales occurring February 1 through 15. We then made our fair value comparisons utilizing the appropriate foreign market value.

United States Price

As provided in section 772(b) of the Act, we used the purchase price of the subject merchandise to represent the United States price because the merchandise was sold to unrelated purchasers prior to its importation into United States. We calculated the purchase price for GOSIGUA based on the f.o.b., unpacked Brazilian port price from a company related to COSIGUA to an unrelated European company which acts as a distributor for resale to United States purchasers. In each of COSIGUA's United States sales transactions COSIGUA knew at the time of sale to the unrelated European company that the merchandise had been sold to, and was scheduled for direct shipment to, a United States company. We made deductions for COSIGUA for Brazilian inland freight, port costs, and commissions to an unrelated Brazilian agent and an unrelated United States company.

COSIGUA also claimed a circumstance of sale adjustment for subsidies which the Department of Commerce preliminarily determined existed in an earlier countervailing duty investigation of carbon steel wire rod from Brazil (47 Fed. Reg. 30550). We have not allowed this adjustment. The applicability of adjusting for export subsidies is discussed in the "Foreign Market Value" section of this notice.

We calculated the purchase price for Belgo-Mineira based on the f.o.b., packed, Brazilian port price from Belgo-Mineira to an unrelated European company, who in turn sold the merchandise to a United States trading company. We made deductions for Belgo-Mineira for Brazilian inland freight and port costs. In each of Belgo-Mineira's United States sales transactions, Belgo-Mineira knew at the time of the sale that the merchandise had been sold to, and was scheduled for direct shipment to, a United States company.

Foreign Market Value

In accordance with section 773(a)(1) of the Act, we calculated foreign market value based on home market sales of COSIGUA and Belgo-Mineira. In calculating foreign market value, we made currency conversions from Brazilian cruzieros to United States dollars in accordance with section 353.56(a)(1) of the Commerce Regulations using the certified daily exchange rates.

COSIGUA

The home market sales reported by COSIGUA and used in our calculation of foreign market value were of AISI category identical to the AISI category sold by COSIGUA in the United States. All home market sales reported by COSIGUA were to unrelated companies. We calculated the foreign market value for COSIGUA by deducting freight costs from the unpacked C & F prices. Deductions were also made for indirect selling expenses in the home market to offset the commissions paid on its United States sales. An adjustment was made, where appropriate, for differences in credit costs in accordance with

VOL
48
ISS
87
MAY
4
1983
UMI

section 353.15 of the Commerce Regulations.

COSIGUA requested that we make additional allowances for the cost of warranty service, bad debt, technical services, level of trade differences and an "economic correlation adjustment" for net inflation. We have preliminarily determined that warranty service, bad debt and technical services are not allowable under section 353.15 of the Commerce Regulations, as we did not consider these items to be circumstances of sale bearing a direct relationship to sales of the wire rod in the home market.

The level of trade adjustment claimed by COSIGUA was to compensate for differences in levels of trade existing between the United States market and the home market for sales of wire rod. Pursuant to section 353.19 of the Commerce Regulations, the deduction was disallowed because COSIGUA was not able to demonstrate differences in pricing arising out of sales of such or similar merchandise at different levels of trade in the home market.

COSIGUA claimed we should make the "economic correlation" adjustment to home market prices to compensate for the high Brazilian inflation rate and for the alleged failure of the government of Brazil to devalue the Brazilian cruziero at rates consistent with domestic inflation. They further alleged that the combination of these circumstances creates an artificially high foreign market value when the cruziero based foreign market value is converted to U.S. dollars at the official rate of exchange. We do not consider the "economic correlation" adjustment to be the type of circumstance of sale expense allowable under section 353.15 of the Commerce Regulations. COSIGUA has not demonstrated that the alleged circumstance of sale is a cost of selling wire rod.

Belgo-Mineira

Belgo-Mineira had no home market sales of wire rod which were identical in physical characteristics to the AISI category wire rod sold to the United States. Accordingly, the home market sales used in our calculation of Belgo-Mineira's foreign market value were of "similar" merchandise as defined in section 771(16)(B) of the Act. The home market sales reported by Belgo-Mineira were to both related and unrelated customers. Pursuant to section 353.22(b) of the Commerce Regulations, we found that sales to Belgo-Mineira's related customers to be at prices comparable to those at which such or similar merchandise was sold to customers unrelated to Belgo-Mineira. Therefore, we used sales to both related and unrelated customers in our calculation for foreign market value.

We calculated the foreign market value for Belgo-Mineira based on the net ex-factory packed prices to both related and unrelated home market customers. Adjustments were made for differences in credit costs, directly related warranty expenses, and packing costs. A quantity discount adjustment claimed by Belgo-Mineira under § 353.14 of the Commerce Regulations was not allowed because Belgo-Mineira was not able to demonstrate that the discounts were justified based on cost savings or that they had been granted with respect to 20 percent or more of sales of such or similar merchandise in the home market. We have further determined that adjustments claimed by Belgo-Mineira for technical services are not allowable under §353.15 of the Commerce Regulations, as Belgo-Mineira could not demonstrate that these adjustments had a direct relationship to the sales of wire rod in the home market.

Both COSIGUA and Belgo-Mineira claim adjustments for the subsidies which the Department of Commerce preliminarily determined existed in an earlier countervailing duty investigation of carbon steel wire rod from Brazil (47 FR 30550). The estimated net subsidy in that preliminary determination, dated July 8, 1982, was 14.31 percent *ad valorem*. On September 21, 1982, the Department of Commerce (the Department) and the government of Brazil concluded a suspension agreement pursuant to section 704 of the Act under which the government of Brazil has agreed to impose an export tax equal to the net subsidy amount on all shipments of carbon steel wire rod shipped from Brazil to the United States on or after October 20, 1982 (47 FR 42399).

Both Belgo-Mineira and COSIGUA contend that the claimed adjustments are necessary to account for the subsidies. COSIGUA claims this adjustment is consistent with adjustments to United States price required under Section 772(d) of the Act, since export subsidies increase the ex-factory price on export sales in the same way that rebates or forgiveness of internal taxes or import duties increase net return on export sales, or that export taxes and U.S. import duties reduce net return. COSIGUA further claims that the Department should not reject the adjustment for subsidies on the grounds that an export tax offsetting the subsidies has been imposed, since the base period price being used in the present antidumping calculations precedes the imposition of the export tax.

We do not consider subsidies received by respondents to be a circumstance of sale allowable under § 353.15 of the Commerce Regulations. The Act does provide for export subsidies but not as a circumstance of sale adjustment. Rather, section 772(d)(1) of the statute takes into account the recipt of export subsidies by a foreign producer when a countervailing duty has been imposed, by increasing the purchase price. Section 772(d)(2) requires that the purchase price not be reduced for export taxes levied on the export of merchandise to the United States specifically intended to offset the subsidies received. The fact that section 772(d) specifically addresses those situations when the Department should make an adjustment for export subsidies in its antidumping calculations indicates that Congress did not intend that a circumstance of sale adjustment be made for export subsidies.

Affirmative Determination of Critical Circumstances

Counsel for petitioners alleged that imports of carbon steel wire rod from Brazil present "critical circumstances." Under Section 733(e)(1) of the Act, critical circumstances exist when the Department has a reasonable basis to believe or suspect that: (1) there have been massive imports of the merchandise under investigation over a relatively short period; and (2)(a) there is a history of dumping in the United States or elsewhere of the merchandise under investigation, or (b) the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise under investigation at less than its fair value.

In preliminarily determining whether there is a reasonable basis to believe or suspect that there have been massive imports over a relatively short period, we considered the following factors: recent import penetration levels; changes in import penetration since the date of the ITC's preliminary affirmative determination of injury; whether imports have surged recently; whether recent imports are significantly above the average calculated over the several years (1980–1982); and whether the patterns of imports over that three-year period may be explained by seasonal swings. Based upon our analysis of the information, we preliminarily determine that imports of the products covered by this investigation do appear massive over a relatively short period (November, 1982 through February, 1983).

We therefore proceeded to consider whether there is a history of dumping of carbon steel wire rod from Brazil in the U.S. or elsewhere. We reviewed past antidumping findings of the Department of the Treasury as well as past Department of Commerce antidumping orders. There have been no past United States antidumping determinations on carbon steel wire rod from Brazil. We also reviewed the antidumping actions of other countries made available to us through the Antidumping Code Committee established by the Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade. We found no history of dumping of this product form Brazil.

We then considered whether the person by whom, or for whose account, this product was imported knew or should have known that the exporter was selling this product at less than its fair value. It is the Department's position that a reasonable basis to believe or suspect that the importer knew or should have known that a product was being sold at less than its fair value exists where margins calculated on the basis of responses to the Department's questionnaire are sufficiently large that the importer knew or should have known that prices for sales to the United States (as adjusted according to the antidumping law) were significantly below home market sales prices. In this case, the margin calculate on the basis of responses to the Department's questionnaire is sufficiently large, even though there is no corporate relationship between the exporters and importers, that there is a reasonable basis to believe or suspect that the importer knew or should have known that the merchandise was being sold in the United States at less than fair value.

For the reasons described above, we preliminarily determine that critical circumstances do exist with respect to carbon steel wire rod from Brazil.

Verification

For purposes of this preliminary determination, we verified sales data and information relative to adjustments claimed by COSIGUA and Belgo-Mineira using standard verification procedures, including examination of accounting records and selected documents containing relevant information. As provided in section 776(a) of the Act, all data used in reaching the final determination will be verified.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the United States Customs Service to suspend liquidation of all entries of carbon steel wire rod. This suspension of liquidation applies to all merchandise entered, or withdrawn from warehouse, for consumption, on or after the date which is 90 days before the date of publication of this notice in the **Federal Register**. The Customs Service shall require a cash deposit or the posting of a bond equal to the estimated weighted-average margin amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price. The suspension of liquidation will remain in effect until further notice. The weighted-average margins are as follows:

Manufacturers/producers/exporters	Weighted-average margin (percent)
COSIGUA	54.12
Belgo-Mineria	75.54
All Other Manufacturers/Producers/Exporters	65.87

ITC Notification

In accordance with section 733(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all non-privileged and non-confidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration.

The ITC will determine whether these imports are materially injuring or threatening to materially injure a U.S. industry, before the later of 120 days after the Department makes its preliminary affirmative determination or 45 days after the Department makes a final affirmative determination.

Public Comment

In accordance with § 353.47 of the Commerce Department Regulations, if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 10 a.m. on May 20, 1983, at the United States Department of Commerce, conference room D, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230. Individuals who with to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room 3099B, at the above address within 10 days of this notice's publication. Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs in at least 10 copies must be submitted to the Deputy Assistant Secretary by May 13, 1983. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, within 30 days of this notice's publication, at the above address and in at least 10 copies.

Judith H. Bello,

Acting Deputy Assistant Secretary for Import Administration.

April 27, 1983.

BILLING CODE 3510-25-M

Preliminary Determination of Sales at Less Than Fair Value; Carbon Steel Wire Rod From Trinidad and Tobago

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Preliminary Determination of Sales at Less than Fair Value; Carbon Steel Wire Rod from Trinidad and Tobago.

SUMMARY: We preliminarily determine that carbon steel wire rod from Trinidad and Tobago is being sold, or is likely to be sold, in the United States at less than fair value. Therefore, we have notified the United States International Trade Commission (ITC) of our determination, and we have directed the United States Customs Service to suspend liquidation of all entries of the subject merchandise which is entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice and to require a cash deposit or the posting of a bond for each such entry in an amount equal to the estimated dumping margin of 14.2 percent.

If this investigation proceedings normally, we will make our final determination by July 12, 1983.

EFFECTIVE DATE: May 4, 1983.

FOR FURTHER INFORMATION CONTACT: John R. Brinkmann, Jr. or Mary Jenkins, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230; telephone: (202) 377–4929 or 377–4136.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

We preliminarily determine that there is a reasonable basis to believe or suspect that carbon steel wire rod from Trinidad and Tobago is being sold, or is likely to be sold, in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (19 U.S.C. 1673) (the Act).

We found that the foreign market value of carbon steel wire rod exceeded the United States price on 97.3 percent of sales. These margins ranged from 3.7 percent to 125.3 percent. The overall weighted-average margin on all sales compared is 14.2 percent.

Case History

On September 30, 1982, we received a petition from counsel for Atlantic Steel Company, Continental Steel Corporation, Georgetown Steel Corporation, Georgetown Texas Steel Corporation, and Raritan River Steel Company on behalf of the domestic carbon steel wire rod industry. In accordance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleged that imports of carbon steel wire rod from Trinidad and Tobago are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act and that these imports are threatening to materially injure a United States industry. Counsel for petitioners also alleged that "critical circumstances" exist, as defined in section 733(e) of the Act.

After reviewing the petition, we determined that it contained sufficient grounds upon which to initiate an antidumping investigation. We notified the ITC of our action and started the investigation on October 20, 1982 (47 FR 47453). On November 15, 1982, the ITC found that there is a reasonable indication that imports of carbon steel wire rod are materially injuring a United States industry.

A questionnaire was presented to the Iron and Steel Company of Trinidad and Tobago (ISCOTT) on November 1, 1982. The response was received on December 15, 1982. The preliminary determination in this investigation was originally due by March 9, 1983. Pursuant to section 733(c)(1)(A) of the Act, we subsequently postponed the preliminary determination to not later than April 28, 1983 (48 FR 7610).

Scope of Investigation

The merchandise covered by this investigation is carbon steel wire rod, a coiled semi-finished, hot-rolled carbon steel product of approximately round solid cross section, not under 0.20 inch nor over 0.74 inch in diameter, not tempered, not treated, not partly manufactured, and valued over 4 cents per pound. Wire rod is currently classifiable under item 607.17 of the *Tariff Schedules of the United States (TSUS).*

This investigation covers the period from April 1 to September 30, 1982. ISCOTT is the only known producer and exporter of carbon steel wire rod exported to the United States. We examined 100 percent of ISCOTT's sales of the subject product to the United States.

Fair Value Comparison

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value.

United States Price

As provided in section 772(b) of the Act, we used the purchase price of the subject merchandise to represent the United States price because the merchandise was sold to unrelated purchasers prior to its importation into the United States. We calculated the purchase price based on the c.i.f., duty-paid, delivered price to unrelated U.S. customers. We made deductions on all United States prices for United States and foreign inland freight, ocean freight, insurance, commissions to an unrelated agent, United States duty and United States port costs. We made additional deductions, where appropriate, for U.S. warehousing. ISCOTT claimed an adjustment to serveral United States sales for differences between ISCOTT's mill weight and the certified scale weight at discharge port. In their response, ISCOTT adjusted the unit prices for the value of such differences but did not make similar adjustments to the quantity of each United States sale. This adjustment is not allowable because scale weight adjustments constitute nothing more than a recalculation of quantity sold and the total selling price.

Foreign Market Value

In accordance with section 773(a)(1) of the Act, we calculated foreign market value based on home market sales by ISCOTT. For purposes of determining such of similar merchandise according to section 771(16) of the Act, we have made comparisons based on grade categories selected by Commerce Department industry experts.

We calculated the foreign market value for ISCOTT on the basis of ex-mill, unpacked prices to unrelated home market purchasers. In instances where ISCOTT's U.S. sales involved commissions to unrelated sellers, adjustments were made for indirect selling expenses in the home market to offset the U.S. commissions. Where appropriate, an adjustment was made for differences in credit costs.

ISCOTT requested that we deduct the cost of technical services, post-sale warehousing and advertising from the home market prices. Pursuant to Commerce Regulations 353.15 we disallowed the technical services and advertising adjustments claimed by ISCOTT as they were not directly related to specific sales of carbon steel wire rod in the home market. The warehousing adjustment claimed by ISCOTT has also been disallowed under § 353.15. While ISCOTT did allocate wire rod to specific customer orders in its production and inventory control records, the merchandise was never set aside as "sold" and therefore remained available to meet the general inventory needs and sales commitments of ISCOTT. We have determined that the merchandise is a part of ISCOTT's standing inventory, rather than merchandise that is warehoused for a specific customer.

Negative Determination of Critical Circumstances

Counsel for the petitioners alleged that imports of carbon steel wire rod from Trinidad and Tobago present "critical circumstances." Under section 733(e)(1) of the Act, critical circumstances exist when there is a reasonable basis to believe or suspect that: (1) there is a history of dumping in the United States or elsewhere of the class or kind of the merchandise which is the subject of the investigation; or the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value; and that (2) there have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relative short period.

We reviewed past antidumping findings of the Department of Treasury as well as past Department of Commerce antidumping orders to determine whether there is a history of dumping of carbon steel wire rod from Trinidad and Tobago in the United States or elsewhere. There have been no past United States antidumping determinations on carbon steel wire rod from Trinidad and Tobago. We also reviewed the antidumping actions of other countries made available to us through the Antidumping Code Committee established by the Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade. We found no history of dumping of this product from Trinidad and Tobago.

We then considered whether the person by whom, or for whose account, this product was imported knew or should have known that it was being sold at less than it fair value. We have no evidence that importers had such knowledge. Nor is the preliminary margin sufficiently large in and of itself to warrant a reasonable belief or suspicion that importers should have known that this product was being sold at less than fair value—particularly where, as here, importers and exporters are unrelated companies.

For the reasons described above, we preliminarily determine that critical circumstances do not exist with respect to carbon steel wire rod from Trinidad and Tobago.

Verification

For purposes of this preliminary examination, we verified sales data and information relative to adjustments claimed by ISCOTT by using standard verification procedures, including examination of accounting records and selected documents containing relevant information. As provided in section 776(a) of the Act, all data used in reaching the final determination will be verified.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the United States Customs Service to suspend liquidation of all entries of carbon steel wire rod as described in the "Scope of Investigation" section of this notice. This suspension of liquidation applies to all of the subject merchandise entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the **Federal Register**. The Customs Service shall require a cash deposit or the posting of a bond equal to the estimated weighted-average margin amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price. The suspension of liquidation will remain in effect until further notice. the weighted-average margin is 14.2 percent.

ITC Notification

In accordance with section 733(f) of the Act, we will notify the ITC of our determination. In addition,we are making available to the ITC all nonprivileged and nonconfidential information relating to this investigation. we will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicy or under an administrative protective order, without the written consent of the Deputy (for Policy) to the Deputy Assistant Secretary for Import Administration.

The ITC will determine whether these imports are materially injuring or threatening to materially injure a U.S. industry, before the later of 120 days after the Department makes its preliminary affirmative determination or 45 days after the Department makes a final affirmative determination.

Public Comment

In accordance with section 353.47 Commerce Regulations, if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 2 p.m. on May 20, 1983, at the United States Department of Commerce, Conference Room D, 14th Street and Constitution Avenue, N.W, Washington, D.C. 20230. Individuals who wish to participate in the hearing must submit a request to the deputy (for Policy) to the Deputy Assistant Secretary for Import Administration, Room 3099B, at the above address within 10 days of this notice's publication. Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed.

In addition, prehearing briefs in at least 10 copies must be submitted to the Deputy (for Policy) to the Deputy Assistant Secretary by May 13, 1983. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, within 30 days of this notice's publication, at the above address and in at least 10 copies.

April 27, 1983.

Judith H. Bello

Certain Electric Motors From Japan; Correction to Notice of Final Results of Administrative Review of Antidumping Duty Order

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice of Correction to Notice of Final Results of Administrative Review of Antidumping Duty Order.

SUMMARY: On April 5, 1983, the Department of Commerce published the final results of its administrative review of the antidumping duty order on certain electric motors from Japan (48 FR 14719–14722).

Due to a clerical error, that notice incorrectly gave 6.3% as the margin and estimated antidumping duty cash deposit rate for Toshiba Corporation. The correct rate for Toshiba is 4.3%. Therefore, the hightest current rate for responding firms is also 4.3%, not 6.3%

EFFECTIVE DATE: May 4, 1983.

FOR FURTHER INFORMATION CONTACT: F. Patrick Pope or Susan M. Crawford, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377–2923/5255.

Dated: April 28, 1983.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

Minority Business Development Agency

Solicitation of Applications Under Minority Business Development Program

AGENCY: Department of Commerce.

ACTION: Notice.

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting applications under its Minority Business Development Center (MBDC) program to operate one project for a 12-month period beginning October 1, 1983 in the Vallejo SMSA. The minimum total program cost will be $198,000. The maximum Federal participation amount is $168,300. The minimum amount required for non-Federal participation is $29,700. The award No. is 09–10–83018–01.

Applicants shall be required to contribute at least 15% of the total program cost through non-Federal funds.

VOL
48

Cost sharing contributions can be in the form of cash contributions, fee for services or in-kind contributions.

CLOSING DATE: May 20, 1983.

ADDRESS: Minority Business Development Agency, U.S. Department of Commerce, 450 Golden Gate Avenue, Box 36114, San Francisco, California 94102.

FOR FURTHER INFORMATION CONTACT: Mr. Mikel Cook at 415/556-6733.

SUPPLEMENTARY INFORMATION:

A. Scope and Purpose of this Announcement. Executive Order 11625 authorizes MBDA to fund projects which will provide technical and management assistance to eligible clients in areas related to the establishment and operation of businesses. The MBDC program is specifically designed to assist those minority businesses that have the highest potential for success. In order to accomplish this, MBDA supports MBDC programs that can: coordinate and broker public and private sector resources on behalf of minority individuals and firms; offer them a full range of management and technical assistance; and serve as a conduit through which and from which information and assistance to and about minority businesses are funneled.

B. Eligible Applicants. Awards shall be open to all individuals, non-profit organizations, for-profit firms, local and state governments, American Indian tribes and educational institutions.

C. Evaluation Process. All proposals received as a result of this announcement will be evaluated by a MBDA review panel.

D. Evaluation Criteria for Minority Business Development Center Applications. The evaluation criteria is designed to facilitate an objective evaluation of competitive applications for the Minority Business Development Center program.

MBDA reserves the right to reject any or all applications, including the application receiving the highest evaluation, and will exercise this right when it is determined that it is in the best interest of the Government to do so (e.g., the apparent successful applicant has serious unresolved audit issues from current or previous grants, contracts or cooperative agreements with an agency of the Federal Government).

Evaluation of proposals will employ the following criteria:

I. *Capability and Experience of Firm/Staff*—provide information that demonstrates the organization's capabilities and prior experiences in addressing the needs of minority business individuals and firms. Provide information that demonstrates the staff's capabilities and prior experiences in providing management and technical assistance to minority individuals and firms. Indicate previous experience in MBE community to be served in terms of: inventorying resources and opportunities; the brokering thereof; and providing management and technical assistance.

The following are key factors to be considered in this section:

Firm.

—The organization's receptivity in the MBE community to be served, i.e., business contacts in the public and private sector; leadership responsibilities; and experience in assisting MBE business persons and firms. (References from clients assisted are pertinent.)

—background credentials and references for the owners of the organization and a capability statement of what the organization can do.

—Knowledge of the geographic area to be served in terms of the needs of minority businesses and past ongoing relationships with local, public and private—entities that can possibly enhance the BDC program effort —i.e., Chambers of Commerce, trade association, venture capital organizations, banks, SBA, HUD, state, city and county government agencies, etc.

Staff.

—List personnel to be used. Indicate their salaries, educational level and previous experience. Provide resumes for all professional staff personnel.

—Demonstrate competence among staff to effectuate mergers, acquisitions, spin-offs and joint-ventures.

—Provide organizational chart, job descriptions and qualification standards involving all professional staff persons to be utilized on the project.

—If any contractors are to be utilized, identify and indicate areas and level of experience. *Primary consideration will be given to inhouse capability.*

Note.—All contracting proposed should be in accordance with procurement standards in Attachment O of OMB Circulars A-110 or A-102.

II. *Techniques and Methodology*—specify plans for achieving the goals and objectives of the project. This section should be developed by using the outline of the Work Requirements and the MBDC responsibilities as *guides* and will become part of the award document. Include start-up plan and example of work plan format. fully explain the procedures for: outreach, screening, assisting and monitoring clients; maintaining the profile inventory of minority businesses; and brokering of new business ownership, market and capital opportunities and prevention of business failures. In summary, address how, when and where work will be done and by whom. Include level of performance.

III. *Resources*—address technical and administrative resources, i.e., computer facilities, voluntary staff time and space; and financial resources in terms of meeting MBDA's 10% cost-sharing requirement and including a fee for services for assistance provided clients. A fee for services in the amount of 10% of the cost of assistance will be charged to all clients receiving management and technical assistance.

Cost-sharing is that portion of project costs not borne by the Federal Government. The composition and amount of cost-sharing are key factors that will be considered in determining the merit of this section. The cost sharing requirement can be met through the following order or priority: (1) cash contributions; (2) fee for services; and (3) in-kind contributions.

A. *Cash contribution*—means cash that is contributed or donated by the recipient, and other non-Federal sources, i.e., public agencies and institutions, private organizations, corporations and individuals.

B. *Fee for services*—is a charge to a client for assistance provided by the MBDC for M&TA and/or SCS.

C. *In-Kind contribution*—represents the value of non-cash contributions provided by the recipient and other non-Federal sources. The order of priority for in-kind contributions are: high technology systems to be utilized to achieve program objectives; top level staff personnel and real and personal property donated by other public agencies, institutions and private organizations. Property purchased with Federal funds will not be considered as the recipient's in-kind contribution. Under no circumstances can the in-kind contribution exceed 50% of the total non-Federal contribution.

IV. *Costs*—demonstrate in narrative format that costs being proposed will give the minority business client and the government the most effective program possible in terms of quality, quantity, timeliness and efficiency.

Include the principal costs involved for achieving work plan under Cooperative Agreement by completing Part III—the Budget Information Section of the Request for Application.

Provide cost-sharing plan information in terms of methodology and format for billing the costs of management and technical assistance and specialized consulting services to clients.

Total project cost will be evaluated in terms of:

—Clear explanations of all expenditures proposed, and

—The extent to which the applicant can leverage Federal program funds and operate with *economy* and *efficiency*.

In conclusion, the applicant's schedule for start of the MBDC operation should be included in Part II. Part II will be known as the applicant's plan of operation and will be incorporaed into the Cooperative Agreement Award.

A detailed justification of all proposed costs is required for Part III and each item must be full explained.

The failure to supply information in any given category of the criteria will result in the application being considered non-responsive and dropped from competitive review.

All information submitted is subject to verification by MBDA.

E. Disposition of Proposals. Notification of awards will be made by the Grants Officer, U.S. Department of Commerce (DOC) Organizations whose proposals are unsuccessful will be advised by MBDA, DOC.

F. Proposal Instructions and Forms. This program is subject to OMB Circular A-95 requirements.

Questions concerning the preceding information, copies of application forms, and applicable regulations can be obtained at the above address.

Nothing in this solicitation shall be construed as committing MBDA to divide available funds among all qualified applicants.

G. A pre-application conference to assist all interested applicants will be held at the above address on May 3, 1983 at 10:00 A.M. Room 13029 (13th floor).

(11.800 Minority Business Development, Catalog of Federal Domestic Assistance)

Dated April 29, 1983.

Powell M. Daniel,

Acting Regional Director.

BILLING CODE 3510-21-M

National Oceanic and Atmospheric Administration

Intent To Prepare a Draft Management Plan and Environmental Impact Statement for the Proposed Hawaii Humpback Whale National Marine Sanctuary

AGENCY: Office of Ocean and Coastal Resource Management (OCRM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: Title III of the Marine Protection, Research and Sanctuaries Act of 1972, as amended, authorizes the Secretary of Commerce, with Presidential approval, to designate ocean waters as national marine sanctuaries for the purpose of preserving or restoring their distinctive conservation, recreational, ecological, and aesthetic values. A nomination for establishing a Humpback Whale National Marine Sanctuary in Hawaiian waters was included on the List of Recommended Areas published in the **Federal Register** on October 31, 1979 (44 FR 62552) and, following interagency consultation, NOAA declared the site an Active Candidate on March 17, 1982 (47 FR 11544). The Office of Ocean and Coastal Resource Management (OCRM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA) intends to prepare with the assistance of the State of Hawaii, a Draft Sanctuary Management Plan (DMP) and complementary Draft Environmental Impact Statement (DEIS) for the proposed Humpback Whale National Marine Sanctuary in Hawaii. The views and comments received during this phase in the countinuing evaluation of the proposal will aid NOAA in determining: (1) The purposes for and objectives in managing the sanctuary in Hawaii: (2) the scope and content of the management plan for achieving them; and (3) the alternatives to the proposed action including the degree to which the alternatives may affect the natural and human environments.

FOR FURTHER INFORMATION CONTACT: Mr. Kelvin Char, Regional Sanctuary Projects Manager, Sanctuary Programs Division, Office of Ocean and Coastal Resource Management, NOS/NOAA, 3300 Whitehaven Street, N.W., Washington, D.C. 20235, (202) 634-4236.

SUPPLEMENTARY INFORMATION: In December 1977, NOAA received a proposal from a private researcher calling for the establishment of a humpback whale marine sanctuary in Maui County waters. In December 1979, NOAA convened in Hawaii a panel of whale experts to discuss and evaluate alternatives for protecting the endangered humpback whale. The panelists concluded, among their other findings, that the designation of a marine sanctuary was the most certain route for assuring the continued protection of the whale in Hawaiian waters. A series of public information meetings were conducted in Hawaii during October 1981 to further discuss the proposal and the panel's recommendations, and receive comment on the feasibility and desirability of proceeding with the nomination. Following these discussions, an Issue Paper was prepared and meetings held in Hawaii to receive public comment and recommendations on the management alternatives for the proposed 784 square nautical mile marine sanctuary. All of these discussions have assisted NOAA in its cooperative evaluation, with the State of Hawaii, of the issues surrounding the sanctury proposal.

NOAA now intends to proceed, still with the full cooperation of the State and other relevant interests in Hawaii, with the preparation of the DMP for the sanctuary and its companion DEIS. Should they be required, additional scoping meetings will be held in Hawaii during May 1983 in accordance with Section 1501.7 of the regulations for implementing the National Environmental Policy Act (42 U.S.C. 4321 et seq.), as amended.

Interested parties who wish to submit suggestions, comments, or substantive information on the sanctuary proposal are invited to contact the Federal contact listed above or Richard Poirier, the Department of Planning and Economic Development, State of Hawaii, P.O. Box 2359, Honolulu, Hawaii, 96804, (808) 548-4609.

CONSUMER PRODUCT SAFETY COMMISION

Notification of Proposed Collection of Information

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1981 (44 U.S.C. 3501 *et seq.*), the Consumer Product Safety Commission has submitted to the Office of Management and Budget a request for extension of approval, through May 1, 1986, of information collection requirements in a regulation applicable to mattresses and

VOL

MY
4
1983
UMI

mattress pads. The regulation, published at 16 CFR Part 1632, is intended to reduce the unreasonable risk of burn injuries and deaths from fires associated with mattresses and mattress pads. The regulation prescribes a test to assure that a mattress and mattress pad will resist ignition from a smoldering cigarette and bans from sale and distribution noncomplying mattresses and mattress pads, under provisions of the Flammable Fabrics Act (15 U.S.C. 1193). Additionally, the regulation and an enforcement rule issued under section 5 of the Flammable Fabrics Act require manufacturers to perform prototype and sampling tests and to maintain a record of required tests, plus certain other records for a least three years.

Information about the Proposed Collection of Information.

Agency address: Consumer Product Safety Commission, 1111 18th Street, NW., Washington, D.C. 20207.

Title of information collection: Standard for the Flammability of Mattresses and Mattress Pads, 16 CFR 1632.

Type of request: Extension of approval.

Frequency of collection: Varies depending upon volume of products manufactured, tested, or sold.

General description of respondents: Manufacturers of mattresses and mattress pads.

Estimated number of respondents: 800

Estimated average number of hours per response: ¼-hour for records and 3 for tests.

Comment: Comments on this proposed collection of information should be addressed to Gwen Pla, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, telephone: (202) 395–7313. Copies of the proposed collection of information are available from Francine Shacter, Office of Budget and Program Implementation, Consumer Product Safety Commission, Washington, D.C. 20207, telephone (301) 492–6529.

This is not a proposal to which 44 U.S.C. 3504(h) is applicable.

Dated: April 29, 1983.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

Notification of Proposed Collection of Information

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1981 (44 U.S.C. 3501 *et seq.*), the Consumer Product Safety Commission has submitted to the Office of Management and Budget a request for approval, through June 30, 1984, of information collection associated with a contract study on structural entrapment. In its regulatory and enforcement work, the Commission uses data on various body measurements of children to evaluate whether certain consumer products present a risk of entrapment to children. Such information must be representative of the U.S. population. The Commission therefore plans to have a contractor collect from parents, through day care centers and other institutions, information on race, demographics, and socio-economic factors. The information will be collected by means of a questionnaire and will be used to define a sample of subjects that is as representative as possible.

Information about the Proposed Collection of Information:

Agency address: Consumer Product Safety Commission, 1111 18th Street, NW., Washington, D.C. 20207.

Title of information collection: Structural Entrapment.

Type of request: Initial approval.

Frequency of collection: Nonrecurring.

General description of respondents: Parents of children, 0 to 48 months of age in one or two large metropolitan areas.

Estimated number of respondents: 250.

Estimated average number of hours per response: 1/30.

Comments: Comments on this proposed collection of information should be addressed to Gwen Pla, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, telephone: (202) 395–7313. Copies of the proposed collection of information are available from Francine Shacter, Office of Budget and Program Implementation, Consumer Product Safety Commission, Washington, D.C. 20207, telephone: (301) 492–6529.

This is not a proposal to which 44 U.S.C. 3504(h) is applicable.

Dated; April 29, 1983.

BILLING CODE 3810–01–M

DEPARTMENT OF EDUCATION

Office of Postsecondary Education

Guaranteed Student Loan Program

AGENCY: Department of Education

ACTION: Notice of Redesignation of the Guaranteed Student Loan Program as a Credit Assistance Program Authorized by Law for an Economically Disadvantaged Class of Persons Under the Equal Credit Opportunity Act.

SUMMARY: The Assistant Secretary for Postsecondary Education announces the redesignation of the Guaranteed Student Loan (GSL) Program as a "special purpose credit program" within the meaning of Section 202.8(a)(1) of Regulation B, Equal Credit Opportunity. The Omnibus Budget Reconciliation Act of 1981, Pub. L. 97–35, amended Title IV–B of the Higher Education Act of 1965, as amended to reinstate the limitation on eligibility for Federal interest benefits to those borrowers under the GSL Program who demonstrate financial need for a subsidized loan. The amendment thereby reconstituted the GSL Program as a credit assistance program authorized by law for an economically disadvantaged class. As such a special purpose credit program, the GSL Program is exempted from certain restrictions of the Equal Credit Opportunity Act (ECOA), and Regulation B, which implements the ECOA.

SUPPLEMENTARY INFORMATION: The ECOA prohibits discrimination against credit applicants on the basis of race, color, religion, national origin, sex, marital status, age (provided that the applicant has the capacity to enter into a binding contract), receipt of income from a public assistance program or the exercise of any right under the Consumer Credit Protection Act. However, a creditor does not discriminate if it refuses to extend credit offered pursuant to any credit assistance program expressly authorized by law for an economically disadvantaged class of persons if that refusal is made pursuant to the requirements of that program. 15 U.S.C. 1691(c)(1). This exemption is incorporated in § 202.8 of Regulation B, 12 CFR 202.8, which was promulgated by the Federal Reserve Board pursuant to its statutory mandate to promulgate regulations to implement the ECOA 15 U.S.C. 1691b.

The Board of Governors of the Federal Reserve System has issued a formal interpretation of § 202.8 in which it stated that a credit program is considered to be "expressly authorized by Federal or State law" if it is authorized by the terms of a Federal or State statute or by a regulation lawfully promulgated by the administering agency (42 FR 40424, August 10, 1977). The Board stated that "a creditor participating in a loan program expressly authorized by Federal or State law will not violate Regulation B by complying in good faith with the law authorizing a program or with a regulation promulgated by an administering agency to implement a program that the agency has determined to be a special purpose credit program under § 202.8(a)(1) of Regulation B." The Board declared that the determination as to whether a particular program benefits an "economically disadvantaged class of persons" is properly made by the agency charged with the administration of the loan program.

Background

The GSL Program was established under Title IV Part B of the Higher Education Act of 1965, as amended, 20 U.S.C. 1071 et seq., to provide the benefits of higher education to borrowers with modest means. The legislative history shows Congress' determination that the "heavy concentration of expenses" incurred for higher education costs placed low and even middle-income families at a

VOL
48
ISS
87
MAY
4
1983
UMI

significant economic disadvantage, and unduly limited their access to higher education. H.R. Rep. No. 621, 89th Congress 1st Session (1965), p.29. To ease that burden, under section 428 of that Act Congress expressly authorized Federal interest subsidies on loans made to borrowers with family incomes below $15,000.

In a November 1, 1977 bulletin to participating lenders, the Office of Education (OE), the agency administering the GSL Program determined that the GSL Program was a "credit assistance program expressly authorized by Federal or State law for the benefit of an economically disadvantaged class of persons," within the meaning of section 202.8(a)(1) of Regulation B.

On November 1, 1978, Congress enacted the Middle Income Student Assistance Act (Pub. L. 95–566), which amended section 428 of the Higher Education Act to eliminate the limitations on family income as an eligibility requirement for Federal interest benefits under the GSL Program. Because Pub. L. 95–566 made Federal interest benefits available to all borrowers without regard to family income, it removed the GSL Program from the category of special purpose credit programs "for the benefit of an economically disadvantaged class of persons." Participating lenders were so notified by OE in a March 27, 1979 bulletin, and advised to comply with the terms of Regulation B. That directive was then incorporated into GSL Program regulations (45 CFR 177.104, 44 FR 53868, September 17, 1979, redesignated 34 CFR 682.104, 45 FR 77369, November 21, 1980).

The Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35) further amended section 428 of the Higher Education Act to reinstate the requirement that borrowers prove financial need for a loan in order to qualify for Federal interest benefits. The statute deems all borrowers with family incomes below $30,000 to have financial need for a subsidized loan to meet that portion of their cost of education not met by other student assistance. The law requires borrowers with family incomes in excess of $30,000 to prove actual financial need for a subsidized loan after deducting from that cost both available aid and a family contribution from disposable income. The legislative history demonstrates the same Congressional awareness of the need for subsidized loans as that shown in enacting the program legislation in 1965. *See* Sen. Rep. No. 139, 97th Congress, 1st Session (1981), pp. 893, 894. This change reconstituted the GSL Program as one authorized by law for an economically disadvantaged class; on the effective date of those statutory changes, the GSL program became, once again, a special purpose credit program under section 202.8(a)(1) of Regulation B. This notice of redesignation as a special credit program merely articulates the consequences under the ECOA of those statutory changes to the Higher Education Act.

Current GSL Program regulations, which were promulgated September 17, 1979 when the GSL Program was not a special purpose credit program, state that the GSL Program is subject to the ECOA and Regulation B (34 CFR 682.104). Although the GSL Program, because of the changes made by Pub. L. 97–35, has been a special purpose credit program since October 1, 1981, no changes are necessary to those GSL Program regulations. Pursuant to § 202.8(b)(1) of Regulation B, GSL Program lenders remain subject to Regulation B where its requirements are not inconsistent with GSL Program regulations.

Office of Special Education and Rehabilitative Services

Arbitration Panel Decision Under the Randolph-Sheppard Act; Illinois Department of Rehabilitation Services, State Licensing Agency

AGENCY: Department of Education.

ACTION: Notice of Arbitration Panel Decision under the Randolph-Sheppard Act.

SUMMARY: Notice is hereby given that on October 31, 1980, an arbitration panel rendered a decision in the matter of Illinois Department of Rehabilitation Services, State Licensing Agency (R-S/79–5). This panel was convened by the Secretary of the Department of Health, Education, and Welfare (HEW) pursuant to 20 U.S.C. 107d–1(b), upon receipt of a complaint filed by Illinois in May, 1979. Under this section of the Act, a State licensing agency which determines that a Federal property managing agency is failing to comply with the Act or implementing regulations may request the Secretary to convene an arbitration panel to resolve the dispute.

Note.—Subsequent to the issuance of the panel decision, the Illinois licensing agency petitioned the Department of Education to reconsider the decision. On May 28, 1982, the Commissioner of the Rehabilitation Services Administration advised the parties of his disagreement with certain portions of the decision and of his view that the dispute should be resolved by the Secretary of Education pursuant to 20 U.S.C. Section 107(b). This Section of the Act provides in pertinent part that "(a)ny limitation on the placement or operation of a vending facility based on a finding that such placement or operation would adversely affect the interests of the United States shall be fully justified in writing to the Secretary, who shall determine whether such limitation is justified."

FOR FURTHER INFORMATION CONTACT:
Frederick Sachs, Acting Director, Division for Blind and Visually Impaired, Rehabilitation Services, Room 3030, Mary E. Switzer Building, Department of Education, 330 C Street S.W., Washington, D.C. 20201, Area Code (202) 245–0212 or TTY (202) 245–0591. The full text of the arbitration panel decision (including the chairman's opinion and two opinions concurring in part and dissenting in part) can be obtained from Mr. Sachs.

Dated: April 28, 1983.

T. H. Bell,
Secretary of Education.

Arbitration Panel Decision

The Randolph-Sheppard Act, under which this decision was rendered, was enacted for the express purposes of providing blind persons with remunerative employment, enlarging the economic opportunities of the blind, and stimulating the blind to greater efforts in striving to make themselves self-supporting. 20 U.S.C. 107. This legislation authorizes blind persons, who are licensed by the State, to operate vending facilities on Federal property, and provides generally that priority should be given to licensed blind persons to operate vending facilities on such property. A State licensing agency is designated by the Secretary to carry out a program for licensing blind vendors, and to train, place and supervise those persons. These licensing agencies are also authorized to bring to the attention of the Secretary Federal agency actions such licensing agencies feel are violative of the Act.

The critial events giving rise to this case occurred in the fall of 1978 when the Illinois licensing agency submitted permit applications to the U.S. Postal Service to operate approximately 100 vending machines at the main post office in Chicago, Illinois. The Postal Service disapproved all but a few of the applications on the grounds that the vending machines in question were scattered about on employee workroom floors and were not "satisfactory sites where it would be feasible for a blind vendor to operate a vending facility." The record indicates that the Postal Service expressed concern for the safety of vendors in these locations and concern for its own employees association whose activities were supported by vending machine profits. The licensing agency declined to accept the individual sites offered by the Postal Service on the grounds that they would not provide a livelihood for blind vendors, and, instead, filed the above referenced complaint to convene a panel.

The licensing agency argued before the panel that the Postal Service violated the priority requirements of the Act by refusing to authorize blind vendors to operate all the disputed machines and by failing to justify its decision to the Secretary of HEW under 20 U.S.C. 107(b) cited earlier. The Postal Service, on the other hand, took the position that it complied with the Act by offering the licensing agency one or more feasible vending machine locations and by sharing income from the remaining machines pursuant to the income distribution provisions of the statute. These provisions generally provide that income from non-blind operated vending machines of Federal property must be shared with blind vendors, and/or licensing agencies, in varying amounts depending on the degree of competition. 20 U.S.C. 107d–3.

Based in large part on its reading of the income sharing provisions, the panel first held that "priority does not mean exclusivity", determining, therefore, that the Postal Service was not required to designate the licensing agency as the sole operator of all the vending machines at the Chicago post office. The panel, however, concluded that the record did not support the Postal Service view that all the disapproved locations were unsafe and further disagreed with the Postal Service position that each vending machine location (regardless of the number of machines) had to be attended by a licensed vendor. The panel remanded the case to the licensing agency and the Postal Service for a reassessment of the permit applications, directing the parties to consider the feasibility of the locations in terms of safety and profitability.

BILLING CODE 4000–01–M

Arbitration Panel Decision Under the Randolph-Sheppard Act; Patrick J. Bedard and the Iowa State Commission for the Blind

AGENCY: Department of Education.

ACTION: Notice of Arbitration Panel Decision under the Randolph-Sheppard Act.

SUMMARY: Notice is hereby given that on December 10, 1980, an arbitration panel rendered a decision in the matter of Patrick J. Bedard and the Iowa State Commission for the Blind, State Licensing Agency (R–S/79–3). This panel was convened by the Secretary of the Department of Health, Education, and Welfare (HEW) pursuant to 20 U.S.C. 107d–1(a), upon receipt of a complaint filed by petitioner Bedard on May 19, 1979. Under this section of the Act, a blind licensee dissatisfied with the State's operation or administration of the vending facility program may request a full evidentiary hearing from the State licensing agency. If the licensee is dissatisfied with the State agency decision, the licensee may complain to the Secretary, who is then required to convene an arbitration panel to resolve the dispute.

FOR FURTHER INFORMATION CONTACT:
Frederick Sachs, Acting Director, Division for Blind and Visually Impaired, Rehabilitation Services, Room 3030, Mary E. Switzer Building, Department of Education, 330 C Street SW., Washington, D.C. 20201, Area Code (202) 245–0212 or TTY (202) 245–0591. The full text of the arbitration panel decision can be obtained from Mr. Sachs.

Dated: April 28, 1983.

T. H. Bell,
Secretary of Education.

Arbitration Panel Decision

The Randolph-Sheppard Act, under which this decision was rendered, was enacted for the express purposes of providing blind persons with remunerative employment, enlarging the economic opportunities of the blind, and stimulating the blind to greater efforts in striving to make themselves self-supporting. 20 U.S.C. 107. This legislation authorizes blind persons, who are licensed by the State, to operate vending facilities on Federal property, and provides generally that priority should be given to licensed blind persons to operate vending facilities on such property. A State licensing agency is designed by the Secretary to carry out a program for licensing blind vendors, and to train, place and supervise those persons. A State licensing agency is also required to provide certain grievance procedures to dissatisfied blind licensees, including the hearing and arbitration procedures stated in 20 U.S.C. 107d-1 (a).

The facts giving rise to this case are as follows. In January of 1978, the State licensing agency notified Bedard that his license to participate in the vending facility program would be terminated at a date certain in the future for unsatisfactory performance over a fifteen year period. The State agency made this decision in accordance with 20 U.S.C. 107a(b) which provides that a license issued to a blind vendor may be terminated by the State"... if it is satisfied that the facility is not being operated in accordance with the rules and regulations prescribed by such licensing agency." Federal regulations implementing the Randolph-Sheppard Act add that the State must afford vendors the opportunity for a full evidentiary hearing before taking such an action. 34 Code of Federal Regulations (CFR), section 395.7(b). After holding such a hearing, a State hearing officer, in May of 1979, affirmed the decision to terminate Bedard's license at a future date, at which point the petitioner filed the above referenced complaint to convene an arbitration panel.

The panel, however, determined that the State licensing agency did not have sufficient cause to remove Bedard from the program, in light of the remedial purposes of the statute, and the corresponding obligations imposed on licensing agencies to provide support and on-going training to assist vendors in managing their facilities. The panel further found that the licensing agency violated the Federal regulations cited above by making its decision to terminate Bedard's license before providing him a hearing, and determined that the hearing itself was flawed because the State hearing officer was not an "impartial presiding official" within the meaning of unpublished HEW guidelines.

The panel, therefore, reversed the hearing decision and directed the licensing agency to continue Bedard in its Randolph-Sheppard program. It declined, however, to award the vendor attorneys fees or compensatory damages for alleged loss of earnings, based on its conclusion that neither the Randolph-Sheppard Act nor the Administrative Procedure Act gives panels the authority to impose these sanctions.

The opinions expressed by this panel do not necessarily represent the views and opinions of the Department of Education.

DEPARTMENT OF ENERGY

Bonneville Power Administration

Notice of Intent To Develop Policies and Procedures for Compensating Costs and Power Losses at Non-Federal Electric Power Projects

AGENCY: Bonneville Power Administration (BPA), Department of Energy.

ACTION: Notice of intent.

SUMMARY: BPA solicits suggestions and recommendations regarding the development of policies and procedures to guide BPA in exercising its authority under the Pacific Northwest Electric Power Planning and Conservation Act to compensate costs and power losses at non-Federal electric power projects. Compensable costs and power losses must result from measures to protect, mitigate, and enhance fish and wildlife affected by hydroelectric facilities located on the Columbia River and its tributaries and must not be attributable to the development or operation of the

UMI

power projects incurring the costs or power losses. BPA seeks information and views on the magnitude of expected costs and power losses, the nature of compensable costs and losses, appropriate procedures for responding to claims for compensation, and other related issues. Once adopted, the policies and procedures will govern all subsequent requests for compensation. Compensation for costs and power losses may affect BPA electric power rates.

DATE: Suggestions and recommendations will be accepted through June 17, 1983.

ADDRESS: Suggestions and recommnedations should be submitted to Ms. Donna L. Geiger, Public Involvement Manager, Bonneville Power Administration, P.O. Box 12999, Portland, Oregon 97212.

Mr. Robert N. Laffel, Idaho Falls District Manager, 531 Lomax Street, Idaho Falls, Idaho 83401; 208–523–2706.

SUPPLEMENTARY INFORMATION:

I. Background

The Pacific Northwest Electric Power Planning and Conservation Act, Pub. L. 96–501 (Regional Act), directs Federal agencies to implement measures to "protect, mitigate, and enhance" fish and wildlife affected by the development and operation of hydroelectric facilities on the Columbia River and its tributaries. In doing so, Federal agencies must take into account, to the maximum extent practicable, the Columbia River Basin Fish and Wildlife Program adopted by the Northwest Power Planning Council in November 1982. The Fish and Wildlife Program calls for a comprehensive range of measures, including flow levels to aid the spring downstream migration of salmon and steelhead. Implementation of these measures will require releases of water from both Federal and non-Federal reservoirs and will result in monetary costs and power losses.

The Regional Act may oblige BPA to bear some of these costs and power losses at non-Federal electric power projects. To be eligible for BPA compensation, section 4(h)(11)(A)(ii) of the Regional Act requires that: (1) The cost or power loss must result from a measure to protect, mitigate, or enhance fish and wildlife imposed under the authority of section 4(h)(11)(A; (2) the measure must have been imposed by a Federal agency other than BPA which manages, operates, or regulates hydroelectric facilites located on the Columbia River or its tributaries; and (3) the measure must not be attributable to the development and operation of the non-Federal electric power project incurring the cost or power loss. Section 4(h)(11)(A) reads:

> The Administrator (of the Bonneville Power Administration) and other Federal agencies responsible for managing, operating, or regulating Federal or non-Federal hydroelectric facilities located on the Columbia River or its tributaries shall—
>
> (i) Exercise such responsibilities consistent with the purposes of this Act and other applicable laws, to adequately protect, mitigate, and enhance fish and wildlife, including related spawning grounds and hibitat, affected by such projects or facilities in a manner that provides equitable treatment for such fish and wildlife with other purposes for which such system and facilities are managed and operated;
>
> (ii) Exercise such responsibilities, taking into account at each relevant stage of decisionmaking processes to the fullest extent practicable, the (Columbia River Basin Fish and Wildlife Program) adopted by the (Northwest Power Planning) Council under this subsection. If, and to the extent that, such other Federal agencies as a result of such consideration impose upon any non-Federal electric power project measures to protect, mitigate, and enhance fish and wildlife which are not attributable to the development and operation of such project, then the resulting monetary costs and power losses (if any) shall be borne by the Administrator in accordance with this subsection.

Section 4(h)(10)(A) of the Regional Act also provides authority to compensate costs and power losses at non-Federal electric power projects. Section 4(h)(10)(A) authorizes BPA to use BPA funds and BPA authorities under other provisions of law to protect, mitigate, and enhance fish and wildlife to the extent affected by the development and operation of any hydroelectric project of the Columbia River and its tributaries. Such uses of BPA funds must be in addition to, not in lieu of, expenditures authorized or required from other entities under other agreements or laws. When determined by the Administrator to be necessary and appropriate to meet BPA's responsibilities pursuant to section 4(h)(10)(A), BPA may compensate a non-Federal electric power project for costs and power losses resulting from measures not attributable to the non-Federal project. To be compensable by BPA under section 4(h)(10)(A), costs or power losses need not result from measures imposed by another Federal agency.

BPA has received several requests to develop policies and procedures for implementing the compensation provision of section 4(h)(11)(A)(ii) of the Act. BPA intends to develop and adopt policies and procedures for both: (1) Implementing the non-Federal electric power project cost and power loss compensation provision of section 4(h)(11)(A)(ii) of the Regional Act; and (2) using the authority of section 4(h)(10)(A) of the Act to compensate non-Federal electric power project costs and power losses. In addition to other issues, the policies and procedures will address releases of water from non-Federal projects for fish and wildlife and the effects on non-Federal facilities of releases at Federal facilities. Once adopted, BPA will follow the policies and procedures in responding to all subsequent requests for compensation pursuant to section 4(h)(11)(A)(ii) of the Regional Act and in providing compensation pursuant to section 4(h)(10)(A) of the Act.

Compensation for monetary costs and power losses at non-Federal electric power projects may affect BPA's electric power rates. BPA recovers all of its revenue requirements through the marketing of electric power and related services. BPA compensation of costs and power losses at non-Federal electric power projects could affect both BPA's revenues requirements and the amount of power available to sell, which have a direct effect on BPA's electric power rates.

BPA solicits from interested parties suggestions and recommendations regarding policies and procedures for compensating monetary costs and power losses at non-Federal electric power projects. BPA then intends to develop draft policies and procedures. BPA will provide opportunity for additional public comment prior to the adoption of final policies and procedures.

II. Issues Identified by BPA

A. What costs and power losses are anticipated at non-Federal electric power projects from measures for the protection, mitigation, and enhancement of fish and wildlife?

B. Which of these costs and power losses are compensable?

1. What actions are included within the scope of the requirement that a measure must have been imposed by a Federal agency other than BPA which manages, operates, or regulates hydroelectric facilities on the Columbia River or its tributaries?

2. Of the costs and power losses resulting from such actions, which should be attributable to the development and operation of non-Federal hydroelectric projects and therefore would not be compensable?

3. In the case of non-Federal reservoirs, are releases compensable only to the extent that the water released is in excess of the amount that would have been discharged in the course of normal operation of the project?

C. Under what conditions should BPA use its section 4(h)(10)(A) authority to compensate a non-Federal project for measures not attributable to the development and operation of what project when a Federal agency has not imposed a fish and wildlife measure on the project?

D. How should BPA quantify compensable monetary costs and power losses?

E. Should BPA compensation for monetary costs and power losses take the form of replacement power or monetary reimbursement?

F. What procedures should BPA establish?

1. What procedures are appropriate to determine whether a cost or power loss at a non-Federal electric power project is compensable, the amount of such compensation, and the form of such compensation?

2. What demonstration should be required of a non-Federal project operator to substantiate that a cost or power loss is not attributable to the development and operation of a non-Federal facility?

3. Is a procedure needed to permit interested parties to periodically review compensable monetary costs and power losses for individual projects?

G. Do other sections of the Regional Act or other laws bear on BPA policies and procedures for compensating monetary costs and power losses pursuant to sections 4(h)(10)(A) and 4(h)(11)(A)(ii) of the Regional Act?

Issued in Portland, Oregon, April 26, 1983.

Peter T. Johnson,

Administrator, Bonneville Power Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Project No. 5715–000]

Alaska Power Authority; Granting Extension of Time To Comment on Staff Draft Environmental Impact Statement

April 28, 1983.

The Cities of Craig and Thorne Bay, Alaska, have requested an extension of time to comment on the Staff Draft Environmental Impact Statement (DEIS) for the Black Bear Lake Project, FERC Project No. 5715–000. Comments on the DEIS were due April 18, 1983. Craig, which is an intervenor in the proceeding, has requested a two week extension. Thorne Bay has requested a 45 day extension.

Craig states that a delay in receiving the DEIS prevents it from completing its comments in a timely manner. Craig states that it received the DEIS on approximately March 24, 1983. Commission staff has confirmed that other DEIS recipients in the project area received the DEIS at about the same time.

Thorne Bay states that it did not receive the DEIS until March 31, 1983. Thorne Bay adds that its possible inclusion as a recipient of project power requires that it spend additional time reviewing the DEIS.

The April 18, 1983 DEIS comment deadline assumed that interested parties in the project area would receive the DEIS in early March. The approximately three week delay in receipt warrants extending the DEIS comment deadline by a similar period. In addition, the City of Thorne Bay has justified a short extension beyond this period. Accordingly, the deadline is extended to May 23, 1983.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83–248–000]

Arkansas Louisiana Gas Company, a Division of Arkla, Inc.; Request Under Blanket Authorization

April 29, 1983.

Take notice that on March 24, 1983, Arkansas Louisiana Gas Company, a division of Arkla, Inc. (Arkla), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP83–248–000 a request pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) to construct and operate four sales taps on its jurisdictional facilities in Louisiana and Oklahoma to permit direct sales of gas under the authorization issued in Docket Nos. CP82–394–000 and CP82–384–001 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Arkla states that the estimated annual volume to be delivered by the proposed facilities is 420 Mcf which Arkla further states is *de minimis* in comparison to Arkla's 1982 annual deliveries of 394,607,813 Mcf. Arkla states that said volumes would be billed at the retail rates applicable under Arkla's effective rates as filed with either the Louisiana Public Service Commission or the Oklahoma Corporation Commission, as appropriate. It is asserted that three taps would be used to sell and delivery gas volumes for domestic purposes in Stephens and Beckham Counties, Oklahoma, and Ouachita Parish, Louisiana, and for commercial purposes in Union Parish, Louisiana. The total estimated construction cost of the proposed facilities is $5,120.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

[Docket No. ER83-459-000]

Cleveland Electric Illuminating Co.; Filing

April 29, 1983.

The filing Company submits the following:

Take notice that on April 14, 1983, the Cleveland Electric Illuminating Company (CEI) tendered for filing an executed Service Agreement and Exhibits A and B thereto, providing for transmission by CEI approximately 20 MW of power from the 345 kv interconnection point on CEI's Juniper-Canton Line with the Ohio Power Company to the City of Cleveland, Ohio (City) in accordance with the terms and conditions of CEI's FERC Transmission Service Tariff.

CEI requests an effective date of April 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 16, 1983. Protests will be considered by the Commission in determining the appropriate action on be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. EL83-19-000]

Cliffs Electric Service Co. and Upper Peninsula Generating Co.; Filing

April 29, 1983.

Take notice that on April 15, 1983, Cliffs Electric Service Company ("Cliffs") and Upper Peninsula Generating Company ("Generating Company") (collectively, "Applicants") filed a joint application for a declaratory order for waiver of certain regulations by the Commission. Cliffs and Generating Company state that they jointly and severally seek a partial waiver of the Commission's regulations. Specifically, Applicants request a waiver of the Commission's Uniform System of Accounts, the statements and reports governed by Parts 41, 50, and 141 of the regulations, and the requirements of Parts 45 and 46 relating to interlocking directorates.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 1, 1983. Protests will be considered by the Commission in determining the appropriate action on be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP81-188-003]

Consolidated Gas Supply Corp.; Petition To Amend

April 28, 1983.

Take notice that on April 22, 1983, Consolidated Gas Supply Corporation (Petitioner), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP81-188-003 a petition to amend further the order issued August 19, 1981 in Docket No. CP81-188-000 pursuant to Section 7(c) of the Natural Gas Act, so as to authorize the transportation and delivery of natural gas to Niagara Mohawk Power Corporation (Niagara Mohawk) of up to 102,000 dt equivalent of gas per day, all as more fully set forth in the petition to amend which is on file with the Commission and open to the public inspection.

Petitioner states that by order issued August 19, 1981, the Commission granted it a certificate of public convenience and necessity authorizing the transportation and delivery of up to 65,000 dt equivalent of natural gas per day to Niagara Mohawk for use in the generation of electric power in Niagara Mohawk's Albany, New York, steam plant. It is asserted that the authorization was for a limited term expiring on July 31, 1982. Petitioner further states that the Commission by orders issued July 30, 1982 and January 28, 1983, extended the authorization to January 30, 1983 and October 31, 1983, respectively.

Petitioner now seeks to amend its existing certificate to increase the daily deliverability to Niagara Mohawk from 65,000 dt to 102,000 dt. Petitioner claims that the present limitation on deliveries of 65,000 dt per day does not provide Niagara Mohawk with the operational flexibility it needs to meet the demand for electric power on its system. According to Petitioner, when the present limitation on gas deliveries is reached, Niagara Mohawk must switch to the use of fuel oil for electric power generation, and then must switch back to gas use the next day. It is asserted that the frequent switching of fuels is causing operational problems in the firing Niagara Mohawk's boilers and, in turn, the production of power.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before May 16, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,
Secretary.

[FR Doc. 83-11837 Filed 5-3-83; 8:45 am]
BILLING CODE 6717-01-M

[Docket No. CP76-265-002]

Consolidated Gas Supply Corp.; Petition To Clarify or, In the Alternative, To Amend

April 29, 1983.

Take notice that on March 23, 1983, Consolidated Gas Supply Corporation (Consolidated), 445 West Main Street, Charleston, West Virginia 26301, filed in Docket No. CP76-265-002 a petition to clarify the order issued September 3, 1981, in Docket No. CP76-265 or in the alternative pursuant to Section 7(c) of the Natural Gas Act to amend such order so as to authorize the transportation for The Brooklyn Union Gas Company (BUG) gas previously purchased by Consolidated from Fuel Resources, Inc. (FRI), BUG's affiliate, but now to be purchased by BUG, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

The September 3, 1981, order, among other things, permitted Consolidated to transport self-help gas purchased by BUG from FRI but also provided that Consolidated would purchase a one-fourth share of the gas deliveries. Consolidated now indicates that it no longer needs or wants to purchase the one-fourth share because of its improving gas supply situation. As a result, Consolidated proposes to relinquish its right to purchase the gas, subject to its right to renew, and instead to transport the gas for BUG.

Consolidated asserts that amendment of the September 3, 1981, order is not necessary because

(1) The additional volumes to be transported, when added to the volumes already being transported under the certificate and 1975 transportation agreement, would not exceed the maximum volume authorized by the Commission;

(2) The Commission did not expressly condition its September 3, 1981, order on the purchase of the gas by Consolidated, and

(3) In any event, transportation of gas could alternatively be accomplished under the self-implementing regulations found at 18 CFR 284.102.

Consolidated also states that, if in the Commission's view, such amendment is necessary, Consolidated requests that the Commission amend the order of September 3, 1981, in Docket No. CP76-265 to provide the additional transportation service.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before May 20, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. ES83-39-000]

El Paso Electric Co.; Application

April 28, 1983.

Take notice that on April 20, 1983, El Paso Electric Company (Applicant) filed an application with the Federal Energy Regulatory Commission, seeking authority pursuant to Section 204 of the Federal Power Act to assume the obligation of payment of up to $50,000,000 principal amount of Pollution Control Revenue Refunding Bonds proposed to be issued by the City of Farmington, New Mexico, in mid to late June 1983, for pollution control facilities at the Four Corners Generating Station.

Any person desiring to be heard or to make any protest with reference to the application should, on or before May 17, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with 18 CFR 385.211 or 385.214, respectively. The application is on file with th

Commission and available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP82-509-001]

Esperanza Transmission Co.; Amendment to Application

April 29, 1983

Take notice that on March 11, 1983, Esperanza Transmission Company (Applicant), P.O. Box 2447, Corpus Christi, Texas 78403, filed in Docket No. CP82-509-001 an amendment to its application filed on August 23, 1982, in Docket No. CP82-509-000 pursuant to section 311(a) of the Natural Gas Policy Act of 1978 and § 284.127 of the Commission's Regulations (18 CFR 284.127) so as to reflect an increase in the proposed initial transportation rate to be charged to Natural Gas Pipeline Company of America (NGPL), all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Applicant states that on August 23, 1982, it filed an application with the Commission in Docket No. CP82-509-000 for authorization to transport natural gas through its intrastate facilities on behalf of NGPL for a period ending December 31, 1988, in connection with NGPL's proposed direct sale of gas to Southwestern Electric Power Company (SWEPCO) for use in SWEPCO's Wilkes Plant located in Marion County, Texas.

Applicant states that it has had to adjust its cost estimates for the transportation due to the time delays which have occurred. Such adjustments have resulted in the necessity to increase its proposed initial rate from 15 cents to 18.2 cents per million Btu, it is asserted.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before May 20, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in

BILLING CODE 6717-01-M

[Docket No. CP83-12-001]

Faustina Pipe Line Co.; Amendment to Application

April 29, 1983.

Take notice that on March 14, 1983, Faustina Pipe Line Company (Applicant), P.O. Box 3102, Tulsa, Oklahoma 74101, filed in Docket No. CP83-12-001, an amendment to its pending application filed in Docket No. CP83-12-000 pursuant to Section 7(c) of the Natural Gas Act so as to reflect a change in the transportation service to be provided United Gas Pipe Line Company (United), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Pursuant to an agreement dated September 12, 1982, Applicant states that it proposes to transport up to 100 billion Btu's of natural gas per day for United from various points on Applicant's contiguous mainline facilities located in southern Louisiana to any other points located on those same facilities. Applicant states that the amendment dated March 7, 1983, changes the service to be authorized by (1) reducing the quantity of the gas to be transported from 100 billion Btu's to 50 billion Btu's of natural gas per day; (2) changing the character of the service to be rendered from firm to interruptible; (3) deleting the minimum annual charge as an element of the rate and charge assessed United for the transportation service; and (4) deleting the right of United to "make up" any defieiencies which may be incurred.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before May 20 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 285.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Secretary.

[FR Doc. 83-11841 Filed 5-3-83; 8:45 am]

BILLING CODE 6717-10-M

[Docket No. CP83-227-000]

Florida Gas Transmission Co.; Application

April 29, 1983.

Take notice that on March 14, 1983, Florida Gas Transmission Company (Applicant), P.O. Box 44, Winter Park, Florida 32790, filed in Docket No. CP83-227-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for the account of Southern Natural Gas Company (SNG), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that SNG has contracted to purchase certain supplies of natural gas to be produced from Block 3, Sabine Pass area, offshore Louisiana. Pursuant to the terms of an October 8, 1982, transportation agreement, Applicant proposes to receive up to 20 billion Btu of gas per day for the account of SNG at an existing point of interconnection between the facilities of Louisiana Resources Company and Applicant in Vermilion Parish, Louisiana. Applicant states that it would transport and deliver these quantities of gas to SNG on a best-efforts basis at existing points of interconnection between the facilities of Applicant and SNG in Washington Parish, Louisiana or at the interconnection of the facilities of Applicant and Trunkline Gas Company in Calcasieu Parish, Louisiana.

It is asserted that Applicant proposes to charge SNG 14.8 cents per million Btu delivered at the existing point of interconnection in Washington Parish, Louisiana, and 12.7 cents per million Btu delivered at Calcasieu Parish, Louisiana.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 20, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestant parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[Docket No. CP77-478-003]

Panhandle Eastern Pipe Line Co. and Trunkline Gas Co.; Petition To Amend

April 29, 1983.

Take notice that on April 4, 1983, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77001, and Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP77-478-003 a joint petition to amend the order issued April 2, 1980, in Docket No. CP77-478 pursuant to Section 7(c) of the Natural Gas Act so as to authorize an increase during the winter period in the daily volumes of natural gas that are transported for Central Illinois Public Service Company (CIPSCO), all as more set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is asserted that pursuant to a transportation and exchange contact dated April 1, 1977, Petitioners agreed to transport gas for CIPSCO to and from CIPSCO's storage fields. It is stated that during the summer period Petitioners transport up to 10,000 Mcf of gas per day from CIPSCO's Southern Service Area to its Northern Service Area for injection into CIPSCO's storage fields. It is further stated that during the winter period gas is withdrawn from the storage fields and Petitioners transport up to 20,000 Mcf of gas per day back to CIPSCO's Southern Service Area.

Petitioners stated that during the summer period (April 1-October 31) Trunkline receives gas for CIPSCO's account in Williamson County, Illinois, and transports it to Panhandle and Panhandle redelivers CIPSCO's gas at Pike or Edgar or Fulton Counties, Illinois. It is explained that during the winter period (November 1-March 31) the gas flows in the opposite direction.

Petitioners propose herein to increase the maximum daily transportation volume for the winter period from 20,000 Mcf per day to 25,000 Mcf per day. It is asserted that the total winter period—summer period volume of gas to be transported, 500,000 Mcf, would not change; therefore, the transportation charge would not change.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before May 20, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F Plumb,

Secretary

BILLING CODE 6717-01-M

[Docket No. ER83-473-000]

Public Service Co. of Oklahoma; Filing

April 29, 1983.

The filing Company submits the following:

Take notice that on April 21, 1983, Public Service Company of Oklahoma ("PSO") tendered for filing a Letter Agreement ("Agreement") dated January 21, 1983, between PSO and West Texas Utilities Company ("WTU"). The Agreement provides for the sale of five (5) megawatts of capacity, without reserves, from PSO to WTU during the calendar year 1983.

PSO requests an effective date of January 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing have been sent to WTU, the Oklahoma Corporation Commission and the Public Utility Commission of Texas.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Revised Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 16, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-472-000]

Public Service Co. of Oklahoma; Filing

April 29, 1983.

The filing Company submits the following:

Take notice that on April 21, 1983, Public Service Company of Oklahoma ("PSO") tendered for filing a Letter Agreement ("Agreement") dated March 14, 1983, between PSO and Arkansas Power and Light Company ("AP&L"). The Agreement provides for the transfer of 133,900 MWh of PSO's entitlement to the Tennessee Valley Authority ("TVA")-South Central Electric Companies ("SCEC") Diversity exchange for the 1983 summer exchange period. This entitlement is provided for in an agreement between TVA and the Mississippi Power and Light Company for the delivery of the allocated diversity within the SCEC agreement. PSO states that it desires to transfer its diversity entitlement to lower its reserves in 1983 and that AP&L desires to purchase the diversity entitlement to meet its system requirements.

PSO requests an effective date of May 29, 1983, and therefore requests waiver of the Commission's notice requirements.

According to PSO, AP&L, Southwestern Electric Power Company, the Oklahoma Corporation Commission and the Arkansas Public Service Commission have been served a copy of the filing.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Revised Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 16, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP77-402-004]

Transcontinental Gas Pipe Line Corp.; Petition To Amend

April 29, 1983.

Take notice that on April 6, 1983, Transcontinental Gas Pipe Line Corporation, P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP77-402-004 a petition to amend the order issued June 18, 1981, in Docket No. CP77-402 pursuant to Section 7(c) of the Natural Gas Act to authorize the Transportation of natural gas for Southern Natural Gas Company (Southern) from two additional sources and to establish a new point of receipt offshore, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is stated that by order issued June 18, 1981, Petitioner was authorized to transport for Southern up to 90,000 Mcf of natural gas per day produced in Vermilion Area Block 22, offshore Louisiana, and received by Petitioner onshore in the Pecan Island area on Petitioner's Central Louisiana Gathering System in Vermilion Parish. Petitioner states that it transports and delivers equivalent quantities to Florida Gas Transmission Company (Florida) for the account of Southern at the interconnection of Florida's East White Lake Lateral and Petitioner's Central Louisiana Gathering System in Vermilion Parish.

Petitioner now proposes to transport for Southern within the 90,000 Mcf per day quantity gas from two new sources: (1) Vermilion Area Block 40, which gas would be received by Petitioner onshore in the Pecan Island area as under the present arrangement, and (2) Vermilion Area Block 37, which gas would be received by Petitioner at the interconnection of its Central Louisiana Gathering System and existing jointly-owned facilities of Petitioner, Southern and United Gas Pipe Line Company (United) in Vermilion Area Block 25.

It is further stated that the transportation rates would be 3.5 cents per million Btu received by petitioner onshore in the Pecan Island area and 10.0 cents per million Btu received by Petitioner offshore in Vermilion Area Block 25. These rates are identical to those rates authorized by order issued March 18, 1982, in Docket No. CP77-435-003 in which Petitioner was authorized to transport gas for United, it is stated.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before May 20, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-11830 Filed 5-3-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. EF80-5011-005 and EF83-5011-000]

Western Area Power Administration; Filing

April 29, 1983.

The Western Area Power Administration submits the following:

Take notice that on April 19, 1983, the Assistant Secretary for conservation and Renewable Energy of the Department of Energy, by Rate Order No. WAPA-17, did confirm and approve, on an interim basis, effective May 25, 1983, applicable the first full billing period thereafter, new rate schedules CV-F5 (schedule of Rates for Wholesale Firm Power Service), CV-T1 (Schedule of Rates for Firm Transmission Service), and CV-T2 (Schedule for Rates for Nonfirm Transmission Service) for the Western Area Power Administration's Central Valley Project. In FR 1987, the new rates for wholesale firm power (rate schedule CV-F5) are expected to provide about $187 million more in annual revenue than would be yielded by the current rates.

The new rates will be in effect pending the Commission's approval of them, or substitute rates, on a final basis, or until they are superseded. The Assistant Secretary states that the rate schedules are submitted for confirmation and approval on a final basis pursuant to authority vested in the Commission by Delegation Order No. 0204-33.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR §§ 385.211, 385.214). All such petitions or protests should be filed on or before May 20, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. PL83-2-000]

Off-System Sales by Interstate Pipelines; Statement of Policy

April 25, 1983.

The Federal Energy Regulatory Commission (Commission) announces a general policy regarding off-system sales by interstate pipelines. The term "off-system sale" connotes a sale of natural gas that is excess to the pipeline's current demand, that is of a short-term, interruptible nature, and that is made to a customer outside or away from the pipeline's traditional or historic market area.

The purpose of this policy statement is to provide guidance for the efficient disposition of pending or future cases which propose off-system sales. The Commission is mindful that a general policy statement does not have the force and effect of law. Instead, it is an articulation of the Commission's tentative intention, which will be followed unless particular circumstances demonstrate the policy to be inappropriate. In individual cases, both the underlying validity of the policy and its application to particular facts may be challenged and are subject to further consideration.

Background

This policy statement is intended to deal with the major issues identified in the November conference [1] and related comments that are common to all the off-system sale proposals. It is not exhaustive, which is to say that for a particular proposal there may be issues or concerns influencing the Commission's decision that are not discussed in this policy statement. As a general matter, however, the Commission expects that applications for off-system sales that are consistent with this policy statement will be processed on an expedited basis.

When the Commission first began authorizing the current round of off-system sales (in late 1980), such sales served the purpose of allowing pipelines and distributors that were short of gas supplies to purchase gas from pipelines that had a surplus.

In the summer of 1981 the Commission again considered off-system sales, but with a somewhat different emphasis. The gas surplus was becoming more prevalent, and some pipelines began to project significant levels of prepayments for gas not taken. Off-system sales were thought to be a way of ameliorating the take-or-pay problem while at the same time permitting pipelines to continue to contract for long-term reserves, even though they did not need the short-term deliverability increases that accompanied such contracts. From the buyer's standpoint, off-system sales served not only to ease physical shortages, but also gave the buyer access to less expensive gas.

During the past two years, the Commission has authorized off-system sales involving approximately 1 Tcf of gas. Something less than 240 Bf has actually been sold. Despite the relatively small portion of authorized volumes sold, off-system sales have had a significant impact in the States of California and Louisiana. However, no off-system gas has been sold in California since August 1982, and more recently, only two pipelines—Northern Natural Gas Company and Natural Gas Pipeline Company of America—could be described as making substantial off-system sales. Both pipelines have relatively low 100% load factor rates enabling them to find markets off their systems, primarily in Louisiana.

Now virtually all interstate pipelines have a supply surplus. For 1982, there existed something over 2 Tcf of excess annual deliverability. According to American Gas Association estimates, it appears that the comparable number for 1983 will be closer to 3 Tcf. The surplus is still short-term, but nonetheless it is a present reality.

There has been one other change over the past two years, not unrelated to the gas surplus, and that is the dramatic shift in the relative prices of gas and oil. In 1980, oil prices were well above gas prices. Today, gas prices are equal to or exceed the cost of high sulfur No. 6 fuel oil at many places in the country.

Although off-system sales have not been as successful as the selling pipelines had projected, some gas has been sold through off-system sales that otherwise would not have been, take-or-pay levels have been reduced to some degree, some fuel oil has been displaced, and buyers were able to purchase gas at prices lower than they otherwise would have to pay.

Not everyone has been in favor of off-system sales. As the Commission heard at the November 1982 conference (and as it has read in the adverse interventions filed in particular dockets), a number of traditional customers of selling pipelines have opposed the sales. They have objected because they consider the sales prices to be too low and not available to on-system customers on the same basis, because the pipeline should be husbanding its gas supplies instead of selling off-system, because the pipelines are buying high cost gas to replace the lower cost gas that is being sold off-system, and because they see off-system sales as relieving the pressure to make more fundamental changes in gas purchasing practices and gas supply contracts.

Certain intrastate pipelines (and the producers who sell to them) have also opposed off-system sales. They claim to be facing the same marketing problems as the interstate pipelines—softening demand, excess deliverability, take-or-pay exposure, shut-in-wells, and competition from oil—and object to interstate pipelines with regulated gas cushions being able to undercut their prices in the intrastates' traditional markets. In effect, they claim that off-system sales will simply shift the problems of the interstate pipelines to the intrastate market.

Some commenters urged that off-system sales be prohibited, others urged that opportunities for off-system sales be opened up to increase the volumes of gas that might be sold. our review of the transcript of the November conference and the comments that were filed in connection with the conference convince us that off-system sales do have a role to play in the current circumstances of the natural gas markets although that role may be more limited than some would hope.

II. Objectives

In our view, an appropriate off-system sales policy should serve the following objectives:

(1) Permit pipelines with excess gas supplies to sell to pipelines (interstate, Hinshaw, or intrastate) and local distribution companies experiencing a physical gas shortage.

(2) Permit pipelines with excess gas to sell to pipelines, local distribution companies, and end-uses who would otherwise purchase more expensive gas.

(3) Ameliorate take-or-pay problems.

(4) Accomplish the first three objectives without unduly burdening the selling pipeline's traditional customers and without simply transferring problems of the interstate pipelines to the intrastate market.

This last objective will require the Commission to give careful scrutiny to certain kinds of transactions. Data have been presented to the Commission demonstrating that the problems of excess supplies, mounting take-or-pay obligations, and competition from alternative fuels that have compelled interstate pipelines to seek off-system sales are also plaguing the intrastate market. Certain intrastate pipelines claim that off-system sales by interstate pipelines have caused and will cause the intrastate pipelines to lose portions of their market to the interstate pieplines. The intrastate pipelines claim that such market loss is made possible solely because of the cushion of price-regulated interstate gas [2] that is not available to the intrastate market. It is not immediately obvious that market loss of this sort is appropriate or desirable. It appears only to solve a problem in the interstate market by creating or exacerbating a problem in the intrastate market. Accordingly, where an interstate pipeline proposes an off-system sale that would cause a direct loss of market by an established supplier, our review of the public convenience and necessity will include an examination of the market impact of the proposed transaction on existing suppliers of the intended buyer.[3]

---

[1] Convened in Docket No. GP82-47, "Review of Off-System Sales Program," pursuant to a notice issued August 6, 1982.

[2] See Sections 104 and 106(a) of the Natural Gas Policy Act.

[3] Such an inquiry might also be appropriate where established suppliers other than intrastate pipelines raise the objection.

III. Criteria

The issue of price drew the most attention in the comments and at the conference. We conclude that where the proposed sale is between two interstate pipelines, the transaction should be priced at the higher of the selling pipeline's system average load factor rate (based upon the rates in effect at the time the transaction is proposed) or its average Section 102 gas acquisition cost (based upon its most recent purchased gas adjustment filing). Where the purchaser is not another interstate pipeline, the selling pipeline would be free to negotiate a higher rate.

Such a rate would ensure, as a general matter, that the sales off-system would not be made at a price lower than is available to on-system customers. Thus the rate can be said to be non-discriminatory. The off-system sale price should also be compensatory. The compensatory requirement would ensure that on-system customers would be no worse off than if the sale had not been made. In choosing this rate methodology, it is our assumption that the pipeline could replace any gas it sold off-system through additional purchases of Section 102 gas.

We have previously stated that allegations of market loss by an established supplier of the buyer identified in a specific transaction raise serious questions that require case-specific analysis and close scrutiny. As one part of our examination into whether or under what circumstances such a transaction should be authorized, we intend to inquire into the relative competitive positions of the two suppliers and whether the interstate pipeline may be able to compete at the marginal cost of making the sale (while recovering its fixed costs elsewhere) against an intrastate pipeline that would be recovering its fixed costs in the rates for the intrastate's traditional market area involved in the proposed sale. In such a case, it may be appropriate to require that the basic price discussed above be increased by an amount to reflect some portion of the interstate pipeline's fixed costs.

An issue related to price is the treatment of revenues derived from the off-system sale. In the past we have generally required that revenues from off-system sales be credited to Account No. 191. In two instances, the pipelines have established representative volume levels for off-system sales in their general rate cases. We conclude that pipelines should have the option to choose either to credit revenues or to establish representative levels of off-system sales or revenues in their rates. Thus, a pipeline may establish representative volumes or revenues in its general rate proceeding and avoid the crediting of revenues in excess of costs. Alternatively, the pipeline would credit to Account No. 191 all revenues from off-system sales in excess of one cent per MMBtu (as representative of out-of-pocket costs). The pipeline could also demonstrate and retain an amount of actual out-of-pocket costs in excess of one cent per MMBtu.

To be eligible to make an off-system sale, the selling pipeline must demonstrate a sufficient surplus that service to existing customers will not be impaired and must also demonstrate at least potential take-or-pay liability. The reason for the surplus requirement is obvious. The whole premise of off-system sales is that there is a surplus. If it appears that the pipeline's supplies are marginal, or will be so within a short space of time, the pipeline should not be selling off-system. The requirement that the pipeline show at least potential take-or-pay liability is based on the assumption the on-system customers incur a detriment when the sale is made, at least in the sense of having contracted reserves being sold away. The off-system sale may also have the effect of increasing their average cost of gas. The requirement that the pipeline demonstrate at least potential take-or-pay exposure would give some measure of an offsetting benefit in the form of avoided take-or-pay liability.

In past cases, the Commission has inquired as to the potential buyer's need for the additional supplies. In some cases that need has been a physical one, in the sense that without the off-system purchase the buyer would have had to curtail deliveries to its customers. In other cases, the buyer has demonstrated a need for less expensive gas supplies by alleging either potential load loss if costs are not reduced or discriminatory prices on various parts of its system due to differences in the rates of its pipeline suppliers. Based on our review of the record, we believe that the buyer's need for the gas should not be an issue in the proceeding, beyond a demonstrated willingness on the part of the buyer to purchase (in the form of an executed contract). Requiring more introduces issues that do not appear to be central to the decisions we must make with respect to off-system sales.

As a corollary, however, there must be specific identification of the buyer (either an end-user, or a pipeline or local distribution company with an established market). Specific identification of the buyer will enable the Commission to identify all of the factors relevant to making a determination as to the public convenience and necessity of the proposed sale. In particular, it will enable the Commission and interested parties to determine whether the proposed transaction presents the potential for market loss described above.

The one exception to the requirement to identify the buyer specifically will be for transactions between two interstate pipelines. The notice of proposed rulemaking in Docket No. RM81–29 (phase II of the blanket certificate rulemaking proceeding) included a provision authorizing off-system sales between two interstate pipelines. The Commission intends to adopt a final rule in Docket No. RM81–29 which will include a provision authorizing off-system sale transactions between two interstate pipelines subject to the prior notice provisions adopted in Docket No. RM81–19 and included in the regulations as Sections 157.201, *et seq.* (18 CFR 157.201, *et seq.*), so long as the transaction is otherwise consistent with this policy statement. The authorizations applied for under the blanket certificate could be either for a specified transaction or for specified volumes within a one-year period to be sold to unspecified interstate pipelines. Applications for blanket certificate authority outside the parameters adopted in Docket No. RM81–29 will generally be denied.

The Commission does not see a need to impose end-use restrictions on the off-system sales. This position is consistent with Commission policy expressed, for example, in Opinon No. 10–B with respect to producer reservations. The principal market for off-system sales has been the boiler fuel market where fuel oil is the alternative to natural gas. We see no reason to place restrictions on the use of off-system sale gas, at least under present circumstances.

As to curtailment status, the off-system sales previously authorized were made on a "best efforts" basis, with a requirement that the sale be interrupted prior to interruption of on-system customers. We believe that policy should be continued. The fundamental predicate for making off-system sales is that the gas is surplus to the requirements of the pipeline's historic market. *A fortiori*, that historic market has a service preference over transactions that are made possible only when and to the extent that a surplus exists. While questions may arise with respect to the relative priority to be accorded more than one off-system sale by the same pipeline, we express no view on that subject here. Where it develops as a genuine issue, we will pursue the matter on the basis of the record developed in a particular proceeding.

In the past we have authorized off-system sales for a one-year term, without prejudice to the seller seeking to extend the sale. We will continue to limit off-system sales to a one-year period. The rapid changes in the nature of the gas markets that have occurred in the last year have convinced us, more than ever, that all participants in decisions concerning future transactions need to remain flexible. We cannot now discern whether the considerations that lead us to authorize off-system sales now will continue to exist a year or more from now.

IV. Procedural Matters

A number of pipelines urged that we expedite the process of deciding cases concerning off-system sales. We believe that this policy statement should expedite case dispositions by serving to narrow the scope of the issues involved, and by providing guidelines for the industry and the Staff as to the nature of transactions the Commission is prepared to authorize on more or less a routine basis. Where applications propose off-system sales that are consistent with the policy statement, we expect such applications to be processed expeditiously.

We are also taking two other steps. First, as stated above, we expect to include in the final rule issued in Docket No. RM81–29 a provision authorizing off-system sales between interstate pipelines. Second, we will delegate to the Director of the Office of Pipeline and Producer Regulation the authority to issue a certificate of public convenience and necessity authorizing an off-system sale where the application is uncontested and consistent with the terms of this policy statement.

Finally, with respect to cases where there is a specific allegation of market loss made by an established supplier of the potential buyer, we believe that an evidentiary hearing to explore the various issues discussed above with respect to market loss is likely to be the only way of developing a record sufficient for the Commission to decide whether the proposed transaction is required by the public convenience and necessity. In this connection, the pipeline or distributor raising the objection must allege with specificity, and be prepared to prove, that the potential buyer is a current customer on the objector's system and that the selling pipeline's sales advantage is due to the statutory framework of the Natural Gas Act and the NGPA, which subject the nation's gas supplies to disparate price ceilings.

By the Commission. Chairman Butler concurred and will have a separate statement. Commissioner Sheldon dissented with a separate statement attached. Commissioner Richard concurred with a separate statement attached.

Lois D. Cashell,

Acting Secretary.

Separate Statement of Commissioner Sheldon

Issued: April 25, 1983.

I disagree with my colleagues in this matter because I believe implementation of the policy will prevent surplus gas from being made available to many prospective purchasers. Further, I believe the least cost gas mix will not be available to consumers.

Industry data indicates that there is presently a deliverability surplus in excess of 3Tcf. Current market demand forecasts demonstrate that the amount of the present surplus may grow even larger. Given OPEC's most recent developments, it is not unreasonable to assume that No. 6 fuel oil may further erode additional industrial markets served currently by natural gas. Notwithstanding the fact that natural gas has at best a tenuous hold on some industrial markets, there is ample evidence that certain areas of the country contain industries that are unable to shift, for pragmatic reasons, to fuel oil or are supplied by expensive sources of natural gas. If it is possible to move some of the surplus to markets efficiently and without undue harm to on-system customers, it is my belief the Commission should facilitate such movement.

While the policy statement issued today seeks to deal with this surplus situation, I believe the policy adopted by the Commission does not achieve its stated objectives.

I am particularly concerned with the pricing scheme established by the policy statement. While it is intended to preclude off-system sales made at discriminatory or preferential prices to the detriment of on-system customers, it is in my view both unnecessary as a protective measure and inimical to the majority's stated objective of moving less expensive gas to off-system markets.

The past 1½ years has indicated that gas will move if it is appropriately priced. Clearly the 100 percent load factor rate resulted in the movement of several billion cubic feet of gas. When the 100 percent load factor was adopted as a policy matter to be in the public convenience and necessity, the Commission believed such a rate was a fair and just pricing scheme. However, we have seen several on-system customers object to the 100 percent load factor because it was not a rate under which the on-system customers could purchase gas for their own use.

I would generally prefer to see this Commission give the selling pipeline and its on-system customers the freedom to determine what off-system sales rate would adequately protect these customers. A system average load factor rate is one which would reflect the average cost of serving all on-system customers and would be a rate under which all on-system customers could make purchases. Such a rate is clearly not unjust, unreasonable nor unduly discriminatory or preferential with regard to on-system customers. In my view, a system average load factor rate would be presumptively in the public convenience and necessity. Further, a system average load factor rate would recover more revenues for on-system customers than the 100 percent load factor rate. Moreover, the record indicates that virtually all of the Louisiana intrastates could continue to purchase vast quantities of the surplus at significant savings to their customers if the selling interstates are authorized to sell gas off their traditional system at the system average load factor rate.

The majority appears to have de-emphasized the off-system sales policy's original goal of reversing a dangerous trend of discouraging producers from continuing their aggressive exploration and development program initiated subsequent to the passage of the NGPA. The system average load factor rate would allow some of the interstates with the largest surpluses to continue their off-system sale efforts. The point is, gas will move off-system without undue harm to on-system customers if it is appropriately priced. The majority's action today will do nothing to ameliorate the current dilemma.

I am concerned also with that part of the policy statement which requires case-specific analysis of situations where a proposed off-system sale is alleged to cause market loss by an established supplier. The mere specter of prolonged litigation will discourage potential sellers from attempting to negotiate an off-system sale.

Another aspect of the policy statement with which I have problems is the requirement that the selling pipeline have actual or potential take or pay obligations. Such a requirement penalizes a well managed company which may have surplus supply not necessarily coupled with take or pay potential. A perhaps less efficient company with take or pay problems would be rewarded by this requirement but an efficient company would be penalized.

The majority appears to imply that there is something ominous about interstates displacing pre-existing intrastate suppliers because of the "cushion" afforded interstates by virtue of the NGPA.

Let me set the record straight by making the following observations: From the onset of interstate curtailments in 1971 to as recently as two years ago, certain intrastate pipelines have enjoyed significant supply advantages to the detriment of the interstate market. A major ingredient which spawned the intrastate surplus was the absence of any price control. However, this absence of controls enabled intrastate suppliers to offer firm, reliable supplies to the intrastate industrial and boiler fuel markets. Moreover, countless industrial customers of interstate pipelines faced with the option of no gas willingly relocated their plants to the gas rich intrastate arena. Further, immediately upon passage of NGPA, these same intrastate

1983
UMI

pipelines, who today the majority seeks to insulate from the rigors of the marketplace, capitalized considerably under Sections 311 (b) and 312 of the NGPA. Enormous volumes of surplus intrastate gas moved into the gas-starved interstate market without a mention of market raiding or anticompetitiveness.

It is shortsighted to assume that today's interstate surplus is any more permanent than was the intrastate surplus of several years ago. Given the severe supply decline curves forecast for the Gulf of Mexico as early as 1985, it is unfortunately not unreasonable to assume that a new era of curtailment is lurking beyond the horizon. Off-system sales are only a temporary and short-term response to the myriad factors which have caused the current deliverability surplus. To deny appropriate market responses for parochial reasons is a policy I cannot support. Further, to suggest that the cushion is a creature of the statute flies in the face of the history of contractual and regulatory practices in the intrastate market. It has been next to impossible for intrastates to acquire low-cost gas on a permanent basis since virtually every intrastate contract contains favored nations clauses which cause all intrastate prices to rise according to the highest price which any intrastate buyer is willing to pay. Interstates today might be facing the same prospect had not the Commission explicitly acted to prohibit the operation of these clauses in interstate contracts.

I favor an off-system sales policy which has the Nation's best interests at heart, not a policy which has the peculiar, if not odious effect of safeguarding parochial concerns. The majority should state simply that it has decided to discontinue the off-system sales program. In effect, it has.

Georgiana H. Sheldon,

Commissioner.

Statement of Commissioner Richard, Concurring

Issued: April 25, 1983.

The Commission, like poor Pilgrim on the way to the Celestial City, has been seeking light in the instant review of its off-system sales policy since the Informal Conference held in November of 1982. Our problems with on-systems sales are enough, yet we now must consider those that are off-system.

Our rules on off-system sales emerged from two policy objectives: to allow supply-rich pipelines to sell gas to supply-poor pipelines to correct regional supply imbalances and to offer interstate pipelines relief from take-or-pay obligations. Regional supply imbalances largely occurred during the curtailments of the 70's with some occurring after enactment of the Natural Gas Policy Act of 1978. The take-or-pay factor in our policy has largely been brought about in the last two years by rising prices during a time of decreased demand.[1] Both reasons for the need for off-system sales can be explained by regulatory policy.[2] Certainly they are not inherently evil.

The picture of our natural gas market from shortage to current surplus has changed considerably since the Central Intelligence Agency in 1977 projected such gas shortages worldwide that the Soviet Union would be a net importer of both oil and gas.[3]

Since the public conference, concern about the supply-demand imbalance has been mounting. Pipelines, both interstate and intrastate as well as distribution companies have fervently expressed their concern about maintaining existing sales levels in their conventional market areas.[4] Markets have been deteriorating. According to the most recent American Gas Association data estimates in the calendar year 1982, the amount of excess gas production capability ranged from 1.9 Tcf to 2.7 Tcf. Estimates of our own Staff note that a further drop in the OPEC oil price to a range of $25, could in turn, increase the surplus even greater.[5] The increasing deliverability surplus issue must be addressed by the Commission.

No one knows how long this supply-demand imbalance will last.[6] We all might agree, however, that the dissipation of surplus is linked to such factors as the interaction between natural gas and fuel oil prices as well as a strengthening of the current soft demand in our automobile and steel industries. In the meantime, there still could be a significant number of willing sellers and willing buyers, who for a number of reasons will be in a position to ameliorate the present and possibly enormous short term market imbalance.

Thus, I concur with the majority that off-system sales are an acceptable response to a difficult, albeit what may be a short term problem. The first place where I differ with my colleagues is in their choice of the pricing mechanism which, in my view, may do very little to facilitate the movement of gas. Nor have we, I think, given enough thought to what chaos might be created if the price of oil drops too precipitously.[7]

Price Restricitons on Gas Movement

The off-system sales conference was replete with criticism of the inadequacies of the 100% load factor rate. When this Commission adopted it in August 1981, it was under enormous pressure to do something with the mounting take-or-pay exposure projected by interstate pipelines. On-system customers were willing to wait and see what their posture would be after the experience of the initial year of the off-system sales. By August of 1982, it became apparent that the 100% load factor rate was being seriously questioned. Since most on-system customers were generally unable to purchase at the lower 100% load factor, our review invited comments on what might be a more appropriate benchmark.

Numerous participants at the November conference encouraged the Commission to adopt the system average load factor rate since in theory it reflected the average cost of serving the typical on-system customer on a particular system. Since this average load factor is one which is designed to accommodate all on-system customers, it is safe to conclude that such a rate is neither unjust, unreasonable, nor unduly discriminatory insofar as those customers are concerned.

A system average load factor rate more fully compensates traditional customers for the volumes sold off-system. It offers a further advantage to on-system customers if the selling pipeline elects to credit off-system revenues to Account 191. The customers will receive significantly more credited revenue under such a plan compared with the 100% load factor rate. An off-system customer, on the other hand, should benefit by averaging down its higher cost supplies with lower cost off-system amounts.

Even this compensatory policy, by itself, could be satified and off-system sales allowed, so long as the selling price is greater than the selling pipeline's avoided or incremental cost. That price could still be lower than any comparable on-system price. It does not have to be the higher of system average load factor or the average Section 102 price.

I am afraid our policy may dampen pipeline flexibility to the ultimate detriment of all consumers. These times call for new policies here at the Commission. Surviving the natural gas industry transistion will be rocky at best. The review of off-system sales have raised a number of questions of an institutional nature along these lines.

It has been argued that interstate pipelines that have operated efficiently and prudently with regard to gas acquisition strategies should be rewarded by being placed in a position to make off-system sales of a short-term surplus.

However, whenever a commodity has been vintaged such as has happened in the wellhead control of natural gas, existing customers of a pipeline may argue that the low cost supplies financed in effect by them, especially if interest free loans by ratepayers such as advance payments are involved, should be "husbanded" for their use.[8] the use of his grandfather idea advanced by lawyers, legislators, or expressed by physicists in who gets to say when time will start, evidenced by the equation, time = 0 will be an issue here at the Commission.

This is where the battle is joined. At what price should off-system sales be set in order to be compensatory to on-system sales? [9] Set too high none will be made; set too low and on-system customers might argue their cushion being eaten up.

As to the husbanding issue, one pipeline executive noted in his testimony that as to the:

". . .perceived low cost advantage at a later date. . . . The gas may not be recovered as a result of drainage or the limited time frame available for make-up or take-or-pay volumes in Natural's gas purchase contracts.[10]

The perceived benefits of husbanding may be illusory. [Pipelines] have continued to add reserves. We feel that that's important to the future viability of all of our markets.

". . .This is not the kind of business dealing with a depreciable asset where you can turn it off and turn it back on when you need it. It requires lead time. . . .[11]

As the band of commodity prices developed under existing statutory authority or (under changed authority) moves toward a much more narrow one, the off-system sales policy has the potential to become a useful tool. Similar to any commodity spot market, it could enable our maturing system of pipelines to move a supply of gas around the country where it is needed much like the idea of a national electrical grid. At the same time it could offer *all* producers the flexibility for continued exploration and production through an expanded market access.

This purpose will be served as long as the on-system customers are adequately protected on the price issue. The supply issue is one that takes care of itself in that off-system sales would, of course, be interruptible.

As to the implication in the policy statement that there appears to be a competitive problem between interstate pipelines and intrastate pipelines, I would suggest that the problem in the future will not be limited between these two entities alone. The potential or disruption caused by vintaging could be between some interstates against other interstates.

As the witness for Northern Natural Gas Company noted:

Since . . . we have lost a lot of sales during the off-peak period, we are trying to find the markets for our long-term gas supply, that we can't market in our traditional area.[12]

Market Raiding

The fact is that any static pricing standard adopted today may soon be irrelevant. The growing surplus of natural gas can become so large that, with rare exceptions, there could be no buyers.[13] Even if the price were set at the "reasonably anticipated average variable cost" [14] (a standard recommended by antitrust experts to avoid predatory pricing) the prices would still approximate the prices of recent sales. The majority has gone farther to consider not only antitrust policies and the need to encourage natural gas sales,[15] but also to take into account the price which does not discriminate against the customer of the selling pipeline and compensates for the loss of the gas. It is true, as the dissent points out, that these steps lessen the likelihood that off-system sales will be made. However it bears reiteration that the crucial battle relating to the regulatory treatment of surplus natural gas in the long term is not likely to be joined between intrastate and interstate pipelines as envisioned by the majority. That is merely a skirmish. The Commission is about to become the arena for the interstate pipeline systems as they challenge each other for shares in what may become a rapidly *contracting* natural gas market, absent market pricing comparable to its fuel competition and an upturn in the economy.

In the public discussion of this policy statement held on March 10, 1983, some members of the majority defended their choice to protect the intrastate pipelines from market intrustion on the ground that the Natural Gas Policy Act of 1978 had conveyed an unintended, competitive advantage upon some interstate pipelines. I agree that, under that statute, several interstate pipelines possess large reserves of low-cost gas which remain under price controls. Thus, their average prices are lower than others less fortunately situated.[16] In my opinion, however, the effects of "price cushions," dropping demand due to conservation, and market loss to alternative fuels have far more serious implications in the interstate market.

The front lines of impending combat have already reached the doorsteps of the Commission. On November 24, 1982, we set for hearing a compliant by Central Illinois Light Company that they be permitted to add a new supplier, displacing some high-priced Panhandled Eastern supplies with volumes from Natural Gas Pipeline Company of

---

[1] An economic recovery and concomitant increase in demand could bring the first reason back to the limelight. Conversely, even lower oil prices or a failure of the economy to revive would continue to emphasize reason two.

[2] *See* Office of Regulatory Analysis, FERC, Off-System Sales: A Preliminary Outline of the Policy Issues, 8–13 (Oct. 12, 1982).

[3] Central Intelligence Agency, *The International Energy Situation: Outlook to 1985* (1977). The report predicted the Soviet bloc by 1985 ". . . would require a minimum of 3.5 million barrels of imported oil" daily. Soviet production is more than 400,000 above the CIA's estimate for 1983. This estimate was part of the impetus behind President Carter's National Energy Plan.

[4] This Commission is too. *See* Tennessee Gas Pipeline Company, 21 FERC ¶ 61,004 (Oct. 1, 1982).

[5] Staff suggests markets for gas could fall further below the 1982 levels with a projection of an oversupply for 1983 to be in excess of 3 Tcf, an amount equal to approximately 15% of the total marketable natural gas production. Working and total storage inventories for 37 interstate pipelines are now 45.5 percent (470 Bcf) and 17.5 percent (594 Bcf) higher, respectively than last year at this time. Office of Pipeline and Producer Regulation, FERC, Preliminary Interstate Form 8 Underground Storage Report (April 1, 1983).

[6] A study by Merrill Lynch suggests up to 1984. *See Oil & Gas J.*, Feb. 21, 1983, at 66–60.

[7] We are seeing some evidence of this now in the form of refusals to honor minimum bills, or take-or-pays. In a non-regulated market all segments of the national production/delivery system would bear the brunt of a drop in demand to the overall benefit of consumers. Due to the nature of our system, however, in a falling market, we are likely to see requests for rate increases to reallocate fixed costs based on lower demand absent falling prices or reduced take-or-pays.

[8] For example, Joesph P. Thomas of Peoples Gas Lighting Company and North Shore Company said, "The question of the old gas prices—which given Natural Gas Pipe substantial advantage—came about because it had fantastic support from the customer in the early '70s in advance payment programs. Also, the customers made direct personal investments with producers to commit gas to Natural Gas Pipe.

Natural Gas Pipe, therefore, today is in a very enviable position in terms of cost of gas, but they are there because they had the support of their customers. And most of it was financial support." Review of Off-System Sales Program, Public Conference Transcript 263 (Nov. 4, 1982).

As Donald Carlson of Interstate Power Company noted, "Curtailment and restriction of growth by Interstate's pipeline suppliers has only ended in the last few years, and these suppliers have offered additional contract quantities to their jurisdictional customers for the first time in approximately 10 to 12 years.

Both Northern and Natural have participated very actively in the off-system sales of their reserves and have applied for authorizations to make additional sales on the future. Interstate believes that these applications should be evaluated in the light of the effect that these authorizations might have on the availability of firm and interruptible service to historic customers on these pipeline systems in the future, and the impact of authorizing such sales on curtailments in the future." Id. at 232.

[9] The interests of traditional system customers in off-system sales raise a multiplicity of difficulties. Some of these are broad issues such as the extent to which a price should compensate them for depletion of the pipeline's cushion. Other issues are linked to the characteristics of the customer class. For example, in Docket No. CP82–544, customers of Tennessee Gas Pipeline have voiced their displeasure at the proposed off-system sale of 129 Bcf of surplus gas at a 100% load factor rate when many small customers are constrained from purchasing the cheap surplus by their annual volumetric limitation imposed under Tennessee's 1974 curtailment plan. Review of Off-System Sales Program, Supplemental Comments of Am. Pub. Assoc. at 7 (Dec. 2, 1982). Resolution of issues of this sort may range from removal of annual volmetric limitation to rate design adjustments.

[10] Review of Off-System Sales Program, Public Conference Transcript at 7 (Nov. 4, 1982) (Comments by Charles Eberst, Natural Gas Pipeline Company).

[11] *Id.* at 63. Lead times are not limited to pipelines—neither acquisition nor production comes, like Athene, full blown from the head of Zeus. This Commissioner, and others, still worry about deliverability in the long term:

"Transco believes that the excess deliverability situation is necessarily a temporary phenomenon because reserves dedicated to pipelines have not increased substantially in recent years. For example, today Transco reserves/annual production ratio is approximately 6 compared to 10 in 1977. During that same period, Transco's pipeline reserves increased 12 percent, whereas, annual deliverability from these reserves increased 90 percent." *id.* at 328 (comments of Alford White of Transco); or,

"[W]e do not believe that there is any magic in maintaining a certain level of gas reserves or a high reserve to production ratio. As a matter of fact, [Lone Star Gas Company doesn't] think that it is reasonable nor practical in today's business environment to maintain the high reserve to production ratios that we were able to maintain 10 to 15 years ago," *id.* at 361 (comments of H. H. Merritt).

[12] *Id.* at 120 (Comments of Othol White of Northern Natural Gas Company). *See infra* note 27.

[13] For the two week period ending February 19, 1983, only 96,000 Mcf/d moved under the off-system sales program. Office of Pipeline and Producer Regulation, FERC, Volumes of Self-Implemented Purchases, Off-System Sales and Curtailments by 28 Major Interstate Pipelines, App. IV (March 3, 1983). It is worth noting that the prices for these transactions were lower than the standard adopted by the majority today.

America [17] which enjoys the lowest system average acquisition cost in the country. On February 3, 1983, the Illinois Commerce Commission passed a resolution directing Central Illinois Light Company, Illinois Power Company, and Central Illinois Public Service Company to inquire into the feasibility of obtaining natural gas supplies less costly than that available from their current suppliers.[18] In addition, the Illinois Commerce Commission has proposed legislation to the National Association of Regulatory Utility Commissioners that many current natural gas supply contracts be voided or subjected to renegotiation and that would make pipelines common carriers. Under such a scheme, the traditional service obligations of the pipelines and their role as sole suppliers would be seriously diminished.[19]

Now it appears that it is to be the burden of the Commission to referee the territorial struggles over shrinking territory.[20] In the past, the fights have largely involved opportunities for market growth. In the near future we may be forced to decide who is to be the shrinking pipeline. The Commission has never grappled with the ramifications of market intrusion on an industry-wide basis.

The cushion debate again raises its head, not between intrastates and interstates, but between interstates with low versus high cushions. The differential in price that may lead to a competitive advantage on price alone, absent legislative changes may last until the 1990's.[21]

A review of some of the leading cases reveals some of the factors which the Commission will have to consider when confronted with the issue of market intrusion. Based upon the Natural Gas Act's directive that certification and abandonment authority are not to "be construed as a limitation upon the power of the Commission to grant certificates of public convenience and necessity for service of an area already being served by another natural gas company," [22] the policy of the Commission has been held to favor competiton.[23]

Under that rubric, however, the Commission has generally sought to balance the benefits of the intrusion against its detriments from the point of view of the affected customers.[24] The chief benefit is generally a lower price, at least in the short-term for some customers.[25] The detriments have received more attention, focusing upon the effect of market loss.[26] Whether this Commission wants to pay attention, to any or which of these cases when gas market priced, no longer sells itself against competing fuels will be our task.

Conclusion

None of these factors are dispositive in the circumstances I believe the natural gas industry will soon face. On the one hand, widespread market-shifting undermines the planning efforts of management and the confidence of investors. It may also injure customers who, when their numbers are reduced, must shoulder a larger share of the fixed costs. On the other hand, protectionist policies may deprive customers of the lowest prices they might receive and remove the discipline of competition.

Naturally the penetration of one's historic market, whether its interstate or intrastate, is a concern.[27] Until the wide band of prices

[17] 21 FERC ¶61,147. The first market entry case decided by the Commission originated in Illinois. In *Central Illinois Public Service Company*, 4 FPC 1043 (1945), the distribution company sought to purchase additional supply from a source other than its traditional supplier, Kentucky Natural Gas Corporation. The distributor, in effect, sought to eliminate the middleman and to purchase directly from Kentucky's supplier, Panhandle Eastern Pipe Line Company.

[19] *Illinois Commerce Commission Pushing Common-Carriage Plan, Greater Competition*, Inside FERC 3 (Mar 14, 1983).

[20] I harbor reservations about the wisdom of protecting market segments, as I have discussed earlier, especially when the protection is grounded in an attempt to compensate for advantages conveyed by a statute which was intended to unify the interstate and intrastate market. However, I view the "tentative" statement issued today as applicable only to off-system sales, not to the broader issues of market competition among long-term suppliers.

[21] The natural gas cushion is derived from the relationship of decontrolled or to be decontrolled gas and the gas which remains subject to price controls. According to the Department of Energy, approximately 60% of all intrastate gas is decontrolled by 1985, rising to 76% in 1987, and 86% by 1990. In the interstate market, 46% of domestic interstate gas supplies will retain price controls by 1985, 36% in 1987, and 25% in 1990. Cir. 1964) (Washington concurring: "Investors in the natural gas industry, although granted an opportunity for a 'fair return', are by no means guaranteed freedom from risk or competition. Such assurance would, in a case such as this, deprive competitors of the right to compete, inhibit efficient allocation of resources and deny ultimate consumers the lowest prices to which they are entitled."). Panhandle Eastern Pipe Line Co. v. FPC, 169 F.2d 881, 884 (D.C. Cir.), *cert. denied*, 335 U.S. 854 (1948); Columbia Gulf Transmission Co., 37 FPC 118, 131 (1967), *off'd*, Atlantic Seaboard Corp. v. F.P.C., 397 F.2d 753 (4th Cir. 1968).

[24] Lynchburg Gas Co. v. FPC, 336 F.2d 942, 950 (D.C. Cir. 1964) (washington, concurring).

[25] *E.g.*, Texas Eastern Transmission Co., 14 FPC 116, 120 (1955) (Low cost was found to be outweighed by the effects of load loss on the established supplier.); Central Illinois Pub. Serv. Co., 4 FPC 1043 (1945). Other benefits have included the extent to which a second supplier can furnish more satisfactory service. Michigan-Wisconsin Pipe Line Co., 5 FPC 953 (1946), *amplified*, 6 FPC 1 and 6 FPC 56 (1947). *See* Michigan Consolidated Gas Co. v. FPC, 283 F.2d 204 (D.C. Cir.), *cert. denied*, 364 U.S. 913 (1960) (remanded related proceedings for consideration of the overall needs of the competing companies). A second physical source of supply which enhances the operational flexibility and safety of the purchaser. Texas Eastern Transmission Co., 14 FPC 116, 120 (1955). Occasionally, when a customer sought to eliminate its "middleman supplier," this has been viewed as a benefit *per se*. Cincinnati Gas & Elec. Co. v. FPC, 389 F.2d 272, 276 (6th Cir. 1968). *Cf.* Shrewsbury Mun. Light Department v. New England Power Co., 32 FPC 373, 377. (1964), *aff'd sub nom.*, New England Power Co. v. FPC, 349 F.2d 258 (1st Cir. 1965) (displacement of original supplier of electric power).

[26] In *Tennessee Gas Transmission Company*, 14 FPC 544 (1955), for example, the Commission permitted the introduction of a second supplier where the impact on the traditional one would "not be material." *Id.* at 548. On the other hand, it has denied intrusion where the savings to the customers were "relatively small." Texas Eastern Transmission Co., 14 FPC 116, 120 (1955). It also denied intrusion in *Transcontinental Gas Pipe Line Corporation*, 21 FPC 130 (1959), relying upon the potential harm to the orginal supplier who had "pioneered" the area. The Third Circuit criticized the reliance of the Commission upon "assertions of possibilities" of economic injury. Lynchburg Gas Co. v. FPC, 275 F.2d 847, 848 (3rd Cir. 1960). (The Commission responded to the court by later granting the intrusion based upon price benefits.) Lynchburg Gas Co., 24 FPC 955, 958 (1960). The Commission has also refused to permit an additional supplier to skim the cream of the industrial load off the original pipeline system. Transwestern Pipeline Co., 36 FPC 176, 20 (1966); Natural Gas Pipe Line Co., 34 FPC 771, 782-783 (1965). We have demanded that the supplier seeking entry show independent economic feasibility for the proposed project. Natural Gas Pipe Line Co., 34 FPC 771, 778 (1965). In two cases the Commission attempted to formulate a mechanical test for balancing these interests. Called the "net market loss test," the theory was first developed by Judge Fahy in his remarks setting forth his reasons for the *per curiam* remand in *Lynchburg Gas Co. v. FPC*, 336 F.2d 942, 947 (1964). It measured the specific potential market loss that intrusion would impose upon the original pipeline in terms of its impact on revenues or growth, but considering whether the historical supplier may increase its sales elsewhere. Alabama-Tennessee Natural Gas Co., 38 FPC 1069, 1073-1078 (1967), *aff'd*, Alabama-Tennessee Natural Gas Co. v. FPC, 417 F.2d 511, 514-518 (5th Cir. 1969); City of Hamilton, Ohio 37 FPC 209, 214 (1967), *off'd* Cincinnatti Gas & Elec. Co. v. FPC 389 F.2d, 272, 276 (6th Cir. 1968); Columbia Gulf Transmission Co., 37 FPC 162, 125-126 (1967). These decisions were severely criticized in Smith, *The Federal Power Commission and Pipeline Markets: How Much Competition?* 68 Colum. L. Rev. 664, 681-687 (1968) (argued that the Commission should also protect the original supplier's right to growth in the contested market, *id.* at 666). The courts have since held that this test is not mechanical, but is a factor which the Commission "may" consider. Atlantic Seaboard Corp. v. FPC, 397 F.2d 753, 760 (4th Cir. 1968). However, the courts have upheld the Commission's reliance on this test even when the result was to completely supplant the original supplier with a competitor new to the service area. Alabama-Tennessee Natural Gas Co. v. FPC, 417 F.2d 511 (5th Cir. 1969); Cincinnati Gas & Elec. Co. v. FPC, 389 F.2d 272 (6th Cir. 1968).

[27] "Mr. Solters: To the extent that people would want blanket transactions, . . . for off-system sales which would permit the selling interstate pipeline to sell gas in somebody else's market, because there aren't any new plants, basically, they are all pretty much tied up—would you be willing to, as a part of that package, look at accepting a condition under which you would transport other people's gas into *your* markets at a particular point in time?"

"Mr. Davidson: I can answer that for Consolidated Mr. Solters . . . . We wouldn't reject it out of hand. We would want to look at what impact it has on our system and on our fixed cost recovery by moving that gas. But again, it would have to be a cooperative effort. Just as when we go out and find off-system markets, we have to also get cooperation from intrastate companies to move that gas to those markets." Review of Off-System Sales Program, Public Conference Transcript, 128 and 132 (Nov. 4, 1982). Plenty of concern by intrastate pipelines is contained in the transcripts.

[28] A reconstruction of contract prices in graph form would also show the price beginning to break downward.

[29] 15 U.S.C. 3371 (Supp. IV 1980).

caused by vintaging becomes a much more narrow one, rather than the 27-type (or 24 but who's counting?) structure we have today, this Commission will have to concern itself with charges of market raiding. When the band is tight it would seem reasonable that surplus gas will move freely on a price basis. The notion that you are either a low cushion intrastate or high or low cushion interstate would be meaningless—efficiency, not vintaging, would win markets and bring the lowest prices to consumers. The Natural Gas Policy Act, among other things, established movement towards a nationwide wellhead price rather than one that differs because it is either intrastate or interstate. In this vein, it is well to remember that although the price unregulated intrastate market brought on increased supplies before the passage of NGPA the intrastate market began to saturate.[28] The validity of this statement flows from the fact that over 2 Tcf of gas flowed into the supply short interstate market through section 311 transactions [29] immediately after passage of the NGPA in 1978. The reasons that were incentives to move gas from intrastate to interstate are the ones that would encourage interstate pipelines to sell a short term surplus. A national debating society could be formed stocked with spirited members on both sides on whether or not the intrastate markets unregulated price kept the reserves forthcoming while the interstate markets regulated price discouraged the exploration and development of gas. The NGPA by unifying the wellhead price supposedly did away with that internecine battle. We should, as a national objective, encourage the free flow of gas across our state and national borders at the price that a free competitive market would produce.

In my view, tentative attempts to resolve these conflicts and contain the struggle to isolated situations, such as today's policy statement, should be avoided until the Commission or Congress has analyzed the larger ramifications and is prepared to address them—the quicker the better. Hopefully any policy developed will rely less on historic regulatory expertise and rely more on hard bargaining where market signals do get sent *up and down* the line.

Oliver G. Richard, III,

Commissioner.

Attachment.—State of Illinois; Illinois Commerce Commission; Inquiry Into Feasibility of Obtaining Alternative Sources of Gas Supply; 83-0061; Order

By the Commission:

Whereas, certain natural gas pipelines serving gas distribution companies in Illinois are purchasing significant quantities of high-priced gas; and

Whereas, the average purchase gas cost of these pipelines with high-priced gas is now far above the price of new domestic gas and the price of gas on other pipeline systems; and

Whereas, information available to the Illinois Commerce Commission indicates that ample supplies of less costly gas are available; and

Whereas, these high-cost gas purchases by certain natural gas pipelines are imposing and will continue to impose severe and unnecessary financial burdens on natural gas customers in Illinois; and

Whereas, Central Illinois Light Company, Illinois Power Company and Central Illinois Public Service Company are particularly affected by pipeline purchases of high-cost gas;

Accordingly, the Commission, pursuant to Sections 8, 9, 36 and 41 of the Public Utilities Act, directs an inquiry into the feasibility of obtaining alternative sources of gas supply. Central Illinois Light Company, Illinois Power Company, and Central Illinois Public Service Company should each file a written report with the Commission on the feasibility of obtaining alternative sources of gas supply. In such reports the companies shall address at a minimum, the technical, regulatory, and economic feasibility of the following alternatives: (1) direct interconnection with pipelines other those that presently serve them; (2) increased purchases of gas from pipelines with lower cost gas that are presently serving them; (3) direct purchase of gas supplies from producers or other sources of supply; and (4) coordination of gas purchases among distribution companies in Illinois.

It is therefore ordered by the Illinois Commerce Commission that Central Illinois Light Company, Illinois Power Company and Central Illinois Public Service Company, be, and they are hereby, directed to each file a written report on the feasibility of obtaining alternative sources of gas supply, as described hereinabove, with the Chief Clerk of the Commission thirty (30) days from the service date of this order.

By Order of the Commission this 3d day of February 1983.

Philip R. O'Connor,

Chairman.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[PF-324; PH-FRL 2358-5]

Pesticide, Food, and Feed Additive Petitions; Certain Companies

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received pesticide, food, and feed additive petitions relating to the establishment and/or amendment of tolerances for residues of certain pesticide chemicals in or on certain commodities.

ADDRESS: Written comments to the product manager (PM) cited in each petition at the address below: Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Written comments may be submitted while the petitions are pending before the Agency. The comments are to be identified by the document control number [PF-324] and the petition number. All written comments filed in response to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: The product manager cited in each petition at the telephone number provided.

SUPPLEMENTARY INFORMATION: EPA gives notice that the Agency has received the following pesticide, food, and feed additive petitions relating to the establishment and/or amendment of tolerances for residues of certain pesticide chemicals in or on certain commodities in accordance with the Federal Food, Drug, and Cosmetic Act. The analytical method for determining residues where required, is given in each petition.

I. Initial Filing

PP 3F2859. Rohm and Haas Co., Independence Mall West, Philadelphia, PA 19105. Proposes amending 40 CFR 180.381 by establishing tolerances for the combined residues of the herbicide oxyfluorfen [2-chloro-1-(3-ethoxy-4-nitrophenoxy)-4-(trifluoromethyl) benzene] and its metabolites containing the diphenyl ether linkage in or on the commodity onions (dry bulb) at 0.05 part per million (ppm). The proposed analytical method for determining residues is gas chromatography using electron capture detector. (PM-23, Richard Mountfort, 703-557-1830).

II. Amended Petitions

Ciba Geigy Corp., P.O. Box 18300, Greensboro, NC 27419, submitted the following pesticide, food, and feed additive petitions published in the **Federal Register** as follows:

Petitions	CFR sections	Publication date
PP 3F2786	40 CFR 180.408	Dec. 22, 1982 (47 FR 57127).
FAP 3H5376	21 CFR 193.277	Do.
FAP 3H5378	21 CFR 561.273	Do.
FAP 3H5377	21 CFR 193.277	Feb. 2, 1983 (48 FR 4717).
FAP 3H5377	21 CFR 561.273	Do.
FAP 3H5382	21 CFR 561.273	March 16, 1983 (48 FR 11155).

Petitions	CFR sections	Publication date
PP 3F2819	40 CFR 180.408	Do.

The above petitions proposed the establishment of tolerances for the combined residues of the fungicide metalaxyl and its metabolites in or on certain raw agricultural, and/or food and feed commodities. The tolerance expression for all the above petitions are amended and should read as "metalaxyl [*N*-2,6-dimethylphenyl)-*N*-(Methoxyacetyl) alanine methyl ester] and its metabolites containing the 2,6-dimethylaniline moiety, and *N*-(2-hydroxymethyl-6-methylphenyl)*N*-(methoxyacetyl) alanine, methyl ester each expressed as metalaxyl.

Additional amendments to the petitions were proposed as follows:

1. *FAP 3H5377.* Increased the proposed tolerance levels for the combined residues of metalaxyl and its metabolites in or on dried citrus pulp from 6.0 ppm, and citrus molasses from 5.0 ppm to 7.0 ppm, (21 CFR 561.273), in connection with an experimental use program.

2. *FAP 3H5376.* Increased the proposed tolerance levels for the combined residues of metalaxyl and its metabolites in or on dried citrus pulp from 6.0 ppm, and citrus molasses from 5.0 ppm to 7.0 ppm (21 CFR 561.273).

3. *FAP 3H5382.* Added a proposed tolerance for the combined residues of metalaxyl and its metabolites in or on the commodity cotton soapstock at 2.0 ppm (21 CFR 561.273).

The proposed analytical method for determining residues in gas chromatography with a flame ionization detector or mass spectrometry. (PM–21, Henry Jacoby, 703–557–1900).

(Sec. 408(d)(1), 68 Stat. 512, (7 U.S.C. 136); 409(b)(5), 72 Stat. 1786, (21 U.S.C. 348))

Dated: April 22, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

[OPTS–44002A; BH–Fri 2358–4]

4-Chlorobenzotrifluoride, 2-Chlorotoluene and Chlorinated Paraffins; Receipt of Test Data

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the data submissions from negotiated testing programs under section 4 of the Toxic Substances Control Act received during the first quarter of 1983. These submissions include: (1) A report on a basic metabolism study of 4-chlorobenzotrifluoride, (2) a draft of a report on the effect of 2-chlorotoluene vapor on pregnancy of the rat, a consultant's letter of evaluation of this test, a preliminary report on an inhalation study on 2-chlorotoluene in the rat and rabbit, and a preliminary draft report on the effect of 2-chlorotoluene on pregnancy in the rabbit, (3) a report on 2-chlorotoluene metabolism in rats, and (4) one teratology study and three range-finding studies on chlorinated paraffins.

ADDRESS: The studies described in the notice, and others previously submitted to the Agency, are available for public inspection from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays. The material may be copied for a nominal fee. TSCA Public Information Office (TS–793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Room E–107, 401 M Street, S.W., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Jack P. McCarthy, Director, Industry Assistance Office (TS–769), Office of Toxic Substances, Environmental Protection Agency, Room E–511, 401 M Street, S.W., Washington, D.C. 10460, Toll Free: (800–424–9065), In Washington, D.C.: (554–1404), Outside the USA: (Operator-202–554–1404).

SUPPLEMENTARY INFORMATION:

I. 4-Chlorobenzothrfluoride

Occidental Chemical Corporation has proposed a testing program for 4-chlorobenzotrifluoride (4–CBTF), a chemical used in the production of dinitroaniline herbicides. The testing scheme is a multi-level approach to both health and environmental effects testing with the EPA participating at a number of program review and decision points. In addition to the acute toxicity information currently available, Occidental has proposed a base set of health effects studies on 4–CBTF which includes subchronic effects, metabolism, mutagenicity and cell tranformation. Decisions on additional testing are to be made when the base set tests are completed and have been reviewed. The environmental effects base set tests proposed by Occidental include: *Daphnia* life cycle, fathead minnow partial life cycle, bluegill flow-through bioaccumulation, soil adsorption/desorption, volatilization from water, photolysis in water and anaerobic aquatic metabolism. Because of these health and environmental effects testing schemes, the EPA has made a tentative decision, published in the **Federal Register** of November 8, 1982, (47 FR 50555), not to propose a test rule for 4–CBTF under section 4 of TSCA.

Occidental has submitted a report on "Metabolism of *p*-Chlorobenzotrifluoride by Rats" which was conducted for it by the Zoecon Corporation. Rats were given a single oral dose of radio-labeled 4–CBTF at 1mg/kg, and the excretion and tissue distribution patterns of the compound and the identity of its principal metabolites were studied.

The Agency is reviewing and evaluating the data and conclusions from this study. The study has been place in the public file on 4–CBTF (OPTS–42026).

II. 2-Chlorotoluene

Occidental Chemical Corporation is conducting a negotiated testing program on 2-chlorotoluene, a solvent for agricultural pesticides and a general solvent replacement for 1,2-dichlorobenzene. The testing scheme is multi-level in approach, with the EPA participating at a number of decision points. The toxicological areas being addressed by this program are metabolism, teratology, mutagenicity, chronic toxicity, and environmental toxicity. Because of Occidental's commitment to this testing scheme the EPA decided that it would not propose a 2-chlorotoluene test rule under section 4 TSCA, as detailed in the **Federal Register** of April 28, 1982 (47 FR 18172). Occidental has submitted the following:

1. A draft report: "Effect of 2-Chlorotoluene Vapor on Preganancy of the Rat" which was conducted by Huntingdon Research Centre for Occidental. The report indicates that several fetuses exposed to the highest dose (9 mg/1) of 2-chlorotoluene had sketetal abnormalities. The report also concluded that in rats exposed to 1 and 3 mg/1 doses of 2-Chlorotoluene "there was no conclusive indication of a treatment-related effect".

2. A report: "2-Chlorotoluene, a Preliminary Inhalation Study in the Rat and Rabbit" by Huntingdon Research Centre for Occidental. This preliminary draft presents data only for the effect of 2-chlorotoluene inhalation in rats at the lowest (4 mg/1) and highest (16 mg/1) doses and for controls. The pareliminary draft reports statistically significant changes in a number of blood and urine parameters and organ weights. Other increases in blood chemistry levels which did not reach statistical signficance were also noted in this preliminary draft.

3. An evaluation of the report: "Effect of 2-Chlorotoluene Vapor on Pregancy of the Rat" submitted by Wilson Consulting Service, Inc. to Occidental. Wilson's report concludes that 2-chlorotoluene appears to have no adverse effect on pregnancy or the condition of the fetuses at the 1 or 3 mg/1 doses. At the 9 mg/1 dose some non-statistically significant sketetal abnormalities were noted which Wilson suggests may be "indirect effects secondary to maternal physiologic reactions to this dose".

4. A report on: "2-Chlorotoluene Metabolism by Rats", a study conducted by Zoecon Corporation for Occidental. Rats were given a single 1 mg/kg oral dose of ^{14}C-labeled 2-chlorotoluene and the excretion and tissue distribution patterns of the radiolabel were studied. Principal metabolites were also identified.

5. A preliminary report on: "Effect of 2-Chlorotoluene Vapor on Pregnancy of the New Zealand White Rabbit". The preliminary report indicates that at the two highest doeses (4 mg/1 and 10 mg/1) clinical signs of maternal stress were observed. 2-Chlorotoluene was reported to have no significant effect upon reproductive performance of female New Zealand white rabbits or upon fetal development.

The Agency is evaluating the data and the conclusions which can be drawn from the data in regard go further testing under the negotiated program. These studies have been inserted in the public file on 2-Chlorotoluene (OPTS-42011A).

III. Chlorinated Paraffins

The Consortium of Chlorinated Paraffins Manufacturers is conducting a negotiated testing program on chlorinated paraffins, substances used primarily as flame retardants and plasticizers. The testing program, decribed in in full in the **Federal Register** of January 8, 1982 (47 FR 1071), was accepted by the EPA in lieu of a chlorinated paraffins test rule under section 4 TSCA. The negotiated testing program is a two-level testing scheme on four chlorinated paraffins of differing chain length and degree of chlorination. All four of the substances are being tested in some of the lower-level tests while other studies will test fewer. These lower-level tests include metabolism, teratology and mutagenicity tests in mammals, and subchronic toxicity tests in both mammals and aquatic organisms. The upper-level tests will use the compound considered the most toxic in the lower-level tests, and will include a two-generation reproduction study in rats and a number of specialized aquatic studies. The American members of the Consortium also will be performing an avian reproductive study on a chlorinated paraffin yet to be selected.

The Consortium recently submitted four studies conducted under contract by International Research and Development Corporation (IRDC).

1. One study examined the teratogenic potential of Cereclor S52® (52 percent chlorination of intermediate chain length) in rabbits. The investigators reported that this chlorinated paraffin did not induce a teratogenic response at any of the three treatment doses (10, 30, and 100 mg/kg/day).

2. Two of the studies consisted of range-finding experiments for a future teratology study with Electrofine S70® (70 percent chlorination of long chain length) in rabbits. As a result of these studies, IRDC concluded that doses of 100, 300, and 1,000 mg/kg/day of Electrofine S70® would be appropriate for the teratology study in rabbits.

3. The fourth study submitted by the Consortium was a 5-day oral range-finding test in rats designed to determine the appropriate doses of Electrofine S70® for a future cytogenetic evaluation in that species. The results led IRDC to select doses of 500, 1,500, and 5,000 mg/kg/day for the cytogenic study.

The Agency is evaluating these data and the conclusions that can be drawn from the data in regard to further testing under this program. The studies have been inserted in the public file on chlorinated paraffins [OPTS–44004] for the notice published in the **Federal Register** of January 8, 1982 (47 FR 1017).

In a January 21, 1983 letter, the Consortium informed the Agency of significant delays in the progress of the testing program. The Agency responded to the Consortium with an expression of substantial concern over these delays. At the Agency's request, representatives of the Consortium met with EPA personnel on March 24, 1983 to discuss the reasons for the delays and corrective actions to be taken by the Consortium. The Consortium's and EPA's letters have been placed in the public file for chlorinated paraffins [OTS–44004] along with a summary of the March 24, 1983 meeting.

EPA has requested that all remaining tests or testing sequences be initiated no later than May 15, 1983. The Consortium has agreed to this deadline and has subsequently submitted, at EPA's request, a detailed revised schedule for the testing program. The schedule shows dates for the following milestones for each study for which a final report has not been submitted:

1. When the test was started (or will start),

2. When the collection of experimental data will be completed,

3. When the final report will be submitted to EPA. A copy of the revised schedule has been placed in the public file.

The Consortium has also agreed to supply the Agency with monthly written status reports detailing progress in the testing program and any further problems that may arise. These reports also will be placed in the public file.

In view of the delays in this negotiated testing program, the Agency has strongly considered initiating rulemaking to require the performance of the negotiated tests. However, in view of the Consortium's agreement to the rapid initiation of the remaining tests and the strengthened reporting procedures that have been adopted, EPA has concluded that continuation of the negotiated testing program will achieve development of the needed test data in the most rapid manner. Therefore, EPA will continue to accept the negotiated testing of chlorinated paraffins so long as the revised schedule is faithfully adhered to.

Dated: April 25, 1983.

Marcia Williams,

Acting Director, Office of Toxic Substances.

Science Advisory Board Executive Committee; Open Meeting

Under Pub. L. 92–463, notice is hereby given of a meeting of the Executive Committee of the Science Advisory Board (SAB). The meeting will be held on May 23–24, 1983, beginning at 9:15 a.m. on May 23 and May 24, in Rooms 3906–08 Mall, EPA, 401 M Street, S.W., Washington, D.C. The agenda for the meeting includes the following issues: reports of SAB Committees and Subcommittees; status report on SAB review of regulations; briefing on the research and development budget for EPA in fiscal year 1984; status report on the SAB's Laboratory Organization Review Group; and other issues of member interest.

The meeting is open to the public. Any member of the public wishing to attend or receive further information should contact Terry F. Yosie or Cheryl B. Bentley on (202) 382–4126 by the close of business on May 18, 1983.

[PP 1G2441/T408; PH-FRL 2357-8]

American Hoechst Corp.; Extension of Temporary Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has extended a temporary tolerance for the combined residues of the insecticide [IR[1(S*) 3 (RS*)]]-2,2-dimethyl-3-(1,2,2,2-(tetrabromoethyl) cyclopropanecarboxylic acid alphacyano-3(3-phenoxyphenyl) methyl ester, and its metabolite in or on the raw agricultural commodity cottonseed.

DATE: This temporary tolerance expires July 1, 1984.

FOR FURTHER INFORMATION CONTACT: Timothy A. Gardner, Product Manager (PM) 17, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 207, CM#2, 1921 Jefferson Davis Highway, Arlington, VA22202, (703–557–2690).

SUPPLEMENTARY INFORMATION: EPA issued a notice, that was published in the **Federal Register** of December 16, 1981 (46 FR 61319), announcing the establishment of a temporary tolerance for the combined residues of the insecticide [IR[1(S*) 3(RS*)]]-2,2-dimethyl-3-(1,2,2,2-tetrabromoethyl) cyclopropanecarboxylic acid alpha-cyano-3(3-phenoxyphenyl) methyl ester, and its metabolite (1R, 3R) 3-(2,2-dibromovinyl)-2,2-dimethylcyclopropanecarboxylic acid (S) alpha-cyano-(3-phenoxyphenyl) methyl eater in or on the raw agricultural commodity cottonseed at 0.02 part per million (ppm). Most recently, this tolerance was extended, as published in the **Federal Register** of June 16, 1982 (47 FR 26020). This temporary tolerance was issued in response to pesticide petition (PP 1G2441), submitted by American Hoechst Corporation, Agricultural Division, Route 202–206 North, Somerville, NJ 08876. At the request of the company, this termporary tolerance is being extended again.

This temporary tolerance has been extended to permit the continued marketing of the raw agricultural commodity named above when treated in accordance with the provisions of experimental use permit 8340–EUP–6, which is being extended under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determinded that the extension of the temporary tolerance will protect the public health. Therefore, the temporary tolerance has been extended on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. American Hoechst Corp. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This tolerance expires July 1, 1984. Residues not in excess of this amount remaining in or on the raw agricultural commodity after this expiration date will not be considered actionable if the persticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerance. This tolerance may be arevoked if the experimental use permit is revoked or it any scientific date or experience with this pesticide indicates that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements fo not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981. (46 FR 24950).

(Sec. 408(j), 68 Stat. 516. (21 U.S.C. 346a(j)))

Dated: April 25, 1983

Douglas D. Campt,

Director, Registration Division, Office of pesticide Programs.

[FR Doc. 83-11772 Filed 5-3-83; 8:45 am]

BILLING CODE 6560-50-M

[OPP-50593; PH-FRL 2357-2]

Pesticides; Issuance of Experimental Use Permits; Abbott Laboratories, et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted experimental use permits to the following applicants. These permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

FOR FURTHER INFORMATION CONTACT: The product manager cited in each experimental use permit at the address below: Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

SUPPLEMENTARY INFORMATION: EPA has issued the following experimental use permits:

275–EUP–36. Issuance. Abbott Laboratories, 14th and Sheridan Rd., North Chicago, IL 60064. This experimental use permit allows the use of 128,000 BIUs of the biological insecticide *Bacillus thruingiensis*, Berliner on shade and sugar maple trees and shrubs to evaluate the control of caterpillars. A total of 11,000 acres are involved; the program is authorized only in the States of Connecticut, Maine, Maryland, Massachusetts, New Jersey, New York, Pennsylvania, and Vermont. The experimental use permit is effective from May 1, 1983 to May 1, 1985. An exemption from the requirement of a tolerance for residues of the active ingredient in or on all growing crops has been established (40 CFR 180.1011). (Timothy Gardner, PM 17, Rm. 207, CM#2, (703–557–2690)).

241–EUP–102. Issuance. American Cyanamid Company, P.O. Box 400, Princeton, NJ 08540. This experimental use permit allows the use of 28.4 pounds of the insecticide (±) cyano(3-phenoxyphenyl) methyl (+)-4-(difluoromethoxy)-alpha-(1-methylethy1)benzene-acetate in ear tags on cattle to evaluate the control of face flies, horn flies, houseflies, lice, stable flies, and ticks. A total of 5,400 head of cattle are involved; the program is authorized only in the States of Arkansas, California, Florida, Georgia, Indiana, Kansas, Kentucky, Nevada, Oklahoma, Oregon, Pennsylvania, Texas, Virginia, Wisconsin, and Wyoming. The experimental use permit

is effective from March 15, 1983 to March 15, 1984. A temporary tolerance for residues of the active ingredient in or on the milk, meat, fat, and meat byproducts of cattle has been established. (Timothy Gardner, PM 17, Rm. 207, CM#2, (703–557–2690)).

8340–EUP–6. Extension. American Hoechst Corporation, Rt. 202–206 North, Somerville, NJ 08876. This experimental use permit allows the use of 1,406 pounds of the insecticide [1R[1(S*) 3(RS*)]]-2,2-dimethyl-3-(1,2,2,2-tetrabromoethyl)cyclopropanecarboxylic acid-alpha-cyano-3(3-phenoxyphenyl)methyl ester on cotton to evaluate the control of the boll weevil, cotton bollworms, cotton leafperforators, pink bollworms, and tobacco budworms. A total of 5,000 acres are involved; the program is authorized only in the States of Alabama, Arizona, Arkansas, California, Georgia, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, and Texas. The experimental use permit is effective from July 1, 1983 to July 1, 1984. A temporary tolerance for residues of the active ingredient in or on cottonseed has been established. (Timothy Gardner, PM 17, Rm. 207, CM#2, (703–557–2690)).

45639–EUP–9. Issuance. BFC Chemicals, Inc., 4311 Lancaster Pike, P.O. Box 2876, Wilmington, DE 19808. This experimental use permit allows the use of 22.9 pounds of the insecticide amitraz on beef cattle and hogs to evaluate the control of lice, mange mites, ticks, and scabies. A total of 3,400 animals are involved; the program is authorized only in the States of Arkansas, California, Colorado, Indiana, Iowa, Kentucky, Missouri, Nebraska, Nevada, New Mexico, North Carolina, Oklahoma, South Carolina, Texas, and Wyoming and the Territory of Puerto Rico. The experimental use permit is effective from March 21, 1983 to March 21, 1984. Temporary tolerances for residues of the active ingredient in or on beef cattle and hogs have been established. (Jay Ellenberger, PM 12, Rm. 202, CM#2, (703–557–2386))

1471–EUP–50. Extension. Elanco Products Company, 740 S. Alabama St., Indianapolis, IN 46285. This experimental use permit allows the use of 7,500 pounds of the fungicide fenarimol on turfgrasses to evaluate the control of various diseases. A total of 2,993 acres are involved; the program is authorized in all 50 States except Alabama, Alaska, Hawaii, Michigan, Mississippi, Vermont, Virginia, and Wisconsin. The experimental use permit is effective from March 31, 1983 to March 31, 1984. (Henry Jacoby, PM 21, Rm. 227, CM#2, (703–557–1900))

1471–EUP–51. Extension. Elanco Products Company, 740 S. Alabama St., Indianapolis, IN 46285. This experimental use permit allows the use of 86.25 pounds of the fungicide fenarimol on commercially grown roses to evaluate the control of powdery mildew. A total of 138 acres are involved; the program is authorized in the States of Alabama, Arizona, California, Colorado, Florida, Georgia, Illinois, Indiana, Maryland, Mississippi, New York, Oregon, Pennsylvania, Texas, and Wisconsin. The experimental use permit is effective from March 31, 1983 to March 31, 1984. (Henry Jacoby, PM 21, Rm. 227, CM#2, (703–557–1900))

2139–EUP–26. Extension. NOR–AM Agricultural Products, Inc., 350 West Shuman Blvd., Naperville, IL 60566. This experimental use permit allows the use of 167,628 pounds of insecticide chlordimeform in a tank mix with synthetic pyrethroids and vegetable oil on cotton to evaluate the control of various cotton insects. A total of 162,628 acres are involved; the program is authorized only in the States of Arizona, Georgia, Louisiana, Mississippi, and Texas. The experimental use permit is effective from March 17, 1983 to March 17, 1984. A permanent tolerance for residues of the active ingredient in or on cottonseed has been established (40 CFR 180.285, 180.378, and 180.379). (Jay Ellenberger, PM 12, Rm. 202, CM#2, (703–557–2386))

359–EUP–60. Extension. Rhone-Poulenc, Inc., P.O. Box 125, Monmouth Junction, NJ 08852. This experimental use permit allows the use of 2,000 pounds of the herbicide acifluorfen on soybeans to evaluate the control of weeds. A total of 4,000 acres are involved; the program is authorized in the States of Alabama, Arkansas, Delaware, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Mississippi, Missouri, Nebraska, North Carolina, Ohio, South Carolina, Tennessee, Texas, and Virginia. The experimental use permit is effective from April 1, 1983 to December 31, 1983. A permanent tolerance for residues of the active ingredient is or on soybeans has been established (40 CFR 180.383). (Richard Mountfort, PM 23, Rm. 253, CM#2, (703–557–1830))

359–EUP–62. Issuance. Rhone-Poulenc, Inc., P.O. Box 125, Monmouth Junction, NJ 08852. This experimental use permit allows the use of 1,728 pounds of insecticide ethoprop on tobacco to evaluate the control of nematodes. A total of 72 acres are involved; the program is authorized only in the States of Florida, Georgia, North Carolina, and South Carolina. The experimental use permit is effective from March 11, 1983 to March 11, 1985. (William Miller, PM 16, Rm. 211, CM#2, (703–557–2600))

284–EUP–66. Issuance. Union Carbide Agricultural Products Co., Inc., P.O. Box 12014, T. W. Alexander Dr., Research Triangle Park, NC 27709. This experimental use permit allows the use of 1,620 pounds of the insecticide aldoxycarb on tobacco to evaluate the control of nematodes and various insects. A total of 540 acres are involved; the program is authorized only in the States of Georgia, North Carolina, South Carolina, and Virginia. The experimental use permit is effective from March 23, 1983 to August 23, 1984. (Jay Ellenberger, PM 12, Rm. 202, CM#2, (703–557–2386))

1023–EUP–45. Issuance. The Upjohn Company, 7171 Portage Rd., Kalamazoo, MI 49001. This experimental use permit allows the use of 189 pounds of the insecticide methyl N-(((((1,1-dimethylethyl)(5,5-dimethyl-2-thioxo-1,3,2-dioxaphosphorinan-2-yl)amino)thio)methylamino)carbonyl) oxy)ethanimidothioate on alfalfa, cirtrus fruits, corn, cotton, leafy vegetables, nuts, peanuts, pome fruits, small fruits, soybeans, tobacco, and turf to evaluate the control of various insects. A total of 37 acres are involved; the program is authorized in States of Alabama, Arizona, Arkansas, California, Florida, Georgia, Illinois, Indiana, Kentucky, Maryland, Massachusetts, Michigan, Mississippi, Missouri, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, South Carolina, Texas, Virginia, Washington, and Wisconsin. The experimental use permit is effective from March 11, 1983 to March 11, 1984. This permit is issued with the limitation that all crops are destroyed or used for research purposes only. (Jay Ellenberger, PM 12, Rm. 202, CM#2, (703–557–2386))

2724–EUP–29. Extension. Zoecon Industries, 12200 Denton Dr., Dallas TX 75234. This experimental use permit allows the use of 16 pounds of the Insecticide hydroprene in homes and apartments to evaluate the control of cockroaches. A total of 100,000 sq. ft. are involved. (Timothy Gardner, PM 17, Rm. 207, CM#2, (703–557–2690))

2724–EUP–30. Extension. Zoecon Industries, 12200 Denton Dr., Dallas TX 75234. This experimental use permit allows the use of 20.4 pounds of the insecticide hydroprene in homes and apartments to evaluate the control of cockroaches. A total of 100,000 sq. ft. are

FEDERAL ELECTION COMMISSION

[Notice 1983–13]

Filing Dates for California Special Election

AGENCY: Federal Election Commission.

ACTION: Notice of filing dates for California special election.

SUMMARY: Committees required to file reports in connection with the special election to be held in the 5th Congressional District of California on June 21, 1983, must file a 12-day pre-election report on June 9, 1983, and a 30-day post-election report due on July 21, 1983.

After filing these reports, committees should resume filing reports on a nonelection year schedule for 1983.

FOR FURTHER INFORMATION CONTACT: Ms. Bobby Werfel, Public Information Office, 1325 K Street, NW., Washington, D.C. 20463, Tel: (202) 523–4068; Toll-free: (800) 424–9530.

Notice of Filing Dates for Special Election, 5th Congressional District, California

The State of California has scheduled a special election in the 5th Congressional District for June 21, 1983. If no candidate receives a majority of the vote in that election, a special runoff election will be held on August 16, 1983.

All principal campaign committees of candidates in the special election and all other political committees not filing monthly that support candidates in this special election shall file a 12-day pre-election report due on June 9, 1983. The coverage dates for this report begin with the date of candidacy, or the closing date of the last report filed, whichever date is later. The closing coverage date for the June 9, 1983, report is June 1, 1983. Also required is a 30-day post-election report due on July 21, 1983, with coverage dates from June 2, 1983, through July 11, 1983. Committees required to file reports in connection with the special election need not file the semiannual report.

In the event a special runoff election is held, those committees not involved in the special runoff election must file the semiannual report. Further published notice will be given promptly after the June 21, 1983, special election with respect to changes in the reporting schedule if the special runoff election is to be held.

After filing the June 9, 1983, and July 21, 1983 reports, committees should resume filing reports on a non-election year schedule.

Dated: April 29, 1983.

Danny L. McDonald,

Chairman, Federal Election Commission.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–677–DR]

Amendment to Major-Disaster Declaration; California

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This notice amends the Notice of a major disaster for the State of California (FEMA–677–DR), dated February 9, 1983, and related determinations.

DATE: April 26, 1983.

FOR FURTHER INFORMATION CONTACT: Sewall H. E. Johnson, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, D.C. 20472 (202) 287–0501.

NOTICE: The notice of a major disaster for the State of California dated February 9, 1983, is hereby amended to include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of February 9, 1983:

In addition to Individual Assistance under Public Law 93–288, Fresno, Madera and Tulare counties are also designated eligible for Federal assistance to disaster-damaged public schools under Public Law 81–815 and Public Law 81–874, as appropriate.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Dave McLoughlin,

Deputy Associate Director, State and Local Programs and Support, Federal Emergency Management Agency.

[FEMA REP–NH–1]

New Hampshire Radiological Emergency Response Plan for Vermont Yankee

AGENCY: Federal Emergency Management Agency.

ACTION: Notice of Receipt of Amendment to Plan.

SUMMARY: For continued operation of nuclear power plants, the Nuclear Regulatory Commission requires approved licensee and state and local governments' radiological emergency response plans. Since FEMA has a responsibility for reviewing the state and local government off-site plans, the State of New Hampshire, by letters of transmittal dated March 3, March 17, and April 12, 1983, has formally submitted amended radiological emergency plans to the FEMA Region I Office. These plans support the Vermont Yankee Nuclear Power Station in Vernon, VT.

DATE AMENDED PLAN RECEIVED: March 17, 1983 and April 20, 1983

FOR FURTHER INFORMATION CONTACT: Mr. David M. Sparks, Regional Director, FEMA Region I, Room 442, John W. McCormack Post Office and Courthouse Building, Boston, MA 02109, 617/223–4741.

SUPPLEMENTARY INFORMATION: In support of the Federal requirement for emergency response plans, FEMA has proposed a rule describing its procedures for review and approval of amended state and local governments' radiological emergency response plans. Pursuant to this proposed FEMA Rule (44 CFR 350.14), "Amendments to State Plans" 45 FR 4341, the amended State Radiological Emergency Plan for the State of New Hampshire was received by the Federal Emergency Management Agency Region I Office.

Included as annexes are the following plans for local governments which are wholly or partially within the plume exposure pathway emergency planning zone for the Vermont Yankee Nuclear Power Station: Chesterfield, Richmond, Hinsdale, Swanzey, and Winchester. The plan for the host community Keene was also submitted.

Copies of the amended plan are available from the State of New Hampshire Civil Defense Agency, New Hampshire Military Reservation, One Airport Road, Concord, New Hampshire 03301.

Copies of the amended plan are also available for review at the FEMA Region I Technological Hazards Office, Room 462, John W. McCormack Post Office and Courthouse Building, Boston, MA 02109. Copies will be made available upon request in accordance with the fee schedule for FEMA Freedom of Information Act requests, as set out in subpart C of 44 CFR Part 5.

Comments on the amended plan may be submitted in writing to David M. Sparks, Regional Director, at the above address within 30 days of the **Federal Register** Notice.

Dated: April 20, 1983.

David M. Sparks,

Regional Director.

Atlantic Bancorporation, et al.; Proposed Acquisition of Florida Interchange Group, Inc.

Atlantic Bancorporation, Jacksonville, Florida; Barnett Banks of Florida, Inc., Jacksonville, Florida; First Florida Banks, Inc., Tampa, Florida; Florida National Banks of Florida, Inc., Jacksonville, Florida; Landmark Banking Corporation of Florida, Ft. Lauderdale, Florida; Southeast Banking Corporation, Miami, Florida; Southwest Florida Banks, Inc., Ft. Meyers, Florida; and Sun Banks of Florida, Inc., Orlando, Florida, have jointly applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to acquire 10 percent each of the voting shares of Florida Interchange Group, Inc., (in organization) ("FIGS"), Orlando, Florida, a proposed joint venture.

Applicants state that the proposed joint venture would provide data processing and transmission services to insured depository institutions located in Florida. FIG will operate a shared EFT switching system for financial transactions interchange between participating financial institutions.

This application is related to, and is being processed concurrently with, an application by NCNB Corporation, Charlotte, North Carolina, to acquire a 10 percent voting interest in FIG. Salco One, Inc., a wholly-owned subsidiary of Amerifirst Federal Savings and Loan Association, Miami, Florida, will constitute the remaining 10 percent owner of FIG.

These activities would be performed from offices of Applicants' joint venture in Orlando, Florida, and the geographic area to be served is the State of Florida. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question of whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Atlanta.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. not later than May 27, 1983.

Board of Governors of the Federal Reserve System, April 28, 1983.

BILLING CODE 6210-01-M

Proposed Acquisition of Miller & Boyd Insurance Agency, Incorporated; Slater Bancshares, Inc.

Slater Bancshares, Inc., Slater, Missouri, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Miller & Boyd Insurance Agency, Incorporated, Slater, Missouri.

Applicant states that the proposed subsidiary would engage in general insurance activities in a community with a population of less than 5,000 and the sale of credit life and credit accident and health insurance related to extensions of credit by Applicant's subsidiary bank in accordance with Title VI of the Garn- St Germain Act of 1982. These activities would be performed from offices of Applicant's subsidiary in Slater, Missouri and the geographic area to be served is the town of Slater, Missouri and the surrounding area within a 12 mile radius. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Bank Holding Companies; Proposed de novo Nonbank Activities; Citicorp and Kasco Mortgage Corp.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and section 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. Federal Reserve Bank of New York (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Citicorp*, New York, New York (finance company and credit-related insurance activities; Georgia, Alabama, Mississippi, Tennessee, Kentucky, Arkansas): To expand the activities of an existing office of Citicorp Acceptance Company, Inc., located in Chattanooga, Tennessee. The new activities in which the office proposes to engage *de novo* are: the making or acquiring of loans and other extensions of credit, secured or unsecured, for consumer and other purposes; the sale of credit related life and accident and health insurance by licensed agents or brokers, as required; and the servicing, for any person, of loans and other extensions of credit. In addition, the office proposes to broaden its previously approved activities of the extension of loans to mobile home dealers for the financing of inventory (floor planning) and working capital purposes and the purchasing and servicing for its own account of sales finance contracts relating to mobile homes, to engage in such activities with regard to all types of dealers and all types of consumer installment paper. The proposed service area, for the proposed *de novo* activities and expanded activities, shall be comprised of the entire States of Georgia, Alabama, Mississippi, Tennessee, Kentucky and Arkansas. Comments on this application must be received not later than May 27, 1983.

B. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230

South LaSalle Street, Chicago, Illinois 60690:

1. *Kasco Mortgage Corporation,* Warren, Michigan (mortgage banking; Michigan, Arizona): To engage in making or acquiring loans and other extensions of credit secured by real estate such as would be made by a mortgage banking company, including commercial and residential loans secured by the borrower's real estate and, in some cases, mortgage insurance provided by private or government sources; servicing such loans for others; and selling such loans, in some cases, to investors such as Federal National Mortgage Association and Government National Mortgage Association. Kasco Mortgage Corporation will service the States of Michigan and Arizona from its office in Warren, Michigan. Comments on this application must be received not later than May 19, 1983.

Board of Governors of the Federal Reserve System, April 28, 1983.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General Antitrust advance notice and to wait designated periods before consummation of such plans. Section 7A (b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Divisions of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

Transaction	Waiting period terminated effective
(1) 83-0226, 83-0227 and 83-0228—Margaret Hunt Trust Estate's proposed acquisition of voting securities of Louisiana-Hunt Trust Estate (Placid Oil Company, UPE); (2)Haroldson L. Hunt, Jr. Trust Estate's proposed acquisition of voting securities of Louisiana Hunt Petroleum Corporation (Placid Oil Company, UPE); and (3) Caroline Hunt Trust Estate's proposed acquisition of voting securities of Rosewood Resources (POC), Incorporated (Placid Oil Company, UPE).	Apr. 11, 1983.
(4) 83-0232-83-0233—Caroline Hunt Trust Estate's proposed acquisition of voting securities of Rosewood Resources (HPC), Inc. (Hunt Petroleum Corporation, UPE); and (5) Hunt Trust Estate's proposed acquisition of voting securities of Rosewood Resources (PROS), Inc. (Prosper Energy Corporation).	Do.
(6) 83-0230, 83-0231 and 83-0234—William Herbert Hunt Trust Estate's proposed acquisition of voting securities of Petro-Hunt Corporation, (Hunt Petroleum Corporation, UPE), (7) Lamar Hunt Trust Estate's proposed acquisition of voting securities of Petro-Hunt Corporation, (Hunt Petroleum Corporation, UPE); and (8) Nelson Bunker Hunt Trust Estate's proposed acquisition of voting securities of Petro-Hunt Corporation, (Hunt Petroleum Corporation, UPE.	Do.
(9) 83-0172—Alexian Brothers of Americas, Inc.'s proposed acquisition of assets of Lutheran Medical Center (Lutheran Charities Association, UPE).	Apr. 12, 1983.
(10) Transaction Number 83-0214—The General Tire and Rubber Company's proposed acquisition of all voting securities of Marion Bottling Company, Inc.	Apr. 7, 1983.
(11) Transaction Number 83-0223—Warburg, Pincus & Company of Motel assets of Herrick and Campbell and voting securities of Western 6 motels, Inc. (Herrick and Campbell, William J. Herrick, UPE'S).	Do.
(12) Transaction Number 83-0225—Grand Metropolitan Public Limited Company's proposed acquisition of all assets of The Mark Hopkins Hotel Joint Venture No. 326135.	Apr. 8, 1983.
(13) 83-0217—MCO Holding, Inc.'s proposed acquisition of assets of Ensource, Inc.	Apr. 18, 1983.
(14) 83-0246—Lear Siegler, Inc.'s proposed acquisition of voting securities of Aviquipo, Inc. (Tiger International, Inc., UPE).	Apr. 19, 1983.
(15) 83-0237—People Express Airlines, Incorporated's proposed acquisition of certain assets of Braniff International Corporation.	Apr. 14, 1983.
(16) 83-0221—The Pulitzer Publishing Company's proposed acquisition of assets of Combined Communications Corporation of Kentucky, Incorporated (Gannett Company, Incorporated, UPE).	Apr. 19, 1983.
(17) 83-0251—John W. Kludge's proposed acquisition of voting securities of Metromedia, Incorporated.	Apr. 15, 1983.

FOR FURTHER INFORMATION CONTACT:
Patricia A. Foster, Compliance Specialist, Premerger Notification Office, Bureau of Competition, Room 301, Federal Trade Commission, Washington, D.C. 20580, (202) 523–3694.

By direction of the Commission.

Emily H. Rock,

Secretary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Meeting of Aging Review Committee

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Aging Review Committee, National Institute on Aging, on June 22, 23, and 24, 1983, in Building 31, Conference Room 4 (A wing), National Institutes of Health, Bethesda, Maryland.

The meeting will be open to the public from 9:00 a.m. to 10:00 a.m. on June 22 for introductory remarks. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on June 22 from 10:00 a.m. to adjournment on June 24, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. June C. McCann, Committee Management Officer, NIA, Building 31, Room 2005, National Institutes of Health, Bethesda, Maryland, Area Code 301, 496–5898, will provide summaries of meetings and rosters of Committee members as well as substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.866, Aging Research, National Institutes of Health)

Dated: April 26, 1983.

Betty J. Beveridge,

National Institutes of Health Committee Management Officer.

BILLING CODE 4140-01-M

Meeting of National Advisory Allergy and Infectious Diseases Council, Allergy and Immunology Subcommittee, Microbiology and Infectious Diseases Subcommittee

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the national Advisory Allergy and Infectious Diseases Council, National Institute of Allergy and Infectious Diseases, and its subcommittees on May 23–24, 1983, at the National Institutes of Health, Building 31C, Confercence Room 10. Bethesda Maryland 20205.

The meeting will be open to the public on May 23 from approximately 9:00 a.m. to 9:30 a.m. for opening remarks of the Institute Director and again from 1:30 p.m. to approximately 5:00 p.m. for discussion of procedural matters, Council business, and a report from the Institute Director which will include a discussion of budgetary matters. The primary discussions will be on Transplantaton. On May 24 the meeting will be open to the public from approximately 8:30 a.m. to 9:30 a.m. for the report of the director of the Immunology, Allergic and Immunologic Diseases Program and the director of the Microbiology and Infectious Disease Program. Attendance by the public at all open sessions will be limited to space available.

In accordance with the provisions set forth in section 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code, and section 10(d) of Pub. L. 92–463, the meetings of the NAAIDC Allergy and Immunology Subcommittee and of the NAAIDC Microbiology and Infectious Diseases Subcommittee will be closed to the public for approximately three hours for the review, evaluation, and discussion of individual grant applications. It is anticipated that this will occur from 9:30 a.m. until approximately 12:30 p.m. on May 23, 1983. The meeting of the full Council will be closed from approximately 10:00 a.m. until adjournment on May 24 for the review, evaluation, and discussion of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concernig individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Nancy Brun, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, Room 7A32, National Institutes of Health, Bethesda, Maryland 20205, telephone (301) 496–5717, will provide summaries of the meetings and rosters of the Council members as requested.

Dr. John W. Diggs, Director, Extramural Activities Program, NIAID, NIH Westwood Building, Room 703, telephone (303) 496–7291, will provide substantive program information.

BILLING CODE 4140–01–M

Meeting of the Board of Scientific Counselors, NEI

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Eye Institute, June 6–7, 1983, Building 31, Room 6A–35, National Institutes of Health, Bethesda, Maryland.

This meeting will be open to the public on June 6 from 8:30 a.m. until approximately 4:00 p.m. for general remarks by the Institute's Scientific director on matters concerning the intramural programs of the National Eye Institute. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Section 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on June 6 from approximately 4:00 p.m. until adjournment on June 7 for review, discussion, and evaluation of individual projects conducted by the Retinal Metabolism and Cell Biology Sections of the Laboratory of Vision Research, NEI. This evaluation and discussion could reveal personal information concerning individuals associated with the projects, including consideration of personnel qualifications and performance, and the competence of individual investigators, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Consequently, this meeting is concerned with matters exempt from mandatory disclosure. Ms. Mary Carter, Committee Management Officer, National Eye Institute Building 31, Room 6A03, National Institutes of Health, Bethesda, Maryland 20205 (301) 496–4903, will provide summaries of the meeting and rosters of committee members.

Substantive program information may be obtained from Dr. Jin Kinoshita, Scientific Director, National Eye Institute, Building 31, Room 6A04, National Institutes of Health, Bethesda, Maryland 20205 (telephone (301) 496–7483.

Dated: April 20, 1983.

Betty J. Beveridge,

NIH Committee Management Officer.

BILLING CODE 4140–01–M

Meeting of the Board of Scientific Counselors, NICHD

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Child Health and Human Development, June 24, 1983, in Building 31, Room 2A52. This meeting will be open to the public from 10:00 a.m. to 2:00 p.m. on June 24 for an annual review of the intramural research program, and for scientific presentations. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in section 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public from 2:30 to 4:00 p.m. on June 24, for the review, discussion, and evaluation of individual programs and projects conducted by the Endocrinology and Reproduction Research Branch, National Institutes of Health, NICHD, including consideration of personnel

VOL 48 ISS 87 MY 4 1983 UMI

qualifications and performance, and the competence of individual investigators, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Marjorie Neff, Committee Management Office, NICHD, Landow Building, Room 6C08, National Institutes of Health, Bethesda, Maryland, Area Code 301, 496–1485, will provide a summary of the meeting and a roster of Board members. Dr. Arthur S. Levine, Scientific Director, NICHD, Building 31, Room 2A50, National Institutes of Health, Bethesda, Maryland, Area Code, 301, 496–2133, will furnish substantive program information.

Dated: April 20, 1983.

Betty J. Beveridge,

NIH Committee Management Officer.

BILLING CODE 4140–01–M

National Institute of Child Health and Human Development; Conference

Notice is hereby given of an open meeting of the Panel on Diagnostic Ultrasound Imaging in Pregnancy. The meeting will be held from 9 a.m. to noon on June 23, 1983 in the NMAC classroom (B1N30B), Building 38A, Lister Hill Center, National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland. The purpose of the meeting will be to receive testimony from various experts on subjects relating to the use of diagnostic ultrasound imaging in pregnancy. Members of the public also may attend and make presentations limited to five minutes. Those members of the public wishing to attend should contact: Mr. Peter Murphy, Prospect Associates, 2115 East Jefferson Street, Suite 401, Rockville, Maryland 20852, phone: 468–6555. An abstract or full statement of remarks should be submitted to Mr. Murphy in advance of the meeting.

Dated: April 20, 1983.

James B. Wyngaarden,

Director, NIH.

BILLING CODE 4140–01–M

Division of Research Grants; Meetings

Pursuant to Pub. L. 92–463, notice is hereby given of the meetings of the following study sections for May through July 1983, and the individuals from whom summaries of meetings and rosters of committee members may be obtained.

These meetings will be open to the public to discuss administrative details relating to study section business for approximately one hour at the beginning of the first session of the first day of the meeting. Attendance by the public will be limited to space available. These meetings will be closed thereafter in accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which which constitute a clearly unwarranted invasion of personal privacy.

The Grants Inquiries Office, Division of Research Grants, Westwood Building, National Institutes of Health, Bethesda, Maryland 20205, telephone 301–496–7441 will furnish summaries of the meetings and rosters of committee members. Substantive program information may be obtained from each executive secretary whose name, room number, and telephone number are listed below each study section. Since it is necessary to schedule study section meetings months in advance, it is suggested that anyone planning to attend a meeting contact the executive secretary to confirm the exact date, time and location. All times are A.M. unless otherwise specified.

Meeting of Research Manpower Review Committee

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Research Manpower Review Committee, National Heart, Lung, and Blood Institute, National Institutes of Health on June 7–8, 1983, at the Linden Hill Hotel, 5400 Pooks Hill Road, Bethesda, Maryland 20814.

This meeting will be open to the public on June 7, 1983, from 8:00 p.m. to approximately 10:00 p.m., to discuss administrative details and to hear reports concerning the current status of the National Heart, Lung, and Blood Institute.

In accordance with the provisions set forth in Section 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on June 8, 1983, from 8:00 a.m. until adjournment for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Terry Bellicha, Chief, Public Inquiries and Reports Branch, National Heart, Lung, and Blood Institute, Building 31, Room 4A21, National Institutes of Health, Bethesda, Maryland 20205, phone (301) 496–4236, will provide summaries of meetings and rosters of the committee members.

Dr. Carol H. Letendre, Executive Secretary, NHLBI, Westwood Building, Room 550, Bethesda, Maryland 20205, phone (301) 496–7361, will furnish substantive program information.

Social Security Administration

Proposed Availability of Funding for Refugee Health Professional/ Paraprofessional Retraining Projects

AGENCY: Office of Refugee Resettlement (ORR), SSA, HHS.

ACTION: Notice of Availability of Funding for Refugee Health Professional/Paraprofessional Retraining Projects.

SUMMARY: This announcement governs the award of grants to public entities and non-profit organizations for the establishment of an educational program leading to licensure/certification for refugee health professionals/paraprofessionals, and the placement of graduates in health care facilities serving large numbers of refugees. These projects include the provision for the dissemination of the training curriculum to appropriate academic institutions with existing health professionals/paraprofessional training and/or continuing education components.

CLOSING DATE: An application must be mailed or hand delivered by the closing date, July 5, 1983. The Director invites application for demonstration projects to retrain refugee health professionals.

Authorization

Authority for this activity is contained in the Immigration and Nationality Act (8 U.S.C. 1522) as amended by the Refugee Act of 1980, Section 412, Pub. L. 96–212. No catalogue of Federal Domestic Assistance Number has been issued.

Application Delivered by Mail

Available Funds: It is expected that approximately $225,000.00 will be available for new grants in fiscal year 1983. The Director estimates that these funds could support three (3) projects. The anticipated award for a project is between $60,000 and $100,000. However, these estimates do not bind the Office of Refugee Resettlement to a specific number of grants or to the amount of any grant unless the amount is otherwise specified by statute or regulations.

Awards will be for 18 months with no further funding anticipated.

An application sent by mail must be addressed to the U.S. Department of Health and Human Services, Social Security Administration, Office of Refugee Resettlement, Grants Management Branch, Room 1332, Switzer Building, 330 C Street, S.W., Washington, DC 20201. An applicant must show proof of mailing on or before the closing date, July 5, 1983 and consisting of one of the following:

(1) A legible dated U.S. Postal Service postmark;

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service;

(3) A dated shipping label invoice or receipt from a commercial carrier.

If an application is sent through the U.S. Postal Service, the Director does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

Applicants should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method the applicant should check with its local post office.

Applicants are encouraged to use registered or at least first class mail. Each late applicant will be notified that the application will not be considered.

Applications Delivered by Hand

An application that is hand delivered must be taken to the U.S. Department of Health and Human Services, Social Security Administration, Office of Refugee Resettlement, Grants Management Branch, Room 1332, Switzer Building, 330 C Street, S.W., Washington, DC 20201.

The Grants Management Branch will accept a hand-delivered application between the hours of 8:30 am and 5:00 pm Eastern Standard time daily except Saturday, Sunday or Federal Holidays. Hand delivered applications will not be accepted after 5:00 pm on the closing date, July 5, 1983.

SUPPLEMENTARY INFORMATION: The announcement describes the availability of funding for demonstrarion projects to establish a refresher program for refugees who are health professionals/paraprofessionals but are not licensed or certified to practice in any state. These programs are designed to assist the refugees in obtaining state licensure or certification and provide placement for employment in health care facilities which serve large numbers of refugees. Grant awards under this announcement will be for an eighteen month period following the date of award.

I. Program Purpose

The purpose of this program is to improve the capacity of health care facilities serving a large number of refugees by assuring the availability of culturally sensitive professionals/paraprofessionals who do not need interpreting services to communicate with this target group. The availability of refugee professionals/paraprofessionals will minimize language and cultural barriers between the refugee population and local health providers.

The objectives of these projects are to:

- Identify refugee health professionals and paraprofessionals [e.g. nurses, nurse-midwives, physicians, physician's assistants and paramedics] in need of additional training or review in preparation for licensure or certification to serve as registered nurses, licensed practical nurses, physician's assistants and paramedics;
- Provide a one year educational program, including didactic and clinical experience, to prepare refugee health professionals and paraprofessionals for licensure or certification;
- Find employment for these professionals/paraprofessionals who complete the programs in health care facilities, public health agencies or in other programs serving a large number of refugees located in the target areas listed below.

Studies have found many highly skilled refugee health professionals working in low skills occupations due to language barriers and the lack of understanding of the licensing process. At the same time, culturally appropriate and effective health care services are not available to refugees in various localities including so called "impacted areas".

In addition, an increased number of refugee health professionals can be expected to increase the efficiency of agencies providing social services to refugees by freeing their bilingual work force for other than health activities. For instance, many bilingual job counselors and employment specialists are currently providing interpretation services to hospitals and clinics. Communication between English-speaking health professionals and refugees through an interpreter is a slow and sometimes inexact process as most interpreters are not trained in the health field. Furthermore, interpreters, usually supplied by social services and voluntary agencies, are often not readily available.

Increasing the accessibility of medical services and providing more effective

treatment by increasing the pool of licensed or certified refugee health professionals and paraprofessionals [e.g. registered nurses, licensed practical nurses, physician's assistants and paramedics) responds to two of the most important service requirements mandated by the Refugee Act of 1980, namely employment and health services for refugees.

Finally, as refugees tend to settle in lower income neighborhoods or communities, strengthening health care services to the refugee population may also alleviate the shortage of health services in these areas.

Projects funded under this grant announcement will identify and screen potential trainees to ascertain knowledge and skills levels and training needs, develop educational programs to provide didactic and supervised clinical experiences, assist trainees in preparing for their licensure/certification, identify health care facilities serving large numbers of refugees and obtain a commitment from each graduate to serve at these facilities for a minimum of one year.

II. Target Areas

The following are areas targeted for these demonstration projects. Graduates must be placed in agencies or facilities located in the following counties:

Alameda CA	Orleans LA
Los Angeles CA	Suffolk MA
Orange CA	Hennepin MN
Sacramento CA	Ramsey MN
San Diego CA	New York NY
San Francisco CA	Multnomah OR
San Joaquin CA	Philadelphia PA
Santa Clara CA	Providence RI
Merced CA	Harris TX
Fresno CA	Salt LakeUT
Denver CO	Arlington VA
Honolulu HI	Fairfax VA
Cook IL	King WA
Sedgwick KA	

Preference will be given to projects located in the same locations. However, ORR is willing to consider alternative sites for graduates' placement if demonstrable evidence is provided which documents a significant service need.

III. Eligible Grantees

Eligible grantees are public entities and organizations incorporated as non-profits under the laws of their State. Preference will be given to educational institutions with existing health professional/paraprofessional training programs. Private for profit agencies or firms are not eligible. Special consideration will be given to those projects that are proposed as part of a community's or state's plan/program to make health services more effective and accessible to refugees.

IV. Activities

Grantees shall be required to carry ou the following:

1. Create an advisory board of five to seven members. Board membership should include but not be limited to representatives from the refugee community, health care providers, professional nurse education and refugee social service providers.

2. Provide an assessment of needs for the proposed activities:

- Identify refugee health care service and personnel need in proposed area(s) of service for categories proposed for educational activities in the application;
- Identify number and types of refugee professionals/paraprofessionals, in the proposed area(s) of service, who are not employed or are underemployed in health fields because of a lack of appropriate credentials;
- Identify and specify categories of refugee professionals/paraprofessionals (e.g. nurses, nurse-midwives, physicians, physician's assistants and paramedics) to be retained in order to be licensed/certified as registered nurse, licensed practical nurse, physician's assistants and paramedics and justify this decisions.
- Recruit a minimum of thirty participatns for each training project. Candidated for retaining must have the minimum English language proficiency and an educational background—either in the United States or in their home countries—to enable them to be licensed/certified in the categories listed above within the grant award period.
- Identify knowledge and skill learning needs (e.g). vocational ESL, psycho-social content, basis sciences, nursing and medical subjects) of refugee professionals/paraprofessionals which will be addressed in programs supported by the project.

3. Design and provide a flexible training program without tuition and related costs to the trainees, to provide the opportunity for each trainee to obtain the knowledge and skills to meet state requirements for licensure/certification, thereby enabling the trainees to past the required examinations.

4. Provide any placemnt services for clinical experience/residency required for licensure/certification with health care providers serving large numbers of refugees;

5. Assist trainees in meeting state licensure requirements, as appropriate, including provision for evaluating and/or reconstituting trainees' educational credentials from their home country.

6. Provide placement services for all graduates with a minimum of 90% serving in health care facilities serving large numbers of refugees in any of the twenty-five designated areas for at least one year.

7. Provide trainees with financial assistance arrangements and/or information. The payment of a stipend is not an allowable cost under this grant; however, provision of text books and other training materials up to $250.00 per recipient is allowable.

8. Provide a means to ensure program graduates' commitment to serve in health care facilities/agencies serving a large number of refugees located in the designated areas for at least one year, or that graduates will repay the costs of their training to the program and that those repayments will be refunded to the Department.

Cooperation with state and local governments, refugee resettlement and social service agencies, foundations and health care facilities and institutions is strongly encouraged.

V. Eligible Trainees

All refugee health professionals/paraprofessionals not meeting licensure/certification requirements are potential eligibles. However, preference should be given to those who are currently underemployed in the health field and those who are unemployed and/or receiving cash assistance. Participants receiving cash assistance must comply with ORR's program instructions (SRS–AT–76–160 and ORR–AT–82–2) on employment or training requirements which specify as follows:

A refugee of any age who is otherwise eligible shall not be denied cash assistance while enrolled and participating in a full-time training program which is part of an employability plan approved by the welfare office agency or its designee—that is, training intended to have a definite short term (less than one year) employement objective.

No person shall be exempt from excepting employment because of part-time participation in training under an approved employability plan.

VI. Application Submission and Approval Procedures.

Applicants may request grant applications from the Department of Health and Human Services, Social Security Administration, Office of Refugee Resettlement, Grants Management Branch, Room 1332, Switzer Building, 330 C Street, S.W. Washington, D.C. 20201, 202–245–0403. Prospective grantees must submit an original application and two copies to the Grants Mangement Branch. An independent panel will be convened to evaluate and rate applications. Final funding decisions will be made by the

Director of the Office of Refugee Resettlement. Criteria for panel evaluation are listed in Section VIII below. It is estimated that grant awards will be issued on or about July 29, 1983.

VIII. Applicable Regulations

The following HHS regulations apply to grants under this Notice:

45 CFR Part 16—Department Grant Appeals Process;

45 CFR Part 74—Administration of Grants;

45 CFR Part 75—Informal Grant Appeals Process;

45 CFR Part 80—Nondiscrimination Under Programs Receiving Federal Assistance Through the Department of Health and Human Services Effectuation of Title VI of the Civil Rights Act of 1964.

45 CFR Part 81—Practice and Procedures for Hearings Under Part 80 of this Title.

45 CFR Part 84—Nondiscrimination on the Basis of Handicap in Programs and Activities Benefitting from Federal Financial Assistance.

45 CFR Part 90—Nondiscrimination on the Basis of Age in Programs or Activities Receiving Federal Financial Assistance.

VIII. Criteria for Evaluating Applications

All competing applications received in response to this announcement will receive a technical review by qualified experts. Applications are evaluated against the following criteria:

	Points
A. Completeness and feasibility of the proposed project design and implementation plan	35
• Extent to which proposal provides documentation for a training site if at a location other than those listed in the announcement	
• Extent to which the applicant has identified health care providers within the target service areas for potential placement of trainees	
• Feasibility of trainee recruitment and selection plan including methodology for identification and selection of trainees who have the minimum necessary domestic and/or foreign education and credentials to benefit from this program	
• Adequacy of training program design including the proposed curriculum and methodology	
• Adequacy of proposed methods to assist trainees to obtain state licensure/certification	
• Adequacy of methodology to provide job placement services for all graduates in one or more of the target areas listed in Section II	
• Adequacy of methodology and plan to assure graduates commitment to serve in health care facilities/agencies serving a large number of refugees located in the designated areas for at least one year	
B. The extent to which the applicant makes maximum utilization of existing resources through establishing linkages, cooperative agreements, referral processes, etc. . . ., with appropriate public and private agencies, foundations and health care institutions serving refugees. Documentation of linkages with a community's or state's plan in making health services more effective and accessible to refugees	10
C. Qualifications, roles and responsibilities of proposed staff. Appointment of Project Director is subject to ORR's approval	15
D. Experience of applicant organization in conducting proposed activities or related experience	15
E. Adequacy of facilities and resources	5
F. Potential for replication of the model training program and plan for dissemination of results of the project, in particular the training curriculum	5
G. Feasibility of proposed budget, justification of costs, and cost sharing by the applicant or other organizations, if applicable	10
H. Adequacy of plans for data gathering and project evaluation	5

IX. Application Content

All applicants will use Standard Form SSA–96, "Federal Assistance" in submitting project proposals. Grant applications must also include the following:

1. Identification of the refugee health providers' personnel needs for program graduates in the proposed areas of service;

2. A work plan to meet the project objectives including identification of all services and materials to be developed and the dissemination plan. The work plan should describe in detail the implementation and the evaluation of the required activities indicated in Section IV above;

3. A management plan for fiscal and program administration to accomplish the grant objectives including a project management chart, time line and staff assignments;

4. Detailed program budget;

5. Description of the applicant organization. If other than a public agency, description of its organizational mandate, funding sources, key staff and principal officers, organization address and telephone number;

6. Documentation of applicant's experience with the training services proposed including description of other projects similar to the proposed activities; and

7. Documentation on non-profit status-IRS form 501 C3 or other proof of non-profit status.

XI. Records and Reports

Grantees will be required to maintain such fiscal and operational records as are necessary for federal monitoring and auditing of the grants. This record keeping shall include but not be limited to:

1. All materials to be disseminated; and

2. Quarterly fiscal and program progress reports due 30 days after the first calendar day of each quarter following the effective date of the grant award. Final reports are due 90 days after end date of the grant.

Dated: April 28, 1983.

Phillip N. Hawkes,

Director, Office of Refugee Resettlement.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Yuma District Resource Management Plan; Arizona

AGENCY: Bureau of Land Management (BLM), Interior

ACTION: Notice of Intent to Prepare a Resource Management Plan/EIS and Invitation for Public Participation.

SUMMARY: Preparation of the Yuma District Resource Management Plan (RMP), began on March 1, 1983. This plan will include the Havasu Resource Management Plan which was announced in the **Federal Register**, Vol. 46, No. 237 dated Thursday, December 10, 1981. The plan will consider various multiple-use alternatives ranging from resource production to resource preservation and will guide long-term land uses on approximately 1.2 million acres of public lands along the Lower Colorado River in southwest Arizona and California. The public scoping process will be used for identifying issues and formulating alternatives.

The planning area is located in portions of La Paz, Mohave, and Yuma Counties in Arizona and Imperial, Riverside, and San Bernardino Counties California. The area extends along the Colorado River from Davis Dam on the north to the International Border with Mexico on the south, in a strip generally from 5 to 35 miles wide, except where the Yuma District extends approximately 45 miles eastward up the Gila River in the Arizona desert. Major Communites within the area are: Bullhead City, Lake Havasu City, Parker, Yuma, Somerton, Wellton, and San Luis in Arizona, and Needles and Blythe in California.

Public scoping meetings will be held to collect public input into planning issues on May 18 and 24, 1983, from 7:00 to 10:00 p.m. The meeting locations are:

May 18, 1983, H. L. Suverkrup School Cafeteria, 1590 South Avenue C, Yuma, Arizona

May 24, 1983, Palo Verde High School Cafeteria, 667 North Lovekin Blvd., Blythe, California.

FOR FURTHER INFORMATION CONTACT:

Dennis Turowski, Planning Coordinator or

J. Darwin Snell, District Manager, Bureau Of Land Management, 2450 Fourth Avenue, P.O. Box 5680, Yuma, Arizona 85364; Telephone FTS 764–6612 Commercial (602) 762–6300.

SUPPLEMENTARY INFORMATION: Among the significant issues expected to be addressed in the plan are: designation of public lands for protection of special natural, cultural or recreational resources; vegetation allocations to livestock, wildlife, and other demands; location of utility corridors and communication sites; making public land available for community expansion and development purposes; public sale of excess public lands; recreational resource development/management; and recommendations for wilderness designation.

An interdisciplinary planning team will develop the Resource Management Plan. Disciplines represented will include: recreation, land use planning, wildlife biology, economics, and sociology.

Public participation will be encouraged and utilized throughout plan development. Federal, State and local governmental entities, Indian Tribal Councils, and other interested publics will be contacted and provided opportunity to participate via public meetings, workshops, and written comment. Opportunities for public involvement will be announced in the news media, and by direct mailings.

A formal record of all public participation and planning activities, decisions, and documents will be maintained in the Yuma District Office and will be made available for public review upon request.

Dated: April 27, 1983.

J. Darwin Snell, District Manager.

BILLING CODE 4310–84–M

[INT DEIS 83–26]

Big Lost—Mackay Grazing Draft Environmental Impact Statement; Idaho

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of Availability and invitation for public comments on the Draft Environmental Impact Statement.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental impact statement (DEIS) for a proposed grazing management program for the Big Lost and Mackay planning units of the Idaho Falls and Salmon districts in southeastern Idaho. The preferred alternative includes changes in stocking rates, implementing improved grazing systems and installing range improvements on about 311,000 acres of public land. The DEIS describes the environmental consequences of 4 alternative grazing management programs. Copies of the DEIS are available for review at the following locations:

Idaho Falls District Office, Bureau of Land Management 940 Lincoln Road, Idaho Falls, Idaho 83401. Telephone (208) 529–1020

Salmon District Office, Bureau of Land Management, U.S. Highway 93, Salmon, Idaho 83467. Telephone (208) 756–2201.

Idaho State Office, Bureau of Land Management, 3380 Americana Terrace, Boise, Idaho 83706. Telephone (208) 334–1401

Public Affairs, Bureau of Land Management, Interior Building 18th and C. Streets, NW., Washington, D.C. 20240.

DATE: Written comments on the draft statement are invited and must be submitted by July 9, 1983. Two open houses will be held to gather comments on the proposal on June 1 and June 2, 1983, from 2:00 p.m. to 8:00 p.m. MDT. These Open Houses were originally scheduled for May 9 and May 10, but were rescheduled to allow more time to examine the DEIS.

ADDRESSES: Written comments should be submitted to District Manager, Bureau of Land Management, 940 Lincoln Road, Idaho Falls, Idaho 83401.

The open houses will be held at the Arco Memorial Building, Arco, Idaho, on June 1, 1983, and at the American Legion Hall, Mackay, Idaho, on June 2, 1983.

FOR FURTHER INFORMATION CONTACT:

O'dell Frandsen or Don Watson, Bureau of Land Management, 940 Lincoln Road, Idaho Falls, Idaho. Telephone (208) 529–1020.

Dated: April 26, 1983.

Clair M. Whitlock,

State Director, Idaho.

Bureau of Land Management

Emergency Leasing; Notice of Public Comment Period and Public Meeting

April 26, 1983.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public comment period and public meeting.

SUMMARY: The Bureau of Land Management intends to hold a public meeting concerning two applications for coal leasing under the "Emergency Leasing" provisions. The meeting will provide the opportunity for the public to comment on and discuss the potential effects of mining the proposed leases, including impacts to the environment, other land uses, other economic activities, and community or regional services. This notice also requests comment on the Fair Market Value and the Maximum Economic Recovery of the coal on the tracts under application.

VOL
48
ISS
87
MY
4
1983
UMI

DATES: A public meeting on the draft environmental assessments which addresses the lease applications will be held at 7 p.m. on May 25, 1983, in the main building, College of Eastern Utah, Gomer Peacock Room, Price, Utah. Public comments received within 30 days of this Notice will be evaluated prior to writing the final environmental assessments.

SUPPLEMENTARY INFORMATION: A draft environmental assessment has been prepared by the Manti-LaSal National Forest to address the impacts of issuing an emergency coal lease applied for by United States Fuel Company. The 160-acre tract (U–51923) described below, is located on the Manti-LaSal National Forest in Carbon County approximately 14 miles southeast of Price, Utah. The coal would be mined from the existing underground King 4 Mine of United States Fuel Company.

T. 15 S., R. 8 E., SLM,
Sec. 20, NW¼.

A draft environmental assessment has been prepared by the Bureau of Land Management to address the impacts of issuing an emergency coal lease applied for by Tower Resources, Inc. The 120-acre tract (U–52341) described below, is located in Carbon County approximately 10 miles northeast of Price, Utah. The coal would be mined from the existing underground Pinnacle Mine of Tower Resources, Inc.

T. 13 S., R. 11 E., SLM,
Sec. 9, E½SW¼, SW¼SE¼.

Comments concerning the fair market value of the coal resource and the maximum economic recovery of the coal on the tracts are also solicited. Comments should address specific factors including, but not limited to: the quantity and quality of the coal resource, the price that the mined coal would bring in the market place, the cost of producing the coal, the probable timing and rate of production, the interest rate at which anticipated income streams would be discounted, depreciation and other accounting factors, the expected rate of industry return and mining method. Documentation or similar market transactions, including location, terms and conditions, may also be submitted. Public comments will be utilized in establishing fair market value for the coal resources in the described lands as prescribed in 30 CFR 211.63 and 43 CFR 3422.1–2. Any proprietary information labeled as such and so stated on the first page of the submission will not be available to the public, if it meets exemptions in the Freedom of Information Act. Comments on fair market value or maximum economic recovery should be sent to the Utah State Director, at the third address listed below.

FOR FURTHER INFORMATION CONTACT: (1) Forest Service Environmental Assessment—Ira W. Hatch, Price District Ranger, Manti-LaSal National Forest, 10 North Carbon Avenue, Price, Utah 84501, (801) 637–2817. (2) Bureau of Land Management Environmental Assessment—Leon E. Berggren, Price River Resource Area Manager, P.O. Drawer AB, 900 North 700 East, Price, Utah 84501, (801) 637–4584. (3) Fair Market Value and Maximum Economic Recovery—R. Max Nielson, Coal Program Leader, Bureau of Land Management, 136 East South Temple, Salt Lake City, Utah 84111, (801) 524–5326.

Gene Nodine,
District Manager.

BILLING CODE 4310–84–M

Land Resource Management; Filing of Plat Survey

AGENCY: Bureau of Land Management, Montana State Office.

ACTION: Notice of filing of plat of survey.

SUMMARY: Plats of survey of the lands described below accepted March 24, 1983, will be officially filed in the Montana State Office effective 8 a.m. on July 5, 1983.

Principal Meridian, Montana

T. 35 N., R. 21 W.

The plat represents the dependent resurvey of a portion of the Flathead Guide Meridian, a portion of the south boundary, a portion of the subdivisional lines, and a portion of the adjusted original meanders of the North Fork of Flathead River; and the survey of the subdivision of Sections 5, 6, 8, 17, 18, 20, 21, 22, 27, 28, 29, 34, and 35, the medial line of an abandoned channel of the North Fork of Flathead River and a portion of the meanders of the North Fork of Flathead River, T. 35 N., R. 21 W., Principal Meridian, Montana. The area described is in Flathead County.

Principal Meridian, Montana

T. 36 N., R. 21 W.

The plat represents the dependent resurvey of a portion of the south boundary, a portion of the subdivisional lines, and a portion of the adjusted original meanders of the North Fork of Flathead River; and the survey of the subdivision of sections 19 and 31, the medial line of an abandoned channel of the North Fork of Flathead River, and a portion of the meanders of the North Fork of Flathead River, T. 36 N., R. 21 W., Principal Meridian, Montana. The area described is in Flathead County.

Principal Meridian, Montana

T. 35 N., R. 22 W.

The plat represents the dependent resurvey of a portion of the subdivisional lines, T. 35 N., R. 22 W., Principal Meridian, Montana. The area described is in Flathead County.

Principal Meridian, Montana

T. 36 N., R. 22 W.

The plat represents the dependent resurvey of a portion of the Ninth Standard Parallel North, through Ranges 21 and 22 West, a portion of the south boundary, a portion of the subdivisional lines, a portion of the adjusted original meanders of the North Fork of Flathead River, and a portion of the adjusted original meanders of Tepee Lake; and the survey of the subdivision of Sections 1, 2, 3, 4, 10, 11, 12, 13, 24, 25, 33, 34, and 35, a portion of the meanders of the North Fork of Flathead River, and the medial line of an abandoned channel of the North Fork of Flathead River, T. 36 N., R. 22 W., Principal Meridian, Montana. The area described is in Flathead County.

Principal Meridian, Montana

T. 37 N., R. 22 W.

The plat represents the retracements of the International Boundary between the United States and Canada from Boundary Monument No. 262 to 260; the dependent resurvey of a portion of the subdivisional lines and a portion of the adjusted original meanders of the North Fork of Flathead River; and the survey of Parcels B and C, the subdivision of Sections 5, 8, 9, 21, 22, 23, 27, 28, 29, 33, and 34, the medial line of an abandoned channel of the North Fork of Flathead River, and a portion of the meanders of the North Fork of Flathead River, T. 37 N., R. 22 W., Principal Meridian, Montana. The area described is in Flathead County.

These surveys were executed at the request of the U.S. Forest Service.

If protest(s) against any of these surveys, as shown on these plats, are received prior to the date of official filing, the filing will be stayed pending consideration of the protest(s). These particular plat(s) will not be officially filed until the day after all the protests have been accepted or dismissed and become final or appeals from the dismissal affirmed.

EFFECTIVE DATE: July 5, 1983.

FOR FURTHER INFORMATION CONTACT: Bureau of Land Mangement, 222 North 32nd Street, P.O. Box 30157, Billings, Montana 59107.

Dated: April 25, 1983.

Delores M. Heser,
Chief, Branch of Records.

[FR Doc. 83–11913 Filed 5–3–83; 8:45 am]
BILLING CODE 4310–84–M

Leasing of Federal Coal, Fort Union Coal Region; Request for Public Comment on Fair Market Value and Maximum Economic Recovery

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management has delineated federal coal tracts located in the Fort Union region of eastern Montana and west-central North Dakota. Twenty-two of these tracts are currently under consideration for public lease sale by the Department of the Interior. Leasing of federal coal in the Fort Union Coal Region is the result of the Secretary of the Interior's decision to offer coal in specific federal coal regions. Descriptions of the tracts are in Table I. The public is invited to submit written comments on the fair market value and the maximum economic recovery of the tracts.

DATES: Comments must be received on or before May 23 1983.

ADDRESSES: for more complete date on these tracts please contact Lloyd Emmons or Jeanette Bejot (telephone 406–657–6291), Bureau of Land Management, Montana State Office, 222 North 32nd Street, Billings, Montana 59101.

SUPPLEMENTARY INFORMATION: In accordance with Federal Coal Management regulations 43 CFR Part 3422, not less than 30 days prior to the publication of a notice of sale, the Secretary shall solicit public comments on fair market value appraisal and maximum economic recovery of the tracts proposed to be offered shown on Table I, and on factors that may affect these two determinations. Proprietary data marked as confidential may be submitted to the Bureau of Land Management in response to this solicitation of public comments. Data so marked shall be treated in accordance with the laws and regulations governing the confidentiality of such information. A final secretarial decision for leasing in the Fort Union Region is expected in May 1983. Information regarding any changes of acreages or tonnages on the final selected tracts may be obtained from the Montana State Office as set out above.

Comments should be sent to Bureau of Land Management, Economic Evaluation Section, 100 East "B" Street, Room B005, Casper, Wyoming 82601, Attention: Tim MacGillvray, (telephone: 307–261–5735), and should address, but not necessarily be limited to the following information:

1. The quality and quantity of the coal resources for each tract;

2. The mining method or methods which would achieve maximum economic recovery of the coal, including specification of seams to be mined on each tract and the most desirable timing and rate of production;

3. The quantity of coal by seam on each tract;

4. Which of the tracts, if any, should be evaluated as part of a larger mining unit (i.e., those tracts which do not in themselves form a logical mining unit);

5. The configuration of any larger mining unit of which the tract may be a part;

6. Restrictions to mining which may affect coal recovery;

7. The price that the mined coal would bring in the market place;

8. Costs, including mining and reclamation, of producing the coal;

9. The percentage rate at which anticipated income streams should be discounted, either in the absence of inflation or with inflation, in which case the anticipated rate of inflation should be given;

10. Depreciation and other accounting factors;

11. The value of any surface estate where held privately;

12. Documented information on the terms and conditions of recent and similar coal land transactions in the lease sale area; and

13. Any comparable sales data of similar coal lands.

This request for comments should not be interpreted as a firm commitment by the Federal Government to lease any of the tracts. A decision to offer any of the tracts for lease sale will be made in a public notice of sale issued by Bureau of Land Management not less than three weeks prior to the date of sale.

TABLE I.—DESCRIPTION OF POSSIBLE LEASE TRACTS IN FORT UNION COAL REGION

Tract name	County	Township and range	Acres	Estimated recovery reserves (MM tons)
Antelope	Mercer	T145N, R87–88W	638	12.5

TABLE I.—DESCRIPTION OF POSSIBLE LEASE TRACTS IN FORT UNION COAL REGION—Continued

Tract name	County	Township and range	Acres	Estimated recovery reserves (MM tons)
Circle West II	McCone	T19–20N, R44E, T19N, R45E	4183	89.1
North Wibaux-Beach	Wibaux/Golden Valley	T14–15N, R60–61E, T141N, R105W, T140N, R106W.	6758	189.5
Redwater I	McCone	T19–20N, R48–49E	9473	201.6
Redwater II	McCone	T21N, R48E, T20–21N, R49E	7935	111.2
Southwest-Glendive	Dawson	T15–16N, R53E, T14–15–16N, R54E.	7463	172.2
Zenith	Stark	T139N, R98–99W	4563	130.1

It should be noted that the above values are current estimates. The values may or may not change as a result of comments received from the public and changes in market conditions between now and when final economic evaluations are completed.

Dated: April 26, 1983

Kannon Richards,

Acting State Director.

[FR Doc. 83-11897 Filed 5-3-83; 8:45 am]

BILLING CODE 4310-84-M

Minerals Management Service

Final Outer Continental Shelf Orders Governing Oil and Gas Lease Operations on the Alaska Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Notice approving final interim requirements.

SUMMARY: Final interim requirements to incorporate by reference certain standards in Subparagraphs 3.2, *Specification for Subsurface-Safety Valves;* 3.3, *Design, Installation, and Operation;* 3.4.1, *Testing of Surface-Controlled Subsurface-Safety Valves;* and 4.2, *Specification for Wellhead Surface-Safety Valves;* and Paragraph 7, *Crane Operations,* of the Alaska Outer Continental Shelf (OCS) Order No. 5, "Production Safety Systems," were published with the final Alaska OCS Orders on October 22, 1982 (47 FR 47180). Comments and recommendations on these final interim requirements were requested. After reviewing the comments, the Associate Director for Offshore Minerals Management has reaffirmed the need for these requirements and has approved them as final requirements of OCS Order No. 5 for the Alaska OCS Region.

DATE: The effective date of November 22, 1982, for the requirements incorporated by reference in subparagraphs 3.2, 3.3, 3.4.1, and 4.2 and paragraph 7 of the Alaska OCS Order No. 5 is reaffirmed.

FOR FURTHER INFORMATION CONTACT: Mr. David A. Schuenke, Chief, Branch of Offshore Rules, Orders, and Standards, Mail Stop 646, Minerals Management Service, U.S. Department of the Interior, 12203 Sunrise Valley Drive, Reston, Virginia 22091, telephone (703) 860–7916 or FTS 928–7916.

SUPPLEMENTARY INFORMATION: The final Alaska OCS Orders published on October 22, 1982 (47 FR 47180), contained final interim requirements (as noted below) to incorporate by reference certain standards in subparagraphs 3.2, 3.3, 3.4.1, and 4.2 and paragraph 7 of OCS Order No. 5, "Production Safety Systems." Because the specific editions and supplements identified as interim requirements in the final Orders were different from those published in the proposed Orders on February 10, 1982 (47 FR 6162), comments and recommendations were requested on the final interim requirements.

One commenter responded to the request and agrees with the interim requirements. The Associate Director for Offshore Minerals Management has approved the final interim requirements for subparagraphs 3.2, 3.3, 3.4.1, and 4.2 and paragraph 7 as final requirements of Alaska OCS Order No. 5 as they were published on October 22, 1982 (47 FR 47180). The effective date for these final requirements is reaffirmed as November 22, 1982.

In subparagraphs 3.3 and 3.4.1, "API Recommended Practice for Design, Installation, and Operation of Subsurface Safety Valve Systems," API RP 14B, Second Edition, November 1981, has been approved as a final requirement to replace language of a general nature as to the same subject which appeared in the proposed Alaska OCS Order No. 5 (47 FR 6162, February 10, 1982).

In subparagraph 3.2, Supplement 1, February 1982, to "API Specification for Subsurface Safety Valve Equipment," API Spec 14A, Fifth Edition, April 1981, has been approved as a final requirement.

In subparagraph 4.2, "API Specification for Wellhead Surface Safety Valves and Underwater Safety Valves for Offshore Service," API Spec 14D, fourth Edition, February 1982, has been approved as a final requirement.

In paragraph 7, Supplement 1, November 1977, to "API Recommended Practice for Operation and Maintenance of Offshore Cranes," API RP 2D, First Edition, October 1972, has been approved as a final requirement; and Supplement 2, January 1975, to "API Specification for Offshore Cranes," API Spec 2C, Second Edition, February 1972, has been approved as a final requirement.

(43 U.S.C. 1334)

Dated: April 26, 1983.

Harold Doley,

Director.

Proposed Order No. 11 Governing Oil and Gas Operations on the Gulf of Mexico and Pacific Region Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of Proposed Revision of OCS Order No. 11 for the Gulf of Mexico and Pacific OCS Regions.

SUMMARY: The Minerals Management Service (MMS) proposes to revise the currently effective Gulf of Mexico and Pacific Regions Outer Continental Shelf (OCS) Order No. 11. Discussions of the revisions are presented in Part I and the proposed Order is presented in Part II. A proposed revision of Form 9–1866, "Reservoir Data-Request for MER," is presented in Part III. Comments and recommendations are solicited on the proposed Order and the proposed form. Comments timely received on the proposed Order and form will be considered by the MMS before a decision is made to issue a final Order. Comments received will be discussed in a **Federal Register** notice for the final Orders.

OCS Order No. 11 is necessary to implement the waste prevention, conservation, and correlative rights protection measures contained in 30 CFR 250.

The intended effect of this proposed revision of OCS Order No. 11 is to eliminate unnecessary reporting and recordkeeping by lessees and operators of producing OCS leases while maintaining the current level of protection of the United States' interests and to prevent the waste of oil and gas.

DATES: Written comments and recommendations on the proposed revision of OCS Order No. 11 must be received on or before July 5, 1983.

ADDRESSES: Comments should be addressed to: David A. Schuenke, Chief, Branch of Rules, Orders, and Standards, Mail Stop 646, Minerals Management Service, U.S. Department of the Interior, 12203 Sunrise Valley Drive, Reston, Virginia 22091.

FOR FURTHER INFORMATION CONTACT: Bill Dockery, Petroleum Engineer, Branch of Development and Production, Mail Stop 646, Minerals Management Service, 12203 Sunrise Valley Drive, Reston, Virginia 22091; telephone (703) 860–7916 or FTS 928–7916.

SUPPLEMENTARY INFORMATION: Notice is hereby given that pursuant to the authority prescribed in the OCS Lands Act, 43 U.S.C. section 1334, as amended, 92 Stat. 629; under Title 30 of the Code of Federal Regulations, §§ 250.10 and 250.11, and in accordance with the Delegation of Authority Published March 14, 1980 (45 FR 16570); and under the authority published February 2, 1982 (47 FR 4751), the Deputy Associate Director for Offshore Operations has proposed a revision of OCS Order No. 11 to be retitled "Oil and Gas Production Rates." The existing Gulf of Mexico Region OCS Order No. 11, "Oil and Gas Production Rates, Prevention of Waste, and Protection of Correlative Rights," became effective on May 1, 1974 (39 FR 15885, May 6, 1974), and the Pacific Region OCS Order No. 11, same title, became effective on May 1, 1975 (40 FR 15411, April 7, 1975).

The proposed revision, if adopted, will be applicable to those lands subject to Federal OCS leasing in the Gulf of Mexico OCS Region and the Pacific OCS Region and will supersede the existing OCS Order No. 11 in those Regions.

The term "Outer Continental Shelf" means all submerged lands lying seaward and outside of the area of lands beneath navigable waters, as defined in section 2 of the Submerged Lands Act (43 U.S.C. 1301), and of which the subsoil and seabed appertain to the United States and are subject to its jurisdiction and control.

This proposed revised Order incorporates appropriate suggestions which were received in response to the USGS (now MMS) **Federal Register** Notice of intent to revise the Order for the Gulf of Mexico and Pacific OCS Regions (42 FR 8232, February 9, 1977).

Information Collection and Recordkeeping Requirements

Information collection and recordkeeping requirements are contained in various paragraphs and subparagraphs of the proposed OCS Order No. 11 as set forth below. These requirements are separated into the following three categories:

1. *Information collected on forms which have been approved by the Office of Management and Budget (OMB) in accordance with 44 U.S.C. 3507.* The information collection and recordkeeping requirements in this category are contained in the following paragraphs and subparagraphs which require the submittal of information on the listed forms:

Paragraph	Form title	Form No.	OMB clearance No.
3.2.1 *Submittal of Initial MPR.* 3.2.2 *Revision of MPR Increase* and 3.2.3 *Revision of MPR Decrease*	Request for Well Maximum Production Rate (MPR).	9–1957	1010–0010
5.3 *Quarterly Test.*	Quarterly Oil-Well Test Report.	9–1869	1010–0016
6.3 *Semiannual Test.*	Semiannual Gas-Well Test Report.	9–1870	1010–0017
11 *Disposition of Gas;* and, 16 *Shut-in Wells*	Monthly Report of Operations—Outer Continental Shelf.	9–152	1010–0012

2. *Information collected on a form which has not been approved by the OMB in accordance with 44 U.S.C. 3507 or on a form with an expired OMB approval.*

The information collection and recordkeeping requirements in subparagraphs 2.1, 2.2, 2.3, 3.1.1, 3.1.2, and 3.1.3 of OCS Order No. 11 are required to be reported on revised Form 9–1866, "Reservoir Data-Request for Reservoir MER." In the current OCS Order No. 11, this form is entitled "Request for Reservoir MER" and carries OMB Clearance No. 1010–0018.

Comments are solicited on the revised Form 9–1866 as presented in Part III. The new form includes a space for indicating whether or not the reservoir is rate sensitive in addition to the information included on the old form. The revised form will be submitted to the OMB for approval.

The information collection and recordkeeping requirements in subparagraphs 3.2.1, 3.2.2, 5.2, and 6.2 of OCS Order No. 11 are required to be reported on Form 9–1868, "Well Potential Test Report." OMB clearance for this form has expired. A request for OMB approval with a new expiration date will be submitted. There will be no change in title, format, or content between the expired and the new form.

3. *Information collected by submittal of plans, programs, procedures, and other narrative formats which have not been approved by the OMB.* The information collection requirements in this category will be sumitted to the OMB for approval as required by 44 U.S.C. 3507. These information collection requirements are contained in the following paragraphs and subparagraphs:

Paragraph	Information required
6.4 Back Pressure Tests	Multipoint back-pressure test results, together with all basic data used, to determine the theoretical open-flow potential of gas wells upon request by the Regional Supervisor (RS). Results to be submitted within 30 days of receipt of request.
7 Witnessing Well Tests	Notification of time and date of any gas- or oil-well test upon request of RS.
9 Bottom-Hole Pressure Tests	Results of bottom-hole pressure tests. Results must be submitted within 45 days of the test. Tests must be conducted in all new reservoirs within 3 months of first continuous production and thereafter annually in sufficient key wells to establish average reservoir pressure. Also requires submittal of results of tests conducted which are not required by this Order.
10.2 Approval of Flaring	Request for approval of flaring of gas for period longer than 24 hours.
10.4Oil-Well Gas	Application for the flaring of oil-well gas including: (1) evidence that the operator has initiated action which will eliminate flaring, and (2) evaluation supported by engineering, geologic, and economic data indicating that it is not economically feasible to save or market the gas.
10.5 Flaring Records	Records detailing flare occurrences to be maintained at the flare site and to be available for inspection.
11 Disposition of Gas	Quantity of oil- and gas-well gas sold, used for fuel, injected, flared, vented, or otherwise used. (To be submitted with Form 9–152, "Monthly Report of Operations," OMB Clearance No. 1010–0012.)
12.4 Commingling	Application to commingle hydrocarbons from multiple reservoirs within a common wellbore, including pertinent well information, geologic and reservoir engineering data, a schematic diagram of well equipment, estimated recoverable reserves, and any alternate drainage points.
14.2 Distance from Property Line	Request for approval to produce a well within 500 feet (200 feet in the Pacific OCS Region) of a property line including letters expressing acceptance or rejection from operators of offset properties.
16 Enhanced Oil and Gas Recovery Operations	Plan of enhanced recovery operations showing that such operations would result in increased ultimate recovery of oil or gas.

Paragraph	Information required
17.1 Competitive Reservoir Determination	Request that RS make a determination that a reservoir is competitive. Advises RS of concurrence or nonconcurrence with RS's determination.
17.2, 17.2.1, 17.2.2 Development and Production Plans.	Plan governing development and production of competitive reservoir, to include proposed MER for sensitive reservoir, proposed MPR for each completion in the reservoir, percentage allocation of reservoir MER for each lease involved and any plans for secondary recovery or pressure maintenance operations.
17.3 Unitization	Plan of unitization when it is determined by the RS that conservation would best be served by unitization (in conjuction with 30 CFR 250.51-2).

Drafting Information

The primary authors of this document are: J. Rogers Pearcy, Acting Deputy Manager, Minerals Management Service, Gulf of Mexico OCS Region; and Bill Dockery, Branch of Development and Production, Minerals Management Service.

Statement of Significance

The Department of the Interior has determined that the proposed revision of OCS Order No. 11 does not constitute a major Federal action significantly affecting the quality of the human environment and, therefore, preparation of an environmental impact statement is not required.

The Department has determined that the proposed revision of OCS Order No. 11 is not a major action and does not require the preparation of a regulatory impact analysis under Executive Order 12291.

The Department has determined that the proposed revision of OCS Order No. 11 does not have a significant economic effect on a substantial number of small entities and does not require a small entity flexibility analysis under the Regulatory Flexibility Act.

Richard B. Krahl,

Deputy Associate Director for Offshore Operations.

I. Discussion of Revisions of OCS Order No. 11, "Oil and Gas Production Rates"

A. Paragraph 1, Definition of Terms

Revision. The definition of "correlative rights" was revised.

Discussion. The definition given in 30 CFR 250.2(i) was used in the interest of consistency.

Revision. The definition of "enhanced recovery operations" was added.

Discussion. The definition was formerly contained in the definition of "waste of oil and gas."

Revision. The definition of "lessee" and "operator" were added.

Discussion. Subparagraph 17.3 of the Order imposes requirements on "operators" and "lessees;" therefore, it is appropriate to define the terms.

Revision. The definition of "maximum efficient rate (MER)" was revised.

Discussion. The definition was revised to make it applicable only to reservoirs which are determined to be sensitive to production rates.

Revision. Definitions of "sensitive reservoir" and "nonsensitive reservoir" were added.

Discussion. These definitions were needed since MER's will pertain only to reservoirs that are sensitive to production rates.

Revision. The definition of "property line" was revised.

Discussion. The reference to portions of leases was deleted because the Office of the Solicitor, U.S. Department of the Interior, has determined that leases cannot be segregated.

B. Paragraph 2, Classification of Reservoirs

Revisions. The entire paragraph has been revised so that each subparagraph addresses classification as to sensitive/nonsensitive reservoir in addition to classification as to reservior fluid type.

In subparagraph 2.1, *Initial Classification,* all reservoirs classified as "oil reservoir with an associated gas cap" shall also be classified as "sensitive."

A third subparagraph entitled "Review of Reservior Classification" has been added. It requires an annual review of each reservoir by the RS, using the reservoir data submitted on revised Form 9–1866, "Reservoir Data-Request for Reservior MER."

Discussion. The MER concept is meaningful only when applied to rate-sensitive reservoirs, in which case the rate at which the reservoir is produced has an affect on ultimate recovery, the MER being the rate at which ultimate recovery is optimized. However, for nonrate-sensitive reservoirs, ultimate recovery is unrelated to rate of production. Studies have shown that ultimate recovery for solution gas and full water-drive reservoirs is independent of the production rate of the reservoir and the individual wells. Moreover, the majority of reservoirs in the Gulf of Mexico contain only one or two wells, and the engineering evidence indicates that ultimate recovery from these small reservoirs is insignificantly affected by rates of production. The majority of oil reservoirs with associated gas caps have been shown to be sensitive to the rate of withdrawal from the reservoir such that a meaningful MER exists which should not be exceeded in the interest of optimizing ultimate recovery. Less than 10 percent of the oil reservoirs on the OCS have original gas caps. Studies have also shown that essentially all gas reservoirs located on OCS leases in the Gulf of Mexico are nonsensitive to the rate of withdrawal. Consequently, it is feasible to initially classify all gas reserviors and all oil reservoirs (except those with an associated gas cap) to be nonsensitive, with occasional exceptions to be handled on an individual-basis as evidence develops that a particular reservoir should be reclassified as sensitive. Conversely, all reservoirs with associated gas caps may initially be considered sensitive with occasional exceptions handled individually as evidence develops that a particular reservoir should be reclassified as nonsensitive.

C. Paragraph 3, Oil and Gas Production Rates

Revision. Subparagraph 3.1 and all subparagraphs thereunder have been revised to pertain only to sensitive reservoirs.

Discussion. As discussed above, the MER concept is only meaningful when applied to rate-sensitive reservoirs.

Revision. In subparagraph 3.1.1, the deadline for submission of Form 9–1866 for sensitive reservoirs was changed from "Within 45 days after the date of first production * * *," to "Within 15 days after the initital 30-day test period * * *."

Discussion. The initial 30 days that a reservoir is on production is usually considered the "inititial 30-day test period," so in actuality the requirement has not changed.

Revision. In subparagraph 3.2 (formerly 3B), the sentence "When an MPR has been approved for a well completion, that rate shall not be exceeded, except as provided in paragraph 4 of this Order," has been deleted.

Discussion. The introduction of balancing of production, paragraph 4 of the Order, at this stage, was premature. Balancing of production follows the approval process for MPR's, and the allowance for exceeding an MPR is covered in paragraph 4.

Revision. In subparagraph 3.2.1, the reference to an extension of the 30-day test period was deleted.

Discussion. We believe that extensions need not be mentioned in the Order, but they would be granted upon valid requests in the same manner as departures.

Revision. In paragraph 3.2.2 (formerly 3B2), the requirement to notify the RS (formerly DMC or Supervisor) of intent to test a well at rates higher than the approved MPR has been deleted.

Discussion. At no time has the requirement existed that lease operators obtain the approval of the Supervisor before testing wells at rates above the approved MPR; only that the Supervisor be notified of the intent to conduct such tests. Experience has shown that it is of little value to receive advance notice of plans to test a well for purposes of increasing the MPR, since the production of wells for short periods in excess of approved rates usually causes no problem in the balancing of production. In any event, the clearance of produced volumes in excess of approved MPR's can be effectively approved at the time the request for MPR increase is received and approved.

Revision. In subparagraph 3.2.3 (formerly 3B3), a phrase requiring that the date of the quarterly or semiannual test be more recent than the effective date of the approved MPR has been added.

Discussion. This phrase was added so that older quarterly or semiannual test data could not be used to decrease an MPR.

Revision. Subparagraph 3B5, *Cancellation of MPR,* of the current OCS Order No. 11 has been deleted.

Discussion. MPR's are monitored by the Well Status and Production System (WSPS) which compares the approved MPR for each well with the latest quarterly (for oil) or semiannual (for gas) well test and reduces or zeros MPR's as appropriate to maintain an MPR not in excess of 110 percent of the latest quarterly or monthly well test. Therefore, MPR's are automatically cancelled quarterly in instances where the well is no longer on production and/or no well test is submitted, thus negating the necessity for a notice of cancellation. Therefore, no reliance has been made upon such notices.

D. Paragraph 4, Balancing of Production

Revision. In subparagraph 4.1 (formerly 4A), *Production Variances,* the requirement to advise the Supervisor of overproduction on Form 2–152 has been deleted.

Discussion. The RS detects overproduction and underproduction through the WSPS mentioned above. This requirement has never been enforced since it is not needed, hence the deletion.

Revision. In subparagraph 4.2 (formerly 4B), *Balancing Periods,* the sentence "As of the first day of the month following the month in which this Order becomes effective, all reservoirs shall be considered in balance," has been deleted.

Discussion. This sentence was necessary when OCS Order No. 11 first became effective for the Gulf of Mexico Region in 1974 and the Pacific Region in 1975 because a beginning point was needed. Since the Order has been in effect continuously since these dates, the sentence is not needed in the revision of OCS Order No. 11.

Revision. The sentence pertaining to overproduction in subparagraph 4.2 (formerly 4B) has been revised.

Discussion. The revision makes the definition clearer and compatible with the remaining text of the subparagraph.

Revision. The sentence requiring notification of balancing of production in subparagraph 4.2 has been deleted.

Discussion. Verification of balanced production is obtained by the RS through the WSPS so the notification by the operator is duplicative and, therefore, not needed.

E. Paragraph 6, Gas-Well Testing Procedures

Revisions. In subparagraph 6.1 (formerly 6A), the requirement for a multipoint back-pressure test has been deleted.

In subparagraph 6.4 (formerly 6D), the requirement of conducting multipoint back-pressure tests "within thirty days after connection to a pipeline" has been changed to "at the request of the RS."

Discussion. Multipoint back-pressure tests have previously been required as a measure of the theoretical open-flow potential of gas wells. However, recent experience has shown that little routine use is being made of this data. Consequently, it appears that in instances where such data is needed for a particular study or analysis, it can be obtained on the basis of a specific request from the RS while eliminating the routine requirement that a multipoint back-pressure test be conducted in each new gas well.

Revision. In subparagraph 6.2 (formerly 6B), a sentence was added requiring that the total production obtained from all tests during the test period shall be reported on Form 9–1868, "Well Potential Test Report."

Discussion. Form 9–1868 has always required this information; therefore, this is not a new information collection requirement. The sentence was added to emphasize this requirement.

F. Paragraph 9, Bottom-Hole Pressure Tests.

Revisions. This paragraph has been revised so that static bottom-hole pressure tests will be required annually on sufficient key wells in each producing reservoirs with three or more producing completions instead of all producing reservoirs.

The deadline for submitting the results of such tests has been cut to "within 45 days" after the date of the test instead of "within 60 days."

Operators will be required to submit the results of tests which are not required by this Order.

Discussion. Static bottom-hole pressure tests have previously been required annually in sufficient key wells to establish an average pressure in each producing reservoir. However, for smaller reservoir with less than three producing completions, experience has shown that the reserves are generally of such limited extent that development and ultimate recovery cannot be controlled or affected to any advantage by the application of extensive reservoir studies and analyses. Therefore, beyond an initial static bottom-hole pressure reading in sufficient key wells, little benefit is accrued from taking subsequent bottom-hole pressure readings. Consequently, the annual bottom-hole pressure test requirement has been deleted, except for reservoirs with three or more producing completions or unless a special request is made by the RS. Submittal of static bottom-hole pressure test data is now required within 45 days rather than 60 days after the date of the test since experience has shown that 45 days is an adequate time period for submittal. Submittal of the results of any bottom-hole pressure test which the lease operators run at their own volition is also required.

G. Paragraph 10, Flaring and Venting of Gas

Revisions. Subparagraph 10.1b (formerly 10A(2)) has been revised so that the time limitations on emergency flaring of gas are specified.

The application requirements for approval of flaring have been moved, unchanged, to subparagraph 10.4.

A new subparagraph 10.5, *Flaring Records,* has been added requiring that records detailing flare occurrences be maintained at each flare point.

Discussion. Time limitations for the approval of emergency oil-well flaring previously contained in the Gulf of

VOL

1983
UMI

Mexico OCS Region's Notice to Lessees and Operators (NTL) No. 75–9 have now been incorporated in OCS Order No. 11, and the time limitations on emergency gas-well flaring have been added to permit such flaring only until the emergency can be eliminated or until contributing gas wells can be shut in. As a distinction, it should be noted that OCS Order No. 11 allows for the approval of oil-well flaring under controlled circumstances, such as a gas compressor being down for repairs, whereas emergency gas-well flaring is permitted only until the emergency can be brought under control and eliminated. In the interest of verification of volumes flared and the circumstances involved, records of flare occurrences must henceforth be maintained for inspection at each flare point as previously required by NTL No. 75–9. No new requirements have been added which were not being required already by NTL No. 75–9 or which were not being done in accordance with prudent operating practices.

H. Paragraph 12, Multiple and Selective completions

Revision. Subparagraph 12.2 (formerly 12B) and Appendix A have been revised to require well numbering in accordance with American Petroleum Institute (API) Bulletin D12A dated January 1979.

Discussion. Appendix A previously required that each well completion within a wellbore be assigned a unique well-completion number which was to remain unchanged throughout the life of the wellbore. However, this numbering system proved unacceptable to many lease operators who wished, in the course of workover or recompletion operations, to change or adjust well names to designate the relative depth or elevation of a particular completion within the wellbore at any given point in time. Therefore, Appendix A has been revised to require identification of well completions and producing intervals on the basis of a 2-character completion symbol added to the API well-completion numbering system. The first of the two characters is an alphabetical designation which indicates the total number of tubing strings installed within the wellbore while the second character is a permanent unique numerical designation assigned to each producing interval completion within the wellbore. Once this unique numerical designation is assigned to a particular producing interval (reservoir sand) within a wellbore, it remains unchanged throughout the life of the wellbore.

Revision. Subparagraph 12C (old Order) which requires a packer test in multiple and selective completions in the current Order has been deleted.

Subparagraph 12.4, *commingling,* has been revised to consider economic factors and also to require the submittal of estimated recoverable reserves and any alternate drainage points.

Discussion. Experience has shown that, while packer tests, in some situations, are useful in confirming the presence of intercommunication within a wellbore, such communication between zones is usually detected initially on the basis of observed changes or similarities in flowing pressures, shut-in pressures, bottom-hole pressures, and/or other producing characteristics of the individual well completions, long before a packer leakage test is conducted. Other producing characteristics which are frequently indicators of communication between zones relate to observed changes or similiarities in liquid hydrocarbon gravity, produced water contents, specific gravity of gas or liquids, and/or the gas/oil ratio of one or more of the well completions within a wellbore. Such intercommunication is usually the result of either packer failure or tubing leaks. Once discovered, the question of whether repairs will be required in order to eliminate such communication between zones, or whether continued commingled production will be approved from such zones in communication, is decided on the basis fof whether or not such communication will result in a loss in ultimate recovery and on the basis of what is economically feasible and/or physically possible to accomplish in the way of workover or repair efforts. In any event, there have been few, if any, instances in which packer leakage tests have proven to be the decisive factor in the detection and/or elimination of communication between zones. Therefore, it is proposed that the requirement for such tests be deleted from OCS Order No. 11.

In making application for approval to commingle, the lease operator will now be required to provide a figure for estimated recoverable reserves and to identify any alternate drainage points which might be used to produce the reservoirs separately since experience has shown this information is needed in evaluating such commingling applications.

I. Paragraph 15, Shut-In Wells

Revision. This paragraph has been added to OCS No. 11. It requires the reporting of the status of all wells not permanently plugged and abandoned. Appendix B to OCS Order No. 11 has also been added. It contains the reporting codes for well status.

Discussion. The annual reporting of shut-in wells to the Congress, along with a statement as to whether such wells will be required to produce, is required by the OCS Lands Act Amendments of 1978. In accordance with letters of instruction, lease operators have previously been required to report the status of shut-in wells on Form 9–152, "Monthly Report of Operations-Outer Continental Shelf" for the Gulf of Mexico OCS Region. However, it is now proposed that this requirement and related instructions be incorporated in OCS Order No. 11.

J. Paragraph 17, Competitive Reservoir Operations

Revision. Subparagraph 17.3, *Unitization,* has been revised by adding language that forced unitization shall not be required until the operators and lessees are provided reasonable notice and an opportunity for a hearing in accordance with 30 CFR 250.51–2.

Discussion. This section of the revised Order provides that unitization of competitive reservoirs or any reservoir reasonably delineated shall not be required until the operators and lessees are provided reasonable notice and an opportunity for a hearing. The semiformal hearings are designed to give operators and lessees an opportunity to present their arguments either for or against unitization on the record and have such arguments and supporting technical data maintained as part of the official record. The proposed revision should result in fewer appeals since much of the controversy surrounding a forced unitization matter can be resolved by the hearing.

K. Paragraph 18, Conferences, Decisions, Appeals

Revision. The penultimate and the last sentence of paragraph 18 (formerly 17) were editorially revised.

Discussion. The revision of the penultimate sentence makes it clear that copies of the RS's decision will be provided to the parties involved. The last sentence was revised to follow the langauge of 30 CFR 250.81.

L. Paragraph 19, Departures

Revision. This paragraph, which allows for departures from the requirements specified in OCS Order No. 11, subject to approval pursuant to 30 CFR 250.11(b), has been added.

Discussion. Past experience has shown the necessity for approving certain exceptions or departures to OCS Order No. 11 in the interest of applying

the Order in a reasonable, realistic manner. Also, most other OCS Orders include a provision for departures, and previous failures to include such a provision in OCS Order No. 11 were probably due to an oversight.

II. Proposed Revision of OCS Order No. 11, "Oil and Gas Production Rates"

19. Departures

Information Collection

The information collection requirements contained in OCS Order No. 11, as listed below, have been approved by the Office of Management and Budget (OMB) under 44 U.S.C. 3507. The information is collected to obtain definite and firsthand knowledge of the information collection requirements listed below under "Information Collection." This information is used to evaluate, approve, or verify compliance with these requirements as listed below under "Used to." The obligation to respond is mandatory.

Paragraph No.	Information collection/OMB clearance No.	Used to
3.2.1 Submittal of Initial MPR	The operator's requested maximum production rate (MPR) for each well, including operator's name and address, field, lease number, well identification, reservoir, reservoir MER, present MPR, and date on Form 9–1867/1010–0019.	Evaluate and approve operator's requested maximum production rate for each well completion.
3.2.2 Revision of MPR Increase; and 3.2.3 Revision of MPR Decrease		
5.3 Quarterly Test	Results of quarterly oil-well tests conducted by the operator, including identification data, production rate, choke size, bottom sediment and water content, tubing pressure, gas-oil ratio, production method, date of test, and current MPR on Form 9–1869/1010–0016.	Evaluate and verify operator's currently approved maximum production rate for each oil-well completion.
6.3 Semiannual Test	Results of semiannual gas-well tests conducted by the operator, including identification data, production data, wellhead pressure, line pressure, date of test, and current MPR on Form 9–1870/1010–0017.	Evaluate and verify operator's currently approved maximum production rate for each gas-well completion.
11. Disposition of Gas	Amounts of gas sold, used for fuel, injected, flared, vented, or otherwise disposed of by each operator on Form 9–152/1010–0012.	Verify the disposition of all gas produced for conservation and royalty purposes.
15. Shut-In Wells	Status of all wells not producing and not abandoned on Form 9–152/1010–0012	Verify the status of nonproducing wells.

United States Department of The Interior, Minerals Management Service

Gulf of Mexico OCS Region/Pacific OCS Region

OCS Order No. 11

Effective ———

Oil and Gas Production Rates

This Order is issued pursuant to the authority prescribed in the OCS Lands Act, 43 U.S.C. section 1334 et seq., as amended, 92 Stat. 629; 30 CFR 250.10 and 250.11 and in accordance with the Delegation of Authority published March 14, 1980 (45 FR 16570); and under the authority published February 2, 1982 (47 FR 4751). This Order implements the requirements of 30 CFR 250.11, 250.16, 250.17, 250.30, 250.33, 250.34, 250.39, 250.50, 250.51, 250.52, 250.55, 250.60, 250.61, 250.68, 250.81, 250.93, and 250.96. References in this Order to approvals, determinations, and requirements for submittal of information or applications for approval are to those granted, made, or required by the appropriate Regional Supervisor (RS) or delegated representative, unless otherwise noted.

1. *Definition of Terms.* For the purpose of this Order, the term—

"Competitive Reservoir" means a reservoir containing one or more producible or producing well completions on each of two or more leases, or portions thereof, in which the lease or operating interests are not the same.

"Correlative Rights," When used with respect to lessees of adjacent tracts, means the right of each lessee to be afforded an equal opportunity to explore for, develop, and produce, without waste, oil or gas, or both, from a common source. (See 30 CFR 250.2(i).)

"Enhanced Recovery Operations" means pressure maintenance operations, secondary and tertiary recovery, cycling, and similar recovery operations which alter the natural forces in a reservoir to increase the ultimate recovery of oil or gas.

"Gas Reservoir" means a reservoir that contains hydrocarbons predominantly in a gaseous (single-phase) state.

"Gas-Well Completion" means a well completed in a gas reservoir or in the gas cap of an oil reservoir with an associated gas cap.

"Interested party" means the lessees and operators, as defined herein, of the lease or leases involved in any proceeding initiated under this Order.

"Lessee" means the party authorized by a lease, or an approved assignment thereof, to explore for and develop and produce the leased deposits in accordance with the regulations in 30 CFR 250. The term includes all parties holding that authority by or through the lessee.

"Maximum Efficient Rate (MER)" means the maximum sustainable daily oil or gas withdrawal rate from a reservoir classified as sensitive which will permit economic development and depletion of that reservoir without detriment to ultimate recovery.

VOL
48
ISS
87
MAY
4
1983
UMI

"Maximum Production Rate (MPR)" means the approved maximum daily rate at which oil may be produced from a specified oil-well completion or the maximum approved daily rate at which gas may be produced from a specified gas-well completion.

"Nonsensitive Reservoir" means a reservoir in which ultimate recovery is not affected by total reservoir production rates and individual well rates.

"Oil Reservoir" means a reservoir that contains hydrocarbons predominantly in a liquid (single-phase) state.

"Oil Reservoir with an Associated Gas Cap" means a reservoir that contains hydrocarbons in both a liquid and a gaseous state (two-phase).

"Oil-Well Completion" means a well completed in an oil reservoir or in the oil accumulation of an oil reservoir with an associated gas cap.

"Operator" means the individual, partnership, firm, or corporation having control or management of operations on the leased area or a portion thereof. The operator may be a lessee, designated agent of the lessee, or holder of rights under an approved operating agreement.

"Producible Well Completion" means a well which is physically capable of producing and which is shut in at the wellhead or at the surface, but not necessarily connected to production facilities, and from which the operator plans future production.

"Property Line" means boundaries dividing leases and/or federally approved unit areas. Boundaries between leased and unleased acreage shall be considered property lines for the purpose of this Order.

"Reservoir" means an oil and/or gas accumulation which is separated from and not in oil or gas communication with any other such accumulation.

"Sensitive Reservoir" means a reservoir in which ultimate recovery is affected by total reservoir production rates or individual well rates.

"Waste of oil and gas" means: (1) The physical waste of oil and gas; (2) the inefficient, excessive, or improper use of, or the unnecessary dissipation of reservoir energy; (3) the locating, spacing, drilling, equipping, operating, or producing of any oil or gas well or wells in a manner which causes or tends to cause reduction in the quantity of oil or gas ultimately recoverable from a pool under prudent and proper operations or which causes or tends to cause unnecessary or excessive surface loss or destruction of oil or gas; and (4) the inefficient storage of oil. It includes the failure to timely initiate enhanced recovery operations where such methods would result in an increased ultimate recovery of oil or gas under sound engineering and economic principles.

2. *Classification of Reservoirs.* Each producing reservoir shall be classified as oil, oil with an associated gas cap, or gas; and as sensitive or nonsensitive, subject to the approval of the RS.

2.1 *Initial Classification.*

2.1.1 *Reservoir Fluid Type.* Within 15 days after the initial 30-day test period, the operator shall file revised Form 9–1866, "Reservoir Data-Request for Reservoir MER," classifying the reservoir as an oil reservoir, an oil reservoir with an associated gas cap, or a gas reservoir.

2.1.2 *Sensitive/Nonsensitive.* All oil reservoirs with associated gas caps shall be initially classified as sensitive and shall require the balancing of production in accordance with subparagraph 4.2 of this Order. All other oil reservoirs and all gas reservoirs shall be initially classified as nonsensitive and shall not require the balancing of production. As of the effective date of this Order, these requirements are applicable to all currently producing reservoirs.

2.2 *Reclassification.*

2.2.1 *Reservoir Fluid Type.* After a minimum of 1 year of production history, a reservoir may be reclassified as to fluid type during its productive life by the RS on the RS's initiative or upon application of an operator when information available shows that such reclassification is warranted.

2.2.2 *Sensitive to Nonsensitive.* The operator may request that a reservoir be reclassified from sensitive to nonsensitive after a minimum of 1 year of production history and upon submittal of relevant engineering and geological data indicating that the ultimate recovery is not sensitive to the rate of production. A reservoir may be reclassified from sensitive to nonsensitive by the RS at any time on the basis of evidence showing that ultimate recovery is not sensitive to the rate of production.

2.2.3 *Nonsensitive to Sensitive.* Either the operator or the RS may at any time initiate the reclassification of oil and gas reservoirs from nonsensitive to sensitive on the basis of reservoir history showing that the ultimate recovery is sensitive to the rate of production.

2.3 *Review of Reservoir Classification.* The classification of each producing reservoir shall be reviewed annually on the basis of reservoir data furnished on revised Form 9–1866, including the current revised reservoir information for both sensitive and nonsensitive reservoirs, accompanied by any requested changes in classification.

3. *Oil and Gas Production Rates.*

3.1 *Maximum Efficient Rate (MER).* In order to conserve reservoir energy and maximize oil and gas recovery, the operator shall propose an MER for each producing sensitive reservoir based on sound engineering and economic principles. When approved, such rates shall not be exceeded, except as provided in paragraph 4 of this Order. An MER shall not be required for a reservoir classified as nonsensitive.

3.1.1 *Submittal of Initial MER.* Within 15 days after the initial 30-day test period, the operator shall file revised Form 9–1866 with appropriate supporting information for a proposed MER for all sensitive reservoirs.

3.1.2 *Revision of MER.* The operator may request a revision of an MER by submitting the proposed revision to the RS on Form 9–1866 with appropriate supporting information. The operator shall obtain approval to produce at test rates which exceed an approved MER when such testing is necessary to substantiate an increase in the MER.

3.1.3 *Review of MER.* The MER for each sensitive reservoir will be reviewed by the operator annually, or at such other required or approved interval of time, in conjunction with the review of classification under subparagraph 2.3 of this Order. The results of the review, with all current supporting information, shall be submitted on revised Form 9–1866.

3.1.4 *Effective Date of MER.* The effective date of an MER, or revision thereof, will be determined by the RS and shown on Form 9–1866 when the MER is approved. The effective date for an initial MER shall be the first day following an approved testing period. The effective date for a revised MER shall be the first day following the completion of an approved testing period, or if testing is not conducted, the date the revision is approved.

3.2 *Maximum Production Rate (MPR).* The operator shall propose an MPR for each producing well completion in a reservoir together with full information on the method used in its determination. The MPR shall be based on well tests and any limitations imposed by—

(1) Well tubing, safety equiment, artifical lift equipment, surface back-pressure, and equipment capacity;

(2) Sand-producing problems;

(3) Producing gas-oil and water-oil ratios;

(4) Relative structural position of the well with respect to gas-or water-oil contacts;

(5) Position of perforated interval within total production zone; and

(6) Prudent operating practices.

The MPR established for each well completion shall not exceed 110 percent of the rate demonstrated by a well test unless jsutified by supporting information.

3.2.1 *Submittal of Initial MPR.* The operator shall have 30 days from the date of first continuous production within which to conduct a potential test, as specified under subparagraphs 6.2 and 7.2 of this Order, on all new, recompleted, and reworked well completions. No later than 15 days after the last day of the test period, the operator shall submit a proposed MPR for the individual well completion on Form 9–1867, "Request for Well Maximum Production Rate (MPR)," with the results of the potential test on Form 9–1866, "Well Potential Test Report." The effective date for any approved initial MPR shall be the first day following the test period. During the 30-day period allowed for testing, the operator may produce a new, recompleted, or reworked well completion at rates necessary to establish the MPR. The operator shall report the total production obtained during the test period on Form 9–1868.

3.2.2 *Revision of MPR Increase.* If an operator determines that the MPR should be increased, the operator shall submit, within 15 days after a specified 30-day test period, a proposed increased MPR on Form 9–1867. Data supporting the requested revision, including the results of the potential test and the total production obtained during the test period, shall be submitted on Form 9–1866. Prior to approval of the proposed increased MPR, the operator may produce the well completion at a rate not to exceed the proposed increased MPR of the well. The effective date for any approved increased MPR shall be the first day following the test period. If testing rates or increased MPR rates result in production from a sensitive reservoir in excess of the approved MER, this excess production shall be balanced by underproduction from the reservoir under the provisions of subparagraph 4.2 of this Order.

3.2.3 *Revision of MPR Decrease.* When the quarterly test rate for an oil-well completion or the semiannual test rate for a gas-well completion, as required under subparagraphs 5.3 and 6.3 of this Order, is less than 90 percent of the approved MPR, and the date of this test is more recent than the effective date of the approved MPR, a new reduced MPR will be established automatically for that well completion equal to 110 percent of the test rate submitted. The effective date for the new MPR for such well completion shall be the first day of the calendar quarter following the required date of submittal of periodic well-test results. The operator may notify the RS on Form 9–1867 of, or the RS may require, a downward revision of a well MPR at any time when the well is no longer capable of producing its approved MPR on a sustained basis. The effective date for such reduced MPR for a well completion shall be the first day of the month following the date of notification.

3.2.4 *Continuation of MPR.* When the results of a quarterly well test for an oil completion or a semiannual well test for a gas completion as required by subparagraphs 5.3 and 6.3, respectively, cannot be timely submitted, production at the last approved MPR for the well may be continued, provided prior approval of an extension of time in which to submit the test results is obtained.

3.3 *MER and MPR Relationship.* The withdrawal rate from a sensitive reservoir shall not exceed the approved MER. The reservoir may be produced from any combination of well completions subject to any limitations imposed by the MPR established for each well completion. The rate of production from the reservoir shall not exceed the MER, although the summation of individual well MPR's may be greater than the MER.

4. *Balancing of Production from Reservoirs Classified Sensitive.*

4.1 *Production Variances.* Temporary well production rates resulting from normal variations and fluctuations exceeding a well MPR or reservoir MER shall not be considered a violation of this Order, and such production may be sold or transferred pursuant to paragraph 8 of this Order. However, when normal variations and fluctuations result in production in excess of a reservoir MER, each operator who is overproduced shall balance such production in accordance with subparagraph 4.2. below.

4.2 *Balancing Periods.* Balancing periods for overproduction of a reservoir MER shall end on January 1, April 1, July 1, and October 1 of each year. A reservoir shall be considered overproduced when total production for a balancing period exceeds total MER for that corresponding balancing period. All overproduction shall be balanced by the end of the next succeeding quarter following the quarter in which the overproduction occurred.

4.3 *Shut In for Overproduction.* Each operator in an overproduction status for two successive quarters in any sensitive reservoir which has not been brought into balance within the balancing period shall shut in that reservoir until the actual production equals that which would have occurred under the approved MER.

4.4 *Temporary Shut In.* If, as a result of storms, hurricanes, emergencies, or other condition speculiar to offshore operations, an operator is forced to curtail or shut in production from a reservoir, the DMM may, upon request, approve makeup of all or part of this production loss.

5. *Oil-Well Testing Procedures.*

5.1 *General.* A test shall be conducted for not less than 4 consecutive hours. Immediately prior to the 4-hour test period, the well completions shall have produced under stabilized conditions for a period of not less than 6 consecutive hours. The 6-hour pretest period shall not begin until after recovery of a volume of fluid equivalent to the amount of fluids introduced into the formation for any purpose. Measured gas volumes shall be adjusted to the standard conditions of 15.025 pounds per square inch absolute (psia) (14.73 psia in Pacific OCS Region) and 60° F for all tests. When orifice meters are used, a specific gravity shall be obtained or estimated for the gas and a specific gravity correction factor applied to the orifice coefficient. The RS may required a prolonged test or retest of a well completion if such test is determined to be necessary for the establishment of a well MPR or a reservoir MER. The RS may approve test periods of less than 4 hours and pretest stabilization periods of less than 6 hours for well completions, provided that test reliability can be demonstrated under such procedures.

5.2 *Potential Test.* Test data to establish or to increase an oil-well MPR shall be submitted on Form 9–1868. The total production obtained from all tests during the test period shall be reported on such form.

5.3 *Quarterly Test.* A quarterly test shall be conducted on each producing oil-well completion, and test results shall be submitted on Form 9–1869, "Quarterly Oil-Well Test Report." Test periods and submittal dates shall be as follows:

Testing period	Latest date for submittal of test results	For quarter beginning
Sept. 11 to Dec. 10	Dec. 10	Jan. 1.
Dec. 11 to Mar. 10	Mar. 10	Apr. 1.
Mar. 11 to June 10	June 10	July 1.
June 11 to Sept. 10	Sept. 10	Oct. 1.

To satisfy the requirements of this subparagraph, there shall be a minimum of 45 days between quarterly tests for an oil-well completion.

6. *Gas-Well Testing Procedures.*

6.1 *General.* Testing procedures for gas-well completions shall be the same as those specified for oil-well completions in subparagraph 5.1.

6.2 *Potential Test.* Test data to establish or to increase a gas-well MPR shall be submitted on Form 9–1868. The total production obtained from all tests during the test period shall be reported on such form.

6.3 *Semiannual Test.* A test shall be conducted on each producing gas-well completion semiannually, and test results shall be submitted on a Form 9–1870, "Semiannual Gas-Well Test Report." Testing periods and submittal dates shall be as follows:

Testing period	Latest date for submittal of test results	For semi-annual period beginning
June 11 to Dec. 10	Dec. 10	Jan. 1.
Dec. 11 to June 10	June 10	July 1.

To satisfy the requirements of this subparagraph, there shall be a minimum of 90 days between semiannual tests for a gas-well completion.

6.4 *Back-Pressure Tests.* Multipoint back-pressure tests to determine the theoretical open-flow potential of gas wells shall be conducted on an individual well basis at the request of the RS in instances where a need for this information develops or exists. Upon the specific request of the RS, the lease operator shall conduct all identified multipoint back-pressure tests within 30 days following receipt of such request or within such other time period specifically requested by the RS. The results of all requested back-pressure tests shall be submitted together with all basic data used in determining the test results.

7. *Witnessing Well Tests.* The RS may have a representative witness any potential or periodic well tests on oil- and gas-well completions. Upon request, an operator shall notify the appropriate office of the time and date of well tests.

8. *Sale or Transfer of Production.* Oil and gas produced pursuant to the provisions of this Order, including test production, may be sold to purchasers or transferred as production authorized for disposal hereunder.

9. *Bottom-Hole Pressure Tests.* Static bottom-hole pressure tests shall be conducted in all new reservoirs within 3 months after the date of first continuous production. Thereafter, bottom-hole pressure tests shall be conducted annually in sufficient key wells to establish an average reservoir pressure in each producing reservoir with three or more producing completions. Results of bottom-hole pressure tests shall be submitted within 45 days after the date of the test. Operators may be required to test specific wells and/or specific reservoirs. In the event bottom-hole pressure tests not required by this Order are conducted in any well or reservoir, the results of such tests shall be filed with the RS (District Supervisor in Pacific OCS Region) within 45 days after the date of the test.

10. *Flaring and Venting of Gas.* Oil-well and gas-well gas shall not be flared or vented except as provided herein.

10.1 *Small Volume or Short-Term Flaring or Venting.* Gas may be flared or vented in small volumes without the approval of the RS (District Supervisor in Pacific OCS Region) in the following situations:

a. *Gas Vapors.* When gas vapors are released from storage and other low-pressure

VOL 48 ISS 87 MAY 1983

production vessels if such gas vapors cannot be economically recovered.

b. *Emergencies.* During temporary situations, such as compressor or other equipment failure, or the relief of abnormal system pressures:

(1) The flaring of oil-well gas need not be reported for periods less than 24 hours; however, it may not be flared for more than 24 hours without the approval of the RS. Also, flaring at a flare point shall not continue beyond a cumulative time of 144 hours during any calendar month without the approval of the RS (District Supervisor in Pacific OCS Region).

(2) The flaring of gas-well gas shall not be permitted beyond the time required to eliminate the emergency or until the gas wells contributing to the flare can be shut in.

c. *Well Purging and Evaluation Tests.* During the unloading or cleaning up of a well and during drill-stem tests, producing or other well evaluation tests for periods not to exceed 24 hours.

10.2 *Approval of Flaring.* Any flaring of a longer duration than the time specified in 10.1 b and c above will require prior approval of the RS (District Supervisor in Pacific OCS Region).

10.3 *Gas-Well Gas.* Except as provided in 10.1 and 10.2 above, gas-well gas shall not be flared.

10.4 *Oil-well Gas.* Except as provided in 10.1 and 10.2 above, oil-well gas shall not be flared unless approved by the RS. An application for the flaring of oil-well gas may be approved by the RS for 1-year periods if: (1) the operator has initiated a positive action which, when completed, will eliminate flaring or venting, or (2) the operator has submitted an evaluation supported by engineering, geologic, and economic data indicating that the oil and gas produced from the well(s) will not economically support the facilities necessary to save and sell the gas or that sufficient quantities of gas are not available for marketing.

10.5 *Flaring Records.* Records detailing flare occurrences shall be maintained for each flare point and shall be available for inspection by a representative of the RS (District Supervisor in Pacific OCS Region).

11. *Disposition of Gas.* The disposition of all gas produced from each lease shall be reported monthly on, or attached to, Form 9–152, "Monthly Report of Operations—Outer Continental Shelf." The report shall be submitted in the following manner:

	Oil-well gas (MCF)	Gas-well gas (MCF)
Sales		
Fuel		
Injected		
Flared		
Vented		
Other (Specify)		
Total		

12. *Multiple and Selective Completions.*

12.1 *Number of Completions.* A wellbore may contain any number of producible completions when justified and approved.

12.2 *Numbering Well Completions.* Well completions shall be numbered using an alphanumeric nomenclature. Once designated as a reservoir completion, the well completion number shall not change. Appendix A contains a detailed explanation of procedures for naming well completion.

12.3 *Selective Completions.* Completions equipment may be installed to permit selective reservoir isolation or exposure in a wellbore through wireline or other operations. All selective completions shall be designated in accordance with subparagraph 12.2 when the application for approval of such completions is filed.

12.4 *Commingling.* Commingling of production from two or more separate reservoirs within a common wellbore may be permitted if it is determined that, collectively, the ultimate recovery will not be decreased and that commingling is the most feasible method, considering the existing mechanical and economic factors. An application to commingle hydrocarbons from multiple reservoirs within a common wellbore shall be submitted for approval and shall include all pertinent well information, geologic and reservoir engineering data, and a schematic diagram of well equipment. The application shall provide the estimated recoverable reserves as well as any available alternate drainage points which might be used to produce the separate reservoirs. For all competitive reservoirs, notice of the application shall be sent by the applicant to all other operators of interest in the reservoirs prior to submitting the application to the RS. The application shall specify the well completion number to be used for subsequent reporting purposes.

13. *Gas-Cap Well Completions.* All existing and future wells completd in the gas cap of a reservoir which has been classified and approved as an oil reservoir with an associated gas cap shall be shut in until such time as the oil is depleted or the reservoir is reclassified as a gas reservoir, provided, however, that production from such wells may be approved when (1) it can be shown that such gas-cap production would not lead to waste of oil and gas, or (2) when necessary to protect correlative rights unless it can be shown that this production will lead to waste of oil and gas.

14. *Location of Wells.*

14.1 *General.* The location and spacing of all exploratory and development wells shall be in accordance with approved programs and plans required in 30 CFR 250.17 and 250.34. Such location and spacing shall be determined independently for each lease or reservoir in a manner which will locate wells in the optimum structural position for the most effective production of reservoir fluids and to avoid the drilling of unnecessary wells.

14.2 *Distance from Property Line.* An operator may drill exploratory or development wells at any location on a lease in accordance with approved plans, provided that no well directionally or vertically drilled and completed in which the completed interval is less than 500 feet from a property line shall be produced unless approved by the RS. An operator requesting approval to produce a directionally drilled well in which the completed interval is located closer than 500 feet (200 feet in Pacific OCS Region) from a property line, or approval to produce a vertically drilled well with a surface location closer than 500 feet (200 feet in Pacific OCS Region) from a property line, shall furnish the RS with letters expressing acceptance or objection from operators of offset properties.

15. *Shut-In Wells.* The status of drilling wells and well completions, except as stated below, shall be reported in the "Remarks" column on form 9–152, "Monthly Report of Operations," using the appropriate code shown in Appendix B of this Order. Wells (boreholes) permanently plugged and abandoned, including those which have met all permanent abandonment requirements of OCS Order No. 3, except paragraph 2.9., relating to clearance of the location, need not be reported after the month the actual abandonment operations occurred. Well completions permanently abandoned need not be reported after the month the actual abandonment occurred. Alternate completions shall not be reported until the primary completion has been abandoned and the alternate completion commences production.

16. *Enhanced Oil and Gas Recovery Operations.* Operators shall initiate enhanced oil and gas recovery operations in a timely manner by submission of a plan for reservoirs where such operations would result in an increased ultimate recovery of oil or gas under sound engineering and economic principles.

17. *Competitive Reservoir Operations.* Development and production operations in a competitive reservoir may be required to be conducted under either pooling and drilling agreements or unitization agreements when the Regional Manager determines, pursuant to 30 CFR 250.50, 250.51, and 250.52, and delegated authority, that such agreements are practicable, necessary, and in the interest of conservation.

17.1 *Competitive Reservoir Determination.* The RS shall notify the operators when the RS has made a preliminary determination that a reservoir is competitive as defined in this Order. An operator may request at any time that the RS make a preliminary determination as to whether a reservoir is competitive. The operators, within 30 days of such preliminary notification or such extension of time as approved by the RS, shall advise of their concurrence with such determination or submit objections with supporting evidence. The RS will make a final determination and notify the operators.

17.2 *Development and Production Plans.* When drilling and/or producing operations are conducted in a competitive reservoir, the operators shall submit for approval a plan governing the applicable operations. The plan shall be submitted within 90 days after the determination by the RS that a reservoir is competitive or within such extended period of time as approved by the RS. The plan shall provide for the development and/or production of the reservoir and may provide for the submittal of supplemental plans for approval by the RS.

17.2.1 *Development Plan.* When a competitive reservoir is still being developed or future development is contemplated, a development plan may be required in addition to a production plan. If agreement to a joint development plan cannot be reached by the operators, each shall submit a separate plan, and any differences may be resolved in accordance with paragraph 18 of this Order.

17.2.2 *Production Plan.* A joint production plan is required for each competitive reservoir. This plan shall include (a) the proposed MER for any sensitive reservoir, (b) the proposed MPR for each completion in the reservoir, (c) the percentage allocation of reservoir MER (if applicable) for each lease involved, and (d) any plans for secondary recovery or pressure maintenance operations. If agreement to a joint production plan cannot be reached by the operators, each shall submit a separate plan, and any differences may be resolved in accordance with paragraph 18 of this Order.

17.3 *Unitization.* The Regional Manager (RM) shall determine when conservation will be best served by unitization of a competitive reservoir, or any reservoir reasonably delineated and determined to be productive, in lieu of a development and/or production plan or when the operators and lessees involved have been unable to voluntarily effect unitization. In such cases, the RM may require that development and/or production operations be conducted under an approved unitization plan, provided, however, that unitization shall not be required until the operators and lessees are provided reasonable notice and an opportunity for a hearing in accordance with 30 CFR 250.51–2. Within 6 months after notification by the RM that such a unit plan is required or within such extended period of time as approved by the RM, the lessees and operators shall submit a proposed plan of unitization for approval pursuant to 30 CFR 250.51.

18. *Conferences, Decisions, and Appeals.* Conferences with interested parties may be held to discuss matters relating to applications and statements of position filed by the parties relating to operations conducted pursuant to this Order. The RS may call a conference with one or more, or all, interested parties on the RS's own initiative or at the request of any interested party. Copies of the RS's decisions shall be provided to the parties involved. Any interested party may appeal decisions of the RS or the RM pursuant to 30 CFR 250.81. The filing of an appeal shall not suspend the requirement for compliance with an Order or decision of the RS or the RM.

19. *Departures.* All departures from the requirements specified in this Order shall be subject to approval, pursuant to 30 CFR 250.11(b).

Louis E. McBee,

Acting Regional Supervisor, Offshore Reserves and Development, Gulf of Mexico OCS Region.

Harry T. Cypher,

Regional Supervisor, Offshore Field Operations, Pacific OCS Region.

Approved:

Richard B. Krahl,

Deputy Associate Director for Offshore Operations.

Appendix A

Subparagraph 12.2, *Numbering Well Completions.* Well completions shall be designated using a two-character completion symbol (CP) as a supplement to the twelve-character American Petroleum Institute (API) well completion numbering system established by API Bulletin D12A, "The API Well Number and Standard State and County Codes Including Offshore Waters," January 1979. This fourteen-character number shall be associated with each well completion (perforated zone) referenced or listed in required correspondence, reports, and forms submitted by lease operators.

The first of the two characters in the CP is alphabetical and is to be revised as necessary to reflect the number of tubing strings, i.e., zone completions existing in the wellbore at any given point in time (disregarding selective completions). The characters to be used are defined as follows:

S Single Completion

D Dual Completion

T Triple Completion

Q Quadruple Completion

V Quintuple Completion

Example No. 1: If a wellbore is initially dually completed, the first character of the CP for each of the two well completions would be designated as the letter "D."

Example No. 2: If a wellbore is reworked and recompleted from a dual completion to a triple completion, the first character of each of the three well CP's would be designated (or redesignated) as the letter "T."

The second of the two characters in the CP is numerical, and once assigned, this number is to be uniquely and permanently related to a specific reservoir (perforated zone), beginning with the number "1" for the first reservoir perforated and produced followed by consecutively higher numbers assigned to successively perforated and produced reservoirs (well completions).

Example No. 3: If a wellbore is initially dually completed, the second character of each CP would be designated by the numbers "1" and "2," respectively. In the event a third reservoir in the same wellbore is then completed (perforated), the second character of the CP for this new well completion would be designated by the number "3." In the event yet a fourth reservoir is completed (perforated) in this wellbore, the second character of the CP for this well completion would be designated by the number "4." To reiterate, once a numerical designation is assigned to a reservoir completion, this unique number is permanently associated with that reservoir completion even if the reservoir completion is subsequently abandoned.

Example No. 4: In the event a wellbore is initially dually completed, the two-character CP's for each of these two reservoir completions would be designated as D1 and D2, respectively. In the event the reservoir completion designated D2 then becomes depleted and is abandoned, following which a third reservoir is completed (perforated), the existing active well completions at that time would be designated by the CP's D1 and D3, respectively. Then, in the event a fourth reservoir is completed in the wellbore while well completions D1 and D3 still exist, i.e., have not been abandoned, the wellbore would become triply completed with perforated well completions designated by CP's T1, T3, and T4, respectively.

Appendix B

Well Codes

COMPABND—Completed Well Abandoned
DRLGACTI—Actively Drilling
DRLGINAC—Inactive Drilling
G—Nonproducing Gas Completion
O—Nonproducing Oil Completion
PLUGABND—Plugged and Abandoned
PRODGAS—Producing Gas Completion
PRODOIL—Producing Oil Completion
SERVGINJ—Gas Injection
SERVGSTO—Gas Storage
SERVINAC—Inactive Service
SERVOTHR—Other Service
SERVWDIS—Water Disposal
SERVWINJ—Water Injection

Reason Codes

Pipelines, Flowlines, and Headers

PHF 1—Pipeline or Flowline Leaks
PFH 2—Pipeline, Flowline, or Header Tie-Ins
PHF 3—No Pipeline—No Market
PHF 4—Pipeline or Flowline Maintenance

NOFUT—No future Action
RECOMP—Recompletion

Acronym Examples

Example No. 1: DRLGACTI
A borehold which is presently being drilled.
Example No. 2: SERVWINJ
A service completion currently being used as a water injection well for a secondary recovery project.
Example No. 3: PRODGAS
A gas-well completion which produced 30 days.
Example No. 4: G, RESIACT, 8001, CORRACT, 8302
A well completed in the gas cap of a reservoir which is not currently producing because it is necessary to conserve reservoir energy. Never produced, initially completed January 1980. Production is anticipated in February 1983.
Example No. 5: G, WEB2ACT1, 8012, CORRACT, 8304
A gas completion which is sanded up and a wireline operation is anticipated in April 1983. Last date of production was December 7, 1980.
Example No. 6: O, WEB1ACT2, 8007, CORRACT, 8303
An oil completion which has a hole in the tubing string and a major workover is anticipated in March 1983. Date of last production was July 20, 1980.
Example No. 7: G, SUR1ACT4, 8002, CORRACT, 8303
A gas completion which is shut in due to mechanical problems with a compressor. Compressor down February 15, 1980, and is expected to be repaired in March 1983.
Example No. 8: O, PFH1ACT4, 8006, CORRACT, 8307
An oil completion which is shut in because of pipeline or flowline leaks requiring repair. Date of last production was June 9, 1980. Pipeline repairs are expected to be complete in July 1983.
Example No. 9: O, PLA1ACT4, 8008, CORRACT, 8310
An oil-well completion shut in for safety reasons because of major workover operations being conducted on the platform. Date of last production was August 19, 1980, and production is expected to be restored in October 1983.
Example No. 10: G, WEA2ACT4, 8001, CORRACT, 8303
Gas completions shut in because of freezing problems associated with surface production facilities. Date of last production was January 29, 1980, and production is expected to be restored in March 1983.
Example No. 11: O, REG1ACT4, 8004, CORRACT, 8309
Because of inadequate compression facilities, an oil completion producing a sufficient quantity of associated gas is shut in to eliminate flaring of that gas. Date of last production was April 15, 1980, and production is expected to be restored in September 1983.
Example No. 12: PLUGBND
A well (borehole) which was plugged and abandoned during the reporting month.
Example No. 13: COMPABND
A well completion which was permanently abandoned by squeezing cement into the perforations in February 16, 1980.
Example No. 14: PRODOIL
An oil-well completion which produced 1 day.
Example No. 15: O, RES2ACT5, 8002, RECOMP, 8310
An oil-well completion ceased producing on February 12, 1980, and the reservoir it produced from is considered depleted. A recompletion is anticipated for October 1983.

Definitions of Basic Data Required

Requested MER: MER determined from a plot of ultimate recovery versus rate
Present MER: Previously approved MER
1. ϕ cut-offs—Upper and lower porosity cut-offs (fractions)
K cut-offs—Upper and lower cut-offs to air permeability (md)
2. G/O interface—initial gas-oil interface (feet subsea)
3. W/O interface—initial water-oil interface (feet subsea)
4. Area @ G/O—Area of gas-oil contact (acres)
5. Area used to Det'n Rock Vol.—Area @ W/O contact or area of reserve isopach (acres)
6. Oil zone rock vol.—Rock volumes used to determine N. (acre-feet)
7. Gas zone rock vol.—Rock volume of gas cap (acre-feet)
8. H_o, h_o—Average gross, average net pay thickness (feet, oil zone)
9. H_g, h_g—Average gross, average net pay thickness (feet gas zone)
10. ϕ—Effective porosity (fraction)
11. Sw—Connate water saturation (fraction)
12. Sg—Initial gas saturation (fraction)
13. So—Initial liquid hydrocarbon saturation (fraction)
14. Boi—Initial flash formation volume factor (fraction)
Bgi—Initial formation volume factor (fraction—Res. Vol/ST Vol.)
15. N—7758 Ah0 (So)(1/Boi) Stock barrels of oil in place
G—43,560 Ah0(Sg)(1/Bgi) Std. Cu. ft. of gas in place
16. Ri—Estimated recovery for drive mechanism (fraction)
17. RiN—Ultimate recoverable oil for drive mechanism (stocktank barrels)
RiG—Ultimate recoverable gas for drive mechanism (MCF)
18. Np/N—Depletion of initial oil-in-place (fraction)
19. Average well depth

$$\frac{\Sigma(T+B)}{2N}$$

Σ = the sum of
T = vertical depth from KB elevation to top of productive oil pay
B = vertical depth from KB elevation to base of productive oil pay
N = number of completions

20. Kh—Average horizontal air permeability (md)
21. Kv—Average vertical air permeability (md)
22. °API—Average API gravity of stock tank oil (degrees @ 60° F)
23. SG—Specific gravity of gas (air = 1.00)
24. Rsi—Initial solution gas-oil ratio (SCF-STB)
25. μ—Initial reservoir oil viscosity (cp)
26. μ—Reservoir oil viscosity at current reservoir pressure (cp)
27. Tavg—Average reservoir temperature (°F)
28. Pi—Initial static reservoir pressue at datum (PSIG)
29. Pws—Current static reservoir pressure at datum (PSIG)
30. Pb—Bubble point pressure (PSIG)
31. Datum Depth—Reference depth for static pressure (feet subsea)
32. GOR—Producing gas-oil ratio for specified month, scf/stb
33. WOR—Producing water-oil ratio for specified month, bbl/stb
34. Injection Completions—Number of completions injecting fluid related to drive mechanism
35. Abandoned Completions—Number of producing completions abandoned
36. No. of active Completions—Number of well completions for requested MER
37. Np(1)—Cumulative oil production, STB at last submission
38. Np(2)—Cumulative production, STB this submission
39. GP(1)Cumulative gas production, MSCF at last submission
40. GP(2)—Cumulative gas production, MSCF this submission
41. Wp(1)—Cumulative water production, BBL at last submission
42. WP(2)—Cumulative water production, BBL this submission

This form is to be filed with the Regional Supervisor as required by paragraphs 2 and 3 of OCS Order No. 11 and shall contain all information required unless such information is not available at the time of submittal because of the stage of development of the reservoir.

The Paperwork Reduction Act of 1980 (44 U.S.C. 3501, et seq.) requires us to inform you that: This information is being collected to obtain definite and firsthand knowledge of reservoir characteristics and parameters. This information will be used to classify the reservoir as sensitive or nonsensitive and to evaluate the lessee's request for approval of a Maximum Efficient Rate of production. Response to this request is mandatory.

Bureau of Reclamation

[INT-DES 83-27]

Regulatory Storage Division, Central Arizona Project, Arizona; Availability of Draft Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, the Department of the Interior has prepared a draft environmental impact statement for the Regulatory Storage Division, a feature of the Central Arizona Project (CAP).

This statement analyzes the environmental consequences of the construction and operation of the Regulatory Storage Division of the CAP; and concurrent and coincident aspects of the Bureau of Reclamation's Safety of Dams program for the Salt and Verde Rivers. Construction of a regulatory unit for CAP water will increase the operating efficiency of the CAP through the conservation of flows of the Salt, Verde, and Agua Fria Rivers, and through regulation of Colorado River water deliveries from the Granite Reef Aqueduct. Modification of existing dams or the construction of new dams will partially solve the dam safety problems of existing Bureau of Reclamation dams on the Salt and Verde Rivers and provide facilities and the means to meet flood control needs on the Salt and Gila Rivers through the Phoenix metropolitan area.

Written comments on the draft environmental impact statement may be submitted to the Regional Director (address below) on or before July 26, 1983.

Copies of the statement are available for inspection at the following locations:

Office of Environmental Affairs, Room 7622, Bureau of Reclamation, Department of the Interior, Washington, DC 20240, (202) 343–4991
Library Branch, Division of Management Support, Engineering and Research Center, Room 450, Building 67, Denver Federal Center, Denver, CO 80225, (303) 234–3019
Office of the Regional Director, Bureau of Reclamation, Nevada Highway and Park Street, Boulder City, NV 89005, (702) 293–8560
Arizona Projects Office, Bureau of Reclamation, Suite 2200, Valley Center, 201 North Central Avenue, Phoenix, AZ 85073, (602) 261–3577

Libraries

Phoenix City Library, 12 East McDowell Road, Phoenix, AZ 85004
Tucson City Library, 200 South 6th Avenue, Tucson, AZ 85701.

Single copies of the draft statement may be obtained on request to the Commissioner of Reclamation or the Regional Director at the addresses listed above, at no charge. Please refer to the statement number above.

Dated: April 29, 1983.

Bruce Blanchard,
Director, Environmental Project Review.

[Investigation No. 337-TA-132]

Certain Hand-Operated, Gas-Operated Welding, Cutting and Heating Equipment and Component Parts Thereof; Initial Determination Terminating Respondent on the Basis of Settlement Agreement

AGENCY: U.S. International Trade Commission.

ACTION: Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above-captioned investigation terminaing the following respondent on the basis of a settlement agreement: I. Ling Industry Co., Ltd.

SUPPLEMENTARY INFORMATION: This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules, the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, unless the Commission orders review of the initial determination. The initial determination in this matter was served upon the parties on April 29, 1983.

Copies of the initial determination, the settlement agreement, and all other nonconfidential documents filed in connection with this invesigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

Written Comments: Interested persons may file written comments with the Commission concerning termination of the aforementioned respondent. The original and 14 copies of all such comments must be filed with the Secretary to the Commission, 701 E Street, NW., Washington, D.C. 20436, no later than 10 days after publication of this notice in the **Federal Register**. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

FOR FURTHER INFORMATION CONTACT: Ruby J. Dionne, Office of the Secretary, U.S. International Trade Commission, telephone 202–523–0176.

By order of the Commission.

Issued: April 29, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

[Investigation No. 337-TA-136]

Certain Marine Hardware and Accessories; Commission Decision Not To Review Initial Determination

AGENCY: U.S. International Trade Commission.

ACTION: Notice is hereby given that the Commission has determined not to review the presiding officer's initial determination (Order No. 6) granting a joint motion by complainant, respondent, and the Commission investigative attorney to terminate the above-captioned investigation based on a settlement agreement.

SUPPLEMENTARY INFORMATION:

Authority: The authority for the Commission's disposition of this matter is contained in sections 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and in §§ 210.53(c) and 210.53(h) of the Commission's Rules of Practice and Procedure (19 CFR 210.53(c) and (h)).

On April 15, 1983, the presiding officer issued an initial determination granting the joint motion of complainant Attwood Corp., respondent L.S. Brown Co., and the Commission investigative attorney to terminate the investigation on the basis of a written settlement agreement. Under § 210.54(b) of the Commission's rules, the deadline for filing petitions for review expired on April 15, 1983. No petitions were filed.

Copies of the nonconfidential version of the presiding officer's initial determination and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT: Michael P. Mabile, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–0486.

By order of the Commission.

Issued April 26, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

[Investigations Nos. 731-TA-131 and 132 (Preliminary)]

Certain Welded Carbon Steel Pipes and Tubes From the Republic of Korea and Taiwan

AGENCY: International Trade Commission.

ACTION: Institution of preliminary antidumping investigations and scheduling of a conference to be held in connection with the investigations.

SUMMARY: The United States International Trade Commission hereby gives notice of the institution of preliminary antidumping investigations under section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673(a)) to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from the Republic of Korea and Taiwan of certain welded carbon steel pipes and tubes,[1] which are alleged to be sold in the United States at less than fair value.

EFFECTIVE DATE: April 21, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Carpenter, Office of Investigations, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C. 20436, telephone 202–523–0399.

SUPPLEMENTARY INFORMATION:

Background

These investigations are being instituted in response to a petition filed on April 21, 1983, on behalf of the Committee on Pipe and Tube Imports, an association of domestic manufacturers of welded carbon steel pipes and tubes. The Commission must make its determinations in the investigations within 45 days after the date of the filing of the petition, or by June 6, 1983 (19 CFR 207.17).

Participation

Persons wishing to participate in these investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided for in § 201.11 of the Commission's Rules of Practice and Procedure (19 CFR 201.11), not later than seven (7) days after the publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairman, who shall determine whether to accept the late entry for good cause shown by the person desiring to file the notice.

Service of documents

The Secretary will compile a service list from the entries of appearance filed in the investigations. Any party submitting a document in connection with the investigations shall, in addition to complying with § 201.8 of the Commission's rules (19 CFR 201.8), serve a copy of the nonconfidential version of each such document on all other parties to the investigations. Such service shall conform with the requirements set forth in § 201.16(b) of the rules (19 CFR 21.16(b)), as amended by 47 FR 33682, Aug. 4, 1982).

In addition to the foregoing, each document filed with the Commission in the course of these investigations must include a certificate of service setting forth the manner and date of such service. This certificate will be deemed proof of service of the document. Documents not accompanied by a certification of service will not be accepted by the Secretary.

Written submissions.

Any person may submit to the Commission on or before May 18, 1983, a written statement of information pertinent to the subject matter of these investigations (19 CFR 207.15). A signed original and fourteen (14) copies of such statements must be submitted (19 CFR 201.8).

Any business information which a submitter desires the Commission to treat as confidential shall be submitted separately, and each sheet must be clearly marked at the top "Confidential Business Data." Confidential submissions must conform with the requirements of § 201.8 of the Commission's rules (19 CFR 201.6). All written submissions, except for confidential business data, will be available for public inspection.

Conference

The Director of Operations of the Commission has scheduled a conference in connection with these investigations for 9:30 a.m., on May 16, 1983, at the U.S. International Trade Commission Building, 701 E Street, NW., Washington, D.C. Parties wishing to participate in the conference should contact the staff investigator, Mr. Robert Carpenter (202–523–0399), not later than May 12, 1983, to arrange for their appearance. Parties in support of the imposition of antidumping duties in the investigations and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference.

Public inspection

A copy of the petition and all written submissions, except for confidential business data, will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C.

For further information concerning the conduct of these investigations and rules of general application, consult the Commission's Rules of Practice and Procedure, Part 207, Subparts A and B (19 CFR Part 207, as amended by 47 FR 33682, Aug. 4, 1982), and Part 201, Subparts A through E (19 CFR Part 201, as amended by 47 FR 33682, Aug. 4, 1982). Further information concerning the conduct of the conference will be provided by Mr. Carpenter.

This notice is published pursuant to § 207.12 of the Commission's rules (19 CFR 207.12).

Issued: April 25, 1983.

Kenneth R. Mason,

Secretary.

[1] For purposes of these investigations, the term "certain welded carbon steel pipes and tubes" covers welded carbon steel pipes and tubes, of circular cross section, with walls not thinner than 0.065 inch, 0.375 inch or more but not over 4.5 inches in outside diameter, provided for in items 610.3231, 610.3232, 610.3241, and 610.3244 of the Tariff Schedules of the United States Annotated (1983) (TSUSA) or of rectangular (including square) cross section, provided for in TSUSA items 610.3955 and 610.4975.

INTERSTATE COMMERCE COMMISSION

[Volume No. 29]

Motor Carriers; Applications, Alternate Route Deviations, and Intrastate Applications

Motor Carrier Intrastate Application(s)

The following application(s) for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to Section 10931 (formerly Section 206(a)(6)) of the Interstate Commerce Act. These applications are governed by CFR Part 1161 of the Commission's Rules of Practice which provide, among other things, that protests and request for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes therein, and any other related matters shall be directed to the State Commission with which the application is filed and shall *not* be addressed to or filed with the Interstate Commerce Commission.

By the Commission

Agatha L. Mergenovich.

Secretary

New York Docket No. T–9453, filed April 5, 1983. Applicant: EAST SIDE MOVERS, INC. 180 Varick Ave., Brooklyn, NY 11237. Representative: Nicholas Guagliardo, Jr., 189 Wykagl Terrance, New Rochelle, NY. Motor Carriers; Finance Applications; Decision-Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the

Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1161.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods).

The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board Number 1, Members Parker, Chandler, and Fortier.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

For the following, please direct status calls to Team 2 at 202–275–7030.

Volume No. OP2–198

Decided: April 27, 1983.

MC 1002 (Sub-25), filed March 7, 1983. Applicant: ASBURY PARK-NEW YORK TRANSIT CORPORATION, 401 Lake Ave., Asbury Park, NJ 07712. Representative: Edward F. Bowes, P.O. [Ex Parte No. 387]

Rail Carriers; Exemptions for Contract Tariffs

AGENCY: Interstate Commerce Commission.

ACTION: Notices of provisional exemptions.

SUMMARY: Provisional exemptions are granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the below-listed contract tariffs may become effective on one day's notice.[1] These exemptions may be revoked if protests are filed.

DATES: Protests are due within 15 days of publication in the **Federal Register**.

ADDRESS: An orignial and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway (202) 275–7278.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in these instances to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption requests meet the requirements of 49 U.S.C. 10505(a) and are granted subject to the following conditions:

These grants neither shall be construed to mean that the Commission has approved the contracts for purposes of 49 U.S.C. 10713(e) not that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine their lawfulness.

Sub-No.	Name of railroad, contract No., and specifics	Review Board [1]	Decided date
906	Burlington Northern Railroad Co., Exemption for Contract Tariff ICC–BN–C–0263 (Wheat)	3	04–27–83
909	Burlington Northern Railroad Co., Exemption for Contract Tariff ICC–BN–C–0241 (Coal)	3	04–27–83
912	Norfolk and Western Railway C., Exemption for Contract Tariff ICC–NW–C–0058, Supplement 1 (Motor Vehicles)	2	04–27–83
913	Consolidated Rail Corporation Exemption for Contract Tariff ICC–CR–C–0405 (Wines, Brandy, or Brandy Spirits)	3	04–27–83
918	The Pittsburgh and Lake Erie Railroad Company Exemption for Contract Tariff ICC–PLE–C–0031 (Pipe, Iron or Steel)	3	04–27–83

[1] Review Board No. 2, Members Carleton, Williams, and Ewing. (Board Member Carleton not participating.)

[1] Note tariff supplements advancing contract's effective date shall refer to these decisions for authority.

Review Board No. 3, Members Krock, Joyce, and Dowell.

This action will not significantly affect the quality of the human environment or the conservation of energy resources.

(49 U.S.C. 10505)

By the Commission.

Agatha L. Mergenovich,

Secretary

[FR Doc. 83-11859 Filed 5-3-83; 8:45 am]

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an interstate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property-that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier-that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker-that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from the date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be

construed as conferring only a single operating right.

Agatha L. Mergenovich,
Secretary.

Note.—All applicants are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Please direct status inquiries to Team 4 at (202) 275–7669.

Volume No. OP4–255

Decided: April 27, 1983.

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing.

MC–30787 (Sub-8), filed March 10, 1983, noticed in the **Federal Register** issue of March 28, 1983, and republished this issue. Applicant: NIAGARA SCENIC BUS LINES, INC., 5700 S. Maelou Drive, Hamburg, NY 14075. Representative: Jeremy Kahn, Suite 733, Investment Bldg., 1511 K St. NW., Washington, DC 20005 (202) 783–3525. Over regular routes, transporting *passengers*, (1) between Niagara Falls, NY and the Buffalo International Airport at Cheektowaga, NY: from Niagara Falls, NY over the Robert Moses Parkway to junction Interstate Hwy 190, then over Interstate Hwy 190 to junction U.S. Hwy 62, then over U.S. Hwy 62 to junction Interstate Hwy 290, then over Interstate Hwy 290 to junction Interstate Hwy 90, then over Interstate Hwy 90 to junction Kensington Expressway (NY Hwy 33), then over Kensington Expressway to junction Genesee St., then over Genesee St., to Buffalo International Airport at Cheektowaga, NY, and return over the same route, serving all intermediate points, and (2) between Niagara Falls, NY and the Buffalo International Airport at Cheektowaga, NY: from Niagara Falls over Robert Moses Parkway to Junction Interstate Hwy 190, then over Interstate Hwy 190 to junction Interstate 290, then over Interstate Hwy 290 to junction Interstate Hwy 90, then over Interstate Hwy 90 to junction Kensington Expressway (NY Hwy 33), then over Kensington Expressway to junction Genesee St., then over Genesee St. to Buffalo International Airport at Cheektowaga, NY, and return over the same rotue, serving all intermediate points.

Note:—(a) The purpose of this republication is to indicate the type service to be performed by applicant. (b) Applicant seeks in (1) above to provide regular-route service in interstate or foreign commerce, and in intrastate commerce under 49 U.S.C. 10922 (c)(2)(B) over the same route, and in (2) above regualr-route service in interstate of foreign commerce.

MC 167187, filed March 31, 1983. Applicant: NICKEL CITY TRANSPORT (Sudbury) LTD., 2240 Long Lake Rd., Sudbury, Ontario, Canada P3E 5H4. Representative: Salvatore N. Artuso, 2 Robert Speck Parkway, Suite 750, Mississauga, Ontario, Canada L4Z 1H8 (416) 272–1800. In foreign commerce only, transporting *general commodities* (except classes A and B explosives, household goods, and commodites in bulk), between Detroit, MI, and points in St. Clair and Chippewa Counties, MI, on, the one hand, and, on the other, points in MI.

For the following, please direct status calls to Team 1 at 202–275–7992.

Volume No. OP1–157

Decided: April 27, 1983.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC 47171 (Sub—233), filed April 18, 1983. Applicant: COOPER MOTOR LINES, INC., P.O. Box 2820, Greenville, SC 29602. Representative: Harris G. Andrews (same address as applicant) (803)–879–2101. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S. (except AK and HI), under continuing contract(s) with Monsanta Company, of St. Louis, MO.

MC 117201(Sub—60), Filed April 11, 1983. Applicant: INTERSTATE DISTRIBUTION CO., 8311 Duranago S.W., Tacoma, WA 98499. Representative: George R. LaBissoniere, 15 S. Grady Way, Suite 239, Renton, WA 98055, (206)–228–3807. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S., under continuing contract(s) with Washington-Oregon Shippers Cooperative Association, Inc., of Seattle, WA.

MC 121821 (Sub-21), filed April 19, 1983. Applicant: TENNESSEE MOTOR LINES, INC., P.O. Box 100363, Nashville, TN 37210. Representative: K. Edward Wolcott, Atlanta Gas Light Towers, Suite 1200, 235 Peachtree St., NE., Atlanta, GA 30303, (404)–522–2322. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in McMinn County, TN, on the one hand, and, on the other, points in the U.S. (except AK and HI).

Note.—Applicant intends to tack the authority in this proceeding with its existing regular route authority.

MC 128761 (Sub-11), filed April 21, 1983. Applicant: RICHARD M. GODFREY, 8530 Kings Cove Dr., Salt Lake City, UT 84121. Representative: Richard M. Godfrey (same address as applicant), (801)–250–4472. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in AZ, CA, CO, ID, NV, UT and WY, on the one hand, and, on the other, points in the U.S. (except AK and HI).

MC 129631 (Sub-86), filed April 14, 1983. Applicant: PACK TRANSPORT, INC., 3975 S. 300 W., Salt Lake City, UT 84107–1487. Representative: Timothy R. Stivers, P.O.B. 1576, Boise, ID 83701, (208)–343–3071. Transporting *general commodities* (except classes A and B explosives and household goods), between points in the U.S., under continuing contract(s) with Pack Transport, Inc., of Salt Lake City, UT.

MC 151411 (Sub-2), filed April 11, 1983. Applicant: DON HOLLAND & ASSOCIATED, INC., P.O. Box 1228, Lexington, NC 27292. Representative: Virgil H. Smith, 74 Highway N., Box 245, Tyrone, GA 30290, (404)–969–1980. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in NC, SC and VA, on the one hand, and, on the other, points in the U.S. (except AK and HI).

MC 152950 (Sub-7), filed April 20, 1983. Applicant: CENTURY TRANSPORTATION CORPORATION, P.O. Box 207, Columbus, MS 39703–0207. Representative: Lloyd R. Pate (same address as applicant), (601)–329–2121. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S. (except AK and HI).

MC 155510 (Sub-1), filed April 13, 1983. Applicant: ORANGE DISTRIBUTION, INC., Main St., P.O. Box 729. Representative: David L. Bolyard, 112 South Pitt St., P.O. Box 453 Alexandria, VA 22313 (703)-548–3301. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S.

MC 156361 (Sub-10), filed April 14, 1983. Applicant: BIGBEE TRANSPORTATION COMPANY, P.O. Box 3610, American Lane, Greenwich, CT 06836–3610. Representative: Richard W. LaPointe (same address as applicant) (203)–552–2366. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S., under continuing contract(s) with (1) National Steel Service Center, Inc., of Parsippany, NJ, (2) International Automated Machines, of Ferrsburg, OH, and (3) Hunt-Wesson Foods, Inc., of Fullerton, CA.

MC 163041, filed April 18, 1983. Applicant: MONROE LEASING & TRANSPORTATION COMPANY, R.R. 1, Box 28, Columbia, IL 62236. Representative: Joseph A. Christ (same address as applicant) (618)–476–1337. Transportating *general commodities* (except classes A and B explosives and household goods), between points in IL and MO, on the one hand, and, on the other, points in the U.S. (except AK and HI).

MC 163080 (Sub-1), filed April 20, 1983. Applicant: SUN TRUCKING, INC., P.O. Box G, Sellersburg, IN 47172. Representative: Thomas L. Salvate, 1814 Gillette Ave., Louisville, KY 40216, (502)–447–2847. Transporting *rubber and plastic products*, between points in the U.S. (except AK and HI).

MC 166310 (Sub-1), filed April 11, 1983. Applicant: PIONEER EXPRESS, INC., 3359 Cazassa St., P.O. Box 16489, Memphis, TN 38186–0489. Representative: William J. Monheim P.O. Box 1756, Whittier, CA 90609, (213)–945–2745. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S., under continuing contract(s) with United Forwarding, Inc., of Omaha, NE.

MC 167261, filed April 12, 1983. Applicant: GLENDALE CORPORATION, 7606 Westover Industrial Airpark, Chicopee, MA 01020. Representative: Roger L. Desrosier (same address as applicant) (413)–593–6710. BILLING CODE 7035–01–M

Motor Carrier Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Agatha L. Mergenovich,

Secretary.

Notice No. F–258

The following applications were filed in Region 3. Send protests to: ICC, Regional Authority Center, Room 300, 1776 Peachtree Street, N.E., Atlanta, GA 30309.

DEPARTMENT OF JUSTICE

Office of the Attorney General

Pollution Control; Consent Judgments; Coastal States Petroleum Co.

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on March 25, 1983, a proposed consent decree in *United States of America* v. *Coastal States Petroleum Company,* Civil No. C-81-129, was lodged with the United States District Court for the Southern District of Texas.

The proposed decree will establish interim limits with which Coastal States must comply until issuance of a new NPDES permit, and will require the company to pay a penalty of $20,000.

The Department of Justice will receive for thirty (30) days from the date of publication of this notice written comments related to the proposed decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and refer to *United States of America* v. *Coastal States Petroleum Company,* D.J. Ref. No. 90-5-1-1-1624.

The proposed consent decree may be examined at the office of the United States Attorney, U.S. Courthouse, 521 Star Street, Corpus Christi, Texas, at the Region VI Office of the Environmental Protection Agency, 1201 Elm Street, Dallas, Texas, and at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1515, 10th and Pennsylvania Avenue, N.W., Washington, D.C. 20530. A copy of the proposed decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice.

Carol E. Dinkins,
Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Pollution Control; Consent Judgments; Connecticut Charcoal Co.

In accordance with Departmental policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that a proposed consent decree (amended) in *United States* v. *The Connecticut Charcoal Co.,* Civil Action No. H-78-680, has been lodged with the United States District Court for the District of Connecticut. The consent decree (amended) requires the Connecticut Charcoal Company to complete fabrication and installation of air pollution control equipment at its Union, Connecticut facility by June 1, 1983; to cease operations of its kilns should it fail to achieve compliance with air pollution regulations by that date, except insofar as is necessary to test air pollution control equipment; and pay a penalty of $16,000.

The consent decree (amended) may be examined at (1) the office of the United States Attorney, District of Connecticut, Room 310, Bullard Building, 270 Orange Street, New Haven, Connecticut 06510, (2) the office of the Environmental Protection Agency, Region I, Office of Regional Counsel, John F. Kennedy Federal Building, Boston, Massachusetts 02203, and (3) the Environmental Enforcement Section, Land and Natural Resources Division, of the Department of Justice, Room 1521, Ninth Street and Pennsylvania Avenue, N.W., Washington, D.C. 20530. A copy of the proposed consent decree (amended) may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, of the Department of Justice.

The Department of Justice will receive comments relating to the consent decree (amended) for a period of thirty (30) days from the date of this notice. Comments should be directed to the Assistant Attorney General for the Land and Natural Resources Division of the Department of Justice, Ninth Street and Pennsylvania Avenue, N.W., Washington, D.C. 20530 and should refer to *United States* v. *The Connecticut Charcoal Co., DOJ Reference #90-5-2-169.*

Carol E. Dinkins,
Assistant Attorney General, Land and Natural Resources Division.

Pollution Control; Consent Judgments; Paul Carville, Peter Retkevicz, and Hudson Plating Co.

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on April 19, 1983, a proposed consent decree in *United States of America* v. *Paul Carville d/b/a Hudson Plating Company et al.,* Civil Action No. 80-479-L, was lodged with the United States District Court for the District of New Hampshire. The proposed consent decree enjoins the defendants from discharging any pollutants from a former electroplating facility located at Clement industrial Park, Hudson, New Hampshire, into Beaver Brook except in compliance with all terms and conditions of an effective national pollutant discharge elimination system permit. The proposed consent decree also requires defendant Paul Carville to pay a civil penalty of $500.00.

The proposed consent decree may be examined at the office of the United States Attorney, District of New Hampshire, Federal Building, 55 Pleasant Street, Concord, New Hampshire 03301; at the Region I office of the United States Environmental Protection Agency, Office of Regional Counsel, 22nd Floor, John F. Kennedy Federal Building, Boston, Massachusetts 02203; and at the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice, Room 1515, 10th and Pennsylvania Avenue, N.W. Washington, D. C. 20530. A copy of the proposed consent decree may be otained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice.

The Department of Justice will receive written comments relating to the proposed consent decree for a period of thirty (30) days from the date of this notice. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, D. C. 20530, and should refer to *United States of America* v. *Paul Carville d/b/a Hudson Plating Company,* D. New Hampshire, Civil Action No. 80-479-L, DJ Ref. 90-5-1-1-1430.

Pollution Control; Consent Judgments; Gail F. Sohler

In accordance with Departmental policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on April 22, 1983, a proposed Consent Decree in *United States of America* v. *Gail F. Sohler,* Civil No. 83-4064, was lodged with the United States District Court for the District of South Dakota.

The defendent, Gail F. Sohler, owns and operates a cattle feedlot operation which discharged agricultural waste into an intermittent tributary of Dry Choteau Creek in Bon Homme County near Avon, South Dakota. The proposed Consent Decree requires Gail F. Sohler to achive compliance with its National Pollutant Discharge Elimination System Permit, to construct a containment dam including monitoring and recording all discharges in accordance with a specified schedule of compliance, and to pay stipulated penalties if she fails to meet the compliance schedule. In addition, the consent decree requires Gail H. Sohler to pay a civil penalty of $1,000.00.

The Department of Justice will receive written comments relating to the proposed consent decree for a period of thirty days from the date of this notice. Comments should be directed to the Assistant Attorney General for the Land and Natural Resources Division of the Department of Justice, Tenth and Pennsylvania Avenue, N.W., Washington, D.C. 20530 and should refer to *United States of America* v. *Gail F. Sohler* D.J. Ref. 905-1-1-1866.

The proposed consent decree may be examined at the Office of the United States Attorney, 400 South Phillips Avenue, Sioux Falls, South Dakota 57102; at the Region VIII office of the Environmental Protection Agency, 1860

NATIONAL SCIENCE FOUNDATION

Commission on Precollege Education in Mathematics, Science and Technology; Open Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: National Science Board Commission on Precollege Education in Mathematics, Science and Technology.

Date and Time: May 17, 1983; 9:00 a.m.-4:30 p.m. May 18, 1983; 9:00 a.m.-5:00 p.m.

Place: National Science Foundation, 1800 G St., N.W., Room 540, Washington, DC.

Type of Meeting: Open.

Contact Person: Dr. Richard S. Nicholson, Executive Director, Commission on Precollege Education in Mathematics, Science and Technology, Room 527, National Science Foundation, Washington, DC 20550.

Summary Minutes: Contact Dr. Richard S. Nicholson at the above address.

Purpose of Commission Meeting and Agenda: May 17: The Commission will discuss issues and recommendations in preparation for its final report May 18: The Commission will continue the discussions of the prior day with special emphasis on the Federal role in precollege education. A combined meeting with the National Science Board will take place from 3:00 to 5:00 p.m.

Reason for Late Notice: Difficulty in arranging acceptable meeting date.

Dated: April 29, 1983.

M. Rebecca Winkler,

Committee Management Coordinator.

BILLING CODE 0000-00-M

POSTAL RATE COMMISSION

[Docket No. R83-1; Order No. 496]

ECOM Rate and Classification Changes, 1983; Filing of Proposed ECOM Rate and Classification Changes and Order Designating Officer of the Commission and Fixing Dates for Responses to Motion for Waiver

April 28, 1983.

Notice is hereby given that on April 25, 1983, the United States Postal Service, pursuant to Sections 3622 and 3623 of the Postal Reorganization Act (39 U.S.C. 3622, 3623), filed a request with the Postal Rate Commission for a Recommended Decision on proposed changes in rates of postage and certain classification provisions for electronic computer originated mail (ECOM). This filing has been assigned Docket No. R83-1.

The Postal Service's filing indicates that at the current ECOM rate of 26 cents for the first page and 5 cents for the second page, ECOM costs exceeded revenues by $16.7 million, or $5.21 per message in FY 1982. It states that at those rates costs will continue to exceed revenues through FY 1985. The filing states that in FY 1987, which is the test year that the Postal Service proposes to use, current ECOM rates would generate a surplus of $24.5 million, or $.07 per message. At current rates, the cumulative deficit from 1982 through the proposed test year would be $27 million, according to the filing.

The Postal Service's filing proposes to increase ECOM rates for the first page to 31 cents, and to increase the rate for the second page to 9 cents. It also proposes a classification change that would eliminate the minimum volume of 200 messages required per transmission, and another classification change that would make reply envelopes available at a rate of 4 cents per envelope. Under the rate and classification changes proposed, the Postal Service estimates that ECOM volume, which was 3.5 million in FY 1982, will rise to 380 million in the FY 1987. The filing estimates that at proposed rates ECOM will break even during FY 1985, and generate a surplus of $56.4 million, or 15 cents per message, in the FY 1987 test year. The filing estimates that proposed rates will generate a cumulative surplus of $32 million from 1982 through the FY 1987 test year.

I. Intervention

Hearings will be held on the proposal submitted by the Postal Service in Docket R83-1. The Commission will sit en banc. Persons desiring to participate as a party in the proceeding should file a notice of intervention with the Secretary, Postal Rate Commission, Washington, D.C. 20268 on or before May 31, 1983, in accordance with Rule 20 of the Commission's Rules of Practice (39 CFR 3001.20). Notices of intervention shall affirmatively state whether or not petitioners request a hearing or, in lieu thereof, a conference; whether the petitioner intends to participate actively in a hearing; and set forth the nature of the petitioner's interest in the issues to be decided, to the extent that that position is known. Persons who seek limited participation but do not wish to become parties may, on or before May 31, 1983, file a written notice of intervention as a "limited participator," pursuant to Rule 20a of our rules of Practice (39 CFR 3001.20a). In addition, persons who wish to express their views informally, and do not wish to become a party or a limited participant, may file comments pursuant to Rule 20b of our Rules (39 CFR 3001.20b).

We direct specific attention to the amendments to Rule 20 adopted by the Commission on April 4, 1983 [48 FR 15626-27 (Tuesday, April 12, 1983)]. Those amendments enable an interested person to file a notice of intervention indicating whether he wishes the status of a full party or a limited participator. Under the amended rule, those filing such a notice will immediately acquire status as full or limited participants, allowing them to commence discovery from the date of their notice. Parties retain the right to oppose such notices, and the Commission retains the authority to determine that participation by a party filing notice is not consistent with the Act.

II. Appointment of the Officer of the Commission

The Officer of the Commission (OOC), who is charged with representing the interests of the public in this proceeding [see 39 U.S.C. 3624(a)], is Stephen A. Gold. During this proceeding the OOC will direct the activities of Commission personnel assigned to assist him, and neither he nor any such personnel will participate in nor advise as to any Commission decision in the case (see 39 CFR 3001.8). The OOC will supply for the record, at the appropriate time, the names of all Commission personnel assigned to assist him in this case. In this proceeding the OOC shall be separately served three copies of all filings in addition to, and simultaneously with, service on the Commission of the 25 copies required by Rule 10(c) of our Rules of Practice [39 CFR 10(c)].

III. Prehearing Conference

Proposed special rules of practice, and the setting of a date for a prehearing conference, will be addressed in a subsequent Commisson notice.

IV. Motion for Waiver

The Postal Service's filing is accompanied by a motion for waiver, requesting that the Commission waiver portions of Rules 54 and 64 of our rules of practice (39 CFR 3001.54, 3001.64). Most prominently, the Postal Service seeks waiver of Rules 54(f)(2) and 54(j)(1)-(5) to allow it to employ FY 1987 as the test year in this proceeding. These rules require that the Postal Service employ a test year that is a fiscal year that begins not more than twelve months after the request for changes in rates is filed—which in this instance would be fiscal 1984.

The motion for waiver purports to make this request pursuant to Rule 22 of our rules of practice. That rule, however, states that a request for waiver "shall not be entertained unless it is timely filed so as to permit Commission disposition of the request prior to the date specified for the requirement for which waiver is requested." Since our test year rules specify the form and content of the Postal Service formal request, the date specified for complying with them is, clearly, the date of filing of that formal request. It is self-evident that a motion to waive rules that specify the form and content of formal requests cannot be timely unless it precedes the filing of that request. How far in advance a motion for waiver must be made is not yet a matter specified by our rules, but it must be fare enough in advance for the Commission to solicit and weigh public comment where the ruels to be waived have a substantial impact on the course that the proceeding will take.

This is especially true with respect to a waiver of our test year rule. The period chosen for forecasting the costs and revenues upon which our rate recommendations will be based can determine to a substantial degree whether those forecasts will be reliable or unacceptably speculative, and whether they will fairly reflect the period during which the recommended rates are actually in effect. Except in unusual circumstances, proposing a test year that does not comply with our rules should be assumed to have a substantial impact on the course of any proceeding under section 3622. Therefore it should be assumed to call for the kind of advance notice we were afforded in past general rate cases. In Docket R80-1, for example, the waiver request was made on Feruary 20, 1980, and granted on March 31, 1980; and the Service filed its request on April 21, 1980. Similar advance notice was given in Docket No. R77-1. Thus the Commission could entertain and weigh public comment on the proposed waiver.

The need for adequate advance notice of a proposal to waive our test year rule is clearly demonstrated in the instant request. It proposes an unprecedentedly distant test year be used in a context where volumes and costs are forecast to change dramatically in the interim period. Whether or not this proposed test year is conceptually sound, it undeniably is pivotal to the course that the requested proceeding will take. As with all proceedings brought under section 3622, this proceeding must be concluded in 10 months. Under these circumstances notice of the proposed waiver of the test year rule should have been given to the Commission and the public well in advance of the formal request, in order to allow an informed and thoroughly considered disposition of this critical issue.

The Commission solicits responses of interested persons to the Postal Service's Motion for Waiver, filed April 25, 1983, including their views with respect to substantive merit of the motion and the effect upon their interests of its failure to comply with Rule 22. Responses to the Service's Motion are due on or before May 31, 1983, and replies on or before June 7, 1983.

The Commission orders:

(A) The Commission will sit en banc in the above-captioned proceeding.

(B) Notices of intervention as full or limited participators in this docket must be sent to Cyril J. Pittack, Acting Secretary of the Commission, 2000 L Street, NW., Washington, D.C. 20268, on or before May 31, 1983.

(C) Stephen A. Gold is designated Officer of the Commission in this docket to represent the public in this proceeding. Service of documents on the Commission shall not constitute service on the OOC, who shall separately be served three copies of all documents.

(D) Responses to the Postal Service's Motion for Waiver, filed April 25, 1983, must be sent to Cyril J. Pittack, acting secretary of the Commission, 2000 L Street, NW., Washington, D.C. 20268, on or before May 31, 1983, and replies thereto on or before June 7, 1983.

(E) The Secretary shall cause this Notice and Order to be published in the **Federal Register**.

By the Commission.

Cyril J. Pittack,

Acting Secretary.

BILLING CODE 7715-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 19709; SR-Amex-82-22]

American Stock Exchange, Inc.; Filing and Order Partially Approving Amended Proposed Rule Change

April 27, 1983.

The American Stock Exchange, Inc. ("Amex" or "Exchange") 86 Trinity Place, New York, NY 10006, submitted on March 15, 1983, copies of an amendment to a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b-4 thereunder, to provide for the listing and trading of options based on an index comprised of 20 stocks from various industries and designated as the Amex Major Market Index ("MMI").[1] On April 15, 1983, the Exchange submitted copies of a second amendment to the proposed rule providing for a January expiration cycle and position and exercise limits for MMI stock index options.

In the second amendment, the Exchange proposes that the MMI option be traded on a January-April-July-October expiration cycle, rather than on the March-June-September-December

[1] The initial filing of SR-Amex-82-22 provides for the listing and trading of options on eleven specific narrow-based stock indices and set forth position and exercise limits of 30,000 contracts which would apply to positions in these narrowly-based index options. *See* Securities Exchange Act Release No. 19344 (December 16, 1982), 47 FR 57374 (December 23, 1982). As noted below, the Commission is taking no action in this release on those portions of the proposed rule change that deal solely with these narrow-based index options.

VOL

1983
UMI

cycle previously proposed. Amendment No. 2 also provides that with respect to the MMI option contract, the Exchange may establish position limits up to and including positions valued at $200 million.[2] For the purpose of compliance, however, the Exchange will establish position and exercise limits in terms of number of contracts ("contract limits"), which may be adjusted at the Exchange's discretion so long as the underlying monetary value [3] of the position in MMI options does not exceed $200 million. The Amex intends to establish position and exercise limits of 15,000 contracts initially.

Notice of the first amendment to the proposed rule change together with the terms of substance of the first amendment to the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 19610, March 17, 1983) and by publication in the **Federal Register** (48 FR 12486, March 24, 1983). No comments were received on the first amendment to the proposed rule change.

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 2 of the proposed rule change within 21 days from the date of publication in the **Federal Register.** Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, 450 Fifth Street, Washington, D.C. 20549. Reference should be made to File No. SR–Amex–82–22.

In order to facilitate Commission approval of options on the MMI, Amex has consented to sever those sections of the proposed rule change relating to MMI options from the initial filing.[4] Thus, the Commisison is approving only Amendment No. 1 and Amendment No. 2 of the proposed rule change, which relate to options on the MMI. The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of Section 6 and the rules and regulations thereunder.

The Commission finds good cause for approving the second amendment prior to the thirtieth day after the date of publication of notice of filing thereof in order to facilitate the commencement of trading in the MMI option [5] and because the Commission believes that the amended position and exercise limits, which were filed at the Commission's request, are more desirable than larger position and exercise limits that otherwise would apply. The Commission believes that the $200 million position and exercise limits are more appropriate for a new index option reflecting a smaller number of stocks than the position and exercise limits previously approved for the CBOE–100 stock index.[6]

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned amendment to the proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83–11956 Filed 5–3–83; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 19710; SR–Amex–83–9]

American Stock Exchange, Inc.; Filing and Order Granting Accelerated Approval of Proposed Rule Change

April 27, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on April 11, 1983, the American Stock Exchange, Inc. ("Amex" or "Exchange") 86 Trinity Place, New York, NY 10006, filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The Amex proposes to amend Rules 900C 902C, 909C, and 918C, and to adopt a new Rule 980C. First, the Amex would amend Rule 900C to define the "reporting authority" in Rule 900C(b)(3) that is responsible for determining the "numerical index value," as defined in the proposed amended Rule 900C(b)(4). The reporting authority would be "the institution or reporting service designated by the Exchange as the official source for calculating and reporting the current levels of [a] stock index." The Amex is currently the reporting authority for the Major Market Index ("MMI").

The amendment to Rule 902C would limit the liability of the exchange as a result of errors, omissions or delays in calculating or disseminating the current index value resulting from an act, condition or cause beyond the reasonable control of the Exchange. The amended Rule 902C would clarify that Amex shall not be liable for damages resulting from an error, omission or delay in calculating or disseminating the current index value if the act is beyond its control.

In order to address the particular problems relating to cash-settled options based on the changing values of a number of securities, the Exchange has proposed trading halt, suspension, opening rotation and option exercise rules specific to stock index options. Rule 918C as amended provides that a specified number or percentage of the stocks underlying an index must have opened for trading before opening rotation for the index option may commence. In the case of options on the MMI, the Exchange proposes that the opening rotation may commence after more than 50 percent of the stocks comprising the MMI have opened for trading in the primary market for such stocks.

Proposed Rule 918C also provides that trading in an index option shall be halted one and one half hours after the opening rotation or at any other time during the day if (i) in the case of an index option reflecting an index of 50 or more stocks, trading has been halted in any combination of stocks comprising 20 percent or more of the current index value; or, (ii) in the case of an index option reflecting an index of less than 50 stocks, trading has been halted in any combination of stocks that reflects a value or percentage greater than the pre-existing standard set by the exchange with respect to that index. With respect to the proposed MMI options, the Amex has provided that MMI options trading will be halted if trading has been halted or suspended in the primary markets for any combination of stocks reflecting 20 percent or more of the current index value. The Exchange believes that the 20 percent standard is appropriate for the MMI because of the large number of market sectors represented, but recognizes that a lesser percentage may be appropriate in the case of an index which reflects a small number of stocks and is narrower in scope.

The purpose of the proposed amendments to Rule 918C is to more clearly define the procedures which will be followed in the trading of stock index options and to assure that index option trading commences and continues only while investors have index value information that is based on current trading information concerning the stocks included in the index. It should be noted that the rule allowing the opening and continuation of index options trading for one and one half hours based on the openings of more than 50 percent of the stocks (in the case of the MMI option), like Amex Rule 917, is permissive; the exchange retains the discretion to halt trading even if the conditions of the 50 percent standard are met if it deems such action appropriate in the interest of a fair and orderly market.

Proposed Rule 980C provides supplemental procedures for the exercise of stock index options. Specifically, member organizations must accept from all customers and market makers exercise instructions for stock index options up until, but no later than 4:10 p.m. Eastern Standard Time ("EST"). The notice of exercise must be time-stamped at the time it is received or prepared. Second, a memorandum to exercise a stock index option contract issued or to be issued in a firm account must be prepared no later than 4:10 p.m. The above provisions, however, would not be applicable to expiring series on the last day of trading prior to expiration.

The proposed rule change will enable persons holding long positions to tender exercise notices on a given day knowing the value of the index at the close of trading. Conversely, in order to protect holders of short positions in index options from unanticipated events occurring after the close of the market, no exercise notice may be issued in a firm account after 4:10 p.m. EST.

Finally, the Amex proposes to amend Rule 909C to provide that restrictions on the exercise of index options imposed by the Exchange may remain in effect until the opening of business on the last day of trading prior to the expiration day. Currently, the Exchange's authority to prohibit the exercise of an option ceases ten days prior to expiration. The proposal to extend the exchange's authority with respect to index option exercises for nine additional day would allow the exchange to respond to the problems arising from the trading and exercise of cash-settlement index options. In particular, the Exchange's extended authority to prohibit exercises appears necessary to protect writers during index options trading halts from being unfairly disadvantaged.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register.** Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Reference should be made to File No. SR-Amex-83-9.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 522, will be available for inspection and copying at the Commission's Public Reference Room. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

The proposed rule change consists of a number of technical changes from the Exchange's rules for individual stock options made necessary by virtue of the nature of stock indices and the use of cash settlement. The proposed amendments are largely the same as rule changes previously filed by the Chicago Board Options Exchange, Incorporated ("CBOE") in connection with its proposal to trade options on the COBE–100 stock index option.[1] The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6 and the rules and regulations thereunder.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof, in that the proposed rule changes would enhance the fairness and liquidity of the stock index option market which is scheduled to commence in the near future.[2] As noted above, the proposed rules are substantially similar to those filed by the CBOE for which notice and the opportunity to comment has been given. The Commission finds that the proposed rules are critical to the fair and efficient commencement of index options trading and had requested previously that the Exchange consider the proposed rules that are the subject of the rule change. Because the trading of the MMI option is imminent, the Commission believes accelerated approval of these rules to ensure fair and efficient index reporting and procedures relating to opening rotation, trading suspensions and exercise and settlement are appropriate. While the Commission believes that subsequent review of the rules governing the trading of index options will be desirable as more trading information becomes available, the Commisson's initial determination is that the special CBOE and Amex rules relating to index options appear to be fair and to protect investors. Thus, the Commission finds it is in the public interest to approve the proposed rule changes on an accelerated basis because the public has been apprised of the issues previously, the public comment has been considered and the proposed rules will provide for a fairer, more efficient and more liquid options market.

---

[2] Proposed amendment to Rule 904C. Because Amendment No. 1 provides in proposed Rule 905C that exercise limits for stock index options be identical to positions limits, a proposed change in position limits would change exercise limits as well.

[3] The monetary value of a position will be the product of the current index value times the index multiplier times the number of MMI option contracts on the same side of the market.

[4] The initial filing (SR–Amex–82–22) relating to options on eleven narrowly-based indices is still pending. *See* letter to Thomas G. Lovett, Chief, Branch of Options Regulation, Division of Market Regulation, SEC, from Nathan Most, Vice President, Amex, dated April 14, 1983.

[5] The Amex has indicated, in discussions with the Commission's staff and in public announcements, that it hopes to commence trading options on the MMI on Apirl 29, 1983.

[6] While the Commission believes that position limits for options on diversified, well-capitalized stock indices may be appropriately set at substantially higher levels than those for options on individual equity securities, it has made no determination regarding the appropriate position limits or margin levels for non-diversified indices composed of a small number of stocks.

[1] The Commission, approved, on an accelerated basis, several rule changes filed by the CBOE. *See* Securities Exchange Act Release Nos. 19588, 19589, 19590, dated March 10, 1983, published at 48 FR 11195, 11196, and 11197, dated March 16, 1983. *See* File, Nos. SR–CBOE–83–2, SR–CBOE–83–3 and SR–CBOE–83–6. The Amex rule governing the opening of trading, Rule 918C, differs slightly from its CBOE counterpart in that it provides that more that 50 precent of the MMI have opened for trading before options trading may commence, while CBOE Rule 24.13 provides that options trading commence only after securities representing 50 percent of the aggregate market value of the CBOE–100 index have opened. This variation reflects both a difference in the number of stocks comprising the two indices and the fact that the MMI is a price-weighted, not market value weighted, index. The Commission notes that questions have arisen regarding the rules in effect with respect to openings. *See* comment letter to Douglas Scarff, Director, Division of Market Regulation, from Charles J. Henry, President, CBOE, dated April 11, 1983 urging reconsideration of CBOE Rule 24.13. The Commission continues to believe that the 50 percent requirement sets an appropriate balance between the need to ensure that index options are opened accurately, that the public understands the basis on which the index value is being calculated, and that the index value is fairly based on current pricing information on the underlying stocks, and the need to ensure fast and efficient openings of the index option market. After the Commission and the exchanges have gained more experience with the trading of stock index options, however, the Commission believes that it may be appropriate to reconsider the present thresholds set in both the Amex and COBE rules governing the commencement of trading.

[2] The Amex has indicated, in discussions with the Commission's staff and in public announcements, that it hopes to commence trading options on the MMI on April 29, 1983.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rules change referenced above be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13196; 812-5495]

Liberty Cash Management Fund, Inc., et al.; Application Filing

April 27, 1983.

In the Matter of Liberty Cash Management Fund, Inc., Seligman Capital Fund, Inc., Seligman Cash Management Fund, Inc., Seligman Common Stock Fund, Inc., Seligman Communications and Information Fund, Inc., Seligman Growth Fund, Inc., Seligman Income Fund, Inc., Tri-Continental Corporation, One Bankers Trust Plaza, New York, New York 10006, [812-5495] Filing of Application for an Order Pursuant to Section 6(c) of the Act Granting Exemptions From the Provisions of Sections 13(a)(2), 18 (a), (c) and (f)(1), 22 (f) and (g) and 23(a) of the Act and Pursuant to Section 17(d) of the Act and Rule 17d–1 Thereunder.

Notice is hereby given that Liberty Cash Management Fund, Inc. ("Liberty"), Seligman Capital Fund, Inc. ("Capital"), Seligman Cash Management Fund, Inc. ("Cash"), Seligman Common Stock Fund, Inc. ("Common"), Seligman Communications and Information Fund, Inc. ("Communications"), Seligman Growth Fund, Inc. ("Growth"), Seligman Income Fund, Inc. ("Income"), and Tri-Continental Corporation ("Tri-Continental") (collectively "the Applicants"), all open-end diversified management investment companies registered under the Investment Company Act of 1940 (the "Act") other than Tri-Continental, which is a closed-end registered diversified management investment company, filed an application on March 18, 1983, for an order of the Commission pursuant to Section 6(c) of the Act exempting Applicants from the provisions of Sections 13(a)(2), 18 (a), (c) and (f)(1), 22 (f) and (g), and 23(a) of the Act in connection with certain proposed deferred compensation plans for directors ("Plans") to be adopted by Applicants and by other investment companies that may be added to the group of investment companies having the same adviser of which the Applicants are a part, and pursuant to Section 17(d) of the Act and Rule 17d–1 thereunder to permit certain joint transactions relating to the Plans. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below. Such persons are also referred to the Act for the complete text of the provisions thereof from which an exemption is being sought.

According to the application, Capital and Communications have as their investment objective capital appreciation, with Communications focusing on long-term capital gain through investment in securities of companies in the communications, and information industries; Cash and Liberty are money market funds which seek to preserve capital and maximum liquidity and current income; Common invests to produce favorable current income and longer-term growth of both income and capital value, without undue risk; Growth emphasizes longer-term growth in capital value and an increase in future income; Income seeks a high level of current income as well as the possibility of future growth of income and capital value; and Tri-Continental's objective is to produce future growth of both capital and income while providing reasonable current income.

The application states that each Applicant's board of directors consists of from eight to eleven persons, a majority of whom is each instance are not "interested persons" of each Applicant within the meaning of Section 2(a)(19) of the Act. Each of the directors of each Applicant who is not an employee of J. & W. Seligman & Co. Incorporated, the manager of the Applicants, or its affiliates receives from that Applicant an annual retainer fee for serving as a director, an annual retainer fee for each board committee membership and for each committee chairmanship and a meeting attendance fee for each day on which he attends board or committee meetings. Applicants assert that the amounts paid to the directors are, and are expected to continue to be, insignificant in comparison to the total net assets of each Applicant.

According to the application, the purpose of the Plans is to permit individual directors to elect to defer receipt of their fees in order to avoid diminution or loss of social security benefits to which directors may otherwise be entitled, to enable directors to defer payment of income taxes on such fees, or for other reasons. Applicants state that they believe the availability of such deferred fee arrangements will enhance their ability to attract and retain directors of high caliber.

Applicants state that each Plan will allow an individual director to elect to defer receipt of fees which otherwise would become payable to him for services performed after the date of the election. The election shall continue in effect until terminated in writing, such termination to take effect on the first day of the calendar year beginning after receipt of the notice of termination. An election shall be irrevocable as to payments deferred in conformity with that election. Each deferred fee will be credited at the time when it otherwise would have been payable to an account on the investment company's books that will be established for each electing director. All amounts in such an account (including interest credited to the account) will bear interest at a rate equivalent to the rate applicable to 90-day U.S. Treasury Bills at the beginning of each calendar quarter. Interest will be credited to the account quarterly at the end of each calendar quarter. Amounts in the account will not be evidenced by any note or other security or secured in any way.

According to the application, all amounts credited to the account pursuant to an election by a director shall be paid after the director ceases to be a director or reaches age 70 in a lump sum or in ten or fewer annual installments all as the director specifies in making the election. In the event of the director's death, amounts payable to him under a Plan will thereafter be payable to his estate. No deferred amount or unpaid portion thereof may be transferred or assigned by a director except by will or the laws of descent and distribution.

Applicants represent that deferral of directors' fees in accordance with the Plans will have a negligible effect on the Applicants' assets, liabilities, net assets and net income per share. Further, the application states that the Plans will not obligate an Applicant to retain a director in such capacity, nor will they obligate an Applicant to pay any (or any particular level of) director's fees to any director.

Applicants state that participation in the deferred fee arangement will be available to all directors who receive director's fees from the Applicants and that Plans will be made available to directors of other investment companies that may be added to the group of investment companies having the same

investment adviser of which the Applicants are a part.

Section 6(c) of the Act provides, in part, that the Commission may, by order upon application, conditionally or unconditionally exempt any person, security or transaction from any provisions of the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Rule 17d–1 under the Act provides that the Commission may, by order upon application, grant exemptions from the prohibitions of Section 17(d) and Rule 17d–1 regarding certain joint enterprises or arrangements and profit-sharing plans involving a registered investment company. Rule 17d–1(b) further provides that in passing upon such an application the Commission will consider whether the participation of the registered investment company in such enterprise, arrangement, or plan is consistent with the policies and purposes of the Act and the extent to which such participation is on a basis different from or less advantageous than that of other participants.

Applicants submit that the Plans are in the best interests of each of the Applicants and their shareholders and consistent with the purposes fairly intended by the policy and provisions of the Act. In addition, Applicants submit that the grant of the requested order is necessary and appropriate in the public interest and consistent with the protection of investors.

With respect to the requested exemptions from Sections 18 (a), (c) and (f)(1) and 13(a)(2) of the Act, Applicants contend that the Plans possess none of the characteristics of senior securities which led Congress to enact the restrictions on the issuance of such securities set forth in these sections of the Act. Applicants submit that they would not be "borrowing" from their directors in the sense which concerned Congress and that all liabilities created by credits to the deferred fee accounts under the Plans would be offset by equal assets of the Applicants which would not otherwise exist if the directors' fees were paid on a current basis. Applicants further argue that the Plans would not induce speculative investments by Applicants or provide opportunity for manipulative allocations of Applicants' expenses and profits; that control of the Applicants would not be affected; and, given the common existence of deferred compensation agreements today, the Plans would not confuse investors, make it difficult for them to value the Applicants' shares or convey a false impression of safety.

With respect to the requested exemption from Section 22(f) of the Act, Applicants argue that this section was designed to bar only those restrictions on transferability or negotiability either not disclosed to the holder of the subject security or expressly prohibited by Commission rule or regulation, neither of which circumstances would apply here. Applicants assert that the restriction on transferability of a director's benefits would be clearly set forth in the Plans and would not adversely affect the interests of the director or of any shareholder of Applicants.

As to Sections 22(g) and 23(a) of the Act, Applicants contend that the legislative history of the Act indicates that Congress was primarily concerned with the dilutive effect on the equity and voting power of the common stock of, or units of beneficial interest in, an investment company if securities were issued for consideration not readily valued. Applicants submit that the Plans would not have this effect in view of current disclosure requirements applicable to director compensation. Applicants also contend that their obligation to make payments under the Plans need not be viewed as being "issued" for services or for property other than cash or securities, because, while any director's fees which might become payable to a director would clearly be for services, any such fees would become payable independent of the Plans. Thus, according to the Applicants, the Plans would merely provide for deferral of payment of such fees and thus may be viewed as being "issued" not in return for services but in return for Applicants not being required to pay such fees on a current basis.

Applicants assert that Section 17(d) of the Act and Rule 17d–1 thereunder are designed to limit or prevent a registered investment company's joint or joint and several participation with an affiliated person in a transaction "on a basis different from or less advantageous than that of" the affiliated person. Applicants submit that none of the Plans is a joint transaction between an Applicant and its directors within the meaning of these provisions as the interest to be accrued on the deferred amounts is to be based upon the rate paid on 90-day U.S. Treasury Bills, so that no Plan possesses the profit-sharing characteristics required for a joint transaction. Applicants argue that the effect of the Plans would merely be to defer the payment of fees that the Applicants would otherwise be obligated to pay on a current basis as services are performed by the directors. Liabilities created by the credits to the accounts under the Plans would thus be offset by assets in an equal amount that would not otherwise exist if the director's fees were paid on a current basis (that is, the fees otherwise payable to the director would remain as part of the Applicants' general assets and property). Applicants contend that deferral of a director's fees in accordance with the Plans would essentially maintain the parties, viewed both separately and in their relationship to one another, in the same position as if the fees were paid on a current basis. Applicants state that, on a comparative basis, deferral would have a negligible effect on each Applicant's assets, liabilities, net assets and net income per share.

Applicants emphasize their view that their ability to recruit and retain highly qualified directors would be enhanced if they were able to offer their director the option of deferred payment of their director's fees. Applicants submit that this benefit to the Applicants and their shareholders outweighs any tax, social security or other benefit that may be realized by an individual director under the proposed Plans.

Notice is Further Given that any interested person wishing to request a hearing on the application may, not later than May 23, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[Release No. 19714; SR-NYSE-83-5]

New York Stock Exchange, Inc.; Order Approving Proposed Rule Change

April 27, 1983.

The New York Stock Exchange, Inc. ("NYSE"), 11 Wall Street, New York, NY 10005, submitted on January 31, 1983, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b–4 thereunder, that would permit a specialist to disclose the names of the parties to orders he holds for execution, he is in the process of executing, or he has executed, unless he is specifically instructed not to do so by the parties involved at the point of order entry. Historically, NYSE specialists have been required to obtain permission to disclose the names of the parties to a trade before doing so.[1]

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 19495, February 9, 1983) and by publication in the **Federal Register** (48 FR 7343, February 18, 1983). No comments were received with respect to the proposed rule change.

The Commission feels that the proposed rule change will assist the specialist in his task of bringing together buyers and sellers, and that the revised NYSE Information Memorandum makes it clear that the specialist will not be free to discriminate arbitrarily in making either the initial or subsequent disclosure. The Commission finds, therefore, that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6, and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-11963 Filed 5-3-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 19713; SR-NYSE-83-16]

New York Stock Exchange, Inc.; Filing and Order Granting Accelerated Approval of Proposed Rule Change

April 27, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on April 25, 1983, the New York Stock exchange, Inc. ("NYSE"), 11 Wall Street, New York, New York 10005, filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change would extend the operation of the NYSE's Registered Representative Rapid Response Service ("R4") until June 1, 1983. R4 is currently a pilot program scheduled to terminate on May 1, 1983.[1] According to the Exchange, the purpose of the proposed rule change is to give the Commission time to consider the Exchange's recent proposal for a one-year extension of R4 and an expansion of its use. That rule filing (SR–NYSE–83–8) has been published for public comment [2] and currently is being reviewed by the Commission. The exchange in its filing states that the statutory basis of the proposed rule change is Section 11A(a)(1) and 17A(a)(1) of the Act.

Interested persons are invited to submit written data, views and arguments concerning the proposed rule change within 21 days after the date of publication in the **Federal Register.** Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 5th Street NW., Washington, D.C. 20549. Reference should be made to File No. SR–NYSE–83–16.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other then those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 5th Street NW., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

The Commission finds that the proposed rule change, in light of its limited purpose and experimental nature, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges and in particular, the requirements of Section 6 and the rules and regulations thereunder. In particular, the Commission believes it is appropriate to extend the R4 pilot program to afford the Commission an opportunity to consider fully the issues raised by NYSE's proposal to extend R4 for another year and to expand its use.[3]

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof, in that the NYSE R4 experiment is scheduled to expire on May 1, 1983, and an extension is necessary to allow the pilot to continue in its present form while the Commission considers the NYSE's proposal for a one-year extension and expansion of the system. The Commission expects to take action on that proposal before June 1, 1983. For this reason, the Commission believes it is appropriate to extend the R4 pilot program to June 1, 1983. In so finding, the Commission does not, however, reach any conclusion as to the consistency with the Act of a continuation of the R4 experiment beyond June 1, 1983.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change referenced above be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-11965 Filed 5-3-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 19712; SR-NYSE-82-13]

New York Stock Exchange, Inc.; Order Granting Partial Approval of Proposed Rule Change

April 27, 1983.

The New York Stock Exchange, Inc. ("NYSE") 11 Wall Street, New York, NY 10005, submitted on August 9, 1982, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b–4 thereunder, to rescind Rule 349, which prohibits the employment of press representatives by member organizations for the purpose of obtaining advance or confidential information; rescind Rule 403, which prohibits engaging in or being associated with a "bucket shop" or certain other types of securities businesses; combine Rule 404 into Rule 415, both of which deal with Exchange approval for carrying customers' accounts and holding customers' securities; amend Rule 422 to delete the requirement of Board approval of certain loans to (or from) Exchange committee members from (or to) members or member organizations; modify and consolidate Rule 423 and Rule 93, both of which deal with joint accounts; and amend Rule 432 to clarify the intent of certain Exchange requirements dealing with daily records of margin calls.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 18984, August 19, 1982) and publication in the **Federal Register** (47 FR 37732, August 26, 1982). No comments were received with respect to the proper rule change.

On October 7, 1982 the Commission approved the portions of the proposed rule change relating to Rules 349, 403, 404, 415, and 432, and reserved decision on the remainder of the proposed rule change.[1] With respect to that portion of the proposed rule change that relates to Rule 422, the NYSE has again consented to a thirty-day extension of time for Commission action pursuant to Section 19(b)(2) of the Act.[2] The Commission, therefore, takes no action in this order with respect to that portion of the proposed rule change relating to Rule 422.

With respect to the proposed modification and consolidation of Rules 93 and 423, the NYSE proposal would have the effect of requiring that only members able to initiate transactions on the floor and their member organizations report their participation in join accounts. Currently, all member firms participating in joint accounts must report to the Exchange. The NYSE has indicated that the proposed rule would eliminate reporting requirements for approximately 75 percent of the joint accounts currently reporting to the Exchange. Nevertheless, the NYSE believes that the proposal will continue to allow the Exchange adequately to monitor joint accounts. To the extent joint accounts raise conflict of interest concerns arising from any different treatment being accorded to customer and joint account orders, NYSE contends that the retention of an approval requirement only for any joint account including a member able to initiate transactions on the floor will permit the Exchange to continue to monitor potential conflicts of interest in connection with joint account arrangements directly related to the Exchange trading floor. To the extent that the existence of joint accounts raises financial responsibility concerns, NYSE maintains that the existence of net capital, margin and recordkeeping requirements will allow the Exchange adequately to monitor joint account members, whether or not they are subject to Rule 93.[3]

Because the NYSE rule proposal will permit the NYSE to continue to monitor those accounts that raise manipulation, conflict of interest or other trading concerns, and given the existence of other regulatory tools for monitoring the joint accounts that will no longer be subject to reporting requirements under the NYSE's proposed modifications, the Commission finds that the portion of the proposed rule change relating to rules 93 and 423 is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6 and the rules and the regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned portion of the proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 22921; 70-6865]

American Electric Power Service Corp. et al.; Sale of Mortgage Notes

April 27, 1983.

In the matter of American Electric Power Service Corp.; American Electric Power Company, Inc., 180 East Broad Street, Columbus, Ohio 43215, (70–6865); proposed issuance and sale of mortgage notes by Service Corporation and gurarnty by holding company.

American Electric Power Company, Inc. ("American"), a registered holding company, and its subsidiary service company, American Electric Power Service Corporation ("Service Corporation"), have filed a declaration with this Commission pursuant to Sections 6(a), 7, and 12(b) of the public Utility Holding Company Act of 1935 ("Act") and Rules 45 and 50(a)(5) promulgated thereunder.

Service Corporation is currently completing construction of a 31-story office building consisting of approximately 75,000 square feet, with parking facilities for approximately 1,000 cars, which is located on a site of approximately 5.3 acres of land near downtown Columbus, Ohio. This office building will become the corporate headquarters for Service Corporation and American commencing with its initial occupancy, now scheduled in June 1983. By orders dated June 28, 1982, and November 17, 1982 (HCAR Nos. 22104 and 22714), the Commission authorized Service Corporation to issue up to $130 million principal amount of its notes to Irving Trust Company under a Building Loan Agreement, as modified, to finance construction of the office building and related facilities and the land acquisition costs. The notes issued to Irving Trust Company are secured by a mortgage and security agreement on the building and the building site, bear interest to maturity at Irving Trust Company's publicly announced prime rate, and mature December 31, 1987. The building loan notes are prepayable at any time without penalty.

---

[1] On February 9, 1983, the Exchange in a clarifying letter explained that the parties to the order whose names the specialists may disclose under the proposed rule change are not public customers but the specialist's customers, *i.e.,* member organizations' brokers entering orders with the specialist. *See* letter dated February 9, 1983, from James E. Buck, Secretary, NYSE, to Alden Adkins, Division of Market Regulation, SEC. As part of its proposed rule change, the NYSE included Exhibit A (Information Memorandum to NYSE members concerning the proposed rule change), indicating that disclosure would be required to all who request it once the specialist discloses initially. On April 20, 1983, the Exchange submitted a revised Exhibit A to the filing in which it is made clear that the specialist "should normally" make the disclosure allowed upon initial request.

[1] On September 14, 1982, the Commission approved R4 as a 6-month pilot program. Securities Exchange Act Release No. 19047, September 14, 1982; 47 FR 41896, September 22, 1982. On March 11, 1983, the Commission approved an extension of the operation of the R4 pilot through May 1, 1983. Securities Exchange Act Release No. 19593, March 11, 1983; 48 FR 11544, March 18, 1983.

[2] Securities Exchange Act Release No 19573, March 8, 1983; 48 FR 10786, March 14, 1983. The NYSE has recently agreed to an extension of time for Commission action on this filing to June 1, 1983. *See* letter dated April 22, 1983 from James E. Buck, Secretary, NYSE, to Michael Cavalier, Division of Market Regulation, SEC.

UMI

Service Corporation now proposes to issue and sell up to $125 million of Mortgage Notes to one or more insurance companies, pension funds, or other financial institutions, and to apply the proceeds thereof to prepay the building loan notes outstanding to Irving Trust Company. In this connection, Service Corporation proposes to distribute a "term sheet" to a limited number of financial institutions believed to have an interest in this kind of investment. Although all terms will be subject to further negotiations, Service Corporation will initially request proposals for a loan secured by a first mortgage lien on Service Corporation's office building, the land on which it is located, and related improvements. It is contemplated that such loan may be evidenced by Mortgage Notes issued in one or more series, each series maturing not less than 5 nor more than 25 years from the date thereof, and bearing interest to maturity at a fixed rate.

As an inducement to a prospective lender to make the loan to Service Corporation, it may be necessary for American to guaranty the obligations of Service Corporation to pay principal and interest on the mortgage Notes. The form of such guaranty, and American's obligations thereunder, would be subject to negotiations with the lender or lenders offering the best terms to the Service Corporation. In this connection, American has guaranteed the performance of Service Corporation's obligations under the Building Loan Agreement and the notes previously issued thereunder, and it is anticipated that the proposed guarantee hereunder would be substantially identical to American's existing guarantee.

The declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by May 23, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarant at the address specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration, as filed or as it may be amended, may be permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19711; SR-Amex-82-14]

American Stock Exchange, Inc.; Order Approving Proposed Rule Change

April 27, 1983.

The American Stock Exchange, Inc. ("Amex") 86 Trinity Place, New York, NY 10006 submitted on October 7, 1982, with amendments on October 13, 1982 and February 2, 1983, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b-4 thereunder to amend Amex rules with respect to Registered Options Traders ("ROTs") and floor traders. The proposed rule change would eliminate a restriction which automatically limits to three the number of Registered Options Traders in a trading crowd who may establish or increase options positions without the written approval of a Floor Official. The proposed rule change would replace this with a new provision which would remove the restriction but would allow for a temporary limitation by two floor officials of the number of ROTs in a trading crowd if such a limitation would serve the interests of a fair and orderly market.[1]

The proposed rule change would also establish a procedure under which a member organization's propriety "facilitation order" could be crossed with a public customer order after the latter's exposure to other market participants.[2] The Commission has previously approved a facilitation order rule submitted by the Chicago Board Options Exchange, Incorporated ("CBOE").[3] The Amex rule differs from the CBOE rule principally in that, under the Amex rule but not the CBOE rule, bids or offers for the customer's order must be sought prior to disclosure of the member's intention to facilitate or of any "contingency" to which the order may be subject, such as an instruction that stock be purchased or sold at the same time the option transaction is made. The Amex procedure conforms to the procedure followed for other customer orders and is based on the belief that quotes more favorable to the customer may be obtained if quotes are requested prior to disclosure of the particulars of the order.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 19601, March 15, 1983) and by publication in the **Federal Register** (48 FR 12026, March 22, 1983).

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule changes be, and hereby are, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

Boston Stock Exchange, Inc.; Applications for Unlisted Trading Privileges and of Opportunity for Hearing

April 28, 1983.

In the matter of Applications of the Boston Stock Exchange, Inc., for unlisted trading privileges in certain securities; Securities Exchange Act of 1934.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following stocks:

EECO, Inc.
Common Stock, $1 Par Value (File No. 7-6613)

Empire of Carolina, Inc.
Common Stock, $.10 Par Value (File No. 7-6614)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

[1] The Commission has approved a similar proposal by the Philadelphia Stock Exchange, Inc. (SR-Phlx-82-6). *See.* Securities Exchange Act Release No. 18870 (July 6, 1982).

[2] A "facilitation" order is a firm proprietary order that is sent to an exchange floor for execution at the same time as a customer order on the other side of the market. Unless an equal or better execution of the customer order can be obtained on the exchange floor, the firm's order can be crossed with the customer's order to facilitate its execution.

[3] *See* Securities Exchange Act Release No. 18881 (April 20, 1982) (File No. SR-CBOE-82-8).

Interested persons are invited to submit on or before May 19, 1983 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13200; 812-5478]

Capital Housing Partners—CL et al.; Application Filing

April 28, 1983.

In the matter of Capital Housing Partners—CL, C.R.I., Inc., William B. Dockser, Martin C. Schwartzberg, and H. William Willoughby, One Central Plaza, 11300 Rockville Pike, Rockville, MD 20852, filing of application for an order pursuant to section 6(c) of the Act granting an exemption from all provisions of the Act.

Notice is hereby given that Capital Housing Partners—CL (the "Partnership"), a District of Columbia limited partnership, and its general partners, C.R.I., Inc., which is the Managing General Partner of the Partnership, William B. Dockser, Martin C. Schwartzberg and H. William Willoughby ("General Partners" and, together with the Partnership, collectively referred to hereinafter as "Applicant"), filed an application on March 7, 1983, for an order of the Commission, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act"), exempting the Partnership from all provisions of the Act and rules thereunder. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicants state that the Partnership was formed under the District of Columbia Uniform Limited Partnership Act as of January 1, 1981, as a vehicle for equity investment in government-assisted rental housing in accordance with the policies and objectives of Title IX of the Housing and Urban Development Act of 1968 ("Title IX"). Applicants state that the Partnership will operate as a "two-tier" entity, i.e., the Partnership, as limited partner, will invest in three other limited partnerships ("Local Limited Partnerships"): (i) two Illinois limited partnerships, each of which owns and is developing a government-assisted project for individuals and families of low and moderate income in Westhaven, Cook County, Illinois, and (ii) a California limited partnership which owns and is rehabilitating a government-assisted apartment project for elderly persons of low and moderate income in San Francisco, California. All such investments are represented to be in accordance with the purposes and criteria set forth in the last paragraph of Investment Company Act Release No. 8456 (August 9, 1974), which release states the views of the Commission's Division of Investment Management regarding the applicability of the Act to two-tier real estate limited partnerships. It is also stated that an affiliate of CRI, Inc., will be a general partner in each Local Limited Partnership.

Applicants state that the Partnership is organized as a limited partnership because that form of organization is the only one that provides investors with both liability limited to their capital investments and the ability to claim on their individual tax returns the deduction, losses, credits, and other tax items that originate from the Partnership's interests in the Local Limited Partnerships. Through its investment in the Local Limited Partnerships, the Partnership intends to realize (i) a potential increase in its equity in the projects through amortization of the projects' mortgage indebtedness, (ii) cash flow from operations, (iii) a potential increase in the value of the projects, and (v) certain current tax benefits. Although the Partnership's direct control over the management of each apartment complex is represented to be limited, the Partnership's ownership of interests in Local Limited Partnerships shall, in an economic sense, it is argued, be tantamount to direct ownership of the apartment complexes themselves. The interests in Local Limited Partnerships will have no substantial value other than their pro rata share of the value of the apartment complexes. No Local Limited Partnership will generate a substantial amount of income or expense other than as directly related to the development, ownership and operation of its apartment complex.

The Partnership, in reliance upon Rule 506 under Section 4(2) of the Securities Act of 1933, will offer $4,979,000 of limited partnership interests in 90 units at $53,300 per unit (the "Units"). Subscriptions for half units may be accepted by the General Partners, and accordingly, the Partnership's securities could be held by more than 100 persons. According to the application, Prudential-Bache Securities and CRICO Securities Corporation and other selected broker-dealers will act as selling agents for the offering of Units. Purchasers of Units will become limited partners ("Limited Partners") of the Partnership.

Applicants state that the partnership will be controlled by the General

VOL 48 ISS 87 MAY 1983

Partners, and the Limited Partners, consistent with their limited liability status, will not be entitled to participate in the control of the business of the Partnership. However, Limited Partners owning a majority of Partnership interests will have the right to amend the Partnership Agreement, remove any General Partner and elect a replacement therefor, and to dissolve the Partnership, provided that such rights will not adversely affect the tax or limited partner status of the Limited Partners. It is stated that the Partnership will receive an opinion of counsel to the effect that the Partnership's liability in respect to each Local Limited Partnership will be limited to the Partnership's capital contribution to the Local Limited Partnership. Applicants represent, in addition, that under the Partnership Agreement, each Limited Partner is entitled to review all books and records of the Partnership at any and all reasonable times.

Without conceding that the Partnership is an investment company as defined in the Act, Applicants request that the Partnership be exempted from all the provisions of the Act pursuant to Section 6(c). Section 6(c) of the Act provides, as herein pertinent, that the Commission, by order upon application, may conditionally or unconditionally exempt any person from the provisions of the Act and the rules promulgated thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants argue that the Partnership is not an "investment company" under the Act; that it will be in the business of investing in and being the beneficial owner of apartment complexes which are not securities, and that the limited partnership interests it will own should not constitute "investment securities" within the meaning of Section 3(a)(3) of the Act. Applicants further state that the interests in Local Limited Partnerships, by their nature, are not readily marketable, and will have no value apart from the value of the apartment complexes owned by the Local Limited Partnerships. No separate market is alleged to exist for such interests and their sale could involve severe adverse tax consequences.

Applicants assert that investment in low and moderate income housing in accordance with the national policy expressed in Title IX is not economically suitable for private investors without the tax and organizational advantages of the limited partnership structure. According to the application, that form of organization provides the only means of bringing private equity capital into government-assisted housing, particularly because public investors typically consider investment in low and moderate income housing programs as involving greater risk than real estate investment generally. Applicants state that the limited partnership form insulates each limited partner from personal liability and limits financial risk incurred by the limited partner to the amount he has invested in the program, while also allowing the limited partner to claim on his individual tax return his proportionate share of the income and losses from the investment.

Applicants state that despite the advantages it affords investors in government-assisted housing, the limited partnership form of organization is incompatible with several fundamental provisions of the Act. Applicants contend that it is appropriate that an exemption from those provisions be granted so as not to discourage use of the two-tier limited partnership entity. To do so, Applicants assert, would frustrate the public policy established by the housing laws.

Applicants state that the substantial fees and other forms of compensation that will be paid to the General Partners and their affiliates will not have been negotiated through arm's length negotiations. They represent, however, that terms of all such compensation will be fair and not less favorable to the Partnership than would be the case if such terms had been negotiated with independent third parties. Further, the Partnership believes that such compensation meets all applicable guidelines necessary to permit the Units to be offered and sold in the various states which prescribed such guidelines, including, without limitation, the statement of policy adopted by the North American Securities Administrators Association, Inc., with respect to real estate programs.

According to the application, interests in the Partnership will be sold only to relatively sophisticated investors who must meet specified suitability standards which the Partnership believes are consistent with the securities laws of all states where the Units will be sold, and these investors will receive extensive reports concerning the Partnership's business and operations. Among the suitability requirements are ones specifying that investors have a net worth (exclusive of home, furnishings and automobiles) of at least $150,000 and have some part of their income subject to federal income tax at the rate of 45% or more. Although the interests of the General Partners and their affiliates may conflict in various ways with the interests of Limited Partners, the Applicants claim that the prospectus contains various provisions designed to eliminate or significantly reduce such conflicts of interest. Further protection for the interests of Limited Partners is provided, Applicants assert, by the numerous provisions of the Partnership Agreement designed to prevent overreaching by the General Partners and to assure fair dealing by the General Partners vis-a-vis the Limited Partners.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 23, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19705; File No. SR-NSCC-82-28]

National Securities Clearing Corporation ("NSCC"); Order Approving Proposed Rule Change

April 26, 1983.

On November 29, 1982, NSCC filed with the Commission pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), (the "Act") and Rule 19b-4 thereunder, a proposed rule change that would permit NSCC to consolidate into a single processing stream the clearance and settlement of exchange-listed and over-the-counter ("OTC") securities transactions in New York City. NSCC currently processes these transactions separately. As discussed in detail below, by approving this proposal, the Commission would allow NSCC to enter "Phase II" of its operations. Notice of the proposed rule change, together with its terms of substance, was given by publication in Securities Exchange Act Release No. 19361 (December 21, 1982), 47 FR 58419 (December 30, 1982). No letters of comment were received.

I. Summary of Events [1]

A. Procedural History

In 1976, NSCC applied for temporary registration as a clearing agency pursuant to Sections 17A(b) and 19(a)(1)[2] of the Act and Rule 17Ab2-1 (17 CFR 240.17Ab2-1) thereunder, and requested that the Commission exempt NSCC from one or more of the determinations that the Commission is directed to make pursuant to Section 17A(b)(3)(A)-(I) of the Act.[3] NSCC's application for registration proposed the merger of three clearing corporations, The American Stock Exchange Clearing Corporation ("ASECC"), The National Clearing Corporation ("NCC"), and Stock Clearing Corporation ("SCC").[4] NSCC suggested that the merger occur in two phases. In Phase I, which was intended to last approximately 120 days, NSCC would operate the three clearing agencies separately and would develop a plan to merge the systems. Once the Commission approved the merger plan, SIAC would become NSCC's facilities manager to process all transactions. "Phase II" was to begin when the merger plan was approved. In accordance with Section 19(a)(1) of the Act, the Commission published notice of the

[1] This Order merely highlights certain events concerning NSCC's registration and does not represent a complete record.

[2] Section 17A(b)(1) of the Act requires each clearing agency to be registered with the Commission. Section 17A(b)(3) of the Act states that a clearing agency may not be registered unless the Commission determines that the clearing agency satisfies the requirements of Section 17A(b)(3)(A)-(I) (the "Requirements"). The Commission, however, has the authority under Section 17A(b)(1) of the Act to grant a registered clearing agency an exemption from one or more of the Requirements. Pursuant to this authority, the Commission has adopted Rule 17Ab2-1(c)(1) (17 CFR 240.17Ab2-1(c)(1)). Securities Exchange Act Release No. 11767 (November 3, 1975), 40 FR 52356 (November 10, 1975), which provides that a clearing agency may request the Commission to grant it registration but to exempt it from one or more of the Requirements. Registration granted in that form is effective only for eighteen months, or such longer period as the Commission may order ("temporary registration"). Following NSCC's application for temporary registration under Rule 17Ab2-1(c)(1), the Commission determined that NSCC satisfied, or was exempt from satisfying, a number of the Requirements and, as discussed in more detail below, granted NSCC temporary registration. *See* 42 FR at 3922, discussed at note 7, *infra*. The Commission has extended by order NSCC's and other applicant clearing agencies' temporary registrations until September 30, 1983 (*see* Securities Exchange Act Release No. 16584 (March 22, 1982), 47 FR 13286 (March 29, 1982)), and is currently concluding proceedings to determine whether all applicant clearing agencies should be fully registered. *See also* note 11, *infra*.

[3] In general, ASECC was owned by, and cleared transactions executed on, the American Stock Exchange, Inc. ("Amex"); NCC was owned by the National Association of Securities Dealers ("NASD") and cleared OTC transactions; and SCC was owned by, and cleared transactions executed on, the New York Stock Exchange, Inc. ("NYSE"). Under the merger plan, NSCC was to be owned equally by the Amex, NASD, and NYSE. The facilities manager for ASECC and SCC was the Securities Industry Automation Corporation ("SIAC"), owned ⅔ by the NYSE and ⅓ by the Amex. The facilities manager for NCC was Bradford National Clearing Corporation ("BNCC"), a subsidiary of Bradford National Corporation ("Bradford").

application in the Federal Register, requesting that interested persons submit pertinent written data, views, and arguments.[4]

Because of the importance of NSCC's registration to the Commission's efforts to foster the development of a national market system [5] and a national system for the safe and efficient clearance and settlement of securities transactions (the "National System"),[6] and because of the extensive written data, views, and arguments submitted in response to the Commission's request for comments, the Commission instituted proceedings to explore further the issues raised by NSCC's application. Toward that end, the Commission provided an opportunity for oral presentation of data, views, and arguments regarding NSCC's application on June 16–18, 1976. At the conclusion of those hearings and in accordance with the requirements of the Act, the Commission temporarily registered NSCC, subject to several terms, conditions, and directives.[7]

B. The Registration Order

The Registration Order reviewed NSCC's application in light of the requirements of the Securities Acts Amendments of 1975 ("1975 Amendments"), in which Congress directed the Commission to foster the development of a National System.[8] The Commission determined that granting NSCC's application for temporary registration was critical to the establishment of the National System and accordingly approved NSCC's application, including the two phase merger proposal. In accordance with Section 17A(b)(3) and Rule 17Ab2–1(c)(1), the Commission determined that (i) NSCC was so organized and had the capacity to safeguard securities and funds in its control or for which it was responsible; (ii) NSCC's rules did not impose any schedule of prices or fix rates for services rendered by participants; and (iii) NSCC's rules assure the safeguarding of securities and funds which were in its custody or control or for which it was responsible.[9] The Commission stated its intention, however, to monitor carefully the effect of NSCC's registration on the National System and the securities industry and reserved the right during Phase I to reverse or to modify substantially its decision to register NSCC temporarily. Furthermore, the Registration Order provided that NSCC could not begin Phase II until NSCC met certain substantial conditions summarized below:[10]

1. NSCC was required to establish full interfaces with the Midwest Clearing Corporation ("MCC"), the Pacific Clearing Corporation ("PCC"), and the Stock Clearing Corporation of Philadelphia ("SCCP") without charging a fee to those clearing corporations, their participants, or to NSCC's participants for using the interfaces (the "Free Interface Condition"); [11]

2. NSCC was required to provide, at cost, efficient facilities through which a broker or dealer located outside of New York City, either directly or through an agent, including a registered clearing corporation, could compare Amex, NYSE, and OTC transactions eligible for comparison at NSCC (the "Remote Comparison Condition");

3. NSCC was required to permit competing clearing corporations to use NSCC's branch network, provided they agreed to pay a proportionate share of the network's operating costs (the "Common Branch Facility Condition"); and

4. NSCC was required to furnish to any requesting clearing corporation, without charge, computer programs for OTC trade comparison. In addition, the comparison of all OTC transactions between participants in two different clearing agencies was required to be performed by one clearing agency at no charge to the other clearing agency. If no other clearing agency was willing to operate the "national" OTC comparison service, NSCC was required to compare all OTC transactions between participants in different clearing agencies without separate charge to participating clearing agencies (the "OTC Comparison Condition").[12]

C. Modifications of the Registration Order

After the Commission issued the Registration Order, NSCC began its Phase I operations and developed plans for Phase II. The Commission, pursuant to its general oversight authority under the Act and in accordance with the specific directives of the Registration Order, monitored NSCC's operations and services, as well as NSCC's effects on other clearing agencies and on the securities industry as a whole. This oversight was accomplished, among other things, through the Commission's review of numerous proposed rule changes filed by NSCC and other clearing agencies, pursuant to Section 19(b) of the Act and Rule 19b–4 (17 CFR 240.19b–4) thereunder, the review of notices sent by the clearing agencies to their participants and filed with the Commission according to Rule 17a–22 (17 CFR 240.17a–22), and the inspection of NSCC's activities.

In September 1978, then Chairman Williams told NSCC in a letter than NSCC could terminate its contract with BNCC for facilities management of the OTC processing stream, and instead, could process OTC trades through SIAC. The letter stipulated, however, that exchange-traded and OTC processing streams would have to remain separate.[13] The letter further stated that, based on the Commission's monitoring of NSCC, other clearing agencies and the securities industry, the Commission concluded that NSCC "ha[d] satisfied all of the conditions to its registration except for the installation of listed clearing in its branch offices, which ha[d] been delayed by request of the staff."[14] The letter also cautioned NSCC not to proceed further toward Phase II pending a resolution of *Bradford National Clearing Corporation et al.* v. *Securities and Exchange Commission et al., supra.*

Six days after the Chairman's letter was sent, the Court of Appeals for the District of Columbia affirmed the Registration Order.[15] The court, however, criticized the Commission's reasoning on two issues and remanded both "for further study and explication."[16] To assist the Commission's study, the Commission issued a release requesting public comment on a list of questions and published a letter to NSCC, asking NSCC to comment on the questions. The letter also provided that NSCC had to observe the conditions in the Registration Order but was released from any other conditions, such as those included in the Chairman's letter of September 13, 1978. Because of this release, NSCC developed and offered to its participants through the branch network merged exchange-listed and OTC clearance and settlement services. The letter, however, also imposed several additional restrictions on NSCC, including a provision that precluded NSCC from offering exchange-listed and OTC processing through a single account in New York City.[17]

The Commission issued the Remand Order when it finished its study.[18] The Remand Order reaffirmed NSCC's temporary registration and explained in greater detail the Commission's approval of NSCC's use of Geographic Price Mutualization and NSCC's choice of SIAC as facilities manager. The Remand Order also imposed two additional requirements on NSCC.[19]

NSCC's Rationale for the Proposed Rule Change

As noted above, the proposed rule change would permit NSCC to consolidate the clearance and settlement of exchange-listed and OTC transactions in New York City and would signify that NSCC's operational consolidation has reached Phase II. In its filing, NSCC states that, for several reasons, the proposal would facilitate the prompt and accurate clearance and settlement of securities transactions and would reduce direct and indirect processing costs for NSCC's participants.

First, under the current scheme, if a New York participant has an open long position in an exchange-listed security issue and an open short position in the same issue that was established by the participant in the third market, the participant is required to (i) arrange for two separate securities movements to settle these trades, one for the exchange-listed obligation and another for the off-board obligation; and (ii) pay two separate fees for these two movements. Under the proposed rule change, these positions would be netted, and, in general, would result in the complete elimination of the positions or in a single smaller net long or short position. Consequently, any net position could be satisfied by a smaller movement of securities for one fee, rather than two larger movements for two fees. Second, the proposal also may reduce the size of NSCC participants' clearing fund contributions because that contribution is calculated by reference to each participant's open long and short positions.[20] Third, whenever the netting process eliminates a participant's short position under the proposed rule change, that participant cannot be subject to any potential buy-in liability.[21]

III. Discussion

The Commission stated in the Registration Order that the National System, among other things, should provide participants with the ability "to compare, account for, and settle through one entity all trades in securities included in the [National] System, regardless of the location of the other party to the trade or the market in which the trade is executed ('one account processing')." [22] The Commission continues to believe that one account processing, which would be enhanced for NSCC's participants by the proposed rule change, is an important element of the National System.[23]

In addition, the Commission believes that NSCC correctly has identified significant operational reasons for approving this proposal.[24] Accordingly, we believe the proposed rule change is consistent with, and in furtherance of, the purposes of the Act because it would reduce costs and improve efficiencies for NSCC and its participants.

Approval of the proposal would permit NSCC to enter Phase II of its temporary registration. As discussed above, the Commission's continuous and close monitoring of NSCC and its effects on the securities industry has led the Commission to conclude that NSCC has satisfied, or with approval of this proposal, will be in compliance with the

[4] Securities Exchange Act Release No. 12274 (March 29, 1976), 41 FR 14455 (April 5, 1976).

[5] Section 11A(a)(2) of the Act.

[6] Section 17A(a) of the Act.

[7] Securities Exchange Act Release No. 13163 (January 13, 1977), 42 FR 3916 (January 21, 1977), National Securities Clearing Corporation, Order Granting Registration and Statement of Reasons, File No. 600–15 (the "Registration Order"). Two subsidiaries of Bradford subsequently petitioned the United States Court of Appeals for the District of Columbia Circuit for a review of the Commission's decision granting temporary registration to NSCC. The court affirmed the Commission's decision, but remanded certain issues for fuller explanation by the Commission. *Bradford National Clearing Corporation et al. v. Securities and Exchange Commission et al.*, 590 F.2d 1085, 1111 (D.C. Cir., 1978). In response to the remand, the Commission issued a final order addressing the issues remanded by the court. Securities Exchange Act Release No. 17662 (February 20, 1981), 22 SEC Docket 129 (1981), as referenced by 46 FR 14244 (February 26, 1981) ("Remand Order").

[8] *See supra*, note 6.

[9] The Registration Order provides at 42 FR 3927 that the Commission would review these determinations with respect to the consolidated system before permitting NSCC to begin Phase II. As discussed *infra*, the Commission has carefully monitored NSCC and expressly reaffirms its findings that NSCC and its rules insure the safeguarding of securities and funds, and that NSCC does not fix participants' prices. *See* note 19 *infra* for discussions of NSCC's price schedule and choice of facilities manager. *See also* File No. SR–NSCC–82–5, Securities Exchange Act Release No. 18744 (May 17, 1982), 47 FR 22285 (May 21, 1982) (financial protections and applicant and participant standards for broker-dealers) modified by File No. SR–NSCC–82–10, Securities Exchange Act Release No. 18417 (August 23, 1982), 47 FR 37990 (September 16, 1982); File No. SR–NSCC–82–13, Securities Exchange Act Release No. 19191 (October 29, 1982), 47 FR 50597 (November 8, 1982) (applicant and participant standards for banks); File No. SR–NSCC–81–7, Securities Exchange Act Release No. 19230 (November 10, 1982), 47 FR 51969 (November 18, 1982) (clearing fund requirements for bank participants).

As discussed *supra* at note 2, the Commission currently is determining whether NSCC satisfies all of the Act's Requirements and should be granted full registration in accordance with Rule 17Ab2–1(c)(2) (17 CFR 240.17Ab2–1(c)(2)).

[10] 42 FR 3929–3935 and 3938. A number of minor conditions contained in the Registration Order have been omitted from this summary.

[11] NSCC also was directed to establish appropriate free links with the Boston Stock Exchange Clearing Corporation ("BSECC") and the now-deregistered TAD Depository Corporation ("TAD") BSECC is now linked with, and is a participant in, NSCC. TAD's deregistration was ordered by the Commission in Securities Exchange Act Release No. 18583 (March 22, 1982), 47 FR 13282 (March 29, 1982).

[12] The OTC Comparison Condition further provided that a clearing agency that did not wish to compare OTC transactions executed between its participants could contract with another clearing agency for those services to be performed for a fee. Registration Order at note 175. SIAC, as NSCC's facilities manager, now performs all OTC trade comparison services for MCC, PCC, and SCCP. Securities Exchange Act Release No. 18277 (November 30, 1981), 45 FR 58239 (November 30, 1981), approving File Nos. SR–MCC–81–7, SR–PCC–81–2, and SR–SCCP–81–6. We understand that, in connection with operating NSCC's national OTC comparison system, NSCC does not charge a fee beyond the facilities management costs it incurs for operating that program for the participating clearing agencies. Those arrangements, negotiated by the participating clearing agencies, appear to be consistent with the Registration Order.

[13] Letter from the Honorable Harold M. Williams, former Chairman, Securities and Exchange Commission, to Mr. Jack Nelson, President, NSCC, September 13, 1978, at 1.

[14] *id.*, at 4.

[15] 590 F.2d at 1111.

[16] *Id.* The issues remanded were the Commission's approval of: (i) NSCC's pricing policy under which NSCC charges participants the same basic fees for transactions compared, cleared, and settled through its branch network as for transactions compared, cleared, and settled through its New York City facility ("Geographic Price Mutualization" or "GPM"); and (ii) NSCC's selection, without competitive bidding, of SIAC as facilities manager of NSCC's system.

[17] Securities Exchange Act Relase No. 15640 (March 14, 1979), 44 FR 17636 (March 23, 1979), including a letter from the Honorable Philip A. Loomis, Jr., Commissioner, to Mr. Jack P. Nelson, President NSCC, March 15, 1979. *See also* File No. SR–NSCC–79–11 approved by Securities Exchange Act Release No. 16213 (September 21, 1979), 44 FR 56062 (September 28, 1979).

[18] *See* note 7 *supra*.

[19] NSCC was required to submit a new fee schedule supporting NSCC's representation that it would operate each branch office only as long as that office produced revenues sufficient to cover operating costs. NSCC submitted such a fee schedule to the Commission pursuant to section 19(b)(3)(A) of the Act. File No. SR–NSCC–81–10, Securities Exchange Act Release No. 18327 (December 11, 1981), 46 FR 61379 (December 16, 1981).

NSCC also was required to submit a report explaining how NSCC had decided to conduct its clearing operations. NSCC filed this report, as prepared by NSCC's independent public accountants, and the Commission published notice of the report's contents as "Notice of Submission of Report Evaluating Facilities Management Alternatives By NSCC," File No. S7–916, Securites Exchange Act Release No. 18298 (December 1, 1981), 46 FR 60062 (December 8, 1981).

[20] *See* NSCC Rule 4 and NSCC Procedures, XIV.

[21] Notwithstanding those benefits, the proposal also would permit NSCC to maintain separate exchange-traded and third market processing streams for participants that so desired.

[22] 42 FR at 3920 (footnotes omitted).

[23] The Commission also continues to believe that: while a participant should be able to obtain one account processing through one clearing entity, the participant should be able also " " " to compare trades through the clearing entity affiliated with the marketplace in which the trade was executed and direct delivery of the compared trade to the clearing entity the participant selects to perform the accounting (*i.e.*, clearing) operation.

Id. at 3921.

[24] *See supra* at Section II of this Order.

UMI

conditions precedent to Phase II.[25] Moreover, the Commission is not aware of any reason for delaying further the beginning of Phase II. The non-New York clearing agencies currently offer their participants the consolidated clearance and settlement processing that NSCC seeks to provide. Thus, this Order will not provide NSCC with a unique service, but merely will permit it to experience the efficiencies already enjoyed by competing non-New York clearing agencies. At the same time, because the proposed rule change is only applicable to consolidated processing at NSCC's New York City office,[26] it will enable NSCC's New York City participants to realize the economies associated with consolidated secondary trade clearance and settlement processing. Finally, based on the Commission's experience, the Commission believes that the non-New York clearing agencies generally find it uneconomical to compete directly for the secondary trade clearance and settlement business of New York broker-dealers [27] and that, as a result, clearing agency competition should not be affected by the rule change.

Although the Commission is allowing NSCC to enter Phase II, the Commission emphasizes that, under this Order, the terms, conditions, and directives of the Registration Order, as modified by the Remand Order and other Commission letters, releases, or actions, remain in effect to the extent practicable.[28]

The Commission continues to believe that these terms, conditions, and directives are beneficial to the development of the National System and intends (i) to continue to monitor NSCC and its impact on broker-dealers, banks, other clearing agencies and the securities markets; and (ii) to amend, modify, or expand the terms, conditions, and directives in NSCC's registration whenever the Commission deems such modifications necessary or appropriate, in accordance with the requirements of the Act.

Accordingly, it is therefore ordered, pursuant to Section 19(b) of the Act, that the proposed rule change (SR–NSCC–82–28) be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83–11989 Filed 5–3–83; 8:45 am]

BILLING CODE 8010–01–M

---

[25] Pursuant to the Remand Order, NSCC is permitted to operate its branch offices only to the extent that each office produces revenues sufficient to cover the cost of that branch's operation. The Commission continues to monitor, in a proceeding separate from this order, the relationship between branch office costs and branch office revenues, and in that setting will take whatever steps are necessary to ensure the continued fulfillment of that condition to NSCC's registration.

[26] As noted, NSCC has offered merged processing in its branch facilities at Geographically Mutualized Prices for several years. *See supra* at notes 16 and 17.

[27] *See* discussion in the Remand Order.

[28] For example, NASCC continues to be required to provide free interfaces to other registered clearing agencies in accordance with the terms of the Registration Order. *See also* Securities Exchange Act Release No. 18823 (June 23, 1982), 47 FR 26512 (June 30, 1982), approving File No. SR–MCC–82–8 and SR–MSTC–82–11, which indicated at note 7 that the "Commission generally has required that the interface costs incurred by each interfacing clearing member * * * be absorbed by that interfacing clearing agency and mutualized across its own participant base." The Registration Order, as supplemented by Release No. 18823, thus contemplated that the free interface requirement for clearing corporations would be a central characteristic of the National System.

Of course, the Commission recognizes that some requirements imposed on NSCC during the course of NSCC's temporary registration have become obsolete. For example, NSCC no longer can establish appropriate links with TAD since TAD has been dissolved and is not registered with the Commission as a clearing agency. *See supra* at note 11.

[Release No. 13198; 812–5480]

New York Localities Legal Cash Access Trust; Filing of Application for an Order of Exemption

April 28, 1983.

Notice is hereby given that New York Localities Legal Cash ACCESS Trust ("Applicant") 200 Park Avenue, Suite 2522, New York, NY 10017, a Massachusetts business trust registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on March 7, 1983, for an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Rules 2a–4 and 22c–1 thereunder to the extent necessary to permit Applicant to compute its price per unit to the nearest one cent on a unit value of one dollar. In all other respects, portfolio securities held by Applicant will be valued in accordance with the views set forth in Investment Company Act Release No. 9786 (May 31, 1977). All interested person are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below and to the Rules under the Act for the text of Rules 2a–4 and 22c–1.

Applicant states that it is a "money market" fund whose investment objective is to provide high current income consistent with stability, safety and liquidity of principal. The application states that Applicant seeks to meet this objective by investing in a portfolio of "money-market" securities meeting specified quality standards and which are legal investments for "public corporations" as that term is defined in Section 66 of the New York State General Construction Law.

Applicant states that the maintenance of a constant net asset value per unit is a crucial factor in the purchase and holding of its units. Applicant asserts that by meeting the conditions set forth below and by valuing its units to the nearest one cent on a unit value of one dollar, it can maintain a constant value for its unitholders along with full liquidity and a satisfactory yield. In addition, Applicant states that its adherence to the conditions set forth below will substantially reduce the likelihood of significant variations from a constant unit price and the likelihood of any dilution of the assets and returns of incoming or outgoing unitholders.

Section 6(c) of the Act provides, in pertinent part, that the Commission may by order upon application, conditionally or unconditionally exempt any person, security or transaction or any class or classes of persons, securities or transactions, from any provision or provisions of the Act and any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicant requests an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Rules 2a–4 and 22c–1 under the Act to permit Applicant to compute its price per unit to the nearest one cent on a unit value of one dollar.

In support of this request, Applicant submits that the issuance of the requested order is necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicant states that unitholders who purchase its units with the expectation of receiving high current income and preservation of principal would be unfairly treated should there be a deviation from $1.00 per unit. Applicant agrees that the following conditions may be imposed in any order granting the exemptive relief requested:

1. Applicant's board of trustees shall have determined, in good faith based upon a full consideration of all material factors, that, absent unusual circumstances, the pricing method hereby applied for will fairly reflect the value of each unitholder's interest in Applicant and that Applicant will continue to use such method only so long as the board of trustees believes that it fairly reflects the value of each unitholder's interest.

2. Applicant's board of trustees, in supervising Applicant's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, undertakes—as a particular responsibility within its overall duty of care owed to Applicant's unitholders—to assure to the extent reasonably practicable, taking into account current market conditions affecting Applicant's investment objective, that Applicant's price per unit as computed for the purposes of distribution, redemption and repurchase, rounded to the nearest one cent, will not deviate from one dollar.

3. Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable price per unit. Applicant will not purchase any instrument with a remaining maturity [1] of more than one year; nor will it maintain a dollar-weighted average portfolio maturity [2] in excess of 120 days.

4. Applicant will limit its portfolio investments, including repurchase agreements, to those instruments which are denominated in United States dollars and which the board of trustees of Applicant determines present minimal credit risks, and which are of "high quality" as determined by any major rating service, or, in the case of any instrument that is not rated, of comparable quality as determined by the board of trustees.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 23, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personnally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filled with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc 83–11947 Filed 5–3–83; 8:45 am]

BILLING CODE 8010–01–M

---

[1] In determining dollar-weighted average portfolio maturity and the maturity of any instrument, Applicant states that it will use the definition of "maturity of an instrument" contained in proposed Rule 2a–7, Investment Company Act Release No. IC–12206 (January 29, 1982), whether or not the proposed rule is withdrawn, or, on the effectiveness of a final rule, the definition contained in such final rule. Applicant will also treat instruments which, at the time of purchase by Applicant, have been called for redemption in one year or less, as maturing within one year.

[2] In fulfilling this condition, if the disposition of a portfolio instrument results in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant will invest its available cash in such a manner as to reduce the dollar-weighted average portfolio maturity of 120 days or less as soon as reasonably practicable.

[Release No. 13197; 812–5453]

Paine Webber/CMJ Properties, LP et al.; Application Filing

April 28, 1983.

In the matter of: Paine Webber/CMJ Properties, LP and PW Shelter Fund, Inc., c/o Paine Webber Properties Incorporated, 100 Federal Street, Boston, MA 02110, Filing of an application for an order pursuant to section 6(c) of the act exempting applicant from all provisions of the act.

Notice is hereby given that Paine Webber/CMJ Properties, LP ("Partnership"), a Delaware limited partnership, and PW Shelter Fund, Inc. ("Managing General Partner" and together with the Partnership, collectively referred to herein as "Applicants"), filed an application on February 10, 1983, and an amendment thereto on April 6, 1983, for an order of the Commission, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act"), exempting the Partnership from all provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicants represent that the Partnership was formed under the Delaware Uniform Limited Partnership Act in December, 1982, as a vehicle for private investment in government-assisted apartment complex projects in accordance with the policies and objectives of Title IX of the Housing and Urban Development Act of 1968. To this end, the Partnership proposes to operate as a "two-tier" partnership; i.e., the Partnership will invest in other limited partnerships ("Local Limited Partnerships"), that in turn, will be engaged in the development, rehabilitation, ownership and operation of housing for low and moderate income persons ("Projects"). According to the application, the General Partners of the Partnership are the Managing General Partner and Properties Associates. Applicants further expect that Corcoran, Mullins, Jennison, Inc., or affiliates thereof ("Local General Partners") will serve as the general partners of most of the Local Limited Partnerships. Applicants also expect the Local General Partners to enter into a consulting agreement with Paine Webber Properties Incorporated ("Paine Webber Properties"), under which, Paine Webber Properties will furnish to the Local General Partners investment analysis and general financial advice in connection with the operation of the Local Limited Partnerships. Applicants state that the Local General Partners are not related to or affiliated with the General Partners of the Partnership in any way.

Applicants represent that the Partnership is organized as a limited partnership because that form of organization is the only one that provides investors with both liability limited to their capital investment and the ability to claim on their individual tax returns the deductions, losses, credits and other tax items arising from the Partnership's interests in Local Limited Partnerships which develop, rehabilitate, own and operate the Projects. Applicants further represent that legal counsel to the Partnership have advised that the Partnership should be classified as a partnership for federal income tax purposes and not as an association taxable as a corporation. Applicants assert that counsel will also render an opinion to the effect that the liability of each person who becomes a limited partner of the Partnership, as well as the liability of the Partnership as a limited partner of each Local Limited Partnership, will be limited to the amount of his or its capital contribution to such partnership, subject to certain exceptions under applicable laws.

According to the application, the Partnership's investment objectives are to provide tax benefits on a current basis, to obtain reasonable protection for invested capital, to provide potential for appreciation, subject to considerations of capital preservation, and to provide potential for future cash distributions from operations (on a limited basis), or from the refinancing or

sale of Projects owned by Local Limited Partnerships, or from the sale of interests in Local Limited Partnerships.

Applicants state that on December 21, 1982, the Partnership filed a registration statement under the Securities Act of 1933, as amended (the "Securities Act"), pursuant to which the Partnership intends to offer publicly 10,000 units of limited partnership interest ("Units") at $1,000 per Unit with a minimum investment of $5,000 per investor. Purchasers of Units will become limited partners ("Limited Partners") of the Partnership. In the event that subscriptions for more than 10,000 Units are received, the Partnership has registered 15,000 Units and has granted its sales agent, Paine, Webber Jackson & Curtis Incorporated ("Sales Agent") that it will have net proceeds of such offering a minimum of $1,740,000 and a maximum of $8,900,000 ($13,350,000 if the Sales Agent exercises its right to increase the number of Units offered and sold to 15,000) available for investment after deduction of sales commissions and other expenses of the offering. Applicants represent that such net offering proceeds will be used primarly to invest in Local Limited Partnerships and also to fund various contingency and working capital reserves. Applicants state that the Partnership intends to invest only in Local Limited Partnerships in which CMJ or another experienced real estate developer will agree to serve as the local general partner.

Applicants further state that subscriptions for Units must be approved by the Managing General Partner, and that such aprpoval will be made conditional upon representations as to suitability of the investment for each subscriber, including (a) compliance with certain standards in regard to net worth and/or taxable income imposed by various states in which Units are expected to be offered and (b) the investor's capacity to evaluate the suitability for him of an investment in Units, based upon his investment objectives, financial situations and needs.

Applicants state that the Partnership will be controlled by the General Partners, and that the Limited Partners, consistent with their limited liability status, will not be entitled to participate in the control of the business of the Partnership. It is represented that Limited Partners owning a majority of Partnership interests will have the right to amend the Partnership Agreement, to remove any General Partner and elect a replacement therefor, to sell or otherwise dispose of all or substantially all of the Partnership's assets and to dissolve the Partnership. Applicant further represents, however, that such rights may not be exercised in the absence of an opinion of counsel or other specified authority to the effect that such exercise will not adversely affect the limited liability of the Limited Partners or the tax status of the Partnership. Applicants state that under the Partnership Agreement, each Limited Partner is entitled to review all books and records of the Partnership at any and all reasonable times.

Applicants state that the substantial fees and other forms of compensation that will be paid to the Managing General Partner and its affiliates have not been negotiated through arm's length neogtiations. They assert, however, that the terms of all such compensation will be fair and not less favorable to the Partnership than would be the case if such terms had been negotiated with independent third parties. Applicants also state that the Local General Partner will receive from the Local Limited Partnerships nonrecurring acquisition fees, in substantial amounts, which have been negotiated at arm's length by the General Partners and the Local General Partners.

Applicants represent that all proceeds of the public offering of Units will initially be placed in an escrow account with The First National Bank of Boston (the "Escrow Agent"). Pending release of offering proceeds to the Partnership, the Escrow Agent will have the right, at the direction of the Partnership, to invest escrowed funds in short-term debt securities such as United States government securities, securities issued by states or political subdivisions thereof (including, but not limited to, industrial revenue bonds), bank obligations, prime commercial paper and other short-term corporate obligations of comparable investment quality, repurchase agreements covering any of the foregoing securities or registered investment companies holding such securities. When subscriptions for at least 2,000 Units have been received and certain other conditions have been satisfied, funds in escrow will be released to the Partnership and held in trust pending investment in Local Limited Partnerships. Applicants further state that after the Partnership has made an initial capital contribution to a Local Limited Partnership, other funds allocated for subsequent investment in that Local Limited Partnership will be temporarily invested by the Partnership in investments referred to above.

Applicants state that the Partnership expects to file with the Commission, pursuant to Section 15(d) of the Securities Exchange Act of 1934 (the "Exchange Act"), all required annual reports, quarterly reports and current reports on Forms 10–K, 10–Q and 8–K, respectively, as well as any other reports required by that act. In addition to those reporting requirements, Applicants state that the Partnership will, under the terms of the Partnership Agreement, be required to provide comprehensive reports to Limited Partners on a periodic basis.

Applicants state that the Partnership Agreement provides that the Partnership shall indemnify the General Partners for losses sustained by them or their affiliates in connection with the business of the Partnership. Applicants further state, however, that insofar as indemnification for liabilities under the Securities Act may be permitted to the General Partners, the Partnership has been advised that in the opinion of the Commission, such indemnification is contrary to public policy as expressed in said Act and is therefore unenforceable. Therefore, the Partnership Agreement further provides that there shall be no indemnification in connection with any claim or settlement involving the Securities Act unless (a) the persons seeking indemnification are successful in defending such action and (b) such indemnification is specifically approved by a court that has been advised as to the current position of the Commission regarding such indemnification.

Without conceding that the Partnership is an investment company defined in the Act, Applicants request that the Partnership be exempted from the provisions of the Act pursuant to Section 6(c). Section 6(c) of the Act provides, as herein pertinent, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction from any provision of the Act and rule thereunder if, and to the extent that, such exemption is necessary or appropriate in the public interest and consistent with the provision of investors and the purposes fairly intended by the policy and provisions of the Act.

In support of their request, Applicants assert that investment in low and moderate income housing in accordance with the national policy expressed in Title IX is not economically suitable for private investors without the tax and organizational advantages of the limited partnership form. Applicants assert that the limited partnership structure provides the only means of bringing private equity capital into government-assisted housing, particularly because public investors typically consider investment in low and moderate housing programs as involving greater risk than real estate investment generally. Applicants state that the limited partnership form insulates each Limited Partner from personal liability and limits financial risk incurred by the Limited Partner to the amount he has invested in the program, while also allowing the Limited Partner to claim on his individual tax return his proportionate share of the income and losses from the investment.

Applicants assert that despite the advantage it affords investors in government-assisted housing, the limited partnership form of organization is incompatible with fundamental provisions of the Act. Thus, an exemption from these basic provisions is needed, and, Applicants contend, it is appropriate that such exemption be granted so as not to discourage use of the two-tier limited partnership entity. To do so, Applicants assert, would frustrate the public policy established by the housing laws.

Applicants further argue that interests in the Partnership will be sold only to relatively sophisticated investors who must meet specified suitability standards which the Partnership believes are consistent with the security laws of all states where the Units will be sold, and these investors will receive extensive reports concerning the Partnership's business and operations. Among the suitability standards is a requirement that investors either have a net worth (exclusive of home, furnishings and automobile) of at least $200,000 or have a net worth of $50,000 and some portion of their income subject to a federal income tax rate of 39%.

According to the application, the Partnership believes that all potential conflicts of interest between the General Partners and the Limited Partners are disclosed in its prospectus, including the receipt of commissions, fees and other compensation by the General Partners and their affiliates, competition by Local Limited Partnerships with affiliates of the General Partners for properties, and the participation by an affiliate of the General Partners as the Sales Agent for the offering.

Applicants further assert that the Partnership Agreement and prospectus contain various provisions designed to eliminate or significantly reduce these and other conflicts of interest. For example, in connection with investment opportunities which might be available to more than one entity which the General Partners or one of their affiliates advise or manage, the decision as to the suitability of the investment for a particular entity will be based upon a review of the investment objectives of each entity and upon such factors as available cash, maximum investment limit for acquisition, estimated income tax effects, leverage policies, any regulatory restrictions on investment policies and the length of time funds have been available for investment. If a particular investment is determined to be suitable for more than one entity, Applicants represent that priority will be given to the entity having had uninvested funds for the longest period of time.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 23, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

Philadelphia Stock Exchange, Inc.; for Unlisted Trading Privileges in Certain Securities; Applications for Unlisted Trading Privileges and of Opportunity for Hearing

April 27, 1983.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Act of 1934 and Rule 12f–1 thereunder, for unlisted trading privileges in the following stocks:

Carling O'Keefe Limited
Common Stock, No Par Value (File No. 7–6585)

Data General Corporation
Common Stock, $.01 Par Value (File No. 7–6586)

Diebold, Inc.
Common Stock, $1.25 Par Value (File No. 7–6587)

Emery Air Freight Corporation
Common Stock, $.20 Par Value (File No. 7–6588)

Mary Kay Cosmetics, Inc.
Common Stock, $.10 Par Value (File No. 7–6589)

Numac Oil & Gas Ltd.
Common Stock, No Par Value (File No. 7–6590)

Shaklee Corporation
Common Stock, No Par Value (File No. 7–6591)

Trans World Airlines, Inc.
Common Stock, $.01 Par Value (File No. 7–6592)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before May 18, 1983 written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13199; 811-3132]

Prime Money Market Trust; Filing of Application for an Order Declaring That Applicant Has Ceased To Be an Investment Company

April 28, 1983.

Notice is hereby given that Prime Money Market Trust ("Applicant"), 421 Seventh Avenue, Pittsburgh, PA 15219, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on February 28, 1983, for an order of the Commission, pursuant to Section 8(f) of the Act, declaring that Applicant has ceased to be an

VOL

4
1983
UMI

investment company. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The application states that on January 26, 1983, Applicant's board of trustees recommended to shareholders that Applicant's affairs be wound-up and terminated. According to the application, a Unanimous Consent of Shareholders approving Applicant's termination was executed on January 26, 1983. On the same day, Applicant was dissolved pursuant to its Declaration of Trust and applicable state law. The application further states that Articles of Dissolution were filed with the Secretary of State of the Commonwealth of Massachusetts on February 8, 1983, pursuant to applicable state law.

The application states that, prior to January 26, 1983, security holders' shares were voluntarily redeemed by Applicant at their net asset value. Finally, Applicant states that it is not now engaged, nor does it propose to engage in any business activities other than those necessary for the winding up of its affairs.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by Order, and, upon the effectiveness of such Order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 23, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13194, 812-5419]

Prudential-Bache Option Growth Fund, Inc.; Filing of Application for an Order Pursuant to Section 6(c) of the Act Exempting Applicant From the Provisions of Sections 18(f)(1) and 17(f) of the Act

April 26, 1983.

Notice is hereby given that Prudential-Bache Option Growth Fund, Inc. (formerly Chancellor Option Growth Fund, Inc.) ("Applicant"), 100 Gold Street, New York, NY 10292, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on December 27, 1982, and an amendment thereto on March 18, 1983, for an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Sections 18(f)(1) and 17(f) of the Act to the extent necessary to permit Applicant to invest in stock index futures and related options. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the text of the sections from which exemption is requested.

The application states that Applicant's investment objective is to seek a high total return, consistent with reasonable risk. Applicant represents that it is permitted to hedge its portfolio, which will be comprised of common stocks and warrants to purchase common stocks, through the use of stock index futures contracts and related options. Applicant is advised by The Prudential Insurance Company of America ("Prudential"). Prudential-Bache Securities Inc. ("Prudential-Bache") is Applicant's administrator and is also distributor of Applicant's shares. Prudential-Bache is an indirect, wholly owned subsidiary of Prudential.

Applicant states that a stock index assigns relative weightings to the common stocks included in the index, and the index fluctuates with changes in the market values of the common stocks so included. A stock index futures contract is a bilateral agreement pursuant to which two parties agree to take or make delivery of an amount of cash equal to a specified dollar amount times the difference between the stock index value at the close of the last trading day of the contract and the price at which the futures contract is originally struck. No physical delivery of the underlying stocks in the index is made. Stock index futures contracts, and the commodities exchanges on which they are traded, are subject to regulation by the Commodity Futures Trading Commision ("CFTC") under the Commodity Exchange Act ("CEA").

Applicant represents that, unlike when Applicant purchases or sells a security, no consideration is paid or received by Applicant upon the purchase or sale of a futures contract. Initially, Applicant will be required to deposit, for the account and in the name of the broker, in a segregated account with its custodian an amount of cash or United States Treasury bills equal to approximately 5% of the contract amount. This amount is known as initial margin. Applicant represents that the nature of initial margin in futures transactions is different from that of margin in security transactions in that futures contract margin does not involve the borrowing of funds by the customer to finance the transactions. Rather, Applicant asserts that the initial margin is in the nature of a performance bond or good faith deposit on the contract which is returned to Applicant upon termination of the futures contract assuming all contractual obligations have been satisfied. The amount of initial margin on deposit may be retained by the broker if, among other things, Applicant defaults in making payment upon termination of the contract or of the variation margin discussed below. Subsequent payments, called variation margin, to and from the broker, a process known "as marking to market," will be made on a daily basis as the price of the underlying stock index fluctuates, thereby making the long and short positions in the futures contract more or less valuable. Applicant further states that variation margin does not represent a borrowing of or loan by Applicant but is instead the daily settlement between Applicant and the broker of the amount one would owe the other if on such day the contract expired.

Applicant represents that it has undertaken that, on the occasions that it has the right to receive variation margin payments from the broker, it will promptly demand payment by the broker of such amounts upon notification by the broker that such amounts are payable. Any such funds received by Applicant will be held by the Fund's custodian. At any time prior to expiration of the futures contract, Applicant may elect to close the position by taking an opposite position, which will operate to terminate Applicant's position in the futures contract. A final determination of variation margin is then made, additional cash is required to be paid by or released to Applicant and Applicant realizes a loss or a gain. Applicant further states that it intends to purchase call and put options on stock index futures which are traded on a United States exchange or board of trade and may sell such options to terminate an existing position.

Applicant states that its stock index futures contracts are governed by the terms and conditions of such contracts determined by the exchanges on which such contracts are traded, and that its futures positions are evidenced by confirmations of transactions received from the executing broker. Applicant undertakes that its custodian will have copies of such exchange terms and conditions and that the custodian will have possession of such confirmations.

Applicant represents that in connection with its request to the CFTC that such agency confirm its opinion that Applicant is not within the definition of "commodity pool" under the CEA, Applicant has agreed that it will not engage in transactions in stock index futures contracts or related options for speculation but only as a hedge against changes in the values of securities held in Applicant's portfolio or which it intends to purchase and where the transactions are economically appropriate to the reduction of risks inherent in the ongoing management of Applicant. Applicant also represents that it may not purchase or sell stock index futures contracts or purchase related options if immediately thereafter more than one-third of its portfolio would be hedged. In addition, Applicant states that it may not purchase stock index futures contracts or purchase related options if immediately thereafter the sum of the amount of initial margin deposits on Applicant's existing futures positions and premium paid for related options would exceed 5 percent of the market value of Applicant's total assets. In instances involving the purchase of stock index futures contracts by Applicant, an amount of cash and cash equivalents, equal to the market value of the futures contracts, will be deposited in a segregated account with Applicant's custodian to collateralize the position and thereby insure that the use of such futures is unleveraged. According to the application, the full collateralization of a long stock index futures contract makes the use of such futures consistent with reverse repurchase agreements, standby commitments and other similar arrangements discussed in Investment Company Act Release No. 10666 (April 18, 1979) ("Release 10666").

Applicant states that if, as assumed in previous interpretive releases, the Commission has jurisdiction over leveraged investments of registered investment companies generally pursuant to Section 18 of the Act, a stock index futures contract may, because of Applicant's contingent obligation to pay variation margin during the life of the contract, constitute a "senior security" (as that term is defined in Section 18(g) of the Act), for the purpose of Section 18(f). Since such an obligation would not run to a bank, the purchase of a stock index futures contract and of a put or call option thereon by Applicant may constitute the issuance of a senior security by Applicant in violation of Section 18(f)(1) of the Act. In addition, to the extent that variation margin payments to Applicant in connection with a stock index futures contract are held overnight by a broker, Applicant may be unable to comply with the provisions of Section 17(f) of the Act.

Applicant therefore requests an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Sections 18(f)(1) and 17(f) of the Act to the extent necessary to permit Applicant to invest in stock index futures contracts and related options.

In support of the relief requested, Applicant states that it believes that commodities future contracts, including stock index futures contracts, are not "securities" for the purpose of the Act, and, thus, such contracts cannot constitute "senior securities" under Section 18(g) or be subject to regulation under Section 18(f)(1). Furthermore, Applicant states that even if such contracts are considered to be senior securities under the Act, the proposed use by and limitations on Applicant with respect to such contracts do not give rise to the speculative abuses which Section 18(f)(1) was designed to prevent. With respect to this point, Applicant asserts that the limitations on Applicant's use of such contracts and the requirement, in connection with the purchase of a stock index futures contract, that Applicant deposit in a segregated account cash or cash equivalents equal to the market value of such contracts are, in fact, consistent with the procedures set forth in Release 10666 to minimize the speculative aspects of the leveraged investments which were the subject of Release 10666.

Applicant further states that it does not believe that stock index futures contracts and related options are "securities" or that the legislative intent of the term "similar investments" reaches such contracts and options. In addition, Applicant states that it believes a separate custodian agreement among Applicant, its custodian bank and the futures commission merchant, pursuant to which Applicant's margin deposits are held by the custodian subject to disposition by the futures commission merchant in accordance with the CFTC Rules and the rules of the applicable commodities exchange, will be consistent with the provisions of Section 17(f).

Section 6(c) of the Act provides, in pertinent part, that the Commission may, by order upon application, conditionally or unconditionally exempt any person, security or transaction from many provisions of the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant asserts that its proposed use of stock index futures contracts and related options, subject to the limitations set forth above as to the percentage of the portfolio which may be hedged, the percentage of its net assets which may be deposited as margin and the collateralization of the market value of the futures contracts, is in the best interests of Applicant and its shareholders and consistent with the policy and provisions of the Act. In addition, to the extent that Sections 18(f)(1) and 17(f) of the Act may be deemed to apply to Applicant's proposed use of stock index futures contracts and related options, Applicant submits that the requested exemption from such sections is appropriate in the public interest and consistent with the protection of investors.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 23, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing

SMALL BUSINESS ADMINISTRATION

Proposed Information Collections Submitted for OMB Review

AGENCY: Small Business Administration.

ACTION: Notice of Proposed Information Collections Submitted for OMB Review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed reporting and recordkeeping requirements to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the agency has made such a submission.

DATE: Comments must be received on or before June 1, 1983. If you anticipate commenting on a submission but find that time to prepare will prevent you from submitting comments promptly, you should advise the OMB reviewer and the agency clearance officer of your intent as early as possible. COPIES: Copies of the proposed forms, the requests for clearance (S.F. 83), supporting statements, instructions, transmittal letters, and other documents submitted to OMB for review may be obtained from the Agency Clearance Officer. Comments on the items listed should be submitted to the Agency Clearance Officer and the OMB Reviewer.

FOR FURTHER INFORMATION CONTACT:

Agency Clearance Officer: Elizabeth M. Zaic, Small Business Administration, 1441 L St., NW., Room 200, Washington, D.C. 20416, Telephone: (202) 653-8538

OMB Reviewer: J. Timothy Sprehe, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3235, New Executive Office Building, Washington, D.C. 20503, Telephone: (202) 395-4814

Culturally Significant Objects Imported for Exhibition; Determination

April 28, 1983.

Notice is hereby given of the following determination: Pursuant to the authority vested in me by the act of October 19, 1965 (79 Stat. 985, 22 U.S.C. 2459) and Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), I hereby determine that the objects in the exhibit, "The Precious Legacy: Judaic Treasures from the Czechoslovak State Collections", (included in the list [1] filed as a part of this determination) imported from abroad for the temporary exhibition without profit within the United States are of cultural significance. These objects are imported pursuant to a loan agreement between the Ministry of Culture of the Czech Socialist Republic representing the State Jewish Museum in Prague and the Smithsonian Institution. I also determine that the temporary exhibition or display of the listed exhibit objections at several museums in the United States, beginning on or about November 8, 1983, to on or about July 29, 1985, is in the national interest.

Public notice of this determination is ordered to be published in the **Federal Register.**

Dated: April 29, 1983.

BILLING CODE 8230-01-M

Culturally Significant Objects Imported for Exhibition; Determination

Notice is hereby given of the following determination: Pursuant to the authority vested in me by the Act of October 19, 1965 (79 Stat. 985, 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), and the Delegation of Authority from the Director, USIA (47 FR 57600, December 27, 1982), I hereby determine that the objects in the exhibit titled: "Henri Fantin-Latour: A Retrospective Exhibition" (included in the list [1] filed as a part of this determination), imported from abroad for temporary exhibition without profit within the United States, are of cultural significance. These objects are imported pursuant to agreements among The Fine Arts Museums of San Francisco, La Reunion des Musees Nationaux (France), National Museums of Canada (Ottawa) and the foreign lenders. I also determine that the temporary exhibition or display of the listed exhibit objects at The Fine Arts Museums of San Francisco, California Palace of the Legion of Honor, San Francisco, California, beginning on or about June 18, 1983, to on or about September 6, 1983, is in the national interest.

[1] An itemized list of objects included in the exhibit if filed as part of the original document.

[1] An itemized list of objects included in the exhibit is filed as part of the original document.

Public Notice of this determination is ordered to be published in the **Federal Register.**

Dated: April 28, 1983.

Jonathan W. Sloat,

General Counsel and Congressional Liaison.

BILLING CODE 8230-01-M

United States Advisory Commission on Public Diplomacy

A meeting of the U.S. Advisory Commission on Public Diplomacy will be held on Wednesday, May 11, 1983, in Room 600, 400 C Street, SW. From 10 a.m. to 12 the Commission will meet with the USIA Area Director for Africa to discuss the Agency's programs and policies in Africa. At 2:30 p.m., the Commission will meet with Ambassador Peter H. Dailey to discuss U.S. information programs in Europe. At 3:30 p.m., the Commission will meet with the USIA's Director of Press and Publications Services to discuss program policies.

Since space is limited, please call Elizabeth Fahl, (202) 485-2457, if you are interested in attending the meeting.

Eileen Binns,

Management Analyst.

FEDERAL DEPOSIT INSURANCE CORPORATION

Changes in Time and Subject Matter of Agency Meetings

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the open and closed meetings of the Board of Directors of the Federal Deposit Insurance Corporation scheduled for 2:00 p.m. and 2:30 p.m. on Monday, May 2, 1983, have been rescheduled for 11:00 a.m. and 11:30 a.m., respectively, that same day.

The Board of Directors is expected to withdraw the following matters from the agenda for consideration at the open meeting and to reschedule them for consideration at the Board's open meeting to be held at 2:00 p.m. on Monday, May 9, 1983:

Memorandum and Resolution re: Proposed amendment to Part 337 of the Corporation's rules and regulations, entitled "Unsafe and Unsound Banking Practices," to add a new section which would, with reference to the FDIC's "Statement of Policy on the Applicability of the Glass-Steagall Act to Securities Activities of Subsidiaries of Insured Nonmember Banks" issued by the Board of Directors on August 23, 1982, (1) define bona fide subsidiary; (2) limit a bank's permissible investment in a securities subsidiary; (3) require notice of intent to invest in such a subsidiary; (4) limit the permissible securities activities of nonmember bank subsidiaries; and (5) place certain other restrictions on loans, extensions of credit, and other transactions between nonmember banks and their subsidiaries or affiliates that engage in securities activities.

Memorandum and Resolution re: Uniform Interagency Community Reinvestment Act Assessment Rating System.

No earlier notice of these changes was practicable.

Dated: April 29, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

Public Health Service

42 CFR Part 57

Grants for Establishment of Departments of Family Medicine

AGENCY: Public Health Service, HHS.

ACTION: Final regulations.

SUMMARY: These regulations govern the award of grants to schools of medicine and osteopathy to assist in meeting the costs of projects to establish, maintain, or improve academic administrative units to provide clinical instruction in family medicine. These grants are authorized by section 780 of the Public Health Service Act.

DATE: June 3, 1983.

FOR FURTHER INFORMATION CONTACT: Kenneth P. Moritsugu, M.D., M.P.H., Director, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, Room 3–22, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782; Telephone (301) 436–6418.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of October 16, 1980 (42 FR 68902), the Assistant Secretary for Health, with the approval of the Secretary of Health and Human Services, proposed to add a new Subpart R to Part 57 of Title 42 of the Code of Federal Regulations to implement section 780 of the Public Health Service Act. Section 780 authorizes Federal grant support to schools of medicine or osteopathy to assist in establishing, maintaining, or improving academic administrative units to provide clinical instruction in family medicine.

Although the primary purpose of these grants is to promote the adequate supply of primary care practitioners by assisting family medicine units in medical and osteopathic schools to achieve academic parity with other comparable medical specialty units, the Department recognizes that the achievement of this objective may necessitate support of activities carried out by the units. Therefore, project support is also provided to assist with planning and developing model family medical programs and other academic and clinical activities relevant to the field of family medicine as part of the function of the unit. This support complements the grant program for predoctoral, graduate, and faculty development projects in family medicine authorized by section 786(a) of the PHS Act and implemented by 42 CFR Part 57, Subpart Q.

The public comment period on the proposed regulations closed on December 15, 1980. No comments were received during that time. Subsequently, a comment was received concerning the definition of "residency training program" in § 57.1702. This definition states that a "residency training program means a three-year residency program in family practice * * * or *the equivalent of such a program* as determined by the Secretary." (Emphasis added.) The writer suggested that the Secretary specify his determination of equivalency in the case of osteopathic medicine.

The Department believes the definition should be changed to accommodate the differences in structure between osteopathic and allopathic programs. Most postgraduate training programs leading to board certification in osteopathic medicine are two years in duration rather than three, which is the norm for allopathic residency programs in family practice. Since the authorizing statute specifically includes schools of osteopathy as eligible applicants, it seems consistent with the intention of Congress in its use of the "equivalent" language that these differences be accommodated. Therefore, the Secretary has determined only for the purposes of this regulation, that for osteopathic medicine a two-year postgraduate program, appropriately approved, will be considered "the equivalent of" a three-year residency program in family practice. Accordingly, the Department has revised the definition in § 57.1702 in response to this suggestion. This change is also reflected in the program requirements of § 57.1704(e). In addition, the following three technical revisions have been included in the final regulation. In the definition of "residency training program" in § 57.1702, the name of the family medicine residency program accrediting body has been changed from the Liaison Committee on Graduate Medical Education to the name of its successor organization, the Accreditation Council for Graduate Medical Education. In § 57.1705, the funding preference for Fiscal Year 1980 for proposed projects containing an educational program in the prevention, recognition, and treatment of alcoholism has been deleted. While the Department continues to be concerned about alcoholism, it believes that funding for grants establishing family medicine units should be based on all aspects of health care delivery in this field. Finally, the wording of the footnote in § 57.1708 has been revised.

Since the publication of the Notice of Proposed Rulemaking in October 1980, the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35) was passed. This legislation impacted heavily on the health professions programs. It amended the existing authority for section 780 accordingly:

—The existing authority for grants to schools of medicine and osteopathy to meet costs of projects to establish and maintain academic administrative units (which may be departments, divisions, or other units) to provide clinical instruction in family medicine is amended to make it clear that funds could be used to improve an existing department (§ 57.1701).

—The existing requirement that to be eligible for a grant an institution must "have control over" an approved residency program in family medicine is amended to require "have control over (or, in the case of a school of osteopathy, have control over or be closely affiliated with)" such a program (§ 57.1704).

—The existing requirement that the residency program have the capacity to enroll no less than 12 interns or residents per year is amended to require a minimum enrollment capacity of 9 (§ 57.1704).

—Other changes of a technical and conforming nature have been made to the definitions (§ 57.1702).

The respective sections of this regulation have been amended to reflect these statutory changes. Additionally, the Department has determined that the language in the Notice of Proposed Rulemaking (§ 57.1704) contains more prescriptive detail regarding requirements than is necessary for projects to be in legal compliance with this section. Accordingly, we have rewritten certain portions to delete such detail.

Paperwork Reduction Act

The recordkeeping and reporting requirements in § 57.1704 and § 57.1708 and the application forms and instructions for this grant program have been approved by the Office of Management and Budget under the Paperwork Reduction Act of 1980 (OMB Approval Numbers are 0935–0065 for the competing application form and 0935–0066 for the continuation application form).

E.O. 12291, Federal Regulation and Regulatory Flexibility Act

These regulations govern a small financial assistance program in which participation is voluntary, and have no other impact. Therefore, the Secretary has determined that this rule does not meet any of the criteria for a major rule as described by Executive Order 12291. Further, the Regulatory Flexibility Act of 1980 (Pub. L. 96–354) does not apply to these rules, since the Notice of Proposed Rulemaking was published prior to January 1, 1981.

List of Subjects in 42 CFR Part 57

Dental health, Education of the disadvantaged, Educational facilities, Educational study programs, Emergency medical services, Grant programs—education, Grant programs—health, Health facilities, Health professions, Loan programs—health, Medical and dental schools, Scholarships and fellowships, Student aid.

Accordingly, Subpart R is added to Part 57 of Title 42 of the Code of Federal Regulations as set forth below.

(Catalog of Federal Domestic Assistance, No. 13.984, Departments of Family Medicine)

Dated: March 4, 1983.

Edward N. Brandt, Jr.,

Assistant Secretary for Health.

Approved April 19, 1983.

Margaret M. Heckler,

Secretary.

Subpart R—Grants for the Establishment of Departments of Family Medicine

Sec.

57.1701 To what programs do these regulations apply?
57.1702 Definitions.
57.1703 Who is eligible to apply for a grant?
57.1704 Program requirements.
57.1705 How will applications be evaluated?
57.1706 How long does grant support last?
57.1707 For what purposes may grant funds be spent?
57.1708 What additional Department regulations apply to grantees?
57.1709 What other audit and inspection requirements apply to grantees?
57.1710 Additional conditions.

Authority: Sec. 215 Public Health Service Act, 58 Stat. 690, as amended by 63 Stat. 35 (42 U.S.C. 216); Section 780, Public Health Service Act, 90 Stat. 2311 (42 U.S.C. 295g), as amended by 95 Stat. 221 (42 U.S.C. 295g).

§ 57.1701 To what programs do these regulations apply?

These regulations apply to the award of grants under section 780 of the Public Health Service Act (42 U.S.C. 295g) to schools of medicine and osteopathy to meet the costs of projects to establish, maintain, or improve academic administrative units to provide clinical instruction in family medicine. These projects may include: (a) The planning and development of model predoctoral, faculty development, and graduate medical education programs; and (b) academic and clinical activities relevant to the field of family medicine.

§ 57.1702 Definitions.

"Academic administrative unit" or "unit" means a department, division, or other formal academic unit of a school of medicine or osteopathy that provides clinical instruction in family medicine.

"Act" means the Public Health Service Act, as amended.

"Family medicine" includes "osteopathic general practice" and means the field of medicine in which the physician:

(a) Serves as a physician of first contact with families and patients of all ages and provides a means of entry into the health care system;

(b) Evaluates the patient's total health needs, provides personal medical care within one or more fields of medicine, and refers the patient, when indicated, to appropriate sources of care while preserving the continuity of care;

(c) Assumes responsibility with the patient for comprehensive and continuous health care and acts as a leader or coordinator of others providing health services; and

(d) Considers the patient's total health care within the context of his or her environment, including the community and the family or comparable social units.

"Nonprofit", as applied to any school means one which no part of the net earnings inures, or may lawfully inure to the benefit of any private shareholder or individual.

"Other major clinical units" means formal academic units at the applicant school that offer clinical instruction in internal medicine, obstetrics and gynecology, pediatrics, psychiatry, or surgery.

"Residency training program" means a three-year residency program in family practice that is fully or provisionally accredited by the Accreditation Council for Graduate Medical Education, or the equivalent of such a program as determined by the Secretary. In the case of osteopathic medicine, a postgraduate program of no less than two years' duration, including the osteopathic internship, as approved or provisionally approved by the American Osteopathic Association will be deemed such an equivalent.

"School of medicine or osteopathy" means a public or nonprofit private school in a State that provides training leading respectively, to a degree of medicine or to a degree of doctor of osteopathy and which is accredited as provided in Section 701(5) of the Act.

"Secretary" means the Secretary of Health and Human Services and any other officer or employee of the Department of Health and Human Services to whom the authority involved has been delegated.

"State" means any one of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Virgin Islands, Guam, American Samoa, or the Trust Territory of the Pacific Islands.

§ 57.1703 Who is eligible to apply for a grant?

Any school of medicine or osteopathy located in a State is eligible to apply for a grant.

§ 57.1704 Program requirements.

Existing units supported under this subpart must meet all the requirements of this section no later than 12 months after initial award of the grant. Units which are being established with the aid of grants under this subpart must meet the requirement of paragraph (a) of this section no later than 12 months after initial award, and the remaining requirements of this section no later than 24 months after initial award of the grant. However, within the first 12 months of grant support, units which are being established must submit a continuation application. This application is expected to include a plan which details, in a format determined by the applicant, how the remaining project requirements will be met by the end of the second year of grant support. In addition to units that are initially establishing under this subpart, those that change organizational status (i.e., from division to department) are also considered establishing units for the purpose of this subpart. Those that maintain organizational status are considered existing units.

(a) Each project must have a project director, who works at the grantee institution on an appointment consistent with other major departments, heads or will head the unit, and has relevant training and experience in family medicine.

(b) The unit must have academic status comparable to that of one of the other major clinical units at the institution.

(c) The unit must have administrative autonomy comparable to that of other academic units.

(d) The unit must have control over (or in the case of a school of osteopathy, have control over or be closely affiliated with) a residency training program. The program must have the capacity to enroll a total of at least 9 interns or residents annually. A unit whose applicant school does not have a residency program accredited under its

VOL
48
ISS
87
MY
4
1983
UMI

direct authority will be considered as meeting this requirement if it has a written affiliation agreement with a hospital which conducts a residency program as described.

(e) The unit must have responsibility for providing instruction to each member of the student body who is engaged in an education program leading to a degree in doctor of medicine or doctor of osteopathy. The amount of mandatory and elective curriculum must be comparable to the amount of mandatory and elective curriculum time required for other major clinical units at the school.

(f) The unit must have, in the judgment of the Secretary, a sufficient number of full-time faculty to conduct the instruction required in § 57.1704(f). The number of family medicine faculty in the unit must be comparable to that of full-time faculty responsible for conducting the instruction of one of the other major clinical units at the school.

(g) Each project must evaluate the program of instruction required in § 57.1704(f) of this section, including evaluation of faculty competence, the administration of the program, and the degree to which program objectives are met.

(h) Where projects include the planning and development of model predoctoral, faculty development, or graduate medical education programs, those programs must be designed to eventually meet the requirements of the regulations implementing section 786(a) of the Act, 42 CFR Part 57, Subpart Q.

§ 57.1705 How will applications be evaluated?

After consulting with the National Advisory Council on Health Professions Education established under section 702 of the Act, the Secretary will award grants to applicants whose projects will best promote the purposes of section 780 of the Act and these regulations. The Secretary will consider, among other factors:

(a) The degree to which the proposed project adequately provides for the project requirements in § 57.1704;

(b) The administrative and management capability of the applicant to carry out the proposed project in a cost-effective manner;

(c) The qualifications of the proposed staff and faculty of the unit; and

(d) The potential of the project to continue on a self-sustaining basis.

§ 57.1706 How long does grant support last?

(a) The notice of grant award specifies how long the Secretary intends to support the project without requiring the project to recompete for funds. This period, called the project period, will not exceed five years.

(b) Generally, the grant will initially be funded for one year and subsequent noncompeting continuation awards will also be for one year at a time. A grantee must submit a separate application to have the support continued for each subsequent year. Decisions regarding noncompeting continuation awards and the funding levels of these awards will be made after consideration of such factors as the grantee's progress and management practices, and the availability of funds. In all cases, noncompeting continuation awards require a determination by the Secretary that continued funding is in the best interest of the Federal Government.

(c) Neither the approval of any application, nor the award of any grant, commits or obligates the Federal Government in any way to make any additional, supplemental, noncompeting continuation or other award with respect to any approved application or portion of an approved application.

(d) Any balance of federally obligated grant funds remaining unobligated by the grantee at the end of a budget period may be carried forward to the next budget period, for use as prescribed by the Secretary, provided a noncompeting continuation award is made. If at any time during a budget period it becomes apparent to the Secretary that the amount of Federal funds awarded and available to the grantee for that period, including any unobligated balance carried forward from prior periods, exceeds the grantee's needs for the period, the Secretary may adjust the amounts awarded by withdrawing the excess. A budget period is an interval of time (usually 12 months) into which the project period is divided for funding and reporting purposes.

§ 57.1707 For what purposes may grant funds be spent?

(a) A grantee shall only spend funds it receives under this subpart according to the approved application and budget, the authorizing legislation, the terms and conditions of the grant award, and the applicable cost principles in Subpart Q of 45 CFR Part 74, and these regulations.

(b) Grantees may not spend grant funds for sectarian instruction or for any religious purpose.

§ 57.1708 What additional Department regulations apply to grantees?

Several other regulations apply to grants under the subpart. These include, but are not limited to:

42 CFR Part 50	PHS grant appeals process.
45 CFR Part 16	Department grant appeals process.
45 CFR Part 46	Protection of human subjects.
45 CFR Part 74	Administration of grants.
45 CFR Part 75	Informal grant appeals procedures (indirect cost rates and other cost allocations).
45 CFR Part 80	Nondiscrimination under programs receiving Federal assistance through the Department—Implements Title VI of the Civil Rights Act of 1964.
45 CFR Part 81	Practice and procedure for hearings under Part 80.
45 CFR Part 83	Nondiscrimination on the basis of sex in the admission of individuals to training programs.
45 CFR Part 84	Nondiscrimination on the basis of handicap in federally assisted programs.
45 CFR Part 86	Nondiscrimination on the basis of sex in federally assisted education programs.
45 CFR Part 91	Nondiscrimination on the basis of age in Department programs or activities receiving Federal financial assistance.

§ 57.1709 What other audit and inspection requirements apply to grantees?

Each grantee must, in addition to the requirements of 45 CFR Part 74, meet the requirements of section 705 of the Act, concerning audit and inspection.

§ 57.1710 Additional conditions.

The Secretary may impose additional conditions on any grant award before or at the time of an award if he or she determines that these conditions are necessary to assure or protect the advancement of the approved activity, the interest of the public health, or the conservation of grant funds.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Note: The Office of the Federal Register proposes to terminate the formal program of agency publication on assigned days of the week. See 48 FR 19283, April 28, 1983.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

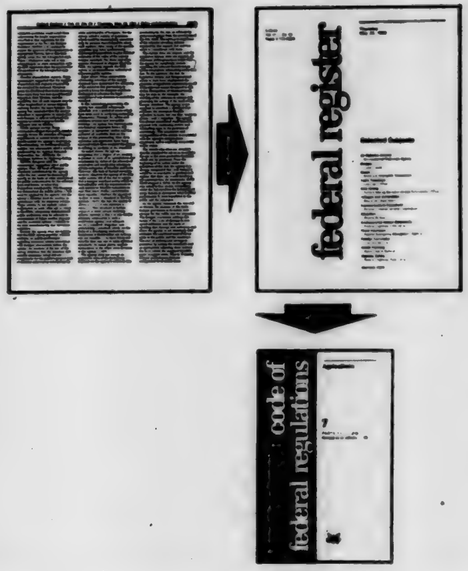
The Federal Register

Regulations appear as agency documents which are published daily in the **Federal Register** and codified annually in the **Code of Federal Regulations**



The **Federal Register**, published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps people up to date on the Federal regulations currently in effect.

Mailed monthly as part of a **Federal Register** subscription are: the LSA (List of CFR Sections Affected) which leads users of the **Code of Federal Regulations** to amendatory actions published in the daily **Federal Register**; and the cumulative **Federal Register Index**.

The **Code of Federal Regulations** (CFR) contains the annual codification of the final regulations printed in the **Federal Register**. Each of the 50 titles is updated annually.

Subscription Prices:

Federal Register
One year: $300 domestic; $375 foreign
Six months: $150 domestic; $187.50 foreign

Code of Federal Regulations
One year: $615 domestic; $768.75 foreign
Single volumes: Individually priced.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 48, No. 88
Thursday, May 5, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Reg. 577]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona navel oranges that may be shipped to market during the period May 6–May 12, 1983. Such action is needed to provide for orderly marketing of fresh navel oranges for this period due to the marketing situation confronting the orange industry.

EFFECTIVE DATE: May 6, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, 202–447–5975.

SUPPLEMENTARY INFORMATION:

Findings

This rule has been reviewed under USDA procedures and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona navel orange crop for the benefit of producers and will not substantially affect costs for the directly regulated handlers.

This regulation is issued under the marketing agreement, as amended and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendation and information submitted by the Navel Orange Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

This action is consistent with the marketing policy for 1982–83. The marketing policy was recommended by the committee following discussion at a public meeting on September 21, 1982. The committee met again publicly on May 3, 1983 at Lindsay, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of navel oranges deemed advisable to be handled during the specified week. The committee reports the demand for navel oranges is easier.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared policy of the Act to make this regulatory provision effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 907

Marketing agreements and orders, California, Arizona, Oranges (navel).

PART 907—[AMENDED]

Section 907.877 is added as follows:

§ 907.877 Navel orange regulation 577.

The quantities of navel oranges grown in California and Arizona which may be handled during the period May 6, 1983 through May 12, 1983, are established as follows:[1]

(1) District 1: 1,500,000 cartons;
(2) District 2: Unlimited cartons;
(3) District 3: Unlimited cartons;
(4) District 4: Unlimited cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: May 4, 1983.

D. S. Kuryloski,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 83–12247 Filed 5–4–83; 11:31 am]
BILLING CODE 3410–02–M

Farmers Home Administration

7 CFR Part 1942

Emergency Jobs Bill; Additional Appropriation for Rural Water and Waste Disposal Grants

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: This action implements regulations for making Rural Water and Waste Disposal Grants with funds appropriated under Pub. L. 98–8 (Emergency Jobs Bill). The intended effect of this action is to create employment and initiate Federal projects and construction of lasting value to the Nation and its citizens. This action is being taken as a result of legislation.

EFFECTIVE DATE: Effective May 5, 1983.

FOR FURTHER INFORMATION CONTACT: Laurence G. Bowman, Loan Officer, Farmers Home Administration, Water and Waste Disposal Division, Room 6328–S, 14th and Independence Avenue, SW., Washington, D.C. 20250 (202/382–9642).

SUPPLEMENTARY INFORMATION: This action has been reviewed under the procedures prescribed in E.O. 12291 and has been determined to be a major regulation. The regulation is likely to result in an annual effect on the economy of $100 million or more. It has been determined that an emergency situation exists, therefore, compliance with E.O. 12291 and the Secretary of Agriculture's Memorandum 1512–1 is impractical. The legislation under which these regulations are being issued was recognized by Congress as emergency legislation to alleviate critically high unemployment levels in as expeditious a manner as possible. An exception has been granted by the Office of Management and Budget (OMB) under

VOL

UMI

E.O. 12291 to respond to and meet the intent of the emergency jobs appropriations.

It is the policy of this Department that rules relating to loans, grants, benefits, or contracts shall be published for prior public comments notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. This action, however, is not being published for proposed rulemaking because to do so would delay expenditure of the appropriated funds with a resultant delay in the creation of additional employment which would be contrary to the public interest. Since Congress specified which regulations were to be used, comments on these regulations would be superfluous and unnecessary.

Public Law 98–8, "Making appropriations to provide productive employment for hundreds of thousands of jobless Americans, to hasten or initiate Federal projects and construction of lasting value to the Nation and its citizens, and to provide humanitarian assistance to the indigent" for rural water and waste disposal grants administered by the FmHA. The Act requires that these funds be administered "under the 1981 formula and regulations for 'Rural Water and Waste Disposal Grants'." FmHA regulations currently in effect for rural water and waste disposal grants do not allow such grants to applicants where the median family income of the service area exceeds eighty-five (85) percent of the State nonmetropolitan median family income. The 1981 regulations do not have such an income limitation.

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget and have been assigned OMB #0575–0074.

Charles W. Shuman, Administrator, has determined that this action will not have a significant economic impact on a substantial number of small entities. This is an administrative action to implement regulations mandated by Pub. L. 98–8.

This document has been reviewed in accordance with 7 CFR Part 1901, Subpart G, "Environmental Impact Statements." It is the determination of FmHA that the proposed action does not constitute a major Federal action significantly affecting the quality of the human environment and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Imapct Statement is not required.

The Catalog of Federal Domestic Assistance (CFDA) No. is 10.418, "Water and Waste Disposal Systems for Rural Communities."

List of Subjects in 7 CFR Part 1942

Community development, Grant programs—housing and community development, Rural areas, Waste treatment and disposal—domestic, Water supply—domestic.

Accordingly, FmHA places in effect the regulations contained in Subpart H of Part 1942, Chapter XVIII, Title 7, Code of Federal Regulations (CFR) as published in the 7 CFR volume revised as of January 1, 1981, for making grants under Pub. L. 98–8.

In addition, the letter of conditions and the Supplemental General Conditions of construction contract documents will be revised. It is the Congressional intent of Pub. L. 98–8, that to the extent practicable, funds will be used to maximize immediate creation of new employment opportunities to individuals who were unemployed at least 15 of the 26 weeks prior to March 24, 1983.

Therefore, FmHA amends Subpart A and H of Part 1942, Chapter XVIII, Title 7, Code of Federal Regulations as follows:

PART 1942—ASSOCIATIONS

Subpart A—Community Facility Loans

1. Section 1942.17 is amended by adding paragraph (s) to read as follows:

§ 1942.17 Appendix A—Community Facilities

* * * * *

(s) *Loans under Pub. L. 98–8 (Emergency Jobs Bill).* Each FmHA project that is funded utilizing FmHA loan funds authorized by Pub. L. 98–8 (Emergency Jobs Bill), will also comply with § 1942.372 (b) and (c) of Subpart H of Part 1942 of this chapter.

Subpart H—Development Grants for Community Domestic Water and Waste Disposal Systems

2. Section 1942.372 is added to read as follows:

§ 1942.372 Special Conditions under Public Law (Pub. L.) 98–8 (Emergency Jobs Bill).

Each project to be funded utilizing grant funds authorized by Pub. L. 98–8 (Emergency Jobs Bill) will be processed in accordance with Exhibit D of this Subpart. In Exhibit D of this subpart (1981 regulations), all references to other FmHA regulations and Forms will be construed to mean the most current version of the other regulations and forms, and the following:

(a) Grant funds shall be made available for projects and activities in civil jurisdictions with high unemployment, or in labor surplus areas, or in political units or in pockets of poverty that are currently or should meet the criteria to be eligible under the Urban Development Grant Action (UDAG program administered by the Department of Housing and Urban Development).

(b) Each letter of conditions that is issued utilizing FmHA loan and/or grant funds authorized by Pub. L. 98–8 will contain the following:

(1) Standard paragraphs in accordance with § 1942.5(a)(1)(ii) of Subpart A of Part 1942 of this chapter, and

(2) "The (i.e. town, district, authority) shall to the extent practicable utilize FmHA funds in a manner which maximizes immediate creation of new employment opportunities to individuals who were unemployed at least 15 of the 26 weeks prior to March 24, 1983. Such a condition will be made part of any construction contract awarded in support of FmHA funds."

(c) The following should be added to the Supplemental General Conditions of construction contracts involving Pub. L. 98–8 funds:

To the extent practicable, the contractor shall hire needed new employees in a manner which maximizes immediate creation of new employment opportunities to individuals who were unemployed at least 15 of the 26 weeks prior to March 24, 1983.

Exhibit D [Added]

3. Exhibit D is added to read as follows:

Regulations for Grant Approvals Utilizing Funds Made Available Under Pub. L. 98–8

I. General

(a) This Exhibit outlines the policies and authorizations and sets forth the procedures for making and processing grants to assist in financing the development cost of domestic water and waste disposal systems to rural communities and other associations of farmers, ranchers, rural residents, and other rural users. Farmers Home Administration (FmHA) will maintain continuous liaison and coordination with State and substate planning district officials. FmHA shall cooperate fully with appropriate State agencies in making grants in a manner which will assure maximum support of the State's strategies for development of rural areas. State and substate A–95 agencies may recommend priorities for applications. FmHA will give due consideration to all A–95 agency review comments and priority recommendations in selecting applications for funding. FmHA State Directors are reminded that funds allocated for use as prescribed in this subpart are to be considered for use by Indian tribes within the State regardless of whether State development strategies include Indian reservations within the State's boundaries. It

is essential that Indians residing on such reservations have equal opportunity to participate in the benefits of these programs on as equal a basis as other residents of the State. This is intended to include an equal application of the outreach activities of FmHA County and District Offices.

(b) It is the policy that the County Office will normally be the entry point for preapplications and serve as the local contact point. However, applications will be filed and grants will be processed to the maximum extent possible by the District Office staff. The State Office staff will monitor grant making and servicing and will provide assistance to District Office personnel to the extent necessary to assure that the activities are being accomplished in an orderly manner consistent with FmHA regulations. The District Director will supply information on grant activity within the County Office service area to the County Supervisor at key points throughout the grant making process.

(c) It is the policy of FmHA to extend its financial program without regard to race, color, religion, sex, national origin, marital status, age, or physical/mental handicap (possess capacity to enter into legal contract.)

II. Processing Applications and Docket Preparation

(a) Preapplications and applications for water and waste disposal development grants will be processed in accordance with § 1942.2 of Subpart A of Part 1942 of this chapter.

(b) Grant dockets will be prepared in accordance with this Subpart and applicable portions of §§ 1942.17, 1942.18 and 1942.19 of Subpart A of Part 1942 of this chapter.

III. Applicant Eligibility and Priority

(a) *Eligibility.* Applicant eligibility shall be determined in accordance with § 1942.17(b) of Subpart A of Part 1942. Also grants shall not be made in connection with any project unless the project:

(1) Will serve a rural area which, if such project is carried out, is not likely to decline in population below that for which the project was designed.

(2) Is designed and constructed so that adequate capacity will or can be made available to serve the present population of the area to the extent feasible and to serve the reasonably foreseeable growth needs of the area. Also, water systems must have sufficient capacity to provide for reasonable fire protection.

(3) Is necessary for orderly community development consistent with a comprehensive community water, waste disposal, or other development plan of the rural area in which the project is located.

(b) *Applicant priorities.* Preference for grant funds will be given to applicants and projects in accordance with § 1942.17(c) (1) and (2) of Subpart A of Part 1942 of this chapter.

IV. Use of Grant Funds

Funds may be used only for the following purposes:

"(a) Domestic and water waste facilities—install and improve community domestic water and waste disposal facilities including:

(1) Facilities for the development, storage, treatment, purification and distribution of water.

(2) Sanitary sewer facilities including collection lines, treatment plants, outfall lines, disposal fields, and stabilization ponds.

(3) Storm sewers for the collection and disposal of surface drainage.

(4) Solid waste disposal projects including facilities for the collection, treatment, or disposal of human, animal, agricultural and other wastes. Items such as garbage trucks and equipment, sanitary landfills, and incinerators are included.

(b) Purchase or rent equipment necessary to extend, protect, develop or utilize facilities. Such purchases or rentals must be necessary to provide efficient service, to enable the facility to remain in operation, and to fulfill the purposes and intent of the loan and/or grant. However, funds may not be used to pay any annually recurring costs, including purchases or rentals, that are normally considered to be operation and maintenance expenses.

(c) Acquire land and rights. Acquiring land, interest in land, and rights such as water rights, leases, permits, right-of-way, and other evidence of land or water control which are necessary for development of the facility.

(d) Buildings, fences, secondary facilities, and relocation.

(1) Construct buildings of modest design, size, and cost, and fences essential to the successful operation or protection of authorized facilities and to provide storage for tools and supplies needed to operate the facility.

(2) Construct secondary facilities such as gas or electric service lines to convey fuel or energy for, or utilities for, primary facilities.

(3) Construct or relocate roads, bridges, utilities, fences, and other public improvements or relocate roads, bridges, utilities, fences, and other private improvements.

(e) Services and fees. Pay costs incidental to establishment of such facilities or for services necessary to accomplish any of the above purposes, including, but not limited to:

(1) Paying fees or other legal expenses of establishing water rights through appropriation, agreement, permit, or court decree.

(2) Paying for other services necessary in planning and completing the facilities to be financed.

(3) Acquiring a water supply by purchasing of water stock or membership in a water users association.

(f) FmHA grant funds may be used on projects where other types of financial assistance are available on all or part of the project, provided the other assistance is on reasonable rates and terms. In such cases the maximum percentages allowed under other agencies' authorities will apply to their participation in the project. However, the FmHA grant may not exceed seventy-five percent (75%) of the eligible project development cost. The need for FmHA grant funds must meet the requirement of paragraph VI of this Exhibit after considering all project financing.

V. Grant Limitations

(a) Grant funds may not be used to:

(1) Pay for the construction of any new combined storm and sanitary sewer facilities.

(2) Pay any annually recurring costs that are generally considered to be operation and maintenance expenses.

(3) Construct or repair electric generating plants, electric transmission lines, or gas distribution lines to provide services for commercial sale.

(4) Purchase fire trucks, hoses, and other firefighting equipment or construct housing for such equipment.

(5) Pay rental for the use of equipment or machinery owned by the association.

(6) Pay for saleserooms or other purposes not directly related to operation and maintenance of the facility being installed or improved.

(7) Purchase existing systems.

(8) Refinance existing indebtedness.

(9) Pay any portion of the cost of a facility when the annual reserve based on a typical year exceeds one-tenth of the average annual debt service requirement unless State regulatory agencies require a larger reserve, or when it is anticipated that facility replacement costs on a relatively short-term basis will require a higher reserve.

(10) Pay interest.

(11) Pay any portion of the cost of a facility which is not located in a rural area.

(b) An FmHA development grant may not be made in excess of seventy-five percent (75%) of the eligible project development costs. Facilities previously installed will not be considered in determining the development costs.

VI. Determining the Need for Development Grants

(a) FmHA District Directors are responsible for determining applicant eligibility for grants and the amount of such grants. Form FmHA 1942–51, "Water and Waste Disposal Development Grant Summary," will be used to determine the amount of FmHA grant assistance for which the applicant qualifies. A separate form will be used to record the determination of FmHA grant assistance for each water, sewer collection and treatment, solid waste, and storm drainage project. A copy of each such form along with the letter of conditions and Form FmHA 1942–45, "Project Summary—Water and Waste Disposal and Other Utility-Type Projects," will be submitted to the National Office, Attention: Water and Waste Disposal Loan Division by the State Director not later than the time of issuance of the letter of conditions.

(b) Grants will be used for water and waste disposal projects serving the most financially needy communities to reduce user costs to a reasonable level for farmers, ranchers, and rural residents. Other rural users whose needs are met or, if there is no meter, could be met by a single residential-size water meter may also be considered eligible. For example, a user on a waste system may be considered for a grant when the water needs of the waste user are met or could be met by such residential-size meter. This method of computing grants will be used for all water and waste disposal projects. Reasonable user rate is defined as that which is not less than

VOL
48
ISS
88
MY
5
1983
UMI

existing prevailing rates in communities being served by an established system constructed at similar cost per user and having similar economic conditions. User costs shall include charges, taxes, and assessments attributable to the project. An exception to the reasonable user rate may be granted by the FmHA National Office in justifiable cases for areas of extremely low income when it is necessary to meet the needs of a particular community. Such an exception will only be considered when comparable systems are not available or the user rates from the comparable systems appear to be too high for the average user of the applicant, and the median income in the applicant service area is less than $4,000. When it is determined that such an exception should be considered, the FmHA State Director will submit information to the National Office concerning health conditions of the area, median income of the service area, and user rates and median incomes of other like or most similar communities in the region, employment conditions, and any other information to justify the recommendation for the exception.

(1) Grants may not exceed seventy-five percent (75%) of the eligible project development costs listed in paragraph IV of this Exhibit.

(2) Ordinarily, an applicant will be considered for grant assistance only when the debt service portion of the average annual user cost for either water or waste service, for only those users in the applicant service area, exceeds the following percentages of median incomes:

(i) .75 percent when the median income is under $6,000.

(ii) 1.00 percent when the median income is $6,000 to $10,000.

(iii) 1.25 percent when the median income is over $10,000.

Median income will be determined in accordance with paragraph VI(b)(6). Except as provided for in paragraphs VI(b) and (b)(4), the grant will be limited to an amount necessary to reduce the debt service portion of the user cost to the applicable percent level listed above. If the median income is not available, the average income may be used. This procedure shall not be used to result in a rate below that deemed to be reasonable as defined in paragraph VI(b). However, an exception to the reasonable user rate may be authorized by the FmHA National Office in accordance with paragraph VI(b).

(3) When the applicant will be furnishing bulk service to rural residents served by another system, a grant to such applicant may also be considered for an amount to reduce the user costs on a similar basis as provided in this paragraph for users of such other system. An agreement between the applicant and the other system (entity) will be obtained that clearly shows that the benefit of the grant will accrue only to the users intended to be benefited by the grant. For purposes of grant determination, all other systems which will receive bulk service may either:

(i) Be considered as part of the total by averaging the median incomes of the systems involved and averaging the debt service portion for the particular service of the other systems; or

(ii) Consider the median income and the debt service portion for the particular service for each entity separately.

(4) If, after applying the formula described in paragraph (VI)(b)(2), FmHA determines that a reasonable user cost has not been achieved due to unusually high operation and maintenance costs, construction or water acquisition costs, or other factors, FmHA may proceed with a grant in an amount necessary to reduce the user cost to not below a reasonable level as defined in paragraph VI(b). However, an exception to the reasonable user rate may be authorized by the FmHA National Office in accordance with paragraph VI(b).

(5) If, after applying the formula described in paragraph (VI)(b)(2), FmHA determines that a reasonable average annual cost to the applicant for delivery of service to residential type users has not been achieved, FmHA may proceed with a grant in an amount necessary to reduce such cost to not below a reasonable user rate as defined in paragraph (VI)(b) provided this option is only available to an applicant that imposes uniform user charges for similar classes of service throughout their service area. Reasonable average annual cost to the applicant is defined as that which is not less then existing prevailing costs in communities, being served by an established system, having similar economic conditions.

(6) The median income in the applicant community or those reference communities used in comparing the proposed system with similar systems will be determined by the FmHA District Director as follows:

(i) The median income will be determined from the U.S. Department of Commerce, Bureau of Census, Publication PC (1)–C series or from reliably extracted unpublished Bureau of Census data for individual enumeration Districts; or

(ii) For those projects where the FmHA District Director has reason to believe that the census data is not an accurate representation of the median income within the area to be served, the District Director may determine the median income taking into consideration the following:

(A) Data from responsible public or private sources.

(B) The District Director's knowledge of the community based on availability FmHA data gained through individual loans.

(C) The results of a survey conducted by the applicant.

(D) By using a combination of the above.

(7) Preliminary engineering reports and suggested operating budgets included herein will be prepared without taking a grant into consideration.

VII. Application Review and Approval

(a) When an FmHA loan and grant are being processed simultaneously, the application review and approval procedures outlined in § 1942.5 of Subpart A of Part 1942 will be followed. Grants will be approved in accordance with this Exhibit and FmHA Instruction 1901–A which is available in any FmHA Office. When a grant only (no FmHA loan) is being made, only those provisions will apply which are necessary to assure:

(1) That the proposed development is completed in accordance with approved plans and specifications.

(2) That grant funds are expended for authorized purposes.

(3) That the terms of the grant agreement are complied with.

(b) Each letter of conditions involving a grant will contain the following:

(1) An item which reads:

"You shall execute the attached Form FmHA 1942–31, 'Association Water or Sewer System Grant Agreement.'"

(2) All items contained in § 1942.5(a)(1) of Subpart A of Part 1942 of this chapter applicable to the grant funding.

(3) Other relative requirements.

VIII. Preparation of Appraisal Reports

When the grant approval official requires an appraisal, Form FmHA 442–10, "Appraisal Report—Water and Waste Disposal System," with appropriate supplements may be used. Appraisal reports will be prepared by the FmHA engineer or, if desired by the grant approval official, another qualified appraiser.

IX. Borrower Contracts

The requirements of § 1942.17 (1) and (3) of Subpart A of Part 1942 of this chapter will be followed when concurring in agreements between grantees and third parties.

X. Grant Approval and Obligating Funds

(a) FmHA State Directors are authorized to approve grants being made in accordance with this Exhibit and Exhibit B of FmHA Instruction 1901–A which is available in any FmHA Office.

(b) State Directors may obligate funds including Regional Commission grant funds when they are available, in accordance with § 1942.5(d) of Subpart A of Part 1942 of this chapter.

XI. Preparation for Grant Closing

Section 1942.6 of Subpart A of Part 1942 of this chapter will be followed when preparing for grant closing.

XII. Grant Closing and Delivery of Funds

(a) Grants will be closed in accordance with instructions received from the Office of the General Counsel (OGC). FmHA policy is not to disburse grant funds from the Treasury until they are actually needed by the applicant. Borrower funds will be disbursed before the disbursal of any FmHA grant funds.

(1) FmHA loan funds will be disbursed before the disbursal of any FmHA grant funds except when:

(i) Interim financing of the total FmHA loan amount is arranged,

(ii) All interim funds have been disbursed, and

(iii) FmHA grant funds are needed before the FmHA loan can be closed.

(2) The FmHA loan should be closed as soon as possible after the disbursal of all interim funds; however, the loan should be closed no later than construction completion. If grant funds are available from other agencies and are transferred to the Finance Office for disbursement by FmHA, these grant funds shall be disbursed in accordance with the agreement governing such agencies' participation in the grant. Any grant funds remaining will be handled in accordance with § 1942.17(p)(6) of Appendix A of Subpart A of Part 1942.

(b) FmHA grant funds will be disbursed b using multiple advances in accordance with § 1942.17(p)(2) of Subpart A of Part 1942.

(c) Form FmHA 1942–31 will be completed and executed in accordance with the requirements of approval and closing instructions. Both District Directors and State Directors are authorized to sign the grant agreement on behalf of FmHA. For grants that supplement FmHA loan funds, the grant should be closed simultaneously with the closing of the loan. However, when grant funds will be disbursed before loan closing as provided for in paragraph XII(a)(1) the grant will be closed not later than the delivery date of the first advance of grant funds. The grant will be considered closed when Form FmHA 1942–31 has been properly executed. Incorporated as a part of this regulation is Form FmHA 1942–31 which appears as Exhibit C to Subpart H of Part 1942 in the **Federal Register.**

XIII. Planning and Performing Development

Planning and performing development will be handled in accordance with §§ 1942.9 and 1942.18 of Subpart A of Part 1942 of this chapter.

XIV. Actions Subsequent to Loan Closing

Section 1942.8 of Subpart A of Part 1942 of this chapter will be followed for water and waste disposal development grants.

XV. Grant Servicing

Grants will be serviced in accordance with Subpart E of Part 1951 of this Chapter.

XVI. Grant Cancellation

The District Director or State Director may prepare and execute Form FmHA 1940–10, "Cancellation of U.S. Treasury Check and/or Obligation," in accordance with the Forms Manual Insert. If the docket has been forwarded to OGC, that office will be notified of the cancellation by a copy of Form FmHA 1940–10. The borrower's attorney and engineer, if any, should be notified of the cancellation. The borrower's attorney and engineer may be provided with a copy of the notification to the applicant.

XVII. Subsequent Grants

Subsequent grants will be processed in accordance with this Exhibit.

XVIII. Regional Commission Grants

Grants are sometimes made by regional commissions for projects eligible for FmHA assistance. FmHA has agreed to administer such funds in a manner similar to FmHA assistance.

(a) When FmHA has funds in the project, no charge will be made for administering commission funds.

(b) When FmHA has neither loan nor grant funds in the project, an administrative charge will be made pursuant to the Economy Act of 1932 (31 U.S.C. 686). A fee of five percent (5 percent) of the first $50,000 of a regional commission grant and one percent (1 percent) of any amount over $50,000 will be paid FmHA by the commission.

(1) Appalachian Regional Commission. Exhibit A of Subpart of H of Part 1942 will be followed in determining the responsibilities of FmHA. The Federal Cochairman and the State Director will provide each other with the necessary notification and certification.

(2) Other regional commissions. Title V of the Pubic Works and Economic Development Act of 1965 authorizes other commissions similar to the Appalachian Regional Commission. Exhibit B of Subpart H of Part 1942 of this chapter will be used to develop a project management agreement between FmHA and the commission separately for each project. The agreement should be prepared by the FmHA State Director as soon as notification is received that a commission grant will be made and the amount is confirmed.

(c) Regional commission grants should be obligated as soon as possible in accordance with § 1942.5(d) of Subpart A of Part 1942 of this chapter, except that the announcement procedure refered to in § 1942.5(d)(8) is not applicable. Regional commission grants will be obtained from the Finance Office in the same manner as FmHA funds are obtained.

XIX. Management Assistance

Grant recipients will be supervised to the extent necessary to assure that facilities are constructed in accordance with approved plans and specifications and to assure that funds are expended for approved purposes.

XX. State Supplements and Guides

This Exhibit may be supplemented by State Supplements and guides in accordance with § 1942.16 of Subpart A of 1942 of this chapter.

XXI. Delegation of Authority

The State Director is responsible for implementing the authorities contained in this Exhibit and may redelegate such authority to appropriate FmHA employees.

[Docket Number 83–004N]

Analyses of Pumped Bacon for Nitrosamine Content, Change in Methodology

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Rule related notice.

SUMMARY: This notice announces the Food Safety and Inspection Service's implementation of a new analytical procedure for confirming the presence of volatile nitrosamines in pumped bacon. The new procedure is a gas chromatography mass spectrometry method and will replace the gas chromatography mass spectrometry method currently used.

EFFECTIVE DATE: June 6, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Richard L. Ellis, Director, Chemistry Division, Science Program, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447–7623.

SUPPLEMENTARY INFORMATION:

Background

Section 318.7(b)(2) of the Federal meat inspection regulations (9 CFR 318.7(b)(2)) sets forth the Department's procedures for collecting and analyzing

VOL
48
ISS
88
MY
5
1983
UMI

samples of pumped bacon to determine nitrosamine levels. An initial sample is collected and then analyzed using a Thermal Energy Analyzer. Should the analysis indicate that a confirmable level of nitrosamines might be present in the product, then the Department is required to collect and analyze additional samples. The second analysis is conducted using a gas chromatography mass spectrometry (GC/MS) testing method. Presumptive positive results are not considered truly positive unless they have been confirmed as such by a GC/MS testing method.

The Department hereby announces that confirmatory analyses of presumptive positives will be conducted using a new procedure known as the Low Temperature Vacuum Distillation Method. This procedure utilizes GC/MS confirmation and provides the Agency with several advantages over the procedure currently used for nitrosamine confirmation. The new procedure provides comparable analytical results and more rapid analytical turnaround, and is transferable to FSIS field laboratories. The use of the new procedure will provide the Agency with significant savings in both time and cost.

Department savings are best evidenced by the fact that under the current testing procedure, the time required to obtain confirmed test results is approximately eight (8) working days from the time analysis begins. With the new test procedure, confirmed test results are generally available in four (4) working days from the time analysis begins. As is now the case, confirmation analysis will not be started until twenty-one (21) days after sliced bacon samples are collected from an establishment for confirmation analysis. These samples will still be collected only when presumptive results from regular monitoring samples indicate non-compliance.

The Department will commence using the new procedure for confirming volatile nitrosamine content in the cooked pumped bacon monitoring program. Copies of the method are available upon request from the Chemistry Division, Science Program, FSIS, USDA, Washington, DC 20250.

Done at Washington, D.C. on April 28, 1983.

Donald L. Houston,

Administrator, Food Safety and Inspection Service.

BILLING CODE 3410-DM-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 83-ASO-5]

Designation of Transition Area, St. Marys, Georgia

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment designates a transition area at St. Marys, Georgia, to accommodate Instrument Flight Rule (IFR) operations at St. Marys Airport. This action lowers the base of controlled airspace from 1,200 to 700 feet above the surface in the vicinity of the airport. An instrument approach procedure, based on the Jacksonville Airport Surveillance Radar (ASR) system, has been developed to serve the airport and this additional controlled airspace is required for protection of IFR operations.

EFFECTIVE DATE: 0901 G.m.t., June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On Thursday, February 10, 1983, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by designating a transition area at St. Marys, Georgia, to provide controlled airspace for containment of aeronautical operations in the vicinity of St. Marys Airport (48 FR 6125). The operating status of St. Marys Airport is changed from VFR to IFR and this transition area will provide the controlled airspace for accommodation of IFR operations. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments were received in response to publication. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3A dated January 3, 1983.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations designates the St. Marys, Georgia, transition area to accommodate aeronautical operations at St. Marys Airport.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Transition area.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 G.m.t., June 9, 1983, as follows:

St. Marys Airport, GA—New

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of St. Marys Airport (Lat. 30°45'16" N., Long. 81°33'27" W.), excluding that portion that coincides with the Fernandina Beach Airport transition area.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on April 26, 1983.

J. Stiglin,

Acting Director, Southern Region.

[FR Doc. 83-11806 Filed 5-4-83; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 97

[Docket No. 23616; Amdt. No. 1241]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Information Center (APA-430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures and Airspace Branch (AFO-730), Aircraft Programs Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260-3, 8260-4 and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

Adoption of the Amendment

PART 97—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 G.m.t. on the dates specified, as follows:

1. By amending § 97.23 VOR-VOR/DME SIAPs identified as follows:

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 390

[Docket No. 30422–62]

General Order Suspending Validated Licenses and Other Authorization for Exports to the U.S.S.R.

AGENCY: Office of Export Administration, International Trade Administration, Commerce.

ACTION: Final rule.

SUMMARY: This rule removes § 390.6, General Order Suspending Validated License and Other Authorizations for Exports to the U.S.S.R. This order was issued on January 11, 1980, 45 FR 3027, January 16, 1980 in reaction to the Soviet invasion of Afghanistan and was superseded by the order of December 30, 1981 (§ 390.8) 47 FR 144, January 5, 1982 which suspended all licensing for exports to the U.S.S.R. On November 18, 1982, the President rescinded the controls which lead to the December 30, 1981 order, and § 390.8 was removed. Section 390.6 should also have been removed at that time.

EFFECTIVE DATE: This rule is effective May 5, 1983.

FOR FURTHER INFORMATION CONTACT: Archie Andrews, Director, Exporters Staff, Telephone: (202) 377–4811.

Rulemaking Requirements

In connection with various rulemaking requirements, the Office of Export Administration has determined that:

1. Under section 13(a) of the Export Administration Act of 1979 (Pub. L. 96–72, 50 U.S.C. app. 2401 *et seq.*) ("the Act"), this rule is exempt from the public participation in rulemaking procedures of the Administrative Procedure Act. This rule does not impose new controls on exports, and is therefore exempt from section 13(b) of the Act, which expresses the intent of Congress that where practicable "regulations imposing controls on exports" be published in proposed form.

2. This rule does not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

3. This rule is not subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*

4. This rule is not a major rule within the meaning of section 1(b) of Executive Order 12291 (46 FR 13193, February 19, 1981), "Federal Regulation."

Therefore, this regulation is issued in final form. Although there is no formal comment period, public comments on this regulation are welcome on a continuing basis.

INTERNATIONAL TRADE COMMISSION

19 CFR Parts 201, 210 and 211

Procedures in Unfair Import Trade Practice Investigations

AGENCY: International Trade Commission.

ACTION: Final rules; amendment and clarification.

SUMMARY: On June 10, 1982, the Commission published amendments to Part 210 of its Rules of Practice and Procedure (19 CFR Part 210) providing procedures in unfair import trade practice investigations under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) for initial determinations by the presiding officer and discretionary Commission review. (47 FR 25134, June 10, 1982). On March 4, 1983, the Commission issued further amendments in the form of interim rules designed to clarify certain provisions and effectuate the smooth functioning of the new procedures. (48 FR 9242, April 4, 1983). The interim rules were to remain in effect pending the receipt of public comment and the issuance of final rules. No public comments were received by the Commission during the 30-day comment period.

EFFECTIVE DATE: May 5, 1983. The procedures amended by these rules are applicable only to section 337 investigations instituted subsequent to June 10, 1982.

FOR FURTHER INFORMATION CONTACT: Michael P. Mabile, Esq., Office of the General Counsel, U.S. International Trade Commission, 701 E Street NW., Washington, D.C., telephone 202–523–0486.

SUPPLEMENTARY INFORMATION:

List of Subjects

19 CFR Part 201

Administrative practice and procedure, Classified information, Confidential business information, Freedom of information, Investigations, Lawyers, Privacy, Seals and insignia, Sunshine Act.

19 CFR Parts 210 and 211

Business and industry, Customs duties and inspection, Imports, Investigations.

Authority for adoption of these amendments is contained in 19 U.S.C. 1335 and the Administrative Procedure Act, 5 U.S.C. 551, et seq. Complete explanation of the purpose of the amendments may be had by reference to the Commission's prior notice of March 4, 1983 (48 FR 9242).

PART 201—[AMENDED]

19 CFR Part 201 is amended as set forth below.

1. In § 201.16, paragraph (d) is revised to read as follows:

§ 201.16 Service of process and other documents.

* * * * *

(d) *Additional time after service by mail.* Whenever a party or Federal agency or department has the right or is required to do some act or take some proceedings within a prescribed period after the service of a document upon it and the document is served upon it by mail, three (3) days shall be added to the prescribed period, except that when mailing is to a person located in a foreign country, ten (10) days shall be added to the prescribed period.

VOL 48 ISS 88 MY 5 1983 UMI

PART 210—[AMENDED]

19 CFR Part 210 is amended as set forth below.

1. In § 210.14, paragraph (b) is revised to read as follows:

§ 210.14 Commission action, public interest factor, and bonding.

* * * * *

(b) Unless otherwise ordered by the Commission, the presiding officer shall not take evidence or other information or hear arguments from the parties and other interested persons with respect to the subject matter of paragraphs (a)(1), (a)(2), (a)(3), and (a)(4) of this section. However, with regard to settlements by agreement or consent order under § 210.51 (c) and (d), the parties may file statements regarding the impact of the proposed settlement on the public interest, and the presiding officer may in his discretion hear argument, although no discovery may be taken with respect to issues relating solely to the public interest. Thereafter, the presiding officer shall consider and make appropriate findings in the initial determination regarding the effect of the proposed settlement on the public health and welfare, competitive conditions in the U.S. economy, the production of like or directly competitive articles in the United States, and U.S. consumers.

2. In § 210.51, paragraphs (c)(1) and (c)(2) are revised to read as follows:

§ 210.51 Termination of investigation.

* * * * *

(c) *Settlement by licensing or other agreement.* (1) An investigation before the Commission may be terminated as provided in paragraph (a) of this section on the basis of a licensing or other agreement entered into between the complainant (all of the complainants if there is more than one) and one or more of the respondents. A motion for termination by such parties shall contain copies of the licensing or other agreement and any agreements supplemental thereto and an affidavit executed by the parties stating that there are no other agreements, written or oral, expressed or implied, between such parties concerning the subject matter of the investigation. If the licensing or other agreement contain confidential business information within the meaning of § 201.6 of the Commission's rules, a copy of the agreement with such information deleted shall accompany the motion.

(2) The motion, licensing or other agreement and any agreements supplemental thereto, and affidavit shall be certified by the presiding officer to the Commission with an initial determination regarding the motion for termination. If the licensing or other agreement or the initial determination contains confidential business information, copies of the agreement and initial determination with confidential business information deleted shall be certified to the Commission simultaneously with the confidential versions of such documents. The Commission shall promptly publish a notice in the **Federal Register** stating that an initial determination has been received terminating the respondent or respondents in question on the basis of a licensing or other agreement, that nonconfidential versions of the initial determination and the agreement are available for inspection in the Office of the Secretary, and that interested persons may submit written comments concerning termination of the respondents in question within ten (10) days of the date of publication of the notice in the **Federal Register.** An order of termination based upon such licensing or other agreement shall not constitute a determination as to violation of section 337.

* * * * *

3. In § 210.53, paragraph (h) is revised to read as follows:

§ 210.53 Initial determination.

* * * * *

(h) *Effect.* An initial determination shall become the determination of the Commission thirty (30) days after the service thereof, unless the Commission, within thirty (30) days after the date of filing of the initial determination, shall have ordered review of the initial determination or certain issues therein pursuant to § 210.54(b) or § 210.55, or by order shall have changed the effective date of the initial determination.

* * * * *

4. In § 210.54, paragraph (b)(1) is revised to read as follows:

§ 210.54 Petition for review.

* * * * *

(b) *Grant or denial of review.* (1) The Commission shall decide whether to grant, in whole or in part, a petition for review within thirty (30) days of the filing of the initial determination, or by such other time as the Commission may order.

* * * * *

5. § 210.55 is revised to read as follows:

§ 210.55 Commission review on its own motion.

Within the time provided in § 210.53(h), the Commission on its own initiative may order review of an initial determination or certain issues therein when at least one of the participating Commissioners votes for ordering review. The standards for granting review of an initial determination are set forth in § 210.54(a)(2). In its order, the Commission shall establish the scope of the review and the issues that will be considered and make provisions for filing of briefs and oral argument if deemed appropriate by the Commission. The order and notice that the Commission has directed review on its own initiative shall be served by the Secretary on all parties, the Department of Health and Human Services, the Department of Justice, the Federal Trade Commission, and such other departments and agencies as the Commission deems appropriate.

PART 211—[AMENDED]

19 CFR Part 211 is amended as set forth below.

1. In § 211.20, paragraph (b) is revised to read as follows:

§ 211.20 Opportunity to submit proposed consent order.

* * * * *

(b) *Subsequent to institution of an investigation.* In investigations under section 337, a proposal to settle a matter by consent shall be submitted as a motion to the presiding officer to terminate an investigation under § 210.51 together with a consent order agreement which incorporates a proposed consent order. If the consent order agreement contains confidential business information within the meaning of § 201.6 of the Commission's rules, a copy of the agreement with such information deleted shall accompany the motion. The proposed agreement shall comply with the requirements of § 211.22. At any time prior to commencement of a hearing as provided in § 210.41(a)(1), the motion may be filed jointly by all of the following: (1) All private complainants, (2) the commission investigative attorney, and (3) one or more respondents. However, upon request and for good cause shown, the presiding officer may consider such a motion during or after a hearing. The filing of the motion shall not stay proceedings before the presiding officer unless the presiding officer so orders. The presiding officer shall promptly file with the Commission an initial determination regarding the motion for termination. If the initial determination contains confidential business information, a copy of the initial determination with such information deleted shall be filed with the Commission simultaneously with the filing of the confidential version of the

initial determination. The Commission shall promptly publish a notice in the **Federal Register** stating that an initial determination has been received terminating the respondent or respondents in question on the basis of a consent order agreement, that nonconfidential versions of the initial determination and consent order agreement are available for inspection in the Office of the Secretary, and that interested persons may submit written comments concerning termination of the respondents in question within ten (10) days of the date of publication of the notice in the **Federal Register.** Pending disposition by the Commission of a consent order agreement, a party may not, absent good cause shown, withdraw from the agreement once it has been submitted pursuant to this section.

2. Section 211.21 is revised to read as follows:

§ 211.21 Settlement by consent.

(a) After the initial determination on the motion for termination based on a consent order agreement has been filed with the Commission, the Commission shall promptly serve copies of the nonconfidential version of the initial determination and the proposed consent order agreement on the Department of Health and Human Services, the Department of Justice, and the Federal Trade Commission, and such other departments and agencies as the commission deems appropriate.

(b) The Commission, after considering the effect of the consent order upon the public health and welfare, competitive conditions in the U.S. economy, the production of like or directly competitive articles in the United States, and U.S. consumers in the manner provided by § 210.14(a)(4), shall dispose of the initial determination according to the procedures of §§ 210.54–210.56. An order of termination based upon a consent order agreement shall not consititute a determination as to violation of section 337. The Commission shall publish in the **Federal Register** and serve on all parties notice of its action together with a statement of reasons in support thereof. Should the Commission reject the proposed agreement and deny the motion, the parties are in no way bound by their proposal in later actions before the Commission.

Issued: April 28, 1983.

By Order of the Commission.

Kenneth R. Mason,

Secretary.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Parts 880, 881, 883, 884, and 886

[Docket No. R-83-1040]

Section 8 Housing Assistance Payments Programs for New Construction and Substantial Rehabilitation

AGENCY: Office of Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of announcement of effective date for interim rule.

SUMMARY: This notice announces the effective date for the interim rule published in the **Federal Register** on March 28, 1983 (48 FR 12698) that implemented certain provisions in the Housing and Community Development Amendments of 1981 which changed the Section 8 Housing Assistance Payments Programs for New Construction and Substantial Rehabilitation. The effective date provision of the rule stated that the rule would become effective upon expiration of the first period of 30 calendar days of continuous session of Congress after publication, subject to waiver, and announced that future notice of the effectiveness of the rule would be published in the **Federal Register.**

Thirty calendar days of continuous session of Congress have expired since the rule was published.

DATE: The effective date for the interim rule published March 28, 1983 (48 FR 12698), is May 4, 1983.

FOR FURTHER INFORMATION CONTACT: James Hamernick, Director, Office of Multifamily Housing Development, Telephone: (202) 755-5720 or (with respect to Part 883) Steven Silvert, Acting Director, Office of State Agency and Bond Financed Programs, Telephone: (202) 755-8135. (These are not toll-free numbers.)

Dated: May 2, 1983.

Grady J. Norris,

Assistant General Counsel for Regulations.

BILLING CODE 4210-27-M

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Part 250

Outer Continental Shelf; Notice of Interpretation of Rules Concerning Extension of a Lease Beyond its Primary Term

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of interpretation.

SUMMARY: In accordance with the Outer Continental Shelf Lands Act (OCSLA), an oil and gas lease shall be for an initial period and for as long thereafter as the lease is producing in paying quantities or approved drilling or well reworking operations are being conducted on the lease. This notice sets out the policy of the Department of the Interior (DOI) with regard to the circumstances under which a lease may be extended beyond its primary term.

FOR FURTHER INFORMATION CONTACT: David A. Schuenke, (703) 860-7916 or FTS: 928-7916.

SUPPLEMENTARY INFORMATION: Section 8(b) of the OCSLA requires that an oil and gas lease be for an initial period "and as long after such initial period as oil or gas is produced from the area in paying quantities, or drilling or well reworking operations as approved by the Secretary are conducted thereon * * *." The section also entitles the lessee to explore, develop, and produce subject to due diligence requirements. Section 5(a) (7) requires the Secretary to promulgate regulations requiring the "prompt and efficient exploration and development of a lease area * * *."

To meet these responsibilities, DOI promulgated the regulations at 30 CFR 250.35. In that rule, DOI established a requirement that a lease could be continued beyond its primary term either by production or by the conduct of approved drilling or well reworking operations at no greater time intervals than every 90 days. By allowing no greater time lapse than 90 days, the activities would be deemed prompt and efficient.

Questions have arisen concerning leases that are near the end of or beyond their primary term, and on

VOL
48
ISS
88
MAY
5
1983
UMI

which a discovery has been made, but for various reasons production is not feasible at that time. Is the lessee required to conduct drilling or well reworking operations at least every 90 days in order to keep the lease alive?

Section 250.35(a) contains a caveat that no time lapse of greater than 90 days will be deemed prompt and efficient "unless operations on the lease have been suspended pursuant to § 250.12 of this part." Section 250.2 sets out the circumstances under which lease operations may be suspended, thereby extending the term of the lease for a period of time equivalent to the time period of the suspension. These regulations implement section 5(a)(1) of the OCSLA.

Under § 250.12(b), the Director of the Minerals Management Service may suspend operations upon the request of the lessee if the Director determines that the suspension is in the national interest and will * * *

(i) Facilitate proper development of a lease; (ii) allow for the construction of, or for the negotiation for the use of, transportation facilities; (iii) facilitate the installation of equipment the Director determines is necessary for safety or environmental reasons; or (iv) allow for inordinate delays encountered by the lessee in obtaining any required permit or consent from Federal, State, or local government authority, including administrative or judicial challenges or appeals.

In order for the Government to evaluate a request for a suspension, the lessee must provide the reasons for the request, a schedule leading to the initiation or restoration of operations, and any other information as required. It is DOI's policy that leases which are near the end of or beyond their primary term, and on which a discovery has been made but are not yet in production, will be considered for a suspension of production or other operations if sufficient exploration to delineate areas of production has been completed and development has commenced. Commencement of development must be evidenced by a discovery of minerals in paying quantities and by submission of a schedule reasonably designed to lead to commencement of production. In determining the reasonableness of a schedule, due consideration shall be given to circumstances such as water depth, distance from shore, and availability of transportation and storage facilities. The times projected in the schedule must be reasonable for the conditions under which the lease is being developed. Such schedule shall also provide for the development of all known significant accumulations of hydrocarbons on the lease. If the Director determines that the criteria have been met, a suspension may be granted, and the lessee would not be required to meet the 90-day requirements of § 250.35 during the period of the suspension.

Therefore, the DOI believes that the suspension provisions of 30 CFR 250.12 answer the question asked above. Every lease past its primary term and not in production is not necessarily required to conduct approved drilling or well reworking operations every 90 days in order to continue the term of the lease. Under appropriate circumstances, a lease term can be extended by the granting of a suspension of production or other operations. If the request is based on circumstances that meet the requirements of § 250.12 and the lessee has a work schedule that is reflective, under the circumstances, of prompt and efficient measures to develop and produce a lease, then it is the DOI's policy that a suspension is in order.

In keeping with the spirit of Executive Order 12291 and the DOI's policy to avoid proliferation of regulations, amendments to § 250.35 are considered unnecessary under these circumstances. The flexibility to extend or continue a lease term without burdensome, counterproductive, or expensive drilling or well reworking operations at least every 90 days already resides in the suspension provisions of 30 CFR 250.12.

Dated: April 26, 1983.

Harold Doley,

Director.

BILLING CODE 4310-MR-M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 294

[DOD Directive 5400.12]

Obtaining Information From Financial Institutions

AGENCY: Office of the Secretary, DOD.

ACTION: Final rule.

SUMMARY: The change to this part specifically recognizes the statutorily mandated authority of the Inspector General, Department of Defense, to issue administrative subpoenas for access to financial records held by financial institutions.

EFFECTIVE DATE: April 15, 1983.

FOR FURTHER INFORMATION CONTACT: Lt. Col. William C. Goforth, USAF, Staff Executive (Attorney), Defense Privacy Board, c/o OSD Mail Room, Rm: 3A948, The Pentagon, Washington, D.C. 20301. Telephone: 202/694-3027.

SUPPLEMENTARY INFORMATION: In FR Doc. 80-8380 appearing in the **Federal Register** on March 19, 1980 (45 FR 17575) the Office of the Secretary of Defense (OSD) published a final rule establishing procedures for the Department of Defense Components to follow in obtaining information from financial institutions under the "Right to Financial Privacy Act of 1978", Title 12, United States Code, Section 3401, *et seq.* Subsequently in FR Doc. 81-16451 published in the **Federal Register** on June 3, 1981 (46 FR 29705) OSD published as a final rule certain changes to the basic rules including suggested procedures to be followed by Components when obtaining financial records from U.S. financial institutions overseas. This new rule modifies further the basic rule by recognizing the fact that under the provisions of the Inspector Generals Act of 1978 as amended (Pub. L. 95-452 as amended by Pub. L. 97-252) the new Inspector General, DOD, has the authority to issue administrative subpoenas for access to financial records under the Right to Financial Privacy Act. No DOD Component had this authority before.

Banks, banking, Credit, Privacy.

PART 294—[AMENDED]

Accordingly, 32 CFR Chapter I, Part 294, is amended by revising paragraphs (a)(1) and (d) of § 294.9 to read as follows:

§ 294.9 Other access procedures.

(a) *Access by compulsory legal process.*—(1) *Administrative summons or subpoena.*

(i) Within the Department of Defense, the Inspector General, DOD, has the authority under Pub. L. 95-452 (The Inspector General Act of 1978, as amended by Pub. L. 97-252) to issue administrative subpoenas for access to financial records. No other DOD Component official may issue summons or subpoenas for access to these records.

(ii) The Inspector General, DOD, shall issue administraive procedures for access to financial records in accordance with established procedures.

* * * * *

(d) Annual Report. The annual reporting requirements of § 294.14 shall apply to access procedures under § 294.9 (a) and (b).

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD5-83-01]

Drawbridge Operation Regulations; Kent Island Narrows, Md.

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of the Maryland Department of Transportation, the Coast Guard is changing the regulations that govern the operation of the Kent Island Narrows Drawbridge at Grasonville, Maryland which will change the number and times of openings during summer weekend peak traffic periods. This change is being made because some summer weekend draw openings have contributed to large vehicular traffic back-ups in the vicinity of the drawbridge. This action will better balance the needs of vehicular and marine traffic.

EFFECTIVE DATE: This rule becomes effective on May 27, 1983.

FOR FURTHER INFORMATION CONTACT: Wayne J. Creed, Bridge Administrator, Aids to Navigation Branch, Fifth Coast Guard District, Portsmouth, Virginia 23705 (804) 398-6222.

SUPPLEMENTARY INFORMATION: On February 22, 1983, the Coast Guard published a proposed rule (48 FR 7476) concerning this amendment. The Commander, Fifth Coast Guard District, also published this proposal as a Public Notice dated February 24, 1983. In each notice, interested persons were given until April 9, 1983 to submit comments. A public hearing was also held on March 24, 1983 at Chesapeake College, Queen Anne's County, Maryland, in which the public was invited to make oral comment.

Due to the expected heavy holiday traffic for the upcoming Memorial Day weekend, and the fact that this final rule will be widely disseminated by various means, this amendment is being made effective less than 30 days from its publication.

Drafting Information

The drafter of this rule is Commander David J. Kantor, project attorney.

Discussion of Comments

At the public hearing, 21 individuals spoke in favor of the proposed operating schedule change and 13 individuals spoke in opposition.

All 21 proponents of the change indicated they favored the change as written, feeling that it would help alleviate the traffic problems now being experienced in the vicinity of the drawbridge. Public safety officials, supported by comments of local residents, expressed concern that the ability of emergency vehicles to respond during periods of heavy traffic back-up was seriously jeopardized. Two individuals expressed concern about opening the draw to navigation on Fridays and Sundays at 8:00 p.m. when average hourly directional vehicular traffic exceeds 2000 vehicles. However, both individuals endorsed the proposed change as written and did not request a change be made at these times.

All of the opponents felt the increased opening restrictions unduly burdened navigation. Concerns over safety and negative economic impact were also voiced, although no substantive data was offered in support. Four individuals recommended that the bridge be opened every other hour. Based upon surveys and the testimony of state highway officials from Maryland, it is apparent that large vehicle back-ups currently occur when directional traffic exceeds 2000 vehicles per hour. However, 2000 vehicle per hour conditions are reached only during certain portions of Fridays, Saturdays and Sundays. A schedule which takes into account the differing conditions, both vehicular and marine, will better balance the equities and be responsive to the needs of both user groups. With respect to the suggestion of an opening every other hour, a 2-hour opening schedule has previously been tried and found to have only aggravated the problem. One of these four individuals also recommended shortening the summer schedule to the period from Memorial Day to Labor Day. Because of heavy vehicle traffic extending from early May until at least mid October, opening on signal at these times would only serve to increase existing problems. For this reason, it is felt a summer schedule running from May 1 to October 31 will better address the situation.

Another person recommended adding to the proposed schedule a 7:00 p.m. Friday opening, a 10:00 a.m. Saturday opening and a 4:00 p.m. Sunday opening. Similarly, another person proposed deleting from the proposed schedule the 3:00 p.m. Friday opening and adding a 4:00 p.m. and 6:00 p.m. Friday opening, deleting the 7:00 a.m. Saturday opening and adding openings at 8:00 a.m., 10:00 a.m. and 2:00 p.m. on Saturdays, and adding openings at 2:00 p.m., 4:00 p.m. and 6:00 p.m. on Sunday. Since these suggestions are similar to some written comments, they will be responded to below.

In addition to the statements made at the public hearing, 122 written comments and 1 petition were submitted to the Coast Guard. Of the 122 comments, 64 were in favor of the proposed change and 58 (22 of which were identical form letters stating general opposition) were in opposition. The petition, which contained 30 signatures, favored more restrictive openings. Of the 64 comments favoring the change, 62 either indicated their support for the change as written or the need to simply limit current draw openings because of excessive vehicular traffic congestion. One letter requested that the drawbridge be permanently closed to navigation. This suggestion must be rejected as it obviously calls for a total restriction of navigation. Another comment suggested the addition of a 4:00 p.m. or 5:00 p.m. Sunday opening but deleting the 8:00 p.m. openings on both those days. Since the 8:00 p.m. openings on Friday and Sunday are the only late evening openings permitted by the proposed schedule, elimination of this opening would unfairly restrict navigation.

The 58 comments submitted in opposition to the proposed change in draw operations generally contended that it unreasonably restricted navigation. Many of the comments contained suggested modifications to the proposed schedule. Without detailing each suggested modification, their basic tenor was that either an additional opening be permitted Saturday morning or a time change be made to the Saturday morning proposed schedule. In addition, they requested additional openings between the 1:00 p.m. and 8:00 p.m. openings on Sunday. There were also requests for additional Friday afternoon openings, retention of the present schedule, openings every two hours, and openings every half-hour.

Based upon prior studies and the information gathered at the public hearing and through written comments, the Coast Guard is making one change to the proposed schedule by changing the Saturday 7:00 a.m. opening to a 9:00 a.m. opening. This change will better accommodate the needs of the boater

VOL
48
ISS
88
MY
5
1983
UMI

and motorist by providing the much requested mid-Saturday morning opening while keeping the bridge closed to navigation at a time (7:00 a.m.) when eastbound traffic is heaviest. Although many comments requested additional openings between the Sunday 1:00 p.m. opening and the 8:00 p.m. opening, statistics have shown that westbound traffic between these hours is at its highest volume. Considering the major disruption to vehicular traffic a bridge opening would cause during this period, additional draw openings cannot be justified. Based on a large compilation of data, as well as all comments received, it is felt the final rule will best temper the existing traffic problem and yet provide for the reasonable needs of navigation.

Many comments submitted by those opposing the change expressed some concerns about potential safety problems and a need to better facilitate the passage of vessels through the draw. While the Coast Guard is not convinced that there is a water safety problem, other than the normal hazards related to negotiating a draw, it does feel that the second concern merits consideration. In addressing this latter concern, some commenters have suggested the establishment of vertical clearance and tidal guage signs to permit boaters to know whether they can clear the bridge in a closed position, either under the main or adjacent spans. In addition, it's been suggested that a system be established, such as large digital clocks, to notify boaters of the time of the next opening. This, combined with a 5 minute warning whistle prior to each opening, may help reduce waiting time. Also suggested was the use of red and green traffic lights for vessels, under the control of the bridgetender, to provide a more rapid and orderly passage by vessels. Finally, it may be helpful to the motorist if permanent signs were displayed at or near approaches to the Kent Narrows corridor informing all motorists of bridge opening times. The Coast Guard believes these suggestions are meritorious and has strongly encouraged the State of Maryland, as bridge owner, to adopt and implement these measures to enhance the flow of marine traffic.

Finally, many of the comments and statements received on this matter suggested construction of a high level bridge. The Coast Guard must agree that any permanent solution to the traffic problems in the Kent Narrows corridor necessitates either an expansion of the present bridge or construction of a new high level bridge or tunnel. In the interim, it is expected that this final rule will achieve a better balance between the motorist and boater. It is not anticipated that any further adjustments will be made to this rule. The permanent solution remains in the hands of the State of Maryland.

This rule has been reviewed for its potential economic impact. It should carry a positive economic impact for those business interests, including resort areas, on the Eastern Shore that have expressed a concern that the heavy traffic back-ups hamper business. Although there are on file several letters which express a concern based on negative economic impact, this final rule is based upon all available evidence. It is designed to preserve numerous bridge openings, especially at most of the times where statistics have shown concentrated vessel traffic. Based on this, it is the Coast Guard's position that there should be no significant reduction of recreational boating in the area. Therefore, the economic impact in the immediate area should be minimal.

Economic Assessment and Certification

These final regulations have been reviewed under the provisions of Executive Order 12291 and have been determined not to be major rules. They are considered to be nonsignificant in accordance with guidelines set out in the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of 22 May 1980). As explained above, an economic evaluation has not been conducted since its impact is expected to be minimal. In accordance with section 605(d) of the Regulatory Flexibility Act (5 U.S.C. 605(b)), it is also certified that these rules will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

Regulations

PART 117—[AMENDED]

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations, is amended by revising § 117.290 (b) and (c) to read as follows:

§ 117.290 Kent Island Narrows, Md., Highway bridge at Grasonville, Md.

* * * * *

(b) From May 1 through October 31:

(1) On Monday (except Monday holidays) through Thursday, the drawbridge shall open for the passage of vessel traffic on the hour from 7 a.m. to 7 p.m., but need not open at any other time.

(2) On Friday, the drawbridge shall open for the passage of vessel traffic on the hour from 6 a.m. to 3 p.m. and at 8 p.m., but need not open at any other time.

(3) On Saturday, the drawbridge shall open for the passage of vessel traffic at 6 a.m., 9 a.m., and 12 noon, and on the hour from 3 p.m. to 8 p.m., but need not open at any other time.

(4) On Sunday and legal holidays falling on Monday, the drawbridge shall open for the passage of vessel traffic on the hour from 6 a.m. to 1 p.m., and at 8 p.m., but need not open at any other time.

(5) The draw shall open at scheduled opening times only if vessels are waiting to pass, and at each opening the draw shall remain open for a sufficient period of time to allow passage of all waiting vessels.

(6) If a vessel is approaching the drawbridge and cannot reach the draw exactly on the hour, the drawtender may delay the hourly opening up to ten minutes past the hour for the passage of the approaching vessel and any other vessels that are waiting to pass.

(c) All public vessels of the United States, and those State or local vessels on public safety missions, shall be passed at any time. The opening signal from these vessels is five or more blasts of a whistle or horn. The opening signal from all other vessels is one long blast followed by one short blast.

(33 U.S.C. 499; 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5); 33 CFR 1.05–1(g)(3))

Dated: April 27, 1983.

John D. Costello,

Rear Admiral, U.S. Coast Guard, Commander, Fifth Coast Guard District.

BILLING CODE 4910-14-M

---

33 CFR Part 165

[Reg. 83-01]

COTP Hampton Roads, VA; Safety Zone Regulations; Elizabeth River, Norfolk, Virginia

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is establishing a safety zone in the Elizabeth River, Norfolk, Virginia to be effective whenever a naval aircraft carrier transits the river either to or from the Norfolk Naval Shipyard, Portsmouth, Virginia. The circumstances creating the need for this action are the restricted nature of the Elizabeth River and the reduced amount of maneuverability of aircraft carriers which, in turn, pose a threat to other watercraft in the area. Excluding vessels moored prior to transit and which remain so moored, waterborne traffic will be prohibited from entering or remaining in the safety zone when in effect.

EFFECTIVE DATE: June 6, 1983.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander W. K. Six, Chief, Port Operations Department, Coast Guard Marine Safety Office, Hampton Roads, Norfolk, Virginia 23510, (804) 441–3296.

SUPPLEMENTARY INFORMATION: On January 27, 1983, the Coast Guard published a notice of proposed rule making in the **Federal Register** for this regulation (48 FR 3783). Interested persons were requested to submit comments and one written comment was received.

Drafting Information

The drafters of this regulation are Lieutenant Commander W. K. Six, project officer for the Captain of the Port and Commander D. J. Kantor, project attorney, Fifth Coast Guard District Legal Office.

Discussion of Comment

One written comment was received on the proposed regulation. The comment supported the concept of restricting the movement of marine traffic in the vicinity of naval aircraft carriers, and further suggested that the area in which this safety zone would be effective be extended out into Chesapeake Bay. This extension of the area is not considered necessary because of the greater maneuvering room in the Chesapeake Bay area for these vessels. Further, U.S. Navy representatives indicate the area they are concerned with is only that portion of the Elizabeth River from the Norfolk Naval Station, Norfolk, Virginia to the Norfolk Naval Shipyard, Norfolk, Virginia.

Economic Assessment and Certification

This regulation is considered to be nonsignificant in accordance with DOT Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5). Its economic impact is expected to be minimal since the safety zone will be implemented on an average of only ten to twelve times per year and will generally be in effect for a few hours each time. Further, the safety zone is a moving zone around the transitory vessel, and will not significantly impede the movement of other vessels. Based upon this assessment, it is certified in accordance with section 605(b) of the Regulatory Act (94 Stat. 1164) that this regulation will not have a significant economic impact on a substantial number of small entities. Also, the regulation has been reviewed in accordance with Executive Order 12291 of February 17, 1981, on Federal Regulation and has been determined not to be a major rule under the terms of that order.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Regulation

PART 165—[AMENDED]

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations, is amended by adding § 165.503 to read as follows:

§ 165.503 Elizabeth River, Norfolk, Virginia.

(a) The waters and waterfront facilities located within the following boundaries are a safety zone when a naval aircraft carrier is transiting the Elizabeth River to or from the Norfolk Naval Shipyard, Portsmouth, Virginia: a circle with a radius of 500 yards with the transiting vessel as its center.

(b) The Captain of the Port will notify the maritime community of periods which this safety zone will be effective through Notice to Mariners and other normal means of notification.

(33 U.S.C. 1225 and 1231; 49 CFR 1.46; 33 CFR 165.3)

Dated: April 25, 1983.

J. D. Webb,

Captain, U.S. Coast Guard, Captain of the Port, Hampton Roads, U.S. Coast Guard.

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-8-FRL 2323-2]

Approval and Promulgation of State Implementation Plans—Revision to the Montana Prevention of Significant Deterioration Regulations

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: EPA is approving a revision to the Montana State Implementation Plan (SIP) submitted by the Governor on January 19, 1983. This SIP revision relates to requirements for the permitting of new major sources and major modifications to existing sources, in areas of the State which are in attainment of the National Ambient Air Quality Standards. Montana has revised its SIP in accordance with the requirements for the Prevention of Significant Deterioration (PSD) of air quality (40 CFR 51.24), as those sections were amended on August 7, 1980 (45 FR 52729–52735). In conjunction with the approval of this plan revision, the application of the Federal PSD program to lands under State jurisdiction is being suspended.

EPA's review of this SIP revision was conducted concurrently with the public review of the same revisions at the State level. This concurrent review, which EPA refers to as "parallel processing", is designed to reduce the time necessary for EPA approval of SIP revisions.

EFFECTIVE DATE: This action will be effective June 6, 1983.

ADDRESSES: Copies of the revision are available for public inspection between 8:00 a.m. and 4:00 p.m. Monday through Friday at the following offices:

Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C. 20408

Environmental Protection Agency, Region VIII, Air Programs Branch, 1860 Lincoln Street, Denver, Colorado 80295

Environmental Protection Agency, Montana Office, 301 S. Park, Helena, Montana 59626

Environmental Protection Agency, Public Information Reference Unit, Waterside Mall, 401 M Street, SW., Washington, D.C. 20460

FOR FURTHER INFORMATION CONTACT: Kenneth L. Alkema, Environmental Protection Agency, 301 S. Park, Drawer 10096, Helena, Montana 59626, Phone: (406) 449–5414.

SUPPLEMENTARY INFORMATION: On May 20, 1982 (47 FR 21880), EPA proposed to approve Montana's SIP revision for PSD. EPA proposed approval of the State's PSD regulations prior to final State adoption of the SIP revision. EPA refers to this new procedure as "parallel processing." It is designed to shorten the time needed to act on SIP Revisions. EPA indicated in the proposed rulemaking notice that if the regulations adopted by the State did not differ substantially from the version EPA proposed to approve, EPA would issue a final rule shortly after State adoption.

On November 19, 1982, the Montana State Board of Health and Environmental Sciences adopted the SIP revision on PSD. The revision which

VOL
48
ISS
88
MY
5
1983
UMI

was adopted did not differ substantially from the version which EPA proposed to approve in its May 20, 1982, Federal Register notice. The only changes made by the State were in the definition of baseline area. Under the initial proposal, baseline area was defined on a county basis. This definition was changed to "statewide" for sulfur dioxide and to "impact area" for total suspended particulates. Since all of these alternatives are discretionary to the State, they do not constitute a significant change relative to EPA's review authority. These rules were submitted to EPA on January 19, 1983.

The Montana PSD regulation does not explicitly require that any redesignation approved by the State be submitted to EPA for its approval. Although it is clear from a reading of the regulation that the State did not intend to exclude EPA from the process, EPA wishes to emphasize that any redesignation approved by the State must be submitted to EPA as a State Implementation Plan revision, and must be approved by EPA in order for the redesignation to take effect.

In developing its regulations, the State was unclear about who would take responsibility for interacting with the Federal Land Managers (FLMs). The State wishes to assume responsibility for notifying the FLMs of all sources wishing to locate with 100 km of any Class I areas. The State will also transmit the permit applications at the time they are declared complete, as well as all other relevant material. The State has committed to amend its regulations to clarify this responsibility. In the interim, the State has committed, as a policy measure, to comply with this responsibility.

As adopted, the portion of the State's regulation dealing with source impact analysis does not specifically address sources which have permits, but which have not begun construction. However, the State has agreed that, as a matter of policy, in making such analyses it will include allowable emissions from sources which have permits, but have not begun construction.

In the notice EPA published on May 20, 1982 (47 FR 21880), comments were requested on EPA's proposal to approve Montana's SIP revision on PSD. Only one set of comments was received. That came from the Western Energy Company in Butte, Montana. The comments concerned the manner in which the Montana PSD regulation treated fugitive emissions, increment consumption, baseline area, and baseline date. The comments consisted of a copy of the written testimony that Western Energy presented at the public hearing held by the Montana State Board of Health and Environmental Sciences on March 13, 1982. In the following paragraphs the Company's testimony is summarized and EPA's response to each of the comments is provided.

Comment: The company expressed a concern over the way in which emissions from mines, primarily "fugitive emissions," are treated.

The company asserted that the entire increment could be consumed by fugitive emissions, thereby precluding any future development.

EPA Response: The PSD regulation adopted by the State of Montana, treats fugitive emissions in a manner identical to EPA's PSD regulations (e.g., fugitive emissions from mines do not count in determining a "net emissions increase" or in determining "potential to emit" unless the source belongs to specified source categories, but fugitive emissions do consume increment). However, as a result of a recent settlement agreement nogotiated in response to litigation challenging EPA's August 7, 1980, final rules *(Chemical Manufacturers' Association, et al., v. EPA* (D.C. Cir., No. 79–1112)), EPA has agreed to propose certain changes to the federal PSD regulations which may alter some of the existing regulatory provisions. In his testimony at the hearing, the Chief of the Montana Air Quality Bureau (the agency responsible for drafting the regulation) stated that as soon as EPA modified its PSD regulation regarding increment consumption by fugitive dust, the State would propose to do likewise.

Inasmuch as the State designed its regulation to be consistent with EPA's existing regulation, EPA concludes that the State has dealt with this issue adequately.

Comment: The company contended that either a county-by-county or statewide baseline area was unduly restrictive. Many of the counties in Montana are quite large. To place this in perspective, the company's testimony pointed to the fact that Rosebud County in eastern Montana is larger than the states of Rhode Island, Delaware or Connecticut. The company, therefore, proposed as an alternative the use of an "impact area". The impact area "would be defined by measurable increases of SO_2 or particulate matter of one microgram per cubic meter or more on an annual basis."

EPA Response: The State made a concerted effort to involve the public in the development of the PSD regulation. A total of six drafts of the regulation were produced. These were widely circulated to industry, environmental groups, EPA and the public at large. Prior to the public hearing on March 13, 1982, numerous informal meetings were held with all persons interested in participating. Subsequent to the public hearing in Helena, three additional public meetings were held in Billings, Great Falls and Missoula, to gather additional public testimony on the proposal.

At its meeting on November 19, 1982, the Board of Health and Environmental Sciences voted to adopt the PSD regulation, including a provision which, in effect, establishes a statewide baseline area for sulfur dioxide and an impact baseline area for total suspended particulates. This decision is also consistent with EPA regulations, which allow States considerable discretion to establish a statewide baseline area provided the area established is no smaller than the impact area.

Action

EPA today is approving this revision to the Montana State Implementation Plan with the following understandings.

1. The State will submit a regulation which does not allow credit for other than GEP (Good Engineering Practice) stack height for sources constructed after December 31, 1970.

2. The State will add to its definition of "Potential to Emit" a provision to indicate that fugitive emissions do not count in determining net emissions for all source types not listed in NSPS (New Source Performance Standards) (40 CFR Part 60), or NESHAPS (National Emissions Standards for Hazardous Air Pollutants) (40 CFR Part 61).

3. The State will delete from its definition of "Actual Emissions" the phrase "as of the baseline date."

The State has committed, as a policy measure, to comply with these provisions in the interim.

Under Section 307(b)(1) of the Clean Air Act, petitions for review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 5, 1983. This action may not be challenged later in proceedings to enforce its requirements. (See sec. 307(b)(2)).

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

This rulemaking is issued under the authority of Part C, Subpart 1, and Section 110 of the Clean Air Act.

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, and Hydrocarbons.

Note.—Incorporation by reference of the State Implementation Plan for the State of Montana was approved by the Director of the Federal Register on July 1, 1982.

Dated: April 22, 1983.

Lee L. Verstandig,

Acting Administrator.

PART 52—[AMENDED]

Title 40, Part 52 of the Code of Federal Regulations is amended as follows:

Subpart BB—Montana

1. In § 52.1370 paragraph (c)(12) is added as follows:

§ 52.1370 Identification of plan.

* * * * *

(c) * * *

(12) On January 19, 1983, Montana submitted revisions to the State Implementation Plan to meet the requirements of Part C, Subpart 1, and Section 110 of the Clean Air Act.

2. In § 52.1382 paragraphs (a) and (b) are revised to read as follows:

§ 52.1382 Prevention of significant deterioration of air quality.

(a) The Montana plan, as submitted, is approved as meeting the requirements of Part C, Subpart 1 of the Clean Air Act, except that it does not apply to sources proposing to construct on Indian Reservations.

(b) Regulation for preventing of significant deterioration of air quality. The provisions of § 52.21 (b) through (w) are hereby incorporated by reference and made a part of the Montana State Implementation Plan and are applicable to proposed major stationary sources or major modifications to be located on Indian Reservations.

BILLING CODE 6560-50-M

40 CFR Part 52

[KY-014; A-4-FRL 2331-7]

Approval and Promulgation of Implementation Plans; Kentucky: Variances for Volatile Organic Compound Sources

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: EPA is today approving variances for two dry cleaning establishments in Covington, Kentucky. The two variances are for volatile organic compounds (VOC), specifically for two perchloroethylene dry cleaning establishments. The affected companies satisfy EPA criteria for such variances.

EFFECTIVE DATE: This action will be effective on July 5, 1983, unless notice is received within 30 days that someone wishes to submit adverse or critical comments.

ADDRESSES: Written comments should be addressed to Waymond Blackmon of EPA Region IV, Air Management Branch (see EPA Region IV address below). Copies of the material submitted by Kentucky may be examined during normal business hours at the following locations:

Library, Office of the Federal Register, Room 8401, 1100 L Street NW., Washington, D.C. 20408

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460

Air Management Branch, EPA, Region IV, 345 Courtland Street NE., Atlanta, Georgia 30365

Kentucky Department for Environmental Protection, 18 Reilly Road, Building 2, Fort Boone Plaza, Frankfort, Kentucky 40601.

FOR FURTHER INFORMATION CONTACT: Waymond Blackmon, EPA Region IV, Air Management Branch, 404/881–2864 or FTS 257–2864.

SUPPLEMENTARY INFORMATION: Following public hearing, Kentucky adopted and submitted plan revisions involving sources of volatile organic compounds (VOCs). In connection with Kentucky regulation 401 KAR 61:160, "Existing Perchloroethylene Dry Cleaners," and Commonwealth of Kentucky has approved variances for two perchloroethylene dry cleaning establishments in Covington, Kentucky. The variances are for Community Cleaners and Perfect Cleaners and are based upon economic and/or technological justification. These variances end the requirement for carbon adsorbers, but good housekeeping and leak prevention requirements are still in force for these plants.

Discussion

The Community Cleaners is a small family operation. The Kentucky Division of Air Pollution Control granted an economic variance based upon an economic evaluation as set forth in the applicable Control Techniques Guideline (CTG) document (EPA–450/2–78–050). This particular document is related to the control of VOCs, specifically perchloroethylene, from all dry cleaning systems, which use this solvent. The methodology described in this document represents the presumptive norm or reasonably available control technology (RACT) that can be applied to existing perchloroethylene dry cleaning systems. RACT is defined as the lowest emission limit that a particular source is capable of meeting by the application of control technology that is reasonably available considering technological and economic feasibility. The CTG developed average or typical costs for each of four (4) capacity ratings of cleaning equipment, based upon 1978 first quarter costs.

The analysis used by the Division was based upon Community Cleaners' 25-pound capacity machines. The average costs for that equipment, as reported in the CTG and ajusted to reflect 1981 costs, was $0.49/kg ($447.97/ton) of controlled VOC. Applying the CTG method of economic analysis to the information submitted by Community Cleaners, a cost of $2.38/kg ($2,160.74/ton) of controlled VOC was obtained using current installation costs as of June 29, 1982 (which includes capital and direct operating costs, capital charges, and solvent cost, etc.). This figure is much larger than the average cost because the average is based upon an assumed 1600 kg/yr (1.76 TPY) of controlled emissions whereas Community Cleaners is so small it generates only 636 kg/yr (0.70 TPY) that can be controlled by RACT. The additional kilograms per year of emissions of VOC resulting from this action would be 1,235 kg/yr (1.36 TPY) uncontrolled emissions compared to 617 kg/yr (0.68 TPY) had this variance not been granted. This amount of uncontrolled emissions is less than one percent (.002%) of the total VOC emissions reported in the designated nonattainment area for 1981. In addition to the above RACT determination, the Agency also considered the effect of the cost on the individual facility, the amount of actual emissions and the source impact on the area's ability to

VOL
48
ISS
88
MY
5
1983
UMI

attain the National Ambient Air Quality Standard for ozone. Taking into consideration all the information submitted, EPA is approving the economic variance granted by the Kentucky Division of Air Pollution Control to Community Cleaners.

The Kentucky Division of Air Pollution Control granted Perfect Cleaners a variance because it is physically impossible to locate the required control equipment at the establishment without extensive renovation to the building. Under the provisions of Regulation 401 KAR 61:160, "Existing Perchloroethylene Dry Cleaning Plants," Perfect Cleaners applied for a technological variance.

Section 7 of this regulation provides for variances based on adequate technical information, that will be considered by the department on a case-by-case basis, to allow for technological or economic circumstances which are unique to a source. The applicable CTG document (EPA–450/2–78–050) defines technological variance, in part, as a variance granted because the source has inadequate space available to install a carbon adsorber. On September 23, 1981, the Kentucky Division of Air Pollution Control performed a field inspection of Perfect Cleaners to evaluate their request. It was found that their claim of inadequate space was correct. The building at 801 Highway would require extensive renovation to accommodate a carbon adsorption unit. This technological variance waives the requirements of Section 3 (2) and (3) of Regulation 401 KAR 61:160, "Existing Perchloroethylene Dry Cleaning Plants." All other requirements in Section 3 shall be adhered to. The additional emissions resulting from the granting of this variance will be 3,614 kg/yr (3.98 TPY) VOC. This amount of uncontrolled emissions is less than one percent (.008%) of the total VOC emissions reported for the designated nonattainment area for 1981. EPA is approving the technological variance granted by the Kentucky Division of Air Pollution Control to Perfect Cleaners because it meets Agency guidance for approving such a variance (Control of Volatile Organic Emissions from Perchloroethylene Dry Cleaning Systems, EPA–450/2–78–050).

Action

EPA has reviewed the submitted material and found it to be consistent with present EPA requirements and policies. The total uncontrolled tonnage from these two variances amounts to 4,849 kg/yr (5.34 TPY) of perchloroethylene, which is less than one percent (.008%) of the total VOC emissions reported for the designated nonattainment area for 1981. Further, the variances will not interfere with attainment or maintenance of the ozone standard or with Reasonable Further Progress towards attainment. Therefore, EPA is today announcing full approval of the State's submittal.

The public should be advised that this action will be effective 60 days from the date of this **Federal Register** notice. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 5, 1983. This action may not be challenged later in proceedings to enforce its requirements. (See sec. 307(b)(2).

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Incorporation by reference of the State Implementation Plan for the State of Kentucky was approved by the Director of the Federal Register on July 1, 1982.

Air Pollution control, Intergovernmental relations, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, and Hydrocarbons.

(Secs. 110 and 172 of the Clean Air Act, as amended (42 U.S.C. 7410 and 7502))

Dated: April 22, 1983.

Lee L. Verstandig,

Acting Administrator.

PART 52—[AMENDED]

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

Subpart S—Kentucky

1. In Section 52.920 is amended by adding paragraph (c)(37) as follows:

§ 52.920 Identification of plan.

* * * * *

(c) The plan revisions listed below were submitted on the dates specified. * * *

(37) Variances for two dry cleaners, submitted on January 27, 1983, by the Kentucky Department for Environmental Protection.

[FR Doc. 83–12086 Filed 5–4–83; 8:45 am]

BILLING CODE 6560–50–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6511]

List of Communities Eligible for the Sale of Insurance Under the National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain flood plain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The date listed in the fifth column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 3429, Bethesda, Maryland 20034, Phone: (800) 638–6620.

FOR FURTHER INFORMATION CONTACT: Mr. Richard E. Sanderson, Chief, Natural Hazards Division (202) 287–0270, 500 C Street Southwest, Donohoe Building, Room 505, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Director of the Federal Emergency Management Agency has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the sixth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Director finds that delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance." This program is subject to procedures set out in OMB Circular A–95.

Pursuant to the provision of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice stating the community's status in the NFIP and imposes no new requirements or regulations on participating communities.

List of Subjects in 44 CFR Part 64

Flood insurance, Flood plains.

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

§ 64.6 List of eligible communities.

State and county	Location	Community No.	Effective dates of authorization/cancellation of sale of Flood Insurance in community	Special flood hazard area identified
Arkansas: Howard	Unincorporated areas	050438A	Mar. 17, 1983, emergency	June 7, 1977.
Wyoming: Park	do	560085A	Mar. 24, 1983, emergency	Apr. 25, 1978.
California: Butte	do	060017	Mar. 21, 1983, emergency	Sept. 6, 1974 and Dec. 27, 1977.
Wisconsin: Barron	Rice Lake, city of	550018C	July 10, 1975, emergency, Oct. 15, 1982, regular, Oct. 15, 1982, suspended, Mar. 28, 1983, reinstated.	Mar. 18, 1978, Dec. 7, 1973 and July 30, 1976.
New York: Oneida	Marshall, town of	3605348	July 17, 1975, emergency, Sept. 30, 1982, regular, Sept. 30, 1982, suspended, Mar. 31, 1983, reinstated.	Aug. 2, 1974 and July 9, 1976.
North Dakota: Richland	Wyndmere, township of	380867–New	Mar. 31, 1983, emergency	
North Carolina: Madison	Hot Springs, town of	370153A	Nov. 17, 1977, emergency, July 5, 1982, regular, July 5, 1982, suspended, Mar. 31, 1983, reinstated.	Sept. 17, 1976.
Illinois: Clinton	Germantown, village of	170049A	Mar. 31, 1983, emergency	Mar. 29, 1974.
Missouri: Warren	Warrenton, city of	290648	do	Feb. 7, 1975.
Arkansas: Miller	Unincorporated areas	050451A	do	Jan. 10, 1983.
Colorado: Delta	Paonia, town of	080045B	Mar. 16, 1983, suspension withdrawn	May 24, 1974 and Oct. 31, 1975.
Connecticut: New Haven	East Haven, town of	090076	do	
Florida: Pinellas	Largo, city of	125122D	do	May 28, 1971 and June 18, 1971.
Indiana: Ceder	West Branch, city of	190058B	do	Mar. 1, 1974 and Jan. 23, 1976.
Kansas: McPherson	McPherson, city of	200217D	do	Mar. 15, 1974 and Apr. 11, 1975.
Maryland	Baltimore, city of	240087B	do	June 28, 1974 and Mar. 15, 1976.
New York:				
Steuben	Bath, village of	360767E	do	Aug. 15, 1977.
Suffolk	East Hampton, town of	360794B	do	Aug. 29, 1975.
Do	Belle Terre, village of	361532B	do	Dec. 27, 1974 and June 18, 1976
Herkimer & Fulton	Dolgeville, village of	360301B	do	Dec. 13, 1974 and Sept. 26, 1975.
Wayne	Lyons, village of	360891B	do	May 3, 1974 and Sept. 24, 1976.
Niagara	Niagara Falls, city of	360506B	do	Mar. 29, 1974 and Nov. 14, 1975.
Westchester	Ossining, town of	361241B	do	Oct. 25, 1974 and Feb. 25, 1977.
Nassau	Oyster Bay, town of	360483C	do	Nov. 29, 1974, Sept. 12, 1975 and Aug. 1, 1978.
Suffolk	Shoreham, village of	361506B	do	
Montgomery	St. Johnsville, town of	360456	do	Aug. 16, 1974 and June 4, 1976.
Tioga	Waverly, village of	361343B	do	Nov. 1, 1974 and June 11, 1976.
New Jersey: Mercer	East Windsor, township of	340244B	do	Feb. 15, 1974 and Sept. 12, 1975.
Ohio: Lucas	Unincorporated areas	390359B	do	May 20, 1977.
Pennsylvania: York	Warrington, township of	422232B	do	Dec. 27, 1974 and Dec. 26, 1980.
South Carolina: Horry	North Myrtle Beach, town of	450110C	do	Aug. 23, 1974 and July 5, 1975.
Vermont: Franklin	Swanton, village of	500060	do	Nov. 26, 1976.
Virginia: Chesterfield	Unincorporated areas	510035	do	Jan. 10, 1975 and June 2, 1976.
Michigan: Monroe	Milan, township of	260152B	do	May 24, 1974 and June 25, 1976.
Minnesota: Marshall	Stephen, city of	270273B	do	June 4, 1976 and May 17, 1974.
Michigan: Oakland	West Bloomfield, township of	260182B	do	June 28, 1974 and Jan. 30, 1976.

(National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968); effective Jan. 28, 1969 (33 FR 17804, Nov. 28, 1968), as amended, 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to the Associate Director, State and Local Programs and Support)

Issued: April 11, 1983.

Dave McLoughlin,

Deputy Associate Director, State and Local Programs and Support.

[FR Doc. 83–12097 Filed 5–4–83; 8:45 am]

BILLING CODE 6718–03–M

VOL 48 ISS 88 MAY 5 1983 UMI

44 CFR Part 64

[Docket No. FEMA 6513]

Suspension of Community Eligibility Under the National Flood Insurance Program

AGENCY: Federal Emergency Management Agency. FEMA.

ACTION: Final rule.

SUMMARY: This rule lists communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended on the effective dates listed within this rule because of noncompliance with the flood plain management requirements of the program. If FEMA receives documentation that the community has adopted the required flood plain management measures prior to the effective suspension date given in this rule, the suspension will be withdrawn by publication in the Federal Register.

EFFECTIVE DATES: The third date ("Susp.") listed in the fourth column.

FOR FURTHER INFORMATION CONTACT: Mr. Richard E. Sanderson, Chief, Natural Hazards Division (202) 287–0270, 500 C Street Southwest, Donohoe Building, Room 505, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001–4128) unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (44 CFR Part 59 et seq.). Accordingly, the communities are suspended on the effective date in the fourth column, so that as of that date flood insurance is no longer available in the community. However, those communities which, prior to the suspension date, adopt and submit documentation of legally enforceable flood plain management measures required by the program, will continue their eligibility for the sale of insurance. Where adequate documentation is received by FEMA, a notice withdrawing the suspension will be published in the Federal Register.

In addition, the Director of Federal Emergency Management Agency has identified the special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. No direct Federal financial assistance except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP and identified for more than a year, on the Federal Emergency Management Agency's initial flood insurance map of the community as having flood prone areas. (Section 202(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Director finds that notice and public procedure under 5 U.S.C. 533(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified. Each community receives a 6 month, 90 days, and 30 days notification addressed to the Chief Executive Officer that the community will be suspended unless the required flood plain management measures are met prior to the effective suspension date. For the same reasons, this final rule may take effect within less than 30 days.

Pursuant to the provision of 5 U.S.C., 605(b), the Associate Director of State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. As stated in section 2 of the Flood Disaster Protection Act of 1973, the establishment of local flood plain management together with the availability of flood insurance decreases the economic impact of future flood loses to both the particular community and the nation as a whole. This rule in and of itself does not have a significant economic impact. Any economic impact results from the community's decision not to (adopt) (enforce) adequate flood plain management, thus placing itself in non-compliance of the Federal standards required for community participation.

In each entry, a complete chronology of effective dates appears for each listed community.

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 82–07; Notice 2]

Federal Motor Vehicle Safety Standards; Power-Operated Window Systems

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Final rule.

SUMMARY: This notice amends Federal Motor Vehicle Safety Standard (FMVSS) No. 118, *Power-Operated Window Systems*, to permit the operation of a vehicle's power windows and partitions during the interval between the shutting off of the engine and the opening of a front door on the vehicle. This amendment, which was proposed in response to a petition from General Motors Corporation (GM), would permit the manufacturers to offer power window systems which are more convenient than current systems. The agency believes the amendment would increase design flexibility without adversely affecting safety.

EFFECTIVE DATE: This amendment is effective on May 5, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Nelson Erickson, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590 (202–426–2720).

SUPPLEMENTARY INFORMATION: In 1970,

VOL 48 ISS 88 MAY 5 1983 UMI

NHTSA issued FMVSS 118 in response to numerous cases of injury and death resulting from accidental operation of power windows. The standard sought to address the main source of these accidents, the unsupervised use of power windows by children, which could result in the child being caught between the closing window or partition and the window or partition frame.

The standard provides that power-operated window and partition systems may be operable only in certain specified circumstances. First, operation is permitted when the vehicle's ignition switch is in the "ON," "START," or "ACCESSORY" position. The rationale for permitting operation in that situation is that the driver would presumably still be in the vehicle to supervise the operation of the windows by any children who are passengers. Second, the standard permits operation of the systems by "muscular force." Third, the systems may also be operated by a key-locking system on the exterior of the vehicle. Here again, the driver would presumably be able to observe the window or partition being closed to assure that the closing track is clear. Fourth, the standard permitted operation of the systems when the key is in the "off" position or removed from the vehicle and the door is opened a specified amount. This provision, which applies only to vehicles having doors with no frame meeting the upper edge of the closed window, was added to the standard in 1975 in response to a petition from GM. However, neither GM nor any other manufacturer ever produced the system which this provision was intended to permit, and it appears that no manufacturer plans to offer such a system in the future.

On April 1, 1982, in 47 FR 13845, the agency proposed to permit operation of power windows and partitions in a fifth circumstance, in response to another petition from GM. Under this proposal, these systems would be operable during the interval between the time the vehicle's ignition key is shut off to the time one of the vehicle's doors is opened. This provision would permit windows to be operable in situations such as refueling stops at service stations, an added convenience for the driver. However, it would also assure, except in rare circumstances, that the driver is still in the vehicle and able to supervise the operation of the windows. The provision was proposed as a method of increasing driver convenience and was anticipated to have no impact on safety.

The agency received 28 comments on the proposal. Comments from the vehicle manufacturers favored the proposal, with some having proposals for slight refinements of the proposed regulatory language. Comments were also received from a number of individuals, most of whom opposed the amendment. After careful consideration of these comments, the agency has determined to promulgate the proposed amendment.

The individuals who opposed the proposed amendment generally argued that the change would permit the operation of power windows by unsupervised children and therefore would be a detriment to safety. Based on the agency's review of the comments and conversations with several of these individuals, it appears that they were unaware that the window systems would cease being operational as soon as the engine is shut off and a door is opened and would remain nonoperational even if the door were again closed. Thus, the proposal would tend to assure that the driver is in the car when the windows can move. Once this aspect of the proposal was explained to the individuals, they no longer opposed the amendment.

While there is a possibility under the new option for power windows to be operational without the driver being present in the vehicle, that possibility could arise only in rare circumstances. Further, similar possibilities exist under one of the existing options. For example, under the new option, a driver could get out of a vehicle, leaving the engine running and close the door. The windows would still be operational. Then, if the driver's window were open so that he or she could reach through the open window instead of opening the door to shut the engine off, the windows would continue to be operational. Similarly, under one of the current options, power windows would be operable in the same circumstances, at least until the driver reached into the vehicle and shut off the engine. The agency believes that these circumstances would rarely occur and would be even less likely to occur when children were in the car. Accordingly, the agency believes that this potential detriment would, if it occurs at all, be very small. Even if it does occur, it could be offset by a small benefit suggested by other commenters. They felt that the amendment would provide a security advantage, by permitting drivers to quickly close the vehicle's windows for protection without first having to turn on the ignition switch. Overall, the agency does not anticipate that the proposal would result in any increase in injuries or deaths.

Several manufacturers argued for certain modifications to the proposed rule. Mercedes-Benz argued that the interval after engine shut-off during which the windows are operable should end when one of the front doors is opened. American Motors made a similar suggestion. The agency agrees that, in the case of four door automobiles, it is unlikely that the driver would exit from one of the rear doors and entry to or exit from rear seats should not impede the ability of the driver to supervise children in the vehicle. Therefore, the agency has adopted this suggestion.

Fiat Motors suggested that the agency permit the use of systems incorporating a 20 second time delay, i.e., windows would be operable for 20 seconds after the engine is shut off regardless of whether a door had been opened. Such a system could provide a brief interval during which children in a vehicle would be unsupervised and the power window system would be operational, possibly increasing the risk of the types of accidents FMVSS 118 was designed to prevent. The agency believes, on the basis of current information, that adoption of the proposal is not appropriate. If Fiat or any other commenter wishes to present data or arguments with regard to the safety impacts of such a system, the agency will reconsider permitting the use of this type of system.

American Motors Corporation (AM) also suggested several clarifications to the proposed rule. First, AM suggested that the rule explicitly state that power window and partition systems may be operable when the ignition switch is in the "ACCESSORY" position after a door is opened. Since the standard always permitted systems to be operable whenever the ignition key is in the "ACCESSORY" position, no substantive change would be involved. The agency has attempted to clarify this point. AM further suggested that references in the standard to the "key that controls activation of the vehicle's engine" be replaced by "ignition switch." However, the standard would apply to any systems used in electric vehicles or other motor vehicles which operate by energy produced by means other than ignition. Therefore, the latter suggestion has not been adopted.

AM also favored the deletion of the provision permitting the operation of power windows in certain vehicles when a door is opened a specified amount, since that provision never has and likely never would be used. Since this provision is apparently obsolete, it has been deleted.

The agency is making this amendment effective immediately upon publication, since the amendment "relieves a restriction" within the meaning of 5 U.S.C. 553(d)(1), by permitting the use of certain systems which were previously unauthorized. The agency also finds that making this amendment effective immediately is in the public interest, in accordance with section 103(e) of the National Traffic and Motor Vehicle Safety Act, since doing so will permit the use of more convenient power window systems at an early date. Also, since the amendment relieves a restriction in FMVSS 118, providing 180 days lead time is unnecessary.

NHTSA has determined that this proceeding does not involve a "major rule" within the meaning of section 1, paragraph (b), of Executive Order 12291 because it is not likely to have an effect on the economy of $100 million or more, to result in a major increase in costs or prices, or to have a significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of United States firms to meet foreign competition. Similarly, this action is not deemed "significant" for purposes of Department of Transportation procedures for internal review of regulatory actions. The economic impacts of this amendment are so minimal as to not warrant preparation of a full regulatory evaluation, since the amendment merely permits the use of certain systems which were previously prohibited.

Pursuant to the Regulatory Flexibility Act, the agency has considered the impact of this rulemaking action on small entities. I certify that this action will not have a significant economic impact on a substantial number of small entities, including small organizations or governmental units.

Therefore, a regulatory flexibility analysis is not required for this action. The agency has concluded that few, if any, manufacturers of power window systems are small entities and that the impacts of this rule on those companies which decide to take advantage of the new alternative method of compliance should be minimal. There would be no significant impact on the cost of new vehicles manufactured in accordance with the new provision. Therefore, there should be no significant impact on small entities which purchase vehicles with power windows.

NHTSA has concluded that the environmental consequences of this action will be of such limited scope that they will not have a significant effect on the quality of the human environment.

PART 571—[AMENDED]

§ 571.118 [Amended]

In consideration of the foregoing, 49 CFR 571.118 is amended as follows:

1. Section 3 is revised to read as follows:

* * * * *

S3. *Power window or partition systems may be operable only in the following circumstances.* (a) When the key that controls activation of the vehicle's engine is in the "ON", "START", or "ACCESSORY" position;

(b) By muscular force unassisted by a vehicle power source;

(c) Upon activation by a key-locking system on the exterior of the vehicle; or

(d) During the interval between the time a running engine is turned off and the opening of either of a two-door vehicle's doors or, in the case of a vehicle with more than two doors, the opening of either of its front doors.

(Secs. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegation of authority at 49 CFR 1.50)

Issued on April 29, 1983.

Proposed Rules

Federal Register
Vol. 48, No. 88
Thursday, May 5, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 337

Unsafe and Unsound Banking Practices

AGENCY: Federal Deposit Insurance Corporation ("FDIC").

ACTION: Proposed rule.

SUMMARY: The FDIC is proposing an amendment to § 337.3(b) of its regulations that would (1) eliminate the current requirement for prior approval by a majority of a bank's board of directors of all extensions of credit exceeding in the aggregate $25,000 that are made to one of the bank's directors, executive officers, principal shareholders, or any related interest of any such person, and (2) substitute a prior approval formula whereby extensions of credit in excess of five percent of capital and unimpaired surplus or $25,000, whichever is larger, must receive prior approval but in no event may any extension of credit exceeding the aggregate $500,000 be made without prior board approval.

DATE: Comments must be received no later than July 5, 1983.

ADDRESS: Send comments to Hoyle L. Robinson, Executive Secretary, Federal Deposit Insurance Corporation, 550–17th Street, NW., Washington, D.C. 20429.

Comments may be hand-delivered to Room 6108 between the hours of 8:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Pamela E. F. LeCren, Senior Attorney, Legal Division, (202–389–4171), Room 4126E, 550–17th Street, NW., Washington, D.C. 20429, or Ken A. Quincy, Examination Specialist, Division of Bank Supervision, (202–389–4141), Room 760–F, 1709 New York Avenue, NW., Washington, D.C. 20429.

SUPPLEMENTARY INFORMATION: Section 22(h) of the Federal Reserve Act (12 U.S.C. 375b) places certain restrictions on extensions of credit to "insiders" of member banks (directors, executive officers, principal shareholders and related interests of such persons) and is made applicable to nonmember banks to the same extent and in the same manner as if they were member banks by section 18(j)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1828(j)(2)). Section 22(h) was recently amended by the Garn-St Germain Depository Institutions Act of 1982 (Pub. L. 97–320, 96 Stat. 1469) so as to delete the express requirement in section 22(h) that a majority of a bank's board of directors give its prior approval for all extensions of credit to a bank insider that exceed in the aggregate $25,000. Substituted in its place was the requirement that prior approval be obtained for all extensions of credit that exceed in the aggregate an amount fixed by regulation of the appropriate Federal banking agency. Effective October 22, 1982, the FDIC amended Part 337 of its regulations concerning unsafe and unsound banking practices so as to (1) clarify the extent to which nonmember banks are subject to the requirements of Federal Reserve Board Regulations O (12 CFR Part 215) which implements section 22(h) of the Federal Reserve Act, and (2) to continue the $25,000 threshold prior approval figure on an interim basis. (See 47 FR 47002).

The FDIC is hereby proposing to amend Part 337 to provide that a majority of the board of directors of an insured nonmember bank must give prior approval for all extensions of credit to its directors, executive officers, principal shareholders, or any related interest of any such person if the extension of credit exceeds, in the aggregate, five percent of the bank's capital and unimpaired surplus or $25,000, whichever is greater, but in no event may an insured nonmember bank grant any extension of credit exceeding in the aggregate $500,000 unless prior board approval is obtained. The formula thus sets $25,000 as the floor for prior approval and $500,000 as the ceiling in excess of which all extensions of credit must be approved.

Any insured nonmember bank that has total capital in excess of $500,000 would have higher prior approval trigger under the proposed formula than under the existing regulations. As 96 percent of the total number of insured nonmember banks have total capital in excess of $500,000, the proposal would reduce the existing prior approval burden for the majority of such banks. Only the very smallest state nonmember bank would still be subject to a $25,000 prior approval requirement. Not only does this not change the status quo for such banks, setting a $25,000 floor avoids setting and unrealistically low threshold figure in the case of small banks that would otherwise kick in if a straight percentage test were used. The $500,000 cap serves as a check for the very largest of banks. This sliding scale that would operate for all other banks has the advantage of more closely aligning the prior approval requirement with the potential threat posed to any particular banks's capital position by insider lending.

The proposal does not establish any additional recordkeeping or reporting requirements and will not affect the competitive positions of banks. As the Comptroller of the Currency and the Board of Governors of the Federal Reserve System are expected to adopt a similar proposal respecting prior approval of extensions of credit to insiders of national banks and member banks, insured nonmember banks would be under the same restrictions regarding prior approval of insider transactions as national and member banks.

Regulatory Flexibility Analysis

The Board of Directors hereby certifies that, if adopted, the proposal would not have a significant economic impact on a substantial number of small entities. The Board bases its conclusion in part on the fact that, for the very smallest of insured nonmember banks, the proposal would not affect the status quo. For the large majority of nonmember banks that would be affected by the change, the proposal would reduce some of their existing prior approval burden. The Board does not associate any economic impact with raising the prior approval trigger as it only relates to the oversight function of a bank's board of directors and neither increases nor decreases a bank's ability to make extensions of credit.

List of Subjects in 12 CFR Part 337

Banks, banking, State nonmember banks.

In consideration of the foregoing, the FDIC hereby proposes to amend Part 337 of title 12 of the Code of Federal Regulations as follows:

PART 337—UNSAFE AND UNSOUND BANKING PRACTICES

1. The authority citation for Part 337 is as follows:

Authority: Sec. 9, 64 Stat. 881–882, 12 U.S.C. 1819; sec. 18(j)(2), 92 Stat. 3664, 12 U.S.C. 1828(j)(2); sec. 422, 96 Stat. 1469, Pub. L. No. 97–320.

§ 337.3 [Amended]

2. It is proposed that Part 337 be amended by revising § 337.3(b) by removing "$25,000" where it appears and inserting in lieu thereof the following:

"the greater of $25,000 or five percent of the bank's capital and unimpaired surplus,[a] or $500,00"

By Order of the Board of the Directors, May 2, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

[FR Doc. 83–12062 Filed 5–4–83; 8:45 am]

BILLING CODE 6714–01–M

[a] For the purposes of § 337.3 an insured nonmember bank's capital and unimpaired surplus shall have the same meaning as found in § 215.2(f) of Federal Reserve Board Regulation O (12 CFR 215.2(f)).

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 83–ASW–19]

Proposed Alteration of Transition Area; Granbury, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Aviation Administration proposes to alter the transition area at Granbury, TX. The intended effect of the proposed action is to provide controlled airspace for aircraft executing a new standard instrument approach procedure (SIAP) to the Granbury Municipal Airport. This action is necessary since there is a proposed change to the SIAP which approaches the airport from the west using the Acton VORTAC.

DATE: Comments must be received on or before June 16, 1983.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8 a.m. and 4:30 p.m. The FAA Rules Docket is located in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: Kenneth L. Stephenson, Airspace and Procedures Branch, ASW–535, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101; telephone: (817) 877–2630.

SUPPLEMENTARY INFORMATION:

History

Federal Aviation Regulation Part 71, Subpart G § 71.181 as republished in Advisory Circular AC 70–3A dated January 3, 1983, contains the description of transition areas designated to provide controlled airspace for the benefit of aircraft conducting instrument flight rules (IFR) activity. Alteration of the transition area at Granbury, TX, will necessitate an amendment to this subpart. This amendment will be required at Granbury, TX, since there is a proposed change in IFR procedures to the Granbury Municipal Airport.

Comments Invited

Interested persons are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposals. (Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposals.) Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 83–ASW–19." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101, or by calling (817) 877–2630. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should contact the office listed above.

List of Subjects in 14 CFR Part 71

Control zones, Transition areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

Granbury, TX Revised

That airspace extending upward from 700 feet above the surface within a 6-mile radius of the Granbury Municipal Airport (latitude 32°23'33" N., longitude 97°49'00" W.).

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.61(c))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Fort Worth, TX, on April 26, 1983.

Richard L. Failor,

Acting Director, Southwest Region.

Proposed Alteration of VOR Federal Airways and Jet Routes, Minneapolis, MN, Area

AGENCY: Federal Aviation Administration (FAA), DOT.

VOL
48
ISS
88
MY
5
1983
UMI

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to revoke segments of VOR Federal Airways V–13E, V–414, and V–416; Jet Routes J–30 and J–113, and to realign V–510 to enhance the traffic flow within the Minneapolis Air Route Traffic Control Center's area.

DATE: Comments must be received on or before June 15, 1983.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, Great Lakes Region, Attention: Manager, Air Traffic Division, Docket No. 83–AWA–9, Federal Aviation Administration, 2300 East Devon, Des Plaines, IL 60018.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Boyd Archer, Airspace Regulations and Obstructions Branch (AAT–230), Airspace-Rules and Aeronautical Information Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426–8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposals. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposals. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 83–AWA–9." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposals

The FAA is considering amendments to § 71.123 and § 75.100 of Parts 71 and 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75) to: (1) Revoke V–13E between Duluth, MN, and Grantsburg, MN; (2) revoke V–414 and EXARC intersection between Alexandria, MN, and Gopher, MN; (3) revoke V–416 between Alexandria, MN, and Gopher, MN; (4) revoke J–30 between Farmington, MN, and Nodine, MN; (5) revoke J–113 between Gopher, MN, and Dubuque, IA; and (6) realign V–510 between Alexandria, MN, DAYLE intersection and Gopher, MN, to enhance the traffic flow within the Minneapolis Air Route Traffic Control Center's area. Sections 71.123 and 75.100 of Parts 71 and 75 of the Federal Aviation Regulations were republished in Advisory Circular AC 70–3A dated January 3, 1983.

List of Subjects in 14 CFR Parts 71 and 75

Airways, Jet routes, Aviation safety.

PARTS 71 AND 75—[Amended]

The Proposed Amendments

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.123 and § 75.100 of Parts 71 and 75 of the Federal Aviation Regulation (14 CFR Parts 71 and 75) as follows:

1. V–13 [Amended]

By deleting the words, "Duluth, MN, including an E alternate; 36 miles, 35 MSL, Thunder Bay, ON, Canada" and substituting for them the words "Duluth, MN; to Thunder Bay, ON, Canada"

2. V–414 and V–416 are revoked.

3. J–30 [Amended]

By deleting the words "Farmington, MN, via Nodine, MN; Joliet, IL," and substituting for then the words "Joliet, IL, via"

4. J–113 [Amended]

By deleting the words, "via Dubuque, IA, INT Dubuque 308° and Gopher 155° radials, to Gopher, MN" and substituting for them the words "to Dubuque, IA"

5. V–510 [Amended]

By inserting the words, "MN; INT Alexandria, MN, 110° and Gopher, MN, 321° radials" between the words; "Alexandria" and the words; "Gopher, MN"

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on April 25, 1983.

S. Wugalter,

Acting Manager, Airspace-Rules and Aeronautical Information Division.

BILLING CODE 4910–13–M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 12

Proposed Customs Regulations Amendments Relating to Requirements for Entry and Release of Imported Electronic Products

AGENCY: Customs Service, Treasury.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the Customs Regulations relating to requirements for the entry and release of imported electronic products. The changes are being proposed to update and conform the regulations to current procedures and the statuory and regulatory requirements administered by Customs for the National Center for Devices and Radiological Health of the Food and Drug Administration.

DATE: Comments must be received on or before July 5, 1983.

ADDRESS: Written comments (preferably in triplicate) should be addressed to the Commissioner of Customs, Attention: Regulations Control Branch, U.S. Customs Service, 1301 Constitution Avenue, NW., Room 2426, Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Legal Aspects: Darrell D. Kast, Entry Procedures and Penalties Division, (202–566–5765); Operational Aspects: Harrison C. Feese, Duty Assessment Division (202–566–8651), U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

SUPPLEMENTARY INFORMATION:

Background

Electronic products offered for importation into the United States are subject to standards prescribed by the Food and Drug Administration (FDA) under section 358 of the Public Health Service Act (42 U.S.C. 201 *et seq.)*, as amended by the Radiation Control for Health and Safety Act of 1968 (42 U.S.C. 263b *et seq.)*. Based upon these standards, sections 12.90 and 12.91, Customs Regulations (19 CFR 12.90, 12.91), set forth the requirements for entry and release of imported electronic products.

Pursuant to statutory changes which necessitated regulatory changes, by notice published in the **Federal Register** on September 5, 1975 (40 FR 41118), Customs proposed to amend §§ 12.90 and 12.91. However, no final action was taken on the proposal. Subsequently, other statutory changes have resulted in the need for additional regulation changes.

Because of the redesignation of the Department of Health, Education, and Welfare, as the Department of Health and Human Services, pursuant to section 509(b) of Pub. L. 96–88, (section 2508(b) of title 20, United States Code), it is necessary to change the references to the "Department of Health, Education, and Welfare," and the "Secretary of Health, Education, and Welfare," in §§ 12.90 and 12.91.

It is proposed to amend §12.90 to provide that "the Act" as referred to in §12.91, refers to the Public Health Service Act, as amended (42 U.S.C. 201 *et seq.)*, and not to the Radiation Control for Health and Safety Act of 1968 (42 U.S.C 263b–263n). It also is proposed to amend §12.91 concerning the declarations required to be made by the importer of record for the entry and release of electronic products subject to the performance standards in effect under section 358 of the Public Health Service Act, as amended (42 U.S.C. 263f).

Present §12.91 requires a declaration by the importer or consignee of electronic products that the products either (1) conform to the standards of section 358 of the Public Health Service Act, as amended (42 U.S.C. 263(f), or (2) will be brought into compliance with these standards, unless intended solely for export.

To conform with FDA requirements, the proposed amendment to § 12.91 would add two alternative declarations, whereby the importer of record may affirm that the products either (1) were manufactured before the date the standards became effective, or (2) are being imported for the purpose of research, investigations, studies, demonstrations, or training. The proposed amendment to § 12.91 also would modify the language of the two existing declarations presently contained in that section to bring them into conformity with current Customs procedures.

The cross-reference in § 12.91 to the provisions of 42 CFR Part 78, pertaining to the administration and enforcement of the provisions of the Public health Service Act, as amended by the Radiation Control for Health and Safety Act of 1968 (42 U.S.C. 263b–263n), would be changed to reflect that the current appropriate regulatory citation is 21 CFR, Chapter I, Subpart J.

This proposal also would set forth the current citation of authority for § 12.91, as well as correct the statutory reference in § 12.90 to the Radiation Control for Health and Safety Act of 1968.

List of Subjects in 19 CFR Part 12

Customs duties and inspection, Imports, Importers.

Proposed Regulations Amendments

It is proposed to amend Part 12, Customs Regulations (19 CFR Part 12), in the following manner:

PART 12—SPECIAL CLASSES OF MERCHANDISE

Sections 12.90 and 12.91, Customs Regulations, would be revised to read as follows:

§ 12.90 Definitions

As used in §§ 12.90 and 12.91, the term "the Act" shall mean the Public Health Service Act (42 U.S.C. 201 *et seq.*), as amended by the Radiation Control for Health and Safety Act of 1968 (42 U.S.C. 263b *et seq.*), and as further amended from time to time.

§ 12.91 Electronic products offered for importation under the Act.

(a) *Standards prescribed by the Department of Health and Human Services.* Electronic products offered for importation into the customs territory of the United States are subject to standards prescribed under section 358 of the Act (42 U.S.C. 263f) unless intended solely for export. Prescribed standards shall not apply to any electronic product intended solely for export if:

(1) Such product and the outside of any shipping container used in the export of such product are labeled or tagged to show that it is intended for export, and

(2) Such product meets all the applicable requirements of the country to which it is intended for export.

(See 21 CFR, Chapter I, Subchapter J.)

(b) *Requirements for entry and release.* Electronic products subject to standards in effect under section 358 of the Act (42 U.S.C. 263f), when offered for importation into the customs territory of the United States, shall be refused entry unless there is filed with the entry, in duplicate, a declaration (FDA Form fd 2877) verified by the importer of record which identifies the products and affirms:

(1) That the electronic products were manufactured before the date of any applicable electronic product performance standard (the date of manufacture shall be specified); or

(2) That the electronic products comply with all standards in effect under section 358 of the Act (42 U.S.C. 263f), and Chapter I, Subchapter J, title 21, Code of Federal Regulations (21 CFR, Chapter I, Subchapter J), and that the certification required by section 360 of the Act (42 U.S.C. 263h) in the form of a label or tag is attached to the product; or

(3)(i) That the electronic products do not comply with all standards in effect under section 358 of the Act (42 U.S.C. 263f), and Chapter I, Subchapter J, title 21, Code of Federal Regulations (21 CFR, Chapter I, Subchapter J), but are being imported for the purpose of research, investigations, studies, demonstrations, or training, (ii) that the products will not be introduced into commerce and when the use for which they were imported is completed they will be destroyed or exported under Customs supervision, and (iii) that an exemption for these products has been or will be requested from the National Center for Devices and Radiological Health, Food and Drug Administration, in accordance with section 360B(b) of the Act (42 U.S.C. 263j); or

VOL 48 ISS 88 MY 5 1983 UMI

(4) That the electronic products do not comply with all standards in effect under section 358 of the Act (42 U.S.C. 263f) and Chapter I, Subchapter J, Code of Federal Regulations (21 CFR, Chapter I, Subchapter J), but that a timely and adequate petition for permission to bring the products into compliance with applicable standards has been or will be filed with the Secretary of Health and Human Services in accordance with section 360 of the Public Health Service Act, as amended, and as implemented by 21 CFR 1005.21.

(c) *Notice of sampling.* When a sampling of a product offered for importation has been requested by the Secretary of Health and Human Services, as provided for in 21 CFR 1005.10, the district director of Customs having jurisdiction over the shipment from which the sample is procured shall give to its owner or importer of record prompt notice of delivery of, or intention to deliver, the sample. If the notice so requires, the owner or importer of record shall hold the shipment of which the sample is typical and not release the shipment until notice of the results of the tests of the sample from the Secretary of Health and Human Services stating the product fulfills the requirements of the Act.

(d) *Release under bond.* If a declaration filed in accordance with paragraph (b) of this section states that the entry is being made under circumstances described in paragraph (b)(4) of this section, the entry shall be accepted only if the owner or importer of record gives a bond on Customs Form 7551, 7553, or 7595 for the production of a notification from the Secretary of Health and Human Services or his designee, in accordance with 21 CFR 1005.23, that the electronic product described in the declaration filed by the importer of record is in compliance with the applicable standards. The bond shall be in the amount required under § 113.14 of this chapter. Within 180 days after the entry of such additional period as the district director may allow for good cause shown, the importer of record shall take any action necessary to insure delivery to the district director of the notification described in this paragraph. If the notification is not delivered to the district director for the port of entry of the electronic products within 180 days of the date of entry or such additional period as may be allowed by the district director, for good cause shown, the importer of record shall deliver or cause to be delivered to the district director those electronic products which were released. In the event that any electronic products are not redelivered to Customs custody or exported under Customs supervision within the period allowed by the district director in the Notice of Redelivery (Customs Form 4647), liquidated damages shall be assessed in the full amount of a bond given on Customs Form 7551. When the transaction has been charged against a bond given on Customs Form 7553, or 7595, liquidated damages shall be assessed in the amount that would have been demanded if the merchandise had been released under a bond given on Customs Form 7551.

(e) *Release without bond—special exemptions.* For certain electronic products the Director, National Center for Devices and Radiological Health, has granted special exemptions from the otherwise applicable standards under the Act. Such exempted products may be imported and released without bond if they meet all the criteria of the special exemption. A bond, once posted, may also be returned if a special exemption is granted after the product has been imported under bond.

(f) *Merchandise refused entry.* If electronic products are denied entry under any provision of this section, the district director shall refuse to release the merchandise for entry into the United States.

(g) *Disposition of merchandise refused entry into the United States; redelivered merchandise.* Electronic products which are denied entry under paragraph (b) of this section, or which are redelivered in accordance with paragraph (d) of this section, and which are not exported under Customs supervision within 90 days from the date of notice of refusal of admission or date of redelivery, shall be disposed of under Customs laws and regulations. However, no such disposition shall result in an introduction into the United States of an electronic product in violation of the Act (42 U.S.C. 263f, 263h).

Authority

The amendments are proposed under the authority of R.S. 251, as amended, section 484, 498, 624, 46 Stat. 722, as amended, 728, as amended, 759 (19 U.S.C. 66, 1484, 1498, 1624).

Comments

Before adopting this proposal, consideration will be given to any written comments timely submitted to the Commissioner of Customs. Comments submitted will be available for public inspection in accordance with section 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. to 4:30 p.m. at the Regulations Control Branch, Room 2426, Headquarters, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

Executive Order 12291

Because this document will not result in a regulation which would be a "major" rule as defined by section. 1(b) of E.O. 12291, a regulatory impact analysis and review as precribed by section 3 of the E.O. is not required.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this proposal because the proposed amendments will not have a significant economic impact on a substantial number of small entities.

The proposal is not expected to: have significant secondary or incidental effects on a substantial number of small entities; impose, or otherwise cause a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities; or generate significant interest or attention through comments, either formal or informal.

Accordingly, it is certified under the provision of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that the proposed amendments, if promulgated, will not have a significant impact on a substantial number of small entities.

Drafting Information

The principal author of this document was Jesse V. Vitello, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Alfred R. De Angelus,

Acting Commissioner of Customs.

BILLING CODE 4820-02-M

Internal Revenue Service

26 CFR Part 1

[LR-57-81]

Source of Income From Certain Leased Aircraft, Vessels, and Spacecraft

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed amendments to the Income Tax Regulations under section 861(e) of the Internal Revenue Code of 1954, relating to the source of income with respect to certain aircraft, vessels, and spacecraft that are or have been leased to a United States person. This amendment will affect owners of such crafts that are used outside the United States.

DATES: Written comments and requests for a public hearing must be delivered or mailed by July 5, 1983. This amendment is proposed to be effective for income with respect to crafts that are first leased after December 28, 1980.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR-57-81), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Mary Frances Pearson of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, Attention: CC:LR:T, 202-566-3238, not a toll-free call.

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 861 of the Internal Revenue Code of 1954. These amendments are proposed to conform the regulations to changes made to section 861(e) by section 104 of the Miscellaneous Revenue Act of 1980 (84 Stat. 3523). The amendments are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

Section 861(e), as amended, provides that income with respect to aircraft, vessels, and spacecraft that are section 38 property (as defined in section 48) and that are manufactured or constructed in the United States will be treated as income from sources within the United States after the craft is leased to a United States person. Income with respect to a craft includes payments for use of the craft and gain on the sale or exchange of the craft. Section 861(e) alters the general statutory rules that (1) payments under a lease of personal property are considered to be from sources within the United States only if the leased property is used within the United States and (2) gain or loss on the sale or exchange of personal property is treated as from sources within the country in which the transfer of titles takes place. Thus, this provision modifies the rules for determining the source of income with respect to certain crafts that are used or sold outside the United States.

Section 861(e) does not apply if the lessor and the lessee are members of the same controlled group of corporations. For purposes of this section, if either the lessor or the lessee is a partnership at least 80 percent of which is owned by members of a controlled group of corporations, that partnership is considered to be a member of the controlled group.

Prior law applies to the income with respect to aircraft and vessels first leased on or before December 28, 1980. Those rules allowed taxpayers to elect to treat the subject income as from sources within the United States. The miscellaneous Revenue Act of 1980 changed this treatment from elective to mandatory and expanded the scope of the provision to include spacecraft. The statutory source rule was made mandatory to insure that the lease payments from a United States person to the lessor were subject to income taxation by some country. In this regard, see H.R. Rep. No. 96-1278, 96th Cong., 2d Sess. 24 (1980); S. Rep. No. 96-1036, 96th Cong., 2d Sess. 16-17 (1980).

The proposed regulations describe the crafts covered by section 861 (e) and § 1.861-9A (b). The crafts must be section 38 property, that is, property for which an investment tax credit is available. The proposed regulations treat a craft as manufactured or constructed within the United States if at least 50 percent of the basis of the craft on the date it is leased to a United States person is attributable to value added within the United States.

The proposed regulations would require that later income with respect to a craft be treated as U.S. source income even after the craft is no longer leased to a United States person or the property ceases to be section 38 property. This treatment as U.S. source income also continues under proposed §1.861-9A (c) when the craft is transferred or distributed if the basis of the craft in the hands of the recipient is determined by reference to its basis in the hands of the transferor or distributor.

Regulatory Flexibility Act and Executive Order 12291

Although this document is a notice of proposed rulemaking that solicits public comment, the Internal Revenue Service has concluded that the regulations proposed herein are interpretative and that the notice and public comment procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, these proposed regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6). The Commissioner of Internal Revenue has determined that this proposed rule is not subject to Executive Order 12291.

Drafting Information

The principal author of this regulation is Martha E. Kadue of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably seven copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the **Federal Register**.

List of Subjects in 26 CFR Parts 1.861-1 through 1.997-1

Income taxes, Aliens, Exports, DISC, Foreign investment in U.S., Foreign tax credit, Sources of income, United States investments abroad.

Adoption of amendments to the regulations. The proposed amendments to 26 CFR Part 1 are as follows:

PART 1—[AMENDED]

Paragraph 1. Section 1.861-1(a)(4) is revised to read as follows:

§ 1.861-1 Income from sources within the United States.

(a) *Categories of income.* * * *

(4) *Exceptions.* An owner of certain aircraft or vessels first leased on or before December 28, 1980, may elect to treat income in respect of these aircraft or vessels as income from sources within the United States for purposes of sections 861(a) and 862(a). See § 1.861-9. An owner of certain aircraft, vessels, or spacecraft first leased after December 28, 1980, must treat income in respect of these craft as income from sources within the United States for purposes of sections 861(a) and 862(a). See § 1.861-9A.

* * * * *

Par. 2. Section 1.861-9 is amended as follows:

1. The title of the section is revised to read "Income from certain aircraft or

VOL
48
ISS
88
MY
5
1983
UMI

vessels first leased on or before December 28, 1980.".

2. The second sentence of paragraph (a) is amended by adding after the word "date", the phrase "of aircraft or vessels first leased by the taxpayer on or before December 28, 1980".

3. A new paragraph (g)(6) is added immediately after paragraph (g)(5), the new paragraph to read as follows:

* * * * *

(g) * * *

(6) *Revocation or termination after December 28, 1980.* The rules in paragraph (g)(1) through (g)(5) continue to apply with respect to any election made pursuant to this section even though the revocation or termination may occur after December 28, 1980.

Par. 3. Section 1.861–9A is added immediately after § 1.861–9, to read as follows:

§ 1.861–9A. Income from certain crafts first leased after December 28, 1980.

(a) *General rule.* If a taxpayer—

(1) Owns a qualified craft (as defined in paragraph (b) of this section),

(2) Leases such qualified craft after December 28, 1980, to a United States person that is not a member of the same controlled group of corporations as the taxpayer, and

(3) The lease is the taxpayer's first lease of the craft and the taxpayer is not considered to have made an election with respect to the craft under § 1.861–9(e)(2),

then the taxpayer shall treat all amounts includible in gross income with respect to the qualified craft as income from sources within the United States for each taxable year ending after commencement of the lease. If this section applies to income with respect to a craft, it applies to all such amounts that are includible in the taxpayer's gross income, whether or not includible during or after the period of a lease to a United States person. Amounts derived by the taxpayer with respect to the qualified craft include any gain from the sale, exchange, or other disposition of the qualified craft. If this section applies to income with respect to a craft and there is a loss with respect to that craft (either due to the allowance of expenses and other deductions or due to a sale, exchange, or other disposition of the qualified craft), such loss is treated as allocable or apportionable to sources within the United States. The fact that a craft ceases to be section 38 property, ceases to be leased by the taxpayer to a United States person, or is leased or subleased for any period of time to a person who is not a United States person will not terminate the application of this section.

(b) *Qualified craft*—(1) *In general.* A qualified craft is a vessel, aircraft, or spacecraft that—

(i) Is section 38 property (or would be section 38 property but for section 48 (a)(5), relating to use by governmental units), and

(ii) Is manufactured or constructed in the United States.

(2) *Vessel.* The term "vessel" includes every type of watercraft capable of being used as a means of transportation on water, and any items of property that are affixed in a permanent fashion or are integral to the vessel. A vessel that is used predominantly outside the United States must be described in section 48(a)(2)(B)(iii) and § 1.48–1(g)(2)(iii), relating to vessels documented for use in the foreign or domestic commerce of the United States, to be a qualified craft.

(3) *Aircraft.* An aircraft used predominantly outside the United States must be described in section 48(a)(2)(B)(i) and § 1.48–1(g)(2)(i), relating to aircraft registered by the Administrator of the Federal Aviation Agency, and operated to and from the United States or operated under contract with the United States, to be a qualified craft.

(4) *Spacecraft.* A spacecraft must be described in section 48(a)(2)(B)(viii) and § 1.48–1(g)(2)(viii), relating to communications satellites, or any interest therein, of a United States person, to be a qualified craft.

(5) *United States manufacture or construction.* A craft will be considered to be manufactured or constructed in the United States if 50 percent or more of the basis of the craft on the date of the lease to a United States person is attributable to value added within the United States.

(c) *United States person.* For purposes of this section, the term "United States person" includes those persons described in section 7701(a)(30) and individuals with respect to whom an election under section 6013 (g) or (h) (relating to nonresident alien individuals married to United States citizens or residents) is in effect.

(d) *Controlled group.* For purposes of paragraph (a)(2) of this section, whether a taxpayer and a United States person are members of the same controlled group of corporations is determined under section 1563. Solely for purposes of this section, a partnership at least 80 percent of the interests in which are owned, directly or indirectly, by one or more corporations that are members of the same controlled group of corporations shall be considered to be a member of that same controlled group of corporations.

(e) *Certain transfers involving carryover of basis*—(1) *In general.* If—

(i) The income with respect to a craft is subject to this section,

(ii) The taxpayer transfers or distributes such craft, and

(iii) The basis of such craft in the hands of the transferee or distributee is determined by reference to its basis in the hands of the transferor or distributor, then this section will apply to the income with respect to the craft includible in the gross income of the transferee or distributee. This paragraph (c) applies even though the transferor or distributor recognizes an amount of gain that increases basis in the hands of the transferee or distributee and even though the transferee or distributee is a nonresident alien or foreign corporation. For example, if a corporation distributes a craft the income of which is subject to this section to its parent corporation in a complete liquidation described in section 332(b), the parent corporation will be treated as if it satisfied the requirements of paragraph (a) of this section with respect to such craft if the basis of the property in the hands of the parent corporation is determined under section 334(b) (relating to the general rule on carryover of basis in liquidations). In further illustration, if a corporation distributes a craft the income of which is subject to this section, in a distribution to which section 301(a) applies, the distributee will be treated as if it satisfied the requirements of paragraph (a) of this section with respect to such craft if its basis is determined under section 301 (d)(2) (relating to basis of corporate distributees) even though the basis may be the fair market value of the craft under section 301(d)(2)(A).

(2) *Partnerships.* If a partnership satisfies the requirements of paragraph (a) (1), (2), and (3) of this section, each partner shall treat all amounts includible in gross income with respect to the craft as income from sources within the United States for any taxable year of the partnership ending after commencement of the lease. In addition, if a partnership distributes a craft the income of which is subject to this section, to a partner, the partner will be treated as if he or she satisfied the requirements of paragraph (a) of this section with respect to such craft.

(3) *Affiliated groups.* If a member of a controlled group of corporations (as defined in section 1563(a)) that files a consolidated return for the year during which the member transfers a craft, the income of which is subject to this section, to another member of that same group, the transferee will be treated as if it satisfied the requirements of paragraph (a) of this section with respect to the craft.

Par. 4. Section 1.862–1(c) is revised to read as follows:

§ 1.862–1 Income specifically from sources without the United States.

* * * * *

(c) *Income from certain property.* For provisions permitting a taxpayer to elect to treat amounts of gross income attributable to certain aircraft or vessels first leased on or before December 28, 1980, as income from sources within the United States which would otherwise be treated as income from sources without the United States under paragraph (a) of this section, see § 1.861–9. For provisions requiring amounts of gross income attributable to certain aircraft, vessels, or spacecraft first leased by the taxpayer after December 28, 1980, to be treated as income from sources within the United States which would otherwise be treated as income from sources without the United States under paragraph (a) of this section, see § 1.861–9A.

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

BILLING CODE 4830–01–M

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Ch. XXVI

Regulatory Flexibility Act; Ten Year Schedule for Review of Rules

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Regulatory Flexibility Act; Ten Year Schedule for Review of Rules.

SUMMARY: This document sets forth the PBGC'S ten year schedule for review of existing regulations, pursuant to requirements of the Regulatory Flexibility Act.

DATE: The schedule includes all regulations which are expected to be under review between June 30, 1981, and June 30, 1991.

FOR FURTHER INFORMATION CONTACT: Melanie Franco Nussdorf, Special Counsel, Pension Benefit Guaranty Corporation, 2020 K Street, NW., Suite 7200, Washington, D.C. 20006.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act requires that each agency publish a 10 year schedule for the review of all agency rules that are in existence on the effective date of the Act (January 1, 1981), and that have or will have a significant economic impact upon a substantial number of small entities. The Act further requires that such rules adopted after the effective date of the Act be reviewed within 10 years of their publication as final rules.

In the review of rules, agencies are required by the Regulatory Flexibility Act to endeavor to minimize any significant economic impact of the rules on a substantial number of small entities in a manner consistent with the stated objectives of applicable statutes. During the course of such review, agencies are to consider the following factors: (1) The continued need for the rules; (2) the nature of complaints or comments received concerning the rule from the public; (3) the complexity of the rule; (4) the extent to which the rule overlaps, duplicates, or conflicts with other Federal rules, and, to the extent feasible, with State and local governmental rules; and, (5) the length of time since the rule has been evaluated or the degree to which technology, economic conditions, or other factors have changed in the area affected by the rule.

The Regulatory Flexibility Act also requires that each year agencies publish in the **Federal Register** list of the rules which have a significant economic impact on a substantial number of small entities which are to be reviewed during the succeeding twelve months. The list must include a brief description of each rule, the need for and legal basis of such rule, and must invite public comment. It is anticipated that the PBGC will publish its list of such, if any, in the **Federal Register** as an adjunct to its next semiannual agenda, which will be compiled to meet the requirements of both the Regulatory Flexibility Act and Executive Order 12291.

The PBGC issues regulations under Title IV of the Employee Retirement Income Security Act, as amended, for single-employer defined benefit pension plans and multiemployer defined benefit pension plans. As of January 1, 1981 the effective date of enactment of the Regulatory Flexibility Act, no regulations had been issued relating to multiemployer plans, since the Multiemployer Amendments Act of 1980, which established an entirely new regulatory scheme for multiemployer plans, was enacted on September 26, 1980. None of the multiemployer plan regulations promulgated since the enactment of the Regulatory Flexibility Act has a significant economic impact on a substantial number of small entities. If future rules are subject to the Act, PBGC will schedule a review of such regulations at a later date.

On the date of enactment of the Regulatory Flexibility Act, the PBGC has issued six regulations relating to internal administrative or general administrative law matters and eight single-employer plan regulations. Of those regulations, PBGC has determined that none has a significant economic impact on a substantial number of small entities. Since that time, PBGC has issued four final rules: Determination of Plan Sufficiency and Termination of Sufficient Plans, 29 CFR Part 2617; Allocation of Assets in Non-multiemployer Plans, 29 CFR Part 2618; Valuation of Plan Benefits in Non-multiemployer Plans, 29 CFR Part 2619; and Employer Liability for Single-employer Plan Terminations, 29 CFR Part 2622. While PBGC has not determined that these regulations have a significant economic impact on a substantial number of small entities, it expects to review these regulations in the next five years to update them as necessary and will, regardless of whether they are covered by the Act, ensure the needs of small entities have been taken into account, and the reporting burdens for these entities have been minimized. In this connection, PBGC has just completed a review and amendment of its regulation on Notice of Intent to Terminate, 29 CFR Part 2616. In the course of that process, the agency introduced a joint reporting form with the Internal Revenue Service to minimize duplicative reporting to the PBGC and the IRS on plan termination. In addition, PBGC is currently reviewing Reporting and Notification Requirements for Reportable Events, 29 CFR Part 2615 and Determination of Plan Sufficiency and Termination of Sufficient Plans, 29 CFR Part 2617 to ensure that these regulations require the minimum paperwork necessary, consistent with the requirements of ERISA.

PBGC welcomes comments from any interested member of the public on its regulations.

Issued this 2nd day of May, 1983.

Edwin M. Jones,

Executive Director, Pension Benefit Guaranty Corporation.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 161

[CGD80-119]

Puget Sound Vessel Traffic Service

AGENCY: Coast Guard, DOT.

ACTION: Termination of rulemaking.

SUMMARY: The Coast Guard is withdrawing its Advance Notice of Proposed Rulemaking published in the Federal Register of April 16, 1981 (46 FR 22207) regarding the issuing or the amending of regulations governing the operation of vessels on the waters of Northwestern Washington (including the Puget Sound Vessel Traffic Service Area). Since the time of that notice, the Coast Guard has hosted an Open Conference of Puget Sound maritime users and interested parties. As a result of that Conference, a number of recommendations were made to the Coast Guard—some of which have already been implemented by other rulemakings. In addition, several non-regulatory proposals have been implemented. Consequently, there does not appear to be any further need for that notice. Accordingly, a determination has been made to terminate the rulemaking.

ADDRESS: The rulemaking docket is available for examination and copying between 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays, at the Office of the Commander (mps), Thirteenth Coast Guard District, Room 3506, 915 Second Avenue, Seattle, WA 98174. (206) 442–1711.

FOR FURTHER INFORMATION CONTACT: Commander T. Roger Pike, USCGR, Marine Safety Division, Thirteenth Coast Guard District, 915 Second Avenue, Seattle, WA 98174. (206) 442–5537.

Drafting Information

The drafters of this notice are Commander T. Roger Pike, USCGR, project officer, Marine Safety Division, Thirteenth Coast Guard District and Lieutenant Commander Richard R. Clark, USCG, project attorney, Thirteenth Coast Guard District Legal Office.

SUPPLEMENTARY INFORMATION: 1. On April 16, 1981 an Advance Notice of Proposed Rulemaking was published in the Federal Register (46 FR 22207) to address user conflicts for the navigable waters of Northwestern Washington, including the Puget Sound Vessel Traffic Service Area. Of particular concern was conflicts between the gillnet fishermen and deep-draft vessels.

2. The April 16, 1981 Advance Notice of Proposed Rulemaking, among other things, announced a public hearing in Seattle, Washington, on June 3, 1981 to receive public comments regarding regulatory or non-regulatory approaches to resolving the conflicts among Puget Sound users. This hearing was well attended and a wide spectrum of maritime and public interests was represented. Although a number of viewpoints were represented, the hearing produced no clear consensus on the direction the Coast Guard should take. However, most participants indicated they would be willing to take part in a subsequent "Open Conference" to jointly develop possible solutions.

3. An Open Conference was held on October 13–14, 1981 at the Seattle Center. This Conference was widely advertised in the press and by direct mail, and was well attended. The attendees were divided into four Working Groups, each of which elected its own chairperson, to address specific elements of the problem. On the second day of the conference, the Working Groups' recommendations for regulatory and non-regulatory solutions were presented to and voted upon by the full conference. Those that were approved became conference recommendations.

4. Three recommendations—or groups of recommendations—were considered "major" and received immediate action, as follows:

a. The Conference recommended that the COLREGS Demarcation Line in Puget Sound be eliminated and that all waters in Northwestern Washington be governed by the '72 COLREGS. This change meant that a single set of navigation rules would apply throughout the region so that mariners operating in the Strait of Juan de Fuca, Puget Sound and adjacent waters, and in Canadian waters, would be governed by rules of the road which are identical or very similar. An Interim Final Rule was published on December 17, 1981 (46 FR 61456) and this change became effective December 24, 1981.

b. A second recommendation—advanced by two Working Groups and adopted by the full Conference—was for periodic waterways users' meetings to discuss problems in a setting similar to the Open Conference. Many of the interested groups represented at the Open Conference recognized that they had never before had an opportunity to discuss mutual concerns in a face-to-face meeting, and felt that regular meetings of this nature could be constructive. Consequently, in early 1982 the Sea Use Council agreed to become the sponsoring organization for the "Puget Sound Users' Forum". An organizational meeting was held on June 23, 1982 and the first regular meeting was held on September 24, 1982.

c. Seven specific recommendations were received concerning the manner in which the Washington State Department of Fisheries establishes periods for gillnet fishing. Several participants at the Open Conference indicated that the Department of Fisheries publishes its regulations without regard for their impact on safety of navigation or vessel traffic management. It was proposed that a dialogue be established between the Coast Guard and the Department of Fisheries, and that Coast Guard input be provided and considered in the scheduling of each year's gillnet season. This dialogue was established in March of 1983 and appears to have increased cooperation between the two agencies.

5. In addition to these three "major" recommendations, a number of "minor" or "supplemental" proposals came from the Open Conference. These are summarized below:

a. Several recommendations called for establishing buoys to mark ferry routes, fishing areas, etc. These were evaluated by the Coast Guard but have not been adopted because they were considered either impractical to establish or too expensive in relation to expected benefit.

b. Other recommendations involved proposed actions by the Coast Guard Captain of the Port or the Puget Sound Vessel Traffic Service. These included:

(1) Directing deep-draft vessels to favor left/right side of the Traffic Lane to avoid concentrations of fishing vessels;

(2) Making special safety broadcasts during periods of heavy fishing vessel concentrations;

(3) Establishing special communication arrangements with fleets of fishing boats; and

(4) Establishing special Captain of the Port orders to manage vessel traffic when conditions reached the point of being clearly unsafe.

The above actions are already within the legal and technical capabilities of the Captain of the Port and the Puget Sound Vessel Traffic Service and can be implemented when the situation requires. No further rulemaking seems necessary or appropriate.

6. Based upon specific recommendations received from the Puget Sound Users' Forum, as well as from the Open Conference, the Coast Guard established "temporary special traffic lanes" during the 1982 gillnet season. One such lane was a one-half mile wide corridor centered on the traffic separation buoys extending from Point No Point to Browns Point. During periods of heavy gillnet fishing, deep-draft vessels are granted deviations by the Puget Sound Vessel Traffic Service to use the temporary special traffic lane in lieu of the normal lanes prescribed by the Puget Sound Traffic Separation Scheme. Gillnet fishermen have agreed to avoid this relatively narrow corridor. They remain free to fish in all other areas of the channel, including the usual traffic lanes. In addition, the Coast Guard established the route normally followed by the Edmonds-Kingston ferry as a temporary special traffic lane. These actions are considered to have made a significant contribution to making the 1982 gillnet season relatively conflict-free.

7. Based upon the apparent effectiveness of these temporary special traffic lanes, the Coast Guard is considering undertaking a rulemaking project to make them a permanent part of the regulations enforced by the Coast Guard and to enhance their usefulness. However, that rulemaking would most probably occur in a part of the regulations not covered by this docket.

8. In view of the above, it appears that no rulemaking will be required under CGD80–119, and that this docket may be closed. The comments received on this rulemaking are available for examination and copying at the address listed above.

Dated: April 20, 1983

H. W. Parker,

Rear Admiral, U.S. Coast Guard, Commander, 13th Coast Guard District.

[FR Doc. 83–12088 Filed 5–4–83; 8:45 am]

BILLING CODE 4910–14–M

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

33 CFR Part 207

San Diego Bay, California, Naval Restricted Area

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of proposed rulemaking.

SUMMARY: The U.S. Navy has requested the Corps of Engineers establish a naval restricted area in the Pacific Ocean in North San Diego Bay, California. The proposed restricted area surrounds an existing ammunition pier where extensive loading and handling of ammunition and explosives take place. The restricted area would protect persons and property from the dangers associated with the ammunition pier.

DATE: Written comments must be received on or before June 20, 1983.

ADDRESS: HQDA, DAEN–CWO–N, Washington, D.C. 20314.

FOR FURTHER INFORMATION CONTACT: Mr. Glenn C. Lukos at (213) 688–5606 or Mr. Ralph T. Eppard at (202) 272–0200.

SUPPLEMENTARY INFORMATION: This proposed restricted area surrounds an existing ammunition pier at the Naval Air Station, North Island, San Diego County, California. Extensive loading and handling of ammunition and explosives takes place in this area. In order to provide maximum protection to lives and property, an area extending 100 feet from the ammunition pier (Bravo Pier) will be closed to all persons and vessels except those owned by, under hire to, or performing work for the Naval Air Station or Naval Weapons Station. The remainder of the restricted area will be open to vessels provided transit is made by the most direct route and without unnecessary delay. No fishing, swimming, mooring or anchoring will be allowed within the restricted area.

List of Subjects in 33 CFR Part 207

Navigation (water), Waterways.

The Corps of Engineers proposes to establish a restricted area under 33 CFR 207.612 as set forth below.

Note.— This proposed regulation is not a major regulation and is issued with respect to a military function of the Defense Department. Accordingly, the provisions of Executive Order 12291 do not apply. The Corps of Engineers has also determined that this regulation will not have a significant economic impact on a substantial number of entities and thus does not require preparation of a regulatory flexibility analysis.

Dated: March 11, 1983.

Approved:

Paul F. Kavanaugh,

Colonel, Corps of Engineers, Executive Director of Civil Works.

PART 207—[AMENDED]

Accordingly, Part 207 of title 33 of the Code of Federal Regulations is proposed to be amended by adding paragraph (a) to § 207.612 to read as follows:

§ 207.612 San Diego Harbor, California; restricted areas.

(a) Restricted area at Bravo Pier, Naval Air Station.

(1) The area. The water of the Pacific Ocean in North San Diego Bay in an area extending from the western boundary of North Island about 0.2 nautical mile bayward and basically outlined as follows:

Station	Latitude	Longitude
1	32°41'51.3" N	117°13'34.0" W.
2	32°41'51.3" N	117°13'46.6" W.
3	32°41'43.3" N	117°13'50.0" W.
4	32°41'35.8" N	117°13'46.0" W.
5	32°41'35.8" N	117°13'35.0" W.

(2) The regulations. (i) The restricted area shall not be open to swimming, fishing, mooring, or anchorage. (ii) Transit will be allowed through the restricted area except that no transit will be allowed within 100 feet of the ammunition pier (Bravo Pier). All unauthorized vessels entering the restricted area shall proceed across the area by the most direct route and without unnecessary delay. Only vessels owned by, under hire to, or performing work for the Naval Air Station or the Naval Weapons Station may operate within 100 feet of the ammunition pier.

BILLING CODE 3710–92–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

46 CFR Part 67

[CGD 82–085]

Documentation of Vessels

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to amend 46 CFR 67.09–3, the portion of the vessel documentation regulations which prescribes which vessels will be considered "built in the United States" for purposes of the Vessel Documentation Act. New vessel documentation regulations were published in the Federal Register on June 24, 1982 (47 FR 27490) and became effective on July 1, 1982. On the basis of comments received prior to the publication of those regulations, the Coast Guard recognized there might be some potential problems in prospective administration of § 67.09–3 due to lack of definition of some of the words used and because it placed into the Code of Federal Regulations a "rule of thumb" concerning allowable use of foreign items in U.S. built vessels which the Coast Guard had used in the past but had not widely publicized. A decision was made to publish the final regulations without changing the section and to use a separate rulemaking project, an Advance Notice of Proposed Rulemaking (ANPRM), to decide whether a change was appropriate. As a result of the comments received in response to that ANPRM, the Coast Guard has decided to propose a change

VOL
48
ISS
88
MY
5
1983
UMI

to the vessel documentation regulations. The revision of § 67.09–3 now being proposed will change the factors to be considered in determining whether a vessel is "built in the United States" within the meaning of the Vessel Documentation Act.

DATE: Comments must be received on or before July 5, 1983.

ADDRESSES: Comments should be submitted to Commandant (G–CMC/24), (CGD 82–085), U.S. Coast Guard, Washington, D.C. 20593. Comments may be delivered and will be available for inspection or copying at the Marine Safety Council (G–CMC/24), Room 4402, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, D.C. 20593, (202) 426–1477 between the hours of 7 a.m. and 5 p.m. Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Mrs. Phyllis D. Carnilla (Project Manager) or Lieutenant Robert R. Meeks (Staff Attorney), Office of Merchant Marine Safety, (202) 426–1492, or (202) 426–1493. Normal office hours are between 7 a.m. and 5 p.m Monday through Friday, except holidays.

SUPPLEMENTARY INFORMATION:

Drafting Information

The principal persons involved in drafting this proposal are Mrs. Phyllis D. Carnilla (Project Manager) and Lieutenant Robert R. Meeks (Staff Attorney), Office of Merchant Marine Safety; and Lieutenant Commander William B. Short (Project Attorney), Office of the Chief Counsel.

Comments Invited

The public is invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Comments should include the name and address of the person making them, and identify this notice (CGD 82–085). Persons desiring acknowledgment that their comment has been received should enclose a stamped, self addressed postcard or envelope. All comments received before expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned.

Background

The regulations governing documentations of vessels contained in Part 67 of Title 46, Code of Federal Regulations, were extensively revised in a final rule published on June 24, 1982. That rulemaking project was undertaken primarily to simplify documentation procedures and was in implementation of the Vessel Documentation Act (Pub. L. 96–594). Comments received during the pendency of that rulemaking were critical of § 67.09–3 which pertains to U.S. build determinations. That section now reads:

> A vessel is considered built in the United States if:
>
> (a) All major components of its hull and superstructure are fabricated in the United States: and
>
> (b) The vessel is assembled entirely in the United States; and
>
> (c) At least fifty (50) percent of the cost of all machinery (including propulsion) and components which are not an integral part of the hull or superstructure relates to items procured in the United States.
>
> (d) For the purposes of this section, United States includes America Samoa.

The comments received concerning that section before it became final said the words "procured," "components," and "superstructure" as used there were vague. Other commenters said the "fifty percent of cost rule" in paragraph (c) had no basis in law, conflicted with past agency practice, was more restrictive than industry practice, would present great difficulties in terms of proof where older vessels are involved, and would be ineffective due to practical problems relative to enforcement. One commenter also said the regulation constitutes a non-tariff customs barrier. In the supplementary information published with the final rule on June 24, 1982, the Coast Guard recognized that the regulations were deficient in treating some of the issues raised by the comments, but did not attempt to address that in the final rule. Instead, the Coast Guard stated in the supplementary information that a further rulemaking to address those issues would be initiated with an Advance Notice of Proposed Rulemaking. The ANPRM was published in October 14, 1982 (47 FR 45888) and the public was given until December 13, 1932 to comment. The following summarizes the comments received and indicates that action proposed by the Coast Guard.

Discussion of Comments and Action

A total of 28 comments were received in response to the ANPRM. Shipping companies, shipbuilders, equipment manufacturers, admiralty law firms, members of Congress, trade associations, fishing companies, current and former customhouse brokers, and others provided comments and analyses which were extremely useful to the Coast Guard. After careful review of all comments, the Coast Guard has determined that further rulemaking is necessary. It appears that the most appropriate way to clarify the rule for determining when a vessel should be considered "built in the United States" is to delete 46 CFR 67.09–3(c) from the regulations. That subsection contains the "fifty percent of cost rule" and the word "procured" which were the cause of most of the uncertainty and criticism reflected in the comments received prior to the publication of the final documentation regulations and repeated during the pendency of the ANPRM. This proposal contains the necessary amendment to delete paragraph (c) and redesignated paragraph (d) to compensate for the deletion.

The Coast Guard proposal is based on consideration of a variety of factors brought out by the comments. For example, 20 of the 28 commenters objected to the so-called "fifty percent of cost rule" in 46 CFR 67.09–3(c). Their objections were stated in a variety of forms, but in general they felt there was no legal foundation for it, that it would be ineffective, and that it was contrary to the intent of Congress as reflected in other laws. The Coast Guard has decided that there is considerable validity to those criticisms. Where the rule is without any legal foundation may be debated, but it is clear that no statute exists which either requires or specifically authorizes it. While the Coast Guard has in the past referred to the language of paragraph (c) as a "rule of thumb" for making U.S. build determinations, it did not publish it as a regulation and has not vigorously enforced it as a requirement. Three commenters noted that H.R. 5020, introduced in Congress during 1982, contained language closely resembling that found in the regulation and that the proposed legislation was not reported out of committee. They inferred that Congress was not inclined toward the approach reflected by the regulation. Regardless of the validity of that inference, the Coast Guard agrees that any need for a "Buy American" rule of this type ought to be more clearly established by Congress and that until it has been it should not be left in regulations which have the force and effect of law.

Eight commenters expressed opposition to any lessening of the "fifty percent of cost rule." Some of them suggested it ought to be tightened to insure that most or all components would be of United States manufacture. The Coast Guard is not inclined to adopt that approach. We belive Congress used the phrase "built in the United States" primarily to protect the United States shipbuilding industry rather than manufacturers. There are tariffs and trade barriers in place to protect U.S. manufacturers of items which may be used by shipbuilders in the United States. The Coast Guard believes that forcing the shipyards in the United States or vessel owners to use less satisfactory or more costly equipment of U.S. manufacture in order to insure that vessels will qualify for use in the domestic trades or the fisheries, or to do without items because they are not available from domestic manufacturers, adds an element of cost to shipbuilders, ship owners, and the public generally which is not required or justified by the Vessel Documentation Act. Therefore, the Coast Guard intends to eliminate the "fifty percent of cost rule" from the regulation and discontinue its use as a "rule of thumb."

One commenter suggested that the sole criterion for determining whether a vessel was built in the United States should be whether the vessel was assembled entirely in the United States. The Coast Guard is not willing to adopt that suggestion. To adopt such a rule would suggest that vessels which are largely the product of foreign shipyards may qualify as U.S. built if they are shipped to the United States in sections and assembled here. That is not an acceptable construction of the phrase "built in the United States" because it is contrary to what the Coast Guard believes is the intent of Congress, that is, to protect the vitality of shipyards in the United States.

Several commenters noted that 46 CFR 67.09–3(c) is unclear as to whether the word "procured" as used there means purchased. Those engaged in fishing or familiar with the fishing industries also indicated that fishing companies would experience serious competitive disadvantages if they are forced to use items of U.S. manufacture or risk having their vessels not be considered U.S. built. They point out that much of the equipment used by the industry is either not avilable from domestic sources or, if it is available, it is not as efficient or advanced as that available from foreign sources where the fishing industry has expanded more rapidly. They suggested that "procured" be defined so that they could use engines and other items of equipment of foreign manufacture or, alternatively, that they be exempt from the regulation. It was also suggested that the regulations provide for a waiver under certain circumstances. The Coast Guard agrees that the word "procured" may have several meanings and that the regulation is unclear in that regard. Although it would be possible to remove the uncertainty by defining the word for purposes of the documentation regulations, for the reasons already discussed the Coast Guard does not feel that is the best way to proceed. Instead, we propose to delete paragraph (c) completely and in doing so will eliminate the word "procured." The Coast Guard believes that the question of whether a vessel should or should not be considered "built in the United States" can be adequately addressed by using the criteria now contained in paragraphs (a) and (b) as quoted above. It is not necessary for the Coast Guard to become involved in questions of where items which are not an integral part of the hull or superstructure were procured in order to answer the basic question of whether a vessel can reasonably be considered the product of United States shipyards. Moreover, acquiring the kinds of evidence which many of the commenters suggested would be appropriate to deal with such issues, that is, bills of sale, invoices, purchase agreements, sworn statements by builders or suppliers, or similar materials, would impose an added burden on the public and the Coast Guard which detracts from our goal of simplification announced in promulgating the vessel documentation regulations. It would also be contrary to the intent of the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

Regulatory Analysis

This proposed regulation has been reviewed under the provisions of Executive Order 12291 and determined not to be a major rule. It is considered non-significant within the guidelines of the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of May 22, 1980). A determination has been made that the expected impact of changing the regulation is so minimal that the proposal does not warrant a full Evaluation. That determination is based on the nature of the change and the following circumstances relative to the need for change.

When the new vessel documentation regulations were proposed in 1981 an effort was made to include various longstanding agency practices. The "fifty percent of cost" rule, paragraph (c) as quoted above, was included on that basis. However, before the regulation was published in final form in June, 1982 it became apparent that paragraph (c), whatever its value or history as a "rule of thumb", would be impossible to implement as a regulation. Rather than change the final regulations, action to deal with § 67.09–3 was deferred to a subsequent rulemaking project. This proposal is part of the follow-up regulatory action which the public was advised would occur.

From the comments received before publication of the final vessel documentation regulations and in response to the ANPRM which preceded this proposal, it is apparent that the existence of a "fifty percent of cost" rule as a Coast Guard guideline or "rule of thumb" for U.S. build determinations was not widely publicized and that it was not well known either within the Coast Guard or the shipbuilding industry. It is also apparent that it was not vigorously enforced. Therefore, it is reasonable to conclude that it has not been a significant factor in decisions by those who might have been affected by it. It is highly unlikely that that situation changed when the final regulations were published, since the Coast Guard advised the public that § 67.09–3 would be subjected to further rulemaking action. No doubt those who have factored paragraph (c) into their decisions since 1 July 1982 have protected themselves against the obvious risk that the subsection might be changed or removed. Thus, the proposed change should produce no more than a minimal impact on anyone. For the same reasons, it is certified in accordance with section 605(b) of the Regulatory Flexibility Act (94 Stat. 1164) that this rule, if promulgated, would not have a significant impact on a substantial number of small entities.

Proposed Regulatory Change

Vessels, Documentation.

PART 67—[AMENDED]

In consideration of the foregoing, the Coast Guard proposes to amend 46 CFR Part 67 as follows:

1. The authority citation for Part 67 reads as follows:

> **Authority:** 94 Stat. 3453 (46 U.S.C. 65 a, c, d, e, t, v); 65 Stat 290 (31 U.S.C. 483a); 41 Stat. 1002, 80 Stat. 795 (46 U.S.C. 927); 41 Stat. 1006 (46 U.S.C. 983); 94 Stat. 978 (42 U.S.C. 9101).

2. Revise 46 CFR 67.09–3 to read as follows:

§ 67.09–3 United States built.

A vessel is considered built in the United States if:

(a) All major components of its hull and superstructure are fabricated in the United States; and

(b) The vessel is assembled entirely in the United States.

(c) For the purposes of this section United States includes American Samoa.

[MM Docket No. 83-373; FCC 83-151]

Revision of the Commission's Rules With Respect to the Assignment of New and Modified Call Letters to AM, FM and TV Broadcast Stations

AGENCY: Federal Communications Commission

ACTION: Proposed rule.

SUMMARY: This Notice proposes to revise § 73.3550 of the Commission's Rules with respect to the assignment of new and modified call letters to AM, FM and TV broadcast stations. This action is taken because the present rules appear to be burdensome and unnecessary.

DATE: Comments are due by May 23, 1983 and replies by June 7, 1983.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Robert A. Hayne, Mass Media Bureau, (202) 632-6485.

Notice of Proposed Rulemaking

In re matter of revision of § 73.3550 of the Commission's rules with respect to the Assignment of New and Modified Call Letters to AM, FM and TV Broadcast Stations; MM Docket No. 83-373.

Adopted: April 7, 1983.

Released: April 14, 1983.

By the Commission: Commissioner Fogarty absent.

1. The Commission, on its own motion, has under consideration the above-captioned matter concerning the processing of broadcast station call letter requests, and the Commission's underlying policies with respect to the assignment of call letters to broadcast stations.

Background

2. This proceeding is part of an overall effort to expedite the processing of all applications and requests which come before this Commission. Over the past two years, we have revised FCC Form 301-Application for construction Permit for Commercial Broadcast Station and released a *Second Report and Order* in General Docket No. 79-137 involving application processing procedures. We are also in the process of revising FCC Form 340-Application for Construction Permit for Noncommercial Educational Broadcast Station and FCC Form 302-Application for New Broadcast Station License. All of these efforts represent significant progress in meeting our objective. Against this background, we believe that significant improvements can likewise be made in regard to our rules and policies regarding the assignment of call letters.

3. The present call letter rules are the result of our 1973 action codifying existing Commission policies which were scattered throughout various decisions and public notices, and, at the same time, addressing processing problems not previously considered by the Commission. *Assignment of Call Signs*, 41 FCC 2d 481 (1973). In essence, that proceeding provided that a station, may, in most situations, request call letters of its choice (except the initial letter) if the desired call letters are available, are in good taste, and are sufficiently dissimilar phonetically and rhythmically from existing call letters of stations in the same service area so that there will be no significant likelihood of public confusion. That proceeding also dealt with such matters as the procedure for requesting call letters and filing of objections to a proposed set of call letters, requests by a proposed assignee, reassignment of relinquished call letters and conforming basic call letters. After nearly ten years of experience, we are persuaded that our present procedures warrant an in-depth review to determine whether they should be retained, modified or eliminated.

4. The current procedure first requires an applicant to notify all broadcast station within 35 miles. After a staff review, the request is placed upon a Commission public notice for 30 days during which objections may be filed. In the absence of any objection, the call letters are made effective shortly affter the 30-day public notice period. In the event an objection is received, it is resolved at staff level. An aggrieved party may then seek reconsideration by the staff and/or file an application for review which will be considered by the Commission.

Proposed Changes Regarding Objections

5. In considering our current rules, the most obvious problem concerns the filing of objections to requests for call letters. For the most part, these objections allege phonetic and rhythmic similarity between call signs. In this connection, we are confronted with both administrative and substantive problems. Administratively, we have been, at times, overburdened with objections. Even though these objections may be disposed of by delegated authority, aggrieved parties do, on occasion, file an application for review requiring consideration by the full Commission. Considering the demands upon the limited administrative resources of the Commission and the staff, we do not feel that disposing of call letter objections represents an optimum utilization of these resources. In both an administrative and substantive context, it must be noted that in excess of 90% of the objections are denied. In fact, we consider a significant proportion of these objections to be frivolous. In any event, we find ourselves disposing of objections which are, for the most part, not valid. In addition, based upon our past experience, we question whether any valid public interest benefits mandate our continued involvement in this area.

6. Our first proposal is that the Commission not continue to be the forum to resolve call letter disputes. The Commission's role has been to determine whether there is sufficient similarity between call letters that would give rise to a significant likelihood of public confusion as to the identity of a particular station. The discharge of this public interest responsiblity has also had the ancillary benefit to stations of avoiding confusion involving advertisers and ratings. But, as we observed in a recent call letter dispute case: "In the early days of the development of broadcast stations, this Commission may have been properly concerned with protecting one station from possibly trading on another's good will, by adopting similar call letters. However, today broadcast is a mature and healthily competitive industry, and there is less need for protectionist rules." *Classsical Broadcasting Society of San Antonio, Inc.*, 53 RR 2d 87, 88 (1983). When a station does select confusingly similar call letters in order to misappropriate the good will of an established station in the market, the action may be a justicable wrong and constitute unfair competition under common law and state law. *See* 87 C.J.S. *Trade-Marks, Trade-Names, and Unfair Competition* 13, 87 (1954), 74 Am. Jur. 2d *Trademarks and Tradenames* 87 (1974); *Cf. Thompson v. Alpine Motor Lodge, Inc.*, 296 F2d 497 (5th Cir. 1961). The issue in the local forum would be, in essence, the same "Likelihood of public confusion" issue which we now resolve in a call letter dispute.[1] Thus, instead of purporting to resolve call letter disputes, we propose, consistent with remaining rules and policies, to process and grant all call letter requests. In the event that a local court determines that a station should not use a particular set of call letters, we would take cognizance of that determination and assign a different set of call letters. *Cf. Shamrock Development Corp.*, 32 FCC 2d 82 (1971).

7. In the event it is determined that the Commission should continue to resolve this type of call letter dispute, we should, at the very least, revisit the criteria used to resolve these disputes. We have previously stated that when considering a call letter objection, an objector is not required to show that public confusion is bound to result. Rather, the objector is only required to show that a significant likelihood of public confusion exists. *John Poole Broadcasting Co., Inc.*, 25 RR 335 (1963). Section 73.3550(j) of the Commission's Rules now embodies this principle. Over the ensuing years, we have received numerous objections but have found over 90% of these objections not to be valid. While we believe that most of these objection were filed in good faith, there does seem to be a problem of perception on the part of the objecting stations as to what constitutes a "significant likelihood of public confusion." In this connection, there is considerable precedent on the issue of public confusion, including a recent decision announcing more of a common sense approach to call letter objections.[2] Nevertheless, we realize the misperceptions can easily exist when each case involves a subjective determination beased on the particular call letters involved. If we determine that the public interest requires us to continue to resolve call letter disputes, we propose to modify the language contained in §73.3550(j) of the Rules. Specifically, we would substitute a phrase such as "clear and convincing likelihood of public confusion" in lieu of "significant likelihood of public confusion."

8. Many objections refer to the fact that proposed call letters could be promoted in a manner which could be confused with either existing call letters and/or existing promotional uses. An example of this could be a station requesting call letters with an "EZ" combination when an existing station promotes itself as "easy listening." We have repeatedly stated that promotional announcements and materials used by broadcast stations are influenced by competitive factors which, by their very nature, are subject to frequent changes. For this reason, among others, the manner in which call letters are, or could be, promoted is not taken into consideration by the Commission in resolving a call letter dispute. *PSA Broadcasting, Inc.*, 42 FCC 2d 772 (1973). Nevertheless, this policy does not hamper any party from asserting such rights as it may have under local law in a local forum. Should it be determined by an appropriate authority that a licensee should not use a particular set of call letters for some reason outside the Commission's purview, the initial assignment of call letters would not serve as a bar to the making of a different call letter assignment. *Shamrock Development Corp., supra.* Even though our procedures are clear, we continue to receive objections premised on potentially confusing promotional uses. Therefore, should we decide that the public interest requires us to continue to resolve call letter disputes, we propose to add specific language to §73.3550 of the Rules to advise stations that objections premised on potential promotional use will not be entertained at the Commission.

Notification

9. Section 73.3550(e)(1) of the Rules requires an applicant requesting a new or modified call sign assignment to notify each broadcast station within 35 miles of the community of license. Upon reflection, it appears that the Commission's Public Notice concerning the request for call letters affords any interested station adequate notice. Our primary goal in this proceeding is to streamline a process that we believe to be outmoded and therefore, in many instances, unnecessarily burdensome to our licensees and the Commission. Accordingly, we propose to eliminate § 73.3550(e)(1), whether or not this rulemaking results in elimination or modification of § 73.3550(j).

30-Day Holding Period

10. Section 73.3550(g) of the Rules provides for a 30-day holding period following the issuance of public notice, during which objections may be filed. In the event we were to defer all objections alleging public confusion to local forums for a determination under local law, it would not be necessary to continue with a 30-day holding period. We would merely process and grant all call letter requests as they arrive. If we were to continue to entertain objections, we do not feel that a full 30-day holding period is, in fact, necessary. Therefore, we propose to shorten this period to 15 days. This would not appear to be a hardship to an objecting party and would expedite the processing of these requests.

Conforming Call Signs

11. Section 73.3550(1) of the Rules provides that only commonly owned stations assigned to the "same or adjoining" communities may request conforming the basic call sign. The reason for the above requirement is the avoidance of public confusion as to community of license. See *Eastern Oklahoma Television Company*, 28 FCC 2d 31 (1971). Subsequently, in *Doubleday Broadcasting Co., Inc.* v. *FCC*, 655 F 2d 417 (D.C. Cir. 1981), the Court of Appeals reversed our action denying a request for waiver of § 73.3550(1) of the Rules involving communities less than 2 miles apart. Following *Doubleday*, we have routinely waived this rule with respect to communities 2 or 3 miles apart. At this juncture, we must consider the continuing efficacy of this rule as well as its underlying rationale. In a waiver context, it is exceedingly difficult to "draw a line" at a certain mileage separation between communities, e.g., there is little justification to deny a waiver involving a 4-mile separation when we routinely waive a 3-mile separation. Furthermore, we are unaware of any instance of public confusion emanating from conforming call signs of stations assigned to different communities, which has compromised any cognizable public interest objective. Indeed, to the extent there may be public confusion, we believe that the further the communities are apart, the *less* the likelihood of public confusion as to a particular station's community of license. Accordingly, we are proposing to eliminate the requirement that the requesting stations be assigned to the same or adjoining communities.

Reassignment of Relinquished Call Letters

12. For the most part, call letter requests are processed on a "first-come-first-served" basis, with the first request blocking the acceptance of a subsequent request for the same call letters. In our 1973 proceeding, we considered the matter of "trafficking" in call letters. Specifically, trafficking involves a licensee relinquishing call letters and

[1] In this connection, we must concede that the Commission has no particular expertise in this area vis-a-vis other available forums.

[2] In *Classical Broadcasting Society of San Antonio, Inc. supra*, we stated that the controlling question is simply whether the letters in the call signs, apart of in combination, would sound sufficiently alike to the average listener so that a listener would confuse one station for another.

VOL
48
ISS
88
MY

1983

another licensee wishing to acquire them, by prearrangement, controlling the "availability" date by appropriate timing of their respective requests. We viewed this practice as being unfair to other parties having a legitimate interest in the relinquished call letters and bordering upon an abuse of process. In response to this purported problem, we adopted § 73.3550(k) of the Rules which provides for the Commission announcing the availability of relinquished call letters. All requests for the relinquished call letters received within a subsequent 15-day period are considered on an equal footing, with the call letters being awarded to the applicant having the longest continuous period of broadcast service. After careful consideration of this matter, we are not persuaded that private agreements between licensees harm other parties or the public interest to the extent of justifying the ongoing burden the above rule places upon our processing staff. In arriving at this determination, we would like to emphasize that any potential applicant for a set of call letters in the process of being relinquished may simply inquire as to the effective date of the proposed change in call letters. Since this date constitutes the date of relinquishement, the interested party may then submit its request on that date. Therefore, we are proposing to eliminate the 15-day procedure and process all call letter requests on a "first-come-first-served" basis. In the event we receive requests for the same call letters on the same day, we would only then select the applicant with the longest continuous period of broadcast service.

13. Section 73.3550(q) of the Rules proscribes reassignment of call letters in the same community within 180 days of relinquishment, except to the same licensee or its successor-in-interest. The purpose of this rule is to avoid the erroneous impression among listeners and viewers that the same principals are involved in the new operation. We are skeptical whether this rule furthers a tangible public interest objective. The purpose of call letters is to permit the identification of a station and not the principals of the licensee. Furthermore, this rule, in effect, draws a dichotomy between a licensee assigning its license (and call letters) to a new party and a new party merely requesting reassignment of relinquished call letters in the same community. Both situations would appear to involve an equally erroneous impression concerning the ownership of the station. We are not convinced that considering one situation to be in the public interest and the other to be contrary to the public interest is a valid distinction. Accordingly, we are proposing to eliminate this proscription concerning assignment of relinquished call letters.

"Suitable Clearance" for Certain Call Letters

14. Section 73.3550(s) of the Rules proscribes the assignment of call letters using the initials of the President, a living former President, the United States of America or any of its agencies or departments, unless "suitable clearance" is obtained. This requires the applicant to undertake efforts to gain suitable clearance and requires us to make *ad hoc* determinations that these efforts represent compliance with this rule. We question whether assignment of such call letters without suitable clearance harms the public interest. In this connection, it should be noted that with the plethora of federal agencies, we have, on occasion, inadvertently assigned call letters representing the initials of a federal agency without any suitable clearance (e.g., Station WEPA, Eupora, Mississippi). In a somewhat similar vein, as individuals become President of the United States, their initials can easily conflict with existing call letters (e.g., Station WRMN, Elgin, Illinois). Such instances do not appear to have caused public confusion or otherwise harmed the public interest. Therefore, we propose to delete this rule and routinely assign such call letters, if requested.

Other Matters

15. There are other matters involving call letters which appear to warrant comment in this proceeding. The first concerns the actual need for call letters. In this connection, we must evaluate our international treaty obligations to assign call letters. We would welcome comments on this subject. We also seek comment on the necessity for and usefulness of call signs with regard to enforcement activity of the Field Operations Bureau. The second matter concerns the requirement of § 73.3550(j) that call letters be "in good taste." In this regard, we would consider comments on whether there should be specific Commission criteria on what is, or is not, in "good taste," and/or whether we should eliminate § 73.3550(j) altogether. Finally, as indicated in paragraph 6, above, we are proposing to have issue of confusingly similar call letters arbitrated in local forums. In such situations, we believe that relief could be afforded regardless of whether or not the confusingly similar call letters are valid technical service marks. *Cf. American Shops v. American Fashion Shops*, 13 N.J. Super. 416, 80 A. 2d 575 (1951). However, it appears that a proceeding in a local forum could be facilitated if the call letters were a valid service mark. For this reason, we would also welcome comments concerning this matter and whether a Commission action conferring a proprietary or ownership right to call letters would be legally sufficient for the licensee to obtain a valid service mark.

16. As required by Section 603 of the Regulatory Flexibility Act, the Commission has prepared an Initial Regulatory Flexibility Analysis (IKRFA) of the expected impact of these proposed policies and rules on small entities. The IRFA is set forth below. Written public comments are requested on the IRFA. These comments must be filed in accordance with the same filing deadlines as comments on the rest of the Notice, but they must have a separate and distinct heading designating them as responses to the Regulatory Flexibility Analysis. The Secretary shall cause a copy of this Notice, including the IRFA, to be sent to the Chief Counsel for Advocacy of the Small Business Administration in accordance with Section 603(a) of the Regulatory Flexibility Act.

17. Pursuant to the Regulatory Flexibility Act of 1980, the Commission finds as follows:

I. Reason for Action

Requiring applicants for call letters to notify all broadcast stations within 35 miles and comply with other rules of questionable public interest value unnecessarily restricts broadcast licenses, imposes a burden on applicants and delays the processing of these requests.

II. The Objective

The Commission proposes to delete such requirements.

III. Legal Basis

Section 303(r) of the Communications Act of 1934, as amended, which permits the Commission to make such rules and regulations, not inconsistent with law, as may be necessary to carry out the provisions of this Act.

IV. Description, Potential Impact and Number of Small Entities Affected

Many broadcast stations can be classified as small businesses. These stations will benefit by lessening the requirements imposed upon them.

V. Recording, Record Keeping and Other Compliance Requirements

None.

VI. Federal Rules Which Overlap, Duplicate or Conflict With This Proceeding.

None.

VII. Significant Alternatives Minimizing Impact on Small Entities

The alternative would be to maintain the status quo and thus continue to require compliance with these rules. This would not accomplish the beneficial objective sought in this rulemaking.

18. For purposes of this non-restricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* contracts are permitted from the time the Commission adopts a notice of proposed rulemaking until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is a written or oral communication (other than formal written comment/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commissioner's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. *See Generally.* § 1.1231 of the Commission's Rules, 47 CFR 1.1231.

19. Authority for issuance of this Notice is contained in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended. Pursuant to the procedures set forth in § 1.415 of the Rules, 47 CFR 1.415, interested parties may file comments on or before May 23, 1983 and reply comments on or before June 7, 1983. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the *Report and Order.*

20. In accordance with the provisions of § 1.419 of the Rules, formal participants shall file an original and five copies of their comments and other materials. Participants wishing each Commissioner to have a personal copy of their comments should file an original and 11 copies. Members of the general public who wish to express their interests by participating informally, may do so by submitting one copy. All comments are given the same consideration, regardless of the number of copies submitted. All documents will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

21. For further information concerning this document, contact Robert Hayne, (202) 632-6485.

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Parts 100-179, Ch. I

[Docket No. HM-188]

Transportation of Hazardous Materials Between Canada and the United States

AGENCY: Research and Special Programs Administration, Materials Transportation Bureau, DOT.

ACTION: Advance notice of proposed rulemaking; notice of public hearing.

SUMMARY: The Materials Transportation Bureau (MTB) solicits public comments relative to any future action it should take concerning the provisions of § 173.8 of the Department's Hazardous Materials Regulations (HMR). This section allows, with certain exceptions, shipments of hazardous materials to be transported by railroad into or through the United States in conformance with the regulations of the Canadian Transport Commission (CTC). MTB will consider oral comments at a public hearing as well as written comments. Commenters may also address matters related to proposed requirements of Canada's Ministry of Transport (Transport Canada) even though such comments would only be relevant to § 173.8 if they are adopted as final requirements under Canada's Transportation of Dangerous Goods Act at a future date.

DATE: hearing June 2, 1983, beginning at 9:30 a.m.

ADDRESS: The Hearing will be held in room 2230, Nassif Building, DOT Headquarters, 400 Seventh Street, SW., Washington, D.C.

Written comments: Submit written comments to Dockets Branch, Materials Transportation Bureau, U.S. Department of Transportation, Washington, D.C. 20590. Comments should identify the docket and be submitted in five copies. The Dockets Branch is located in room 8426 of the Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.

Public dockets may be reviewed between the hours of 8:30 a.m. and 5:00 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Edward A. Altemos, International Standards Coordinator, Materials Transportation Bureau, Department of Transportation, 400 Seventh Street, SW., Washington, D.C. 20590. Telephone: (202) 426-0656.

SUPPLEMENTARY INFORMATION: Until the mid 1970's, the regulations of the CTC (formerly the Board of Transport Commissioners for Canada) were, with few exceptions, identical to those found in the HMR. It was due to this regulatory compability that trans-border shipments of hazardous materials moved without confusion on the part of shippers and carriers as to the applicability of regulatory requirements of each country. This may not be the present situation since CTC's and DOT's regulations for the safe transportation of hazardous materials differ in a number of significant ways.

The CTC regulations are entitled "Regulations for the Transportation of Dangerous Commodities by Rail" (TDCR) and are prescribed by "General Order No. 1974-1-Rail" of the Canadian Transport Commission dated July 31, 1974. The following is stated in general notice as a forward to the TDCR:

> These regulations are applicable to dangerous commodities transported over railways subject to the jurisdiction of the Commission.

Paragraph 9(a) of § 173.8 of the HMR reads as follows:

> Except for hazardous wastes and hazardous substances, shipments of hazardous materials which conform to the regulations of the Canadian Transport

UMI

VOL
48
ISS
88
MY
5
1983
UMI

Commission (formerly the Board of Transport Commissioners for Canada), may be transported from the point of entry in the United States to their destination in the United States, or through the United States en route to a point in Canada. Empty rail tank cars may be transported in conformity with Canadian Transport Commission regulations from point of origin in the United States to a point of entry into Canada.

Considering the applicability of CTC's TDCR and the paragraph from the HMR quoted above, so-called reciprocity in regulations exist at the present time only in regard to transportation of hazardous materials (dangerous commodities) by railroad and only to materials that are subject to both CTC and DOT regulations (e.g., there is no CTC regulation presently applicable to combustible liquids; therefore, the provisions of § 173.8 do not apply and combustible liquids must be transported in conformance with the HMR).

Most recent major revisions to CTC's regulations became effective on May 1, 1982. Many of the revisions reflect conformance to international standards based on recommendations issued by the United Nations Committee of Experts on the Transport of Dangerous Goods. The following discussions do not constitute a comprehensive analysis of CTC's regulations; they are provided only to illustrate some of the differences between CTC and DOT regulations (two numbers before a decimal in a section citation denote a CTC rule, e.g., § 71.1, whereas three numbers before a decimal denote a DOT rule contained in 49 CFR, e.g., § 171.1):

1. The list of dangerous commodities in § 72.5 most closely aligns with the list of the International Maritime Dangerous Goods Code (IMDG Code) and differs in many respects from the list in § 172.101. For example, numerous explosives descriptions not given in § 172.101 are listed in § 72.5. The list is virtually identical to DOT's optional hazardous materials table in § 172.102 and quite similar to the International Civil Aviation Organization's Technical Instructions for the Safe Transport of Dangerous Goods by Air, use of which is permitted by § 171.11.

2. A number of materials are classed differently in § 72.5 than they are in § 172.101. Also, the international class numbering system is used in § 72.5 rather than the class words in § 172.101 Examples are: (1) Aluminum hydride bears class number 4.2 which, according to § 72.1, means a substance "liable to spontaneous combustion" whereas, in § 172.101, it is classed as a Flammable solid; (2) Ammonia, anhydrous and Hydrogen chloride bear class number 2.3 which, according to § 72.1, means "Poison gases" whereas, in § 172.101, each of these materials is classed as a nonflammable gas; and (3) according to § 72.1, high-strength nitric acid, e.g., a 72% concentration, bears class number 8 for corrosives, and according to § 172.101, nitric acid at this concentration is classed as an oxidizer.

3. Section 73.427 sets forth CTC's requirements for shipping papers. Included is a provision that the class number of a material be used rather than a class word(s) required by § 172.202 in referencing § 172.101. Use of class numbers alone is not generally permitted by the HMR for imported shipments moving by rail or highway; therefore, for basic descriptions of hazardous materials on shipping papers appearing in the United States, only shipments by rail coming from Canada are presently permitted (by § 173.8) to have classes identified on shipping papers by numbers in place of class words.

4. Except for placards for Explosives and Poison Gas, placards for railcars specified in § 74.548 are wordless enlarged UN labels bearing class numbers in the bottom corner. For example, the only distinction between a FLAMMABLE GAS and a FLAMMABLE LIQUID placard is class number 2 or 3, respectively, in the bottom corner. DOT requires class words on placards except when identification numbers are permitted and displayed. In § 74.548a, CTC not only requires identification numbers to be displayed on bulk packagings, as is required by DOT, but on every carload, container load, or trailer load of hazardous materials requiring a placard. Except for division 2.3 (poison gas), which is addressed in § 74.548b, § 74.548a requires identification numbers to be displayed only on placards and does not permit optional use of orange panels.

5. The CTC regulations contain no provisions for the transport of consumer commodities as provided by the HMR.

6. Paragraph 73.9(c) permits, with certain exceptions, the transport into the United States of hazardous materials prepared in accordance with the IMDG Code, provided they are transported in closed freight containers and that the DOT certification statement appears on the shipping papers. The HMR do not generally permit the transport by rail of hazardous materials packaged or placarded in accordance with the IMDG Code without regard to the corresponding requirements in the HMR.

7. The CTC regulations contain no listing of forbidden materials, as listed in § 172.101, and certain provisions appear in § 173.21 for which there is no corresponding provision in § 73.21. For example, § 173.21(d) forbids "* * * materials (other than those classed as explosives) which will detonate in a fire". The CTC regulations contain no such general prohibition. Other examples of materials forbidden for transport under the HMR, but permitted by the CTC regulations, include "new" explosives not approved in accordance with § 173.86 and Methyl ethyl ketone peroxide containing more than 9 per cent active oxgen.

MTB believes that it should make every reasonable effort to recognize shipments coming into the United States in conformance with CTC regulations (and future Transport Canada regulations) in consideration of the fact that (1) CTC fully recognizes shipments moving into Canada under DOT regulations (§ 73.8), and (2) more than $3 billion worth of hazardous materials (dangerous commodities) move annually between our countries.

Commenters are invited to address any potential safety impacts being encountered or contemplated as a result of the present "reciprocal" regulatory provisions of § 73.8 and § 173.8 or that may result from Transport Canada requirements (a number of which, if adopted as proposed in the *Canada Gazette* on June 19, 1982, would be the same as those of CTC). Of particular concern to MTB are those potential safety impacts that may be related to emergency response actions because of several fundamental differences in communications requirements. This concern may be offset by the fact that both regulatory systems use identification numbers assigned to materials based on the worldwide UN System. It is these identification numbers which provide rapid access to emergency response information in the U.S. Emergency Response Guidebook and Canada's Emergency Response Guide for Dangerous Goods. Commenters are encouraged to discuss the value of this matrials identification numbering commonality in offsetting other differences in light of the wide dissemination of the Guidebook and its growing use by fire, police, and other emergency response entities in the United States.

MTB wishes to emphasize that the purpose of this Advance Notice of Proposed Rulemaking is to solicit comments concerning safety impacts due to differences in regulations pertaining to the safe transportation of hazardous materials. It is not intended to address the mertis of CTC's regulations (or those proposed by Transport Canada); nor is it intended to serve as a forum for such a purpose.

It is requested that persons desiring to provide oral comments at the hearing advise Mr. Altemos before June 2, 1983.

(49 U.S.C. 1803, 1804, 1808; 49 CFR 1.53, Appendix A to Part 1 and paragraph (a)(4) of Appendix A to Part 106)

Issued in Washington, D.C. on April 28, 1983.

Alan L. Roberts,

Associate Director for Hazardous Materials Regulation, Materials Transportation Bureau.

BILLING CODE 4910-60-M

Federal Railroad Administration

49 CFR Part 229

[Docket No. RSGC-2, Notice 4]

Display of Alerting Lights by Locomotives at Public Rail-Highway Crossings; Termination of Rulemaking

AGENCY: Federal Railroad Administration (FRA), DOT.

ACTION: Termination of rulemaking.

SUMMARY: This notice terminates rulemaking action in FRA Docket No. RSGC-2. The last notice of proposed rulemaking (47 FR 44791) involved a proposal to require railroad locomotives to display flashing lights at public rail-highway grade crossings. The underlying assumption of the proposal was that such lights would alert motorists of an approaching train and thereby reduce the likelihood of an accident at the crossing. Termination of this rulemaking is based on public comments and FRA's determination that there is no justification for a Federal regulatory requirement that railroads equip their locomotives with an alerting light.

FOR FURTHER INFORMATION CONTACT: John Leeds, Office of Safety, Federal Railroad Administration, Washington, D.C. 20590, telephone (202) 426-4345.

SUPPLEMENTARY INFORMATION:

Background

On March 7, 1978, the FRA published an advance notice of proposed rulemaking (ANPRM). The purpose of the ANPRM was to determine whether Federal regulations should require locomotives to be equipped with lighted devices, beyond the standard headlight, intended to alert motorists that a train is approaching a rail-highway crossing at grade (43 FR 9324).

Although the comments were largely negative, FRA determined that the alerting light concept warranted further exploration. Hence, FRA issued a notice of proposed rulemaking (NPRM) on June 18, 1979 (44 FR 34982). This NPRM proposed to require the display by railroad locomotives of dual alternating electronic flash tube lights (strobe lights) at public rail-highway crossings at grade.

The response to the strobe light NPRM was overwhelmingly negative. Substantial questions were raised about the effectiveness of the strobe light (and alerting lights generally), the costs involved, and the operational reliability of the strobe devices. As a result, the FRA withdrew the strobe light NPRM on April 15, 1982 (47 FR 16189).

On October 12, 1982, FRA issued a second NPRM (47 FR 44791). This notice proposed the installation of a single alerting light on railroad locomotives, with a wide variety of light types qualifying as an alerting light. By removing the concerns expressed by the commenters to the earlier NPRM that related solely to the strobe type light, FRA sought to focus attention on the critical question whether alerting lights were effective at all.

Once again, the comments were largely negative. In view of the practical experience of the commenters with alerting lights and the depth of the technical analysis, the working hypothesis of the proposed rule was substantially undermined.

Substantial data and analyses have now been developed as a consequence of this extended rulemaking proceeding. FRA believes that the current information is more than sufficient to permit a determination whether a requirement that locomotives be equipped with alerting lights is justified. Having conducted a thorough review of the data and analyses, FRA has concluded that the information in the Docket does not support the proposition that alerting lights are effective in reducing the incidence of grade-crossing accidents. Without that support, a Federal regulatory requirement that railroads equip their locomotives with an alerting light is not justified.

Alerting Light Effectiveness

The notion that the installation of a lighted flashing device on a railroad locomotive (in addition to the standard headlight) might make the locomotive more conspicuous is not a new one. Decades before FRA began its proceeding in this docket, some railroads were utilizing an oscillating headlight (Mars light) on locomotives used in high speed passenger service to attract the attention of persons along the right-of-way. More recently, other lighted devices (strobe lights and revolving dome lights, for example) have been utilized by various railroads for a variety of purposes.

Against this backdrop, FRA approached its inquiry with a working assumption or hypothesis that an alerting light would increase the conspicuousness of a railroad locomotive, and thereby reduce the number of rail-highway accidents at grade.

As set forth below, however, this assumption has not been validated by the analysis and data in the docket that has been developed as part of this rulemaking.

The most important study in support of the first proposed rule is entitled "Analysis for NPRM: Strobe Lights on Locomotives". It was prepared for FRA by Dr. W. Curtiss Priest and Mr. Karl Knoblauch of IOCS, Inc. The study includes an evaluation of the effectiveness of dual strobe lights, an analysis of the benefits and an estimation of the costs of a regulation requiring strobe lights, and a measure of the economic impact of such a regulation on the railroad industry. This study, which concluded that strobe lights are cost beneficial, formed the basis for FRA's cost/benefit analysis for the second NPRM.

The IOCS study, however, is not based on empirical data. It is instead a theoretical analysis of the possible impacts of requiring alerting (strobe) lights on railroad locomotives. On both aspects of the effectiveness issue—the degree of increased conspicuity alerting lights provide and whether that increased conspicuity will actually reduce the number of accidents—the authors, in the absence of any data, were compelled to speculate. The authors could conclude only that "[i]t is judged that between 25 and 75 percent of the motorists would react favorably."

The IOCS study, therefore, is of no real assistance on the issue of whether and to what extent alerting lights on railroad locomotives are effective.

The second study involves the FRA strobe light test program and is entitled "Operational Testing of Locomotive-Mounted Strobe Lights." The study was prepared for FRA by John B. Hopkins of the Transportation Systems Center of DOT. The testing, conducted in cooperation with four railroads, sought to assure compatibility with normal operations, validate previous cost estimates, and obtain a measure of safety effectiveness.

The major finding of the study was that the strobe light device used in the test program did not have adequate reliability in the rail environment, a concern voiced by the many railroad commenters in response to the first NPRM. As a result, the FRA withdrew

VOL
48
ISS
88
MY
5
1983
UMI

the strobe light NPRM and subsequently issued the second NPRM that would have permitted a wide variety of light types.

The operational tests did not provide an objective measure of the effectiveness of alerting lights. Compared on the basis of rail-highway crossing accidents per locomotive mile, the locomotives equipped with strobe lights fared slightly better than those without them. The authors of the study noted, however, that so few accidents occurred on each participating railroad that one more or one less accident involving either the equipped or the unequipped locomotives would produce substantially different comparative results. Accordingly, the study found (page viii) that "the sample was too small to draw valid conclusions on a wider basis." The study concluded that, insofar as effectiveness was a criterion, the limited operational test data did not provide justification for a universal requirement for alerting lights.

FRA likewise concludes that this test report does little to illuminate the issue of effectiveness. Moreover, FRA believes that no test program of any reasonable cost and scope can be devised to generate objective, statistically valid data from which the actual effectiveness of alerting lights can be determined. A host of factors are intertwined in the causal circumstances underlying public rail-highway crossing accidents, many of which are impossible to isolate or quantify for purposes of achieving valid test conclusions. The relative infrequency of such accidents on a per locomotive mile basis inhibits the accumulation of a proper data base. The wide differences in railroad environments and operating conditions preclude generalizing from limited testing in a few environments.

The third study relating to the effectiveness issue is the study included in the comments of the Association of American Railroads (AAR).

The AAR study analyzed the 1980 and 1981 accident rates at public rail-highway crossings at grade not protected by active warning devices. It compared the accident rates for railroads that have equipped their locomotives with alerting lights to the rates for railroads whose locomotives are not so equipped. The railroads included in the study accounted for approximately 70 percent of road locomotives, 60 percent of all public rail-highway crossings at grade, and 63 percent of all public rail-highway crossing accidents.

A summary of the conclusions of the study is found on page A–1 of the AAR comments:

> The results of the analysis indicate that there is no statistically significant relationship between the number of accidents per crossing and whether or not the locomotives were equipped with altering lights. There is no evidence in the available data that alerting lights are effective in reducing grade crossing accidents.

Having carefully reviewed the underlying study, FRA agrees that the conclusions drawn by the AAR are consistent with the data analyzed. As in the case with any complex statistical analysis, reasonable minds might differ with certain of the assumptions that were made by the AAR in comparing and analyzing the data. Nevertheless, FRA believes that such differences would not materially affect the validity of the AAR's conclusions.

Indeed, as a result of the approach taken by the AAR study, FRA developed a fourth study. This study also compares a group of railroads with locomotives equipped with alerting lights to a group whose locomotives were not so equipped to determine if the effectiveness of alerting lights on railroads locomotives can be demonstrated. The FRA study, which has been included in the docket, approaches the selection of the relevant rail-highway crossing accidents in a different manner. It attempts to isolate more specifically the altering light component in the overall accident rate of the two groups—an extremely difficult task since that component is only one of many, more significant factors.

The FRA analysis, at the very least, supports the identical conclusion reached by the AAR: there is no evidence that alerting lights are effective in reducing grade crossing accidents. In fact, the group of equipped railroads that were examined in the FRA study had a slightly higher grade-crossing accident rate. To the extent any affirmative conclusion could be drawn from the FRA study, it is that alerting lights have no discernible effect on the incidence of grade-crossing accidents.

Finally, FRA was presented with the statements of railroads commenters that their actual experience with altering lights on railroad locomotives does not indicate any discernible safety benefit. These statements are notably consistent with the negative and inconclusive results of the studies discussed above. At the public hearing held in conjunction with the last NPRM, the witness for Amtrak, which is a carrier whose locomotives are equipped with strobe lights, testified as follows:

> Although Amtrak now has extensive experience with the operation of trains in all parts of the country with warning lights on its locomotives, we do not feel there is any evidence in our experience that could justify the conclusion that these lights produce a significant safety benefit * * * Amtrak believes that enhanced visibility of trains, which we have sought to achieve through the use of warning lights, is not a significant factor in eliminating grade crossing accidents * * * Amtrak cannot specifically demonstrate that there have been no safety benefits from such lights; however, we have not found any positive evidence that these lights produce a significant safety benefit.

Not only is there no evidence warranting a finding that alerting lights are effective in reducing accidents, the data do not provide any adequate basis for comparing the relative effectiveness of alerting lights with other grade crossing safety efforts, *e.g.*, Operation Lifesaver, an industry-State cooperative public education program. Information in the docket indicates that States having Operation Lifesaver programs have a rail-highway crossing accident rate declining at a faster pace than States that do not have such programs. Thus, even assuming that alerting lights were effective to some degree, that alone would not warrant Federal regulation to require them as opposed to other alternatives.

Obtaining data to make comparisons between various rail-highway grade crossing protection programs is extremely difficult, if not impossible. The difficulties in isolating and measuring the effectiveness of alerting lights are also present in determining the effectiveness of other grade crossing protection programs. Accordingly, FRA has no basis upon which to mandate a universal rule for all railroad operations. An individual railroad is in the best position to determine the optimum grade crossing program or programs for its particular situation. The steady decline over the past decade in the number of rail-highway accidents, fatalities, and injuries indicates that the choices have been successful overall.

Accordingly, rulemaking action in Docket No. RSGC–2 is terminated.

(Secs. 2, 7, 8, 9, and 13, Locomotive Inspection Act (45 U.S.C. 23, 28, 29, 30 and 34); sec. 6 (e) and (f), Department of Transportation Act (49 U.S.C. 1655 (e) and (f)))

Issued in Washington, D.C., on April 26, 1983.

Joseph W. Walsh,

Associate Administrator for Safety.

BILLING CODE 4910-06-M

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 74–09; Notice 12]

Federal Motor Vehicle Safety Standards; Child Restraint Systems

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes an amendment to Standard No. 213, *Child Restraint Systems*, which would modify the buckle force requirements of the standard. The proposed amendment would reduce the minumum force requirement in the pre-impact test of the belt buckle from 12 to 9 pounds. It would also establish a new 12-pound maximum force requirement for the pre-impact test. The current maximum permitted force in the post-impact test would be reduced from 20 to 16 pounds. In addition, the notice proposed adding buckle size and buckle latching requirements to the standard. The effect of these requirements will be to ensure that child restraint belt buckles are easier for adults to operate, while also ensuring that children will not be able to open the buckles by themselves.

DATES: Comments must be received by June 20, 1983. The proposed effective date of the amendment is 35 days after publication of the final rule.

ADDRESS: Comments should refer to the docket number and be submitted to: Docket Section, Room 5109, 400 Seventh Street, SW., Washington, D.C. 20590. Docket hours are 8 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Vladislav Radovich, Office of Vehicle Safety Systems, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590 (202–426–2064).

SUPPLEMENTARY INFORMATION: On December 13, 1979 (44 FR 72131), the agency adopted Safety Standard No. 213, *Child Restraint Systems* (49 CFR 571.213). That standard substantially upgraded the performance requirements for child restraints. One section of the standard sets a limit on the amount of force necessary to open a child restraint belt buckle and release a child. The purpose of the requirement is to prevent young children from unbuckling the restraint, while still allowing adults to do so easily. Based on research done by Peter Arnberg for the National Swedish Road and Traffic Research Institute, the agency adopted a force of 12 pounds as the minimum force required to open a buckle and limited the maximum force to 20 pounds. (A copy of that research, "Handling Performance of Buckles on Child Seats with Regard to Opening Force Requirements," as well as the other research and information provided by manufacturers that is cited in this notice have been placed in the general reference section of this docket.)

Buckle Force Limits

Since adoption of the standard, the agency has received information indicating that the minimum force level found in belt buckles meeting the standard may be too high, thus making the buckles difficult to open. One manufacturer, Questor Juvenile Manufacturing Co., has provided the agency with letters from owners of its restraints commenting on the difficulty of opening the belt buckles. In addition, a study conducted for the agency by the University of Michigan's Highway Safety Research Institute (HSRI) has indicated that the operating force found in some buckles may be too high. The study, "Factors Affecting Consumer Acceptance and Use of Child Restraint Systems," examined the cause of consumer satisfaction and dissatisfaction with child restraint systems. Although the researchers did not conduct formal buckle force compliance tests, they did make measurements of the forces needed to open the buckle. They found that some buckles required as much as 21 pounds of pressure to release, a force which is difficult for most adult women to produce.

The researchers suggested that manufacturing variations were one reason for the high force level (i.e., to ensure that all their buckles do not open when a force of less than 12 pounds is applied to them, manufacturers may have to design their buckle to open at 14 pounds to account for expected variations in the manufacturing process).

To reduce potential problems in opening child restraint belt buckles, the agency has decided to reduce the minimum and maximum buckle release force limits. In addition, the agency is proposing to modify the buckle force measurement test procedures. Both of these changes will facilitate the use of belt buckles that require approximately 10.5 pounds of force to release.

At present, the buckle force test procedure specifies that a buckle is to be tested both before and after the impact testing of the child restraint. In both the pre-and post-impact tests, tension is applied to the buckle prior to measuring the buckle release force. The purpose of applying tension is to simulate the force that would be applied to the buckle by a child that is hanging upside down in the restraint.

The agency is proposing to make several changes to the pre-impact tests. The first change would eliminate the use of tension in the pre-impact test. While the application of tension is appropriate in the post-impact test, to simulate the buckle force that would be encountered by an adult who is releasing a child from a restraint after a rollover crash, the application of tension is not needed in the pre-impact test. Thus, in the pre-impact test, buckle force would be measured with no load applied to the belt buckle, except the load exerted by properly adjusting the belt system around a child.

The agency is also proposing the minimum buckle force permitted in the pre-impact test be reduced by 3 pounds, from 12 to 9 pounds. According to the Arnberg study, a minimum buckle force level of 9 pounds is sufficient to prevent children up to the age of approximately 4 from opening the buckle by themselves. In addition, the agency is proposing to set a force of 12 pounds as the maximum permitted in the pre-impact test. Setting a minimum level of 9 pounds will mean that even if the amount of manufacturing variation in buckle force is 3 pounds, the force required to open the buckle under normal conditions need not be more than 12 pounds. The agency specifically requests comments and test data from manufacturers about whether a difference of 3 pounds between the minimum and maximum buckle force is sufficient to account for the amount of buckle force variation that they are currently experiencing.

In the post-impact test, the agency would still apply tension to the buckle before the release force is measured. However, the maximum permitted release force would be reduced from 20 to 16 pounds. The agency is permitting a slightly higher maximum release force in the post-impact test to account for damage that might occur to the buckle during the impact test. According to Arnberg's research almost all of the adult women in the study were able to open a buckle with a maximum release force of 16 pounds using one hand.

Buckle Latching

The agency has received several letters concerning instances where parents have fastened a child restraint belt buckle, the buckle felt secured, but subsequently popped open. Such a design problem, referred to as false

VOL
48
ISS
88
MY
5
1983
UMI

latching, is easily correctable. To prevent further problems, the agency is proposing to require child restraint buckles to meet the latching requirement of S4.3(g) of Standard No. 209, *Seat Belt Assemblies*. That requirement prohibits the material used in the buckle from wearing so that it impairs the normal latching and unlatching of the buckle.

Buckle Size

A portion of the difficulty parents have experienced in opening some child restraint belt buckles may be attributable to the size of the buckle release mechanism (i.e., the size of the push button or other type of release mechanism). For example, the smaller the area of the push button release mechanism, the larger the amount of pressure per square inch the parent must exert to open the buckle. The agency has eliminated such problems for adult seat belt buckles by specifying a minimum area for the buckle release mechanism. To ensure that child restraint belt buckles are as easy to operate as adult belts, the agency is proposing to require child restraint buckles to have a minimum release area. For example, a push button would have to have a minimum area of 0.6 square inch. Most child restraints currently have minimum buckle release areas that comply with this requirement.

Belt Length/Shell Width

The HSRI report on child restraints also raised questions about the length of the harness webbing used in child restraints and the width of child restraints. The researchers noted that the use of winter clothing significantly increases the amount of harness webbing needed to accommodate a fully clothed and diapered child. They reported that a snowsuit can add six inches to the length required for a harness lap belt to accommodate a child. In addition, the researchers said that nearly all child restraints are too narrow for the size children they claim to accommodate.

The researchers attribute these design problems to a failure to use anthropometric data in determining needed width and harness webbing length and the failure to take into consideration the use of heavy clothing. They also commented that the design problems result in part from the use of the Part 572 three-year-old test dummy, which is used in the dynamic sled test to measure the crash performance of the restraint, as the exclusive design guide in developing restraints.

One long-range solution is for the standard to be amended to use additional test dummies to simulate larger children. However, because of the long time and expense needed for research, development and testing such dummies, such a solution would be several years away. Another possible solution is to conduct the crash tests with a test dummy dressed in a typical snowsuit. At present, child restraints are tested with the dummy dressed in summer-type clothing.

The agency requests comments from all interested parties on those and other regulatory and non-regulatory ways to address the issues of belt length and shell width.

Economic Effects

The agency has considered the economic and other effects of this proposal and has determined that the proposed rule is not a major rule within the meaning of Executive Order 12291. The agency has further determined that the proposal is not significant within the meaning of the Department of Transportation's regulatory procedures. The basis for those determinations is that the proposed rule reduces the current overly stringent buckle force requirements. The expected effects of the buckle force, latching and minimum size proposals are so minimal that the proposal does not warrant a full Regulatory Evaluation.

The agency has also considered the effect of this proposal in relation to the Regulatory Flexibility Act. I certify that the proposal would not have a significant economic impact on a substantial number of small entities. As explained previously, the effect of the proposal is to modify the buckle release requirements to make it easier for adults to open the buckle. The proposed requirements should not significantly increase the testing and design costs for child restraint manufacturers.

The proposed amendments would not have a significant effect on a substantial number of small government jurisdictions and small organizations. Some of those entities are affected because they are purchasers of child restraints. However, the cost effect of the proposed changes are minimal. Accordingly, no initial regulatory flexibility analysis has been prepared.

Finally, the agency has analyzed this proposal for the purposes of the National Environmental Policy Act. The agency has determined that implementation of this action would not have any significant effect on the human environment.

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

All comments must be limited not to exceed 15 pages in length. Necessary attachments may be appended to these submissions without regard to the 15 page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation (49 CFR Part 512).

All coments received before the close of business on the comment closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestion for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose, in the envelope with their comments, a self addressed stamped postcard. Upon receiving the comments, the docket supervisor will return the postcard by mail.

Imports Motor vehicle safety Motor vehicles, Rubber and rubber products, Tires.

PART 571—[AMENDED]

§ 571.213 [Amended]

In consideration of the foregoing, the following amendment is proposed to § 571.213, *Child Restraint Systems*, of Title 49 of the Code of Federal Regulations:

1. Section 5.4.3.5 would be revised to read as follows:

* * * * *

S5.4.3.5 *Buckle Release.* Any buckle in a child restraint system belt assembly designed to restrain a child using the system shall:

(a) When tested in accordance with S6.2.2 prior to the dynamic test of S6.1, not release when a force less than 9 pounds is applied and shall release when a force of not more than 12 pounds is applied;

(b) After the dynamic test of S6.1, when tested in accordance with S6.2.3, release when a force of not more than 16 pounds is applied;

(c) Meet the requirements of S4.3(d)(2) of FMVSS No. 209 (§571.209), except that the minimum surface area for child restraint buckles designed for push button application shall be 0.6 square inch;

(d) Meet the requirements of S4.3(g) of FMVSS No. 209 (§571.209) when tested in accordance with S5.2(g) of FMVSS No. 209; and

(e) Not release during the testing specified in S6.1.

* * * * *

2. Section 6.2 would be revised to read as follows:

* * * * *

S6.2 *Buckle release test procedure.* Any belt assembly buckle used in each child restraint system shall be tested in accordance with S6.2.1 through S6.2.4.

* * * * *

3. Section 6.2.1 would be revised to read as follows:

* * * * *

S6.2.1 Prior to testing specified in S6.1 place the locked buckle on a hard, horizontal, flat surface with each belt end loaded to 2 pounds. For pushbutton-release buckles the force shall be applied by a conical surface (cone angle not exceeding 90°) at the centerline of the push button 0.125 inches from a movable edge and in the direction that produces maximum releasing effect. For lever release or sliding type buckles, the force shall be applied on the centerline of the buckle lever or finger tab in a direction that produces maximum release. Measure the force required to release the buckle.

* * * * *

4. Section 6.2.2 would be revised to read as follows:

* * * * *

S6.2.2 After completion of the testing specified in S6.1, and before the buckle is unbuckled, tie a self-adjusting sling to each ankle of the test dummy in the manner illustrated in figure 4.

* * * * *

5. Section 6.2.4 would be revised to read as follows:

* * * * *

S6.2.4 While applying the force specified in S6.2.3, measure the force reqired to release the buckle as follows: For push button release buckles, apply a force with a conical surface (cone angle not exceeding 90°) at the centerline of the pushbutton 0.125 inches from a movable edge and in the direction that will produce maximum releasing effect. For lever release or sliding type buckles, the force is applied on the centerline of the buckle lever or finger tab in a direction that produces maximum release effect.

* * * * *

6. Section 6.2.5 would be removed.

(Sec. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegations of authority at 49 CFR 1.50 and 501.8)

Issued on April 29, 1983.

Courtney M. Price,

Associate Administrator for Rulemaking.

BILLING CODE 4910-59-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 260

Request To Grade Imported Fishery Products

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Request for comment.

SUMMARY: The National Marine Fisheries Service (NMFS) seeks comments on the effect on consumers and the U.S. seafood industry of grading imported finished fishery products for sale in the United States. Comments will be used to determine if seafood product inspection regulations should be changed in response to requests from U.S. corporations for grading services for imported finished products.

DATE: Comments should be received by June 30, 1983.

ADDRESS: Comments should be addressed to Thomas J. Billy, Acting Director, Office of Utilization Reseach, F/S3, National Marine Fisheries Service, Washington, D.C. 20235.

FOR FURTHER INFORMATION CONTACT: Richard V. Cano (Acting Program Manager, National Seafood Inspection Program), 202-634-7458.

SUPPLEMENTARY INFORMATION: NMFS has been requested by a U.S. corporation to grade foreign-processed, finished seafood products and mark them with the appropriate U.S. grade designation for sale in the United States. Similar inquiries have been received in the past from other interested parties in the United States and from U.S. companies with interests in foreign countries. The U.S. Department of Agriculture grades certain imported commodities (other than fish) under requirements of marketing orders. It also has bilateral arrangements with certain foreign inspection agencies to accept foreign certification of hygienic processing conditions and wholesomeness of certain commodities, in some cases for subsequent U.S. grading.

It has been determined that NMFS is not prohibited by statute from grading foreign finished seafood products so long as such grading will further the purposes of both the Fish and Wildlife Act of 1956, as amended, and the Agricultural Marketing Act of 1946, as amended. The Fish and Wildlife Act state that the fishing industry can prosper only if certain fundamental needs are satisfied, including:

- Maintenance of an economic atmosphere in which domestic production and processing can prosper;
- Protection from subsidized competing products; [and,] * * *
- Assistance consistent with that provided by the Government for industry generally, such as is involved in promoting * * * fair trade standards * * * [or] better health standards and sanitation * * *.

The Agricultural Marketing Act states the intent of Congress to provide:

* * * an integrated administration of all laws enacted by Congress to aid the distribution of agricultural products [including fish] * * * to the end that marketing methods and facilities may be improved, that * * * the price spread between the producer and consumer may be narrowed, that dietary and nutritional standards may be improved, that new and wider markets for American agricultural products may be developed, both in the United States and in other countries, with a view to making it possible for the full production of American farms to be disposed of usefully, economically, profitably, and in an orderly manner.

Existing NMFS regulations do not permit the grading and subsequent marking of imported finished product. For such services to be provided, 50 CFR Part 260 would have to be amended to create a category of "approved foreign establishment" and to provide for an agreement with a foreign country to recognize its fishery products inspection program, if that program is determined to be at least the equivalent of the NMFS program.

VOL
48
ISS
88
MY
5
1983
UMI

In order to assess whether the regulations should be changed, NMFS needs the views of interested parties on the possible short or long term impacts, whether positive or negative, of grading foreign, finished product for sale in the United States with the appropriate U.S. grade designation on the product label.

Comments are solicited from all segments of the seafood industry, including fishermen, processors, brokers and distributors. Comments are also encouraged from consumers, food stores, and food service establishments. Comments, if possible, should address the supply of fishery products in the U.S. market, competition, product quality, production costs, prices, expected impacts on individual firms and the seafood industry in general, and consumer preferences.

Vol. 48, No. 88
Thursday, May 5, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

COMMISSION ON CIVIL RIGHTS

Hawaii Advisory Committee; Agenda and Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Hawaii Advisory Committee to the Commission will convene at noon on May 26, 1983 and will end at noon on May 27, 1983, at the Ala Moana Hotel, in the Board Room, 410 Atkinson Drive, Honolulu, Hawaii 96814. The purposes of this meeting are for the Subcommittee on Native Issues to discuss recent developments regarding Hawaiian homelands (from noon to 2:30p on May 26); for the full Committee to engage in program planning (from 3:00p to 8:00p on May 26); and to conduct a press conference on the Committee's statement on Affirmative Action in the Hawaii State Department of Education (from 10:00a to noon on May 27).

Persons desiring additional information or planning a presentation to the Committee, should contact the Chairperson, Helen R. Nagtalon-Miller, 3201 Beaumont Woods Place, Honolulu, Hawaii 96822, (808) 948-7183 or the Western Regional Office, 3660 Wilshire Boulevard, Suite 810, Los Angeles, California 90010, (213) 688-3437.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C. May 2, 1983.

John I. Binkley,

Advisory Committee Management Officer.

BILLING CODE 6335-01-M

Michigan Advisory Committee; Agenda and Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Michigan Advisory Committee to the Commission will convene at 6:00p and will end at 9:00p, on May 24, 1983, at the Michigan State University, Kellogg Center, Harrison Road, East Lansing, Michigan, 48824. The purposes of this meeting is to discuss the tuition tax credit and equality in commercial lending projects.

Persons desiring additional information or planning a presentation to the Committee, should contact the Chairperson, M. H. Rienstra, 1225 Thomas South East, Grand Rapids, Michigan, 49506, (616) 949-4000 or the Midwestern Regional Office, 230 South Dearborn Street, 32nd Floor, Chicago, Illinois, 60604, (312) 353-7479.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C. May 2, 1983.

1983

U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No.: 83–56. Applicant: Colorado State University, Department of Physics, Fort Collins, Colorado 80523. Instrument: Synchronouly Scanned Tandem Mechanical Stage for a Fabry Perot Interferometer, Control Unit for Same, and Segmented Ramp Control Unit. Manufacturer: John Sandercock, Switzerland. Intended use of instrument: See Notice on page 54990 in the **Federal Register** of December 7, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides a large free spectral range (FSR) up to 1000 gigahertz and a narrow bandwidth of approximately one megahertz. The National Bureau of Standards advises in its memorandum dated March 28, 1983 that: (1) The capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

The following is a consolidated decision on applications for duty-free entry of electron microscopes pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No.: 83–126. Applicant: Texas A&M University, College of Medicine, College Station, TX 77843. Instrument: Electron Microscope Model EM 420 and Accessories. Manufacturer: Philips Electronic Instruments, Inc., The Netherhlands. Intended use of Instrument: See Notice on page 5578 in the **Federal Register** of February 7, 1983. Instrument ordered: November 23, 1982.

Docket No.: 83–127. Applicant: University of California, Los Alamos National Laboratory, P.O. Box 990, Los Alamos, NM 87545. Instrument: Electron Microscope, EM 410 with Accessories. Manufacturer: Philips Electronic Instruments, Inc., The Netherlands. Intended use of Instrument: See Notice on page 5578 in the **Federal Register** of February 7, 1983. Instrument ordered: September 27, 1982.

Docket No.: 83–132. Applicant: University of North Carolina School of Medicine, Department of Anatomy, 108 Swing Building 217H, Chapel Hill, NC 27514. Instrument: Electron Microscope, JEM 200–CX SEG. Manufacturer: JEOL, Japan. Intended use of Instrument: See Notice on page 8320 in the **Federal Register** of February 28, 1983. Instrument Ordered: September 23, 1982.

Docket No.: 83–135. Applicant: Cook County Department of Purchase (Cook County Hospital), 118 North Clark Street, Chicago, IL 60602. Instrument: Electron Microscope, Model JEM–100CX/II and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of Instrument: See Notice on page 9550 in the **Federal Register** of March 7, 1983. Instrument ordered: December 1, 1982.

Docket No.: 83–136. Applicant: Centers for Disease Control, 1600 Clifton Rd., NE., Atlanta, GA 30333. Instrument: Electron Microscope, EM 410G with Accessories. Manufacturer: Philips Electronic Instruments, Inc., The Netherlands. Intended use of Instrument: See Notice on page 9550 in the **Federal Register** of March 7, 1983. Instrument ordered: February 14, 1983.

Docket No.: 83–137. Applicant: University of Michigan Hospitals, 1405 E. Ann Street, Ann Arbor, MI 48109. Instrument: Electron Microscope, EM 400 and Accessories. Manufacturer: N.V. Philips, The Netherlands. Intended use of instrument: See Notice on page 9950 in the **Federal Register** of March 7, 1983. Instrument ordered: December 7, 1982.

Docket No.: 83–138. Applicant: The University of Texas System Cancer Center, M.D. Anderson Hospital and Tumor Institute, 6723 Bertner, Texas Medical Center, Houston, Texas 77030. Instrument: Electron Microscope, EM 410G and Accessories. Manufacturer: Nederlandse Philips Bedrijven B.V., The Netherlands. Intended use of Instrument: See Notice on page 9550 in the **Federal Register** of March 7, 1983. Application received by Commissioner of Customs: February 16, 1983.

Docket No.: 83–140. Applicant: University of Alabama in Birmingham, Department of Biochemistry, University Station, Birmingham, AL 35294. Instrument: Electron Microscope, EM 10CA and Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of Instrument: See Notice on page 13214 in the **Federal Register** of March 30, 1983. Instrument ordered: August 10, 1982.

Comments: No comments have been received with respect to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as these instruments are intended to be used, was being manufactured in the United States at the time the instruments were ordered.

Reasons: Each foreign instrument to which the foregoing applications relate is a conventional transmission electron microscope (CTEM). The description of the intended research and/or educational use of each instrument establishes the fact that a comparable CTEM is pertinent to the purposes for which each is intended to be used. We know of no CTEM which was being manufactured in the United States either at the time of order of each instrument described above or at the time of receipt of application by the U.S. Customs Service.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign instruments to which the foregoing applications relate, for such purposes as these instruments are intended to be used, which was being manufactured in the United States either at the time of order or at the time of receipt of application by the U.S. Customs Services.

Geological Survey; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Docket No: 82–00097. Applicant: U.S. Geological Survey, Water Quality Laboratory, 5293 Ward Road, Arvada, CO 80002. Instrument: Gas Chromatograph/Mass Spectrometer/Data System, Model MM707GDS. Manufacturer: VC Micromass Ltd., United Kingdom. Intended use of instrument: See Notice on Page 13394 in the **Federal Register** of March 30, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, was being manufactured in the United States at the time the foreign instrument was ordered (September 26, 1980).

Reasons: This application is a resubmission of Docket Number 81–00075 which was denied without prejudice to resubmission on September 15, 1981 for informational deficiencies. The foreign instrument can scan from mass 500 to 25 including reset to 500 in 0.6 second. The Department of Health and Human Services advises in its memorandum dated April 4, 1983 that: (1) The capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use which was being manufactured in the United States at the time the foreign instrument was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which was being manufactured in the United States at the time the foreign instrument was ordered.

University of California; Notice of Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 879) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No.: 83–83. Applicant: University of California, Lawrence Livermore National Laboratory, P.O. Box 5012, Livermore, CA 94550. Instrument: Camera, X-Ray, Ultra-Fast Streak, Model IMACON 500/X-Ray with Accessories. Manufacturer: John Hadland, Limited, United Kingdom. Intended use of instrument: See Notice on page 56534 in the **Federal Register** of December 17, 1982.

Comments: No comments have been received with respect to this application.

Decisions: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument operates in the visible ultraviolet x-ray range of 20 electron volts to 10 kilo electron volts. The National Bureau of standards advises in its memorandum dated March 29, 1983 that: (1) The capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

National Bureau of Standards

Invitation to Participate in International Laboratory Accreditation Conference (ILAC) 1983

AGENCY: National Bureau of Standards, Commerce.

ACTION: Invitation to participate in ILAC 83 Conference.

SUMMARY: The Seventh International Laboratory Accreditation Conference (ILAC) will be held in Prague, Czechoslovakia, October 31–November 4, 1983. ILAC is an informal organization of approximately 42 nations and 12 international organizations whose overall purpose and objective is to promote: (1) The development of national programs for accrediting testing laboratories; (2) the employment of harmonized accreditation criteria; and (3) the development of bilateral or multilateral arrangements which would encourage importers to accept the results of tests and data made by laboratories that have been accredited under a recognized laboratory accreditation program in exporting nations.

Annual conferences in support of ILAC's stated purpose have been held to develop information about laboratory accreditation systems, to provide a forum for discussing differences among such systems, to describe basic principles and criteria for operating such systems, and to develop bilateral or other arrangements which would establish mutual recognition of such systems or of test reports issued by laboratories accredited under such systems. These bilateral arrangements are intended to minimize technical barriers to trade.

The United States Delegation is chaired by the Director of the Office of Product Standards Policy. Anyone interested in attending this meeting in

Prague as a member of the U.S. Delegation, using his or her own financial resources, for registration fees, hotel accommodations, food, and travel expenses, is invited to submit a request by June 30, 1983, to Dr. Stanley Warshaw, Chairman, U.S. ILAC Delegation, National Bureau of Standards, TECH B154, Washington, DC 20234. Such persons should have a background in standards development, laboratory accreditation, product testing or product certification activities.

The U.S. Delegation will have an open pre-conference meeting at 10:00 a.m. on Friday, October 7, 1983, in Lecture Room A of the administration Building at the National Bureau of standards, Gaithersburg, Maryland to prepare for the conference. The meeting attendees and delegates will: (1) Review ILAC Task Force reports; (2) consider the position that the U.S. Delegation should take in response to those reports; (3) prepare any proposed resolution for introduction at ILAC 83; and (4) consider any additional matters of interest. The pre-conference meeting will be chaired by Dr. Stanley Warshaw, Director, Office of Product Standards Policy, National Bureau of Standards.

Anyone wishing to attend this meeting, which is open to the public or provide information on proposals for consideration by the delegation, should notify Mr. John W. Locke, National Bureau of Standards, TECH B141, Washington, DC 20234, telephone: 301–921–3431.

Dated: May 2, 1983.

Ernest Ambler,

Director, National Bureau of Standards, Department of Commerce.

[FR Doc. 83–12011 Filed 5–4–83; 8:45 am]

BILLING CODE 3510-13-M

National Oceanic and Atmospheric Administration

North Pacific Fishery Management Council; Scientific and Statistical Committee; and Advisory Panel; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Notice.

SUMMARY: The North Pacific Fishery Management Council, established by Section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94–265, as amended), has established a Scientific and Statistical Committee (SSC) and an Advisory Panel (AP) to assist the Council in carrying out its responsibilities under the Act. The Council, its SSC and AP will hold separate public meetings.

DATES: The Council meeting will convene on Wednesday, May 25, 1983, at approximately 9 a.m., in the Old Federal Building, 605 West Fourth Avenue, Anchorage, Alaska, and will meet until approximately 5 p.m., on Thursday, May 26, 1983, or until Council business is completed. The SSC meeting will convene on Monday, May 23, 1983, at approximately 9:30 a.m., and will adjourn at approximately 5 p.m., on Tuesday, May 24, in the Old Federal Building. The AP will convene its meeting on Tuesday, May 24, at aproximately 9:30 a.m., and will adjourn at approximately 5 p.m., in the Old Federal Building. The meetings may be lengthened or shortened depending upon progress on the agenda.

Proposed Agenda: Council—A detailed agenda will be sent to the public approximately May 13, 1983. The Council will review its Herring Fishery Management Plan (FMP) for final submission to the Secretary of Commerce. This review will include considering changing herring from an allowable incidental catch by the foreign trawl fleets to a prohibited species. The Council will also be informed of the latest developments of the United States/Canada salmon negotiations. Crab fisheries regulations adopted by the Alaska Board of Fisheries will be reviewed along with two proposed amendments to the Tanner Crab FMP. The Council will give final consideration to Amendment #8 of the Bering Sea/Aleutian Islands Groundfish FMP, which will decrease the prohibited species catch limit for salmon in 1984 and 1985. The Council will hear a progress report of the Council's working group on prohibited species in the Gulf of Alaska. For both the Bering Sea and the Gulf, the Council will discuss the status of groundfish resources and management alternatives for both domestic and foreign fleets, including evaluation of present optimum yield levels for pollock and other species in both areas. The Council will also discuss objectives for future halibut limited entry sytem and will review a summary of a report submitted by Northwest Resource Analysis, and will set a schedule for public presentations of the report. Finally, the Council will review budget matters and may also have foreign fishing permits to review.

The SSC and AP agenda items will be the same as that of the Council.

FOR FURTHER INFORMATION CONTACT: North Pacific Fishery Management Council, P.O. Box 3136DT, Anchorage, Alaska 99510, Telephone: (907) 274–4563.

Dated: April 29, 1983.

Alfred J. Bilik,

Acting Chief, Fees, Permits and Regulations Division, National Marine Fisheries Service.

BILLING CODE 3510-22-M

National Marine Fisheries Service; Notice of Receipt of Application for Permit; College of the Atlantic

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), the Endangered Species Act of 1973 (16 U.S.C. 1531–1544), the National Marine Fisheries Service regulations governing endangered fish and wildlife permits (50 CFR Parts 217–222).

1. Applicant:

a. Name: College of the Atlantic (P322).

b. Address: Bar Harbor, Maine 04609.

2. Type of Permit: Scientific Research/Scientific Purposes.

3. Name and Number of Animals:

Unspecified number of various species of marine mammals of Western North Atlantic Canadian and United States waters for deposit and exchange in U.S. and Canadian scientific collections.

4. Type of Take:

Collection, importation and export of specimens found dead.

5. Location of Activity: Eastern coast of Canada and United States.

6. Period of Activity: 5 years.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Northeast Region, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930.

Dated: April 28, 1983.

R. B. Brumsted,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Patent and Trademark Office

Policy Regarding Exchange Agreements Under the Authority of 35 U.S.C. Section 6(a)

Background

The Patent and Trademark Office (PTO), by virtue of Section 6(a) of Title 35, United States Code, is empowered to enter into exchange agreements with other organizations to further the use of patent and trademark information, and to facilitate the use and availablity of that information. In recognition of these objectives, the PTO establishes the following guidelines and principles which shall apply when evaluating and entering into exchange agreements with other public, private, domestic and foreign agencies, firms and companies.

Nature of Exchange Agreements

Exchange agreements by the PTO will generally be for the purpose of : (1) Acquiring goods and services which will assist the PTO in accomplishing its mission and achieving its goals; (2) reducing the cost to the government of processing activities associated with the examination of applications for patent and trademark registration; (3) fostering the dissemination of information contained in patent and trademark documents; and (4) furthering the general goal of automating patent and trademark examination process.

In exchange agreements, the PTO and the industrial or commercial concerns will share in the cost and risks of the endeavor. Terms and conditions of each agreement, including the business arrangements, are negotiable within the limits of prevailing statutes and regulations and will be commensurate with the risks, involvement, and investment of the parties to the agreements. The PTO's intent is to offer as much latitude as practical in the agreement.

Each agreement will be negotiated on a case-by-case basis. Agreements will vary in size, complexity, scope and the nature of the materials, services, and/or products being exchanged by the parties. All exchange agreements will be subject to the availability of funds.

Incentives

Incentives provided by the PTO for the purpose of entering into exchange agreements may include, but are not limited to (1) Providing copies of PTO documents; (2) providing computer processable data obtained from patents, trademark applications, trademark registrations, and other data sources developed by the PTO; (3) providing government furnished equipment necessary for the other party to fulfill the agreement; and (4) entering into joint programs where each party funds its own participation.

Considerations

The factors to be considered by the PTO prior to entering into an exchange agreement or providing incentives shall include, but will not be limited to the following considerations: (1) public or social need for the product(s) of the agreement; (2) enhanced dissemination of technological information; (3) benefits accruing to the public or the U.S. Government from the endeavor; (4) the desirability of private sector involvement in PTO programs; (5) the merit of the research, development or application proposed; (6) the degree of risk and financial participation by the other party; (7) the amount of proprietary data or other information to be furnished by the concern; (8) the rights in data to be granted to the PTO and the concern as a result of their contributions; (9) the willingness and ability of the concern to market and sell any resulting new or enhanced products on a reasonable basis; and (10) the impact of PTO sponsorship upon a given industry or area of commercial endeavor.

Administration

The Administrator for Automation is delegated the authority to enter into negotiations. The Commissioner of Patents and Trademarks will approve exchange agreements on behalf of the PTO. Before proceeding into comprehensive evaluation of a joint endeavor, a preliminary assessment will be made of the merits of the offer. Exchange agreement proposals which are too sketchy or ill-defined to: (1) Establish the merit in the basic idea, (2) establish that the proposal is in accordance with PTO program objectives, or (3) establish that the proposing organization is willing to make significant contribution to the endeavor, will not be evaluated in depth and will be treated as correspondence or advertising. This preliminary assessment will be conducted by the Administrator for Automation or his or her designee to determine if the proposal warrants further consideration. If this determination is positive and if the parties agree to proceed with a joint endeavor, the Administrator for Automation will enter into detailed discussions and negotiations with the offeror regarding the technical and business aspects of the offer. Upon reaching a mutually satisfactory arrangement, the agreement will be submitted to the Commissioner of Patents and Trademarks for approval. Administration of the exchange agreement program will be performed by the Administrator for Automation.

Due to resource limitations and the necessity for diversity in the program, only one offer will normally be accepted for a given PTO incentive. If substantially similar offers are received within any 45-day period, they will be evaluated and/or negotiated together. The offer which provides the best total consideration for the Government will be accepted. Special consideration shall be given to small and minority businesses, as appropriate.

Gerald J. Mossinghoff,

Commissioner of Patents and Trademarks.

May 2, 1983.

BILLING CODE 3510-16-M

DEPARTMENT OF EDUCATION

List of Accrediting and State Approval Agencies for Review Under Special Procedure

AGENCY: Office of Postsecondary Education, Education.

ACTION: Notice—List of accrediting and State approval agencies to be reviewed under a special procedure.

SUMMARY: The Secretary lists nationally recognized accrediting agencies and State approval agencies that the National Advisory Committee on Accreditation and Institutional Eligibility recommends to the Secretary under a special review procedure. The list of agencies to which the Advisory Committee has applied this procedure is composed of (1) agencies that were awarded the full four-year recognition period in their last review and (2) agencies that have submitted interim reports.

DATE: Comments on these analyses must be received no later than June 3, 1983.

ADDRESS: Comments may be submitted to Richard J. Rowe, Director, Eligibility

VOL
48
ISS
88
MAY

1983

and Agency Evaluation Staff, Office of Postsecondary Education, 400 Maryland Avenue, SW. (Room 3030, ROB–3) U.S. Department of Education, Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT: Richard J. Rowe, Telephone: (202) 245–9873.

SUPPLEMENTARY INFORMATION: This document is intended to advise the public that the National Advisory Committee,on Accreditation and Institutional Eligibility, in making recommendations to the Secretary regarding his responsibility for listing accrediting agencies and State approval agencies as required by 20 U.S.C. 1141(a), 20 U.S.C. 1094(b)(3) and other statutes, is following a special review procedure regarding some agencies.

Usually the Advisory Committee reviews in detail each report and petition and each staff analysis and hears oral presentations from the petitioning agencies and interested third parties before formulating the recommendations to the Secretary regarding the accrediting or State approval agencies.

The Special procedure for reviewing agency petitions and interim reports will reduce the depth of review by the Advisory Committee of agencies that were awarded the full four-year recognition period in their last review, and of agencies which have submitted interim reports. The Advisory Committee will use both staff analyses and public comment before submitting final recommendations to the Secretary regarding the list of these agencies under 34 CFR Part 603.

This notice provides the names of the agencies being reviewed under this special procedure. The Department's Eligibility and Agency Evaluation Staff has prepared analyses of the petitions and reports of these agencies according to the criteria in 34 CFR 603.6, and 34 CFR 603.23 and has prepared recommendations on them.

The public is offered an opportunity to comment on these analyses before the Advisory Committee makes final recommendations to the Secretary.

The reports and petitions of the following agencies are being reviewed:

Petitions for Recognition as Nationally Recognized Accrediting Agencies and Associations

A. *Petitions for Continuation of Recognition*—National agencies.

American Veterinary Medical Association, Committee on Animal Technician Activities and Training (for accreditation of two-year programs of animal technicians).

Proposed Recommendation: Continue recognition for a period of four years. Request the agency to submit an interim report in one year on training and selection of visiting teams [(a)(3)(iii)(B) and (d)(2)] and assessment of the validity and reliability of standards (b)(5).

American Veterinary Medical Association, Council on Education (for accreditation of colleges of veterinary medicine offering programs leading to a professional degree in veterinary medicine and for the preaccreditation status of "Reasonable Assurance").

Proposed Recommendation: Continue recognition for a period of four years.

Association of Theological Schools in the United States and Canada (for accreditation of free-standing schools, as well as schools affiliated with larger institutions, offering graduate professional education for ministry and graduate study of theology).

Proposed Recommendation: Continue recognition for a period of four years.

B. *Petitions for Continuation of Recognition*—Regional Commission.

North Central Association of Colleges and Schools, Commission on Institutions of Higher Education (for accreditation, and preaccreditation as Candidate for Accreditation of postsecondary institutions that offer a program of at least one academic year (or equivalent) in length and that require general education as an essential part, of or a prerequisite to, the principal programs in the States of Arizona, Arkansas, Colorado, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, New Mexico, North Dakota, Ohio, Oklahoma, South Dakota, West Virginia, Wisconsin, and Wyoming).

Proposed Recommendation: Continue recognition for a period of four years.

Petitions for Recognition as State Agencies Recognized for the Approval of Public Postsecondary Vocational Education

A. *Petitions for Continuation of Recognition.*

Arkansas State Board for Vocational Education (for recognition as the State agency for the approval of public postsecondary vocational education in Arkansas).

Proposed Recommendation: Continue recognition for a period of four years.

Kansas State Board of Education (for recognition of the Kansas State Board of Education as the agency for approval of public postsecondary vocational education in Kansas).

Proposed Recommendation: Continue recognition for a period of four years.

Petitions for Recognition as a State Agency Recognized for the Approval of Nurse Education

A. *Petitions for Continuation of Recognition.*

Montana State Board of Nursing (for recognition as a State agency for approval of nurse education in Montana).

Proposed Recommendation: Continue recognition for a period of four years.

Invitation to comment: A copy of the analysis of any of the reports and petitions submitted by the agencies listed in this Notice may be obtained from Richard J. Rowe.

Dated: May 2, 1983.

Edward M. Elmendorf,

Assistant Secretary for Postsecondary Education.

[FR Doc. 83-12012 Filed 5-4-83; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

International Energy Program; Approval By the Secretary of Energy Pursuant To Section 5 of the Voluntary Agreement and Plan of Action

AGENCY: Department of Energy.

ACTION: Publication of Approval of Participation by U.S. Oil Companies in the International Energy Agency's Fourth Allocation Systems Test.

SUMMARY: On April 22, 1983, the Secretary of Energy issued letters of approval with respect to U.S. oil company participation in the International Energy Agency's Fourth Oil Allocation Systems Test. The text of the letter and related documents are appended to this notice.

FOR FURTHER INFORMATION CONTACT: Craig S. Bamberger, Assistant General Counsel for International Trade and Emergency Preparedness, Room 6A–141, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585: (202) 252–2900.

SUPPLEMENTARY INFORMATION: Pursuant to section 252 of the Energy Policy and Conservation Act (EPCA), 42 U.S.C. 6272, the Secretary of Energy monitors the carrying out of voluntary agreements to implement the Agreement on an International Energy Program (TIAS 8278, November 18, 1974) by U.S. oil companies and issues certain approvals with respect thereto. U.S. oil companies which are members of the Voluntary Agreement and Plan of Action to Implement the International Energy Program, 2 CCH Federal Energy Guidelines, para. 15,845, are afforded an antitrust defense under EPCA section 252 for activities in connection with the preparation or testing of the International Energy Agency's (IEA's) emergency sharing system.[1] Pursuant to section 5(b) of the Voluntary Agreement, specific approval of the Secretary of Energy is required if these U.S. oil companies are to provide or exchange confidential or proprietary information or data in the test.

The IEA's Fourth Emergency Allocation Systems Test (AST–4) began on April 22, 1983, with the transmission by the IEA of a disruption telex to IEA member governments and participating companies. To facilitate the test activities of U.S. oil companies which participate in the Voluntary Agreement, written approval has been given by the Secretary of Energy pursuant to section 5(b) of the Voluntary Agreement for these companies' submission or exchange in AST–4 of confidential or proprietary information or data which is necessary to the conduct of the test.

The documents published herewith are the text of the letter of approval sent to the 20 U.S. oil companies participating in the Voluntary Agreement, the operating procedures and requirements for recordkeeping in connection with such participation (which apply and elaborate existing DOE regulations contaned in 10 CFR Part 209), and correspondence among the Department of Energy, the Department of Justice, the Department of State and the Federal Trade Commission evidencing consultation among those agencies and the required concurrence of the Department of Justice in the issuance of the letter of approval by the Secretary of Energy.

A draft of this approval letter with its operating procedures/recordkeeping requirements was published in the **Federal Register** for public comment, 48 FR 11760 (March 21, 1983). No public comments were received. The only substantive changes made in the letter published on March 21 concern its provisions with respect to the "Group of Experts," a subject discussed below.

The approval letter and operating procedures/recordkeeping requirements are similar to those which were provided for the IEA's Third Allocation Systems Test (AST–3) held in 1980, *see* 45 FR 71314 (October 27, 1980). Several improvements have been made in those documents based on experience of the U.S. Government in monitoring AST–3, and operating procedures and recordkeeping requirements have been simplified and made less burdensome.

The most significant new feature of the antitrust approval letter for this systems test is paragraph 9(n), dealing with approval of company disclosures of their confidential or proprietary information or data in the test. In previous tests, the clearance letters enumerated the types of confidential or proprietary information or data which could be disclosed by the companies, and required further Government approval before other types of such information or data could be communicated. Paragraph 9 of the letter similarly enumerates specific types of covered information, but under paragraph 9(n), it also would be permissible to disclose "such additional * * * types of information or data as may be needed on a timely basis in implementing the (IEA's) oil allocation procedures" if a request for advance approval of such disclosure were not feasible. However, prompt notice of any such additional disclosure must be given to U.S. Government test monitors along with an explanation of why advance approval could not be obtained, and approval for the continued submission or exchange of such information or data can be terminated prospectively by U.S. Government observers if that proves warranted.

Most of the data base for the test—consisting principally of historical import, export, indigenous production and stock level data for March through August of 1981—actually will be altered to reflect the effects of an hypothesized emergency oil disruption scenario. Also, companies are free to deliberately "mask" their data if they so wish. Thus the age of the data, their distortion to reflect the disruption scenario and their potential masking by the companies, combined with the projections built into the approval letter, should significantly reduce any risk of anticompetitive behavior as a result of the disclosure of proprietary company information during AST–4.

The pricing of oil transactions is not being tested in AST–4. The antitrust approval letter therefore expressly excludes permission for the U.S. oil companies to disclose or exchange confidential or proprietary crude oil or petroleum product prices or other commercial terms.

One unique feature of AST–4 is the role of a "Group of Experts," consisting of three consultants to the IEA Secretariat who are to witness the test and participate in appraising it.[2] The antitrust approval letter provides the participating U.S. companies with antitrust protection when they give these Experts access to the confidential or proprietary information or data which they will disclose while participating in AST–4. None of the three people who have been selected to serve as Experts currently is an employee of an IEA Reporting Company. However, because the Experts do have various kinds of consulting, investment or other relationships to the energy industry, the approval letter previously published in draft form has been revised to reflect the expectation that, in the absence of a further, specific approval by the U.S. Government, the Experts will not have access to any disaggregated confidential or proprietary information or data of the U.S. oil companies other than the information or data made available by them in AST–4 to the Industry Supply Advisory Group, the industry group serving at IEA headquarters as part of the IEA Emergency Management Organization.

Issued in Washington, D.C., April 28, 1983.

Craig S. Bamberger,

Assistant General Counsel for International Trade and Emergency Preparedness.

Appendices

A. Letter of Approval from the Secretary of Energy to U.S. Reporting Companies.

B. Operating Procedures and Recordkeeping Requirements.

C. Letter from the Secretary of Energy to the Assistant Attorney General, Antitrust Division, Department of Justice.

D. Letter from the Secretary of Energy to the Secretary of State.

E. Letter from the Assistant Secretary of State, Economic and Business Affairs, to the Secretary of Energy.

F. Letter from the Assistant Attorney General, Antitrust Division, Department of Justice, to the Secretary of Energy.

G. Letter from the Chairman of the Federal Trade Commission to the Assistant Attorney General, Antitrust Division, Department of Justice.

Appendix A

April 22, 1983.

Dear ————: 1. The International Energy Agency (IEA) will conduct in the near future a fourth test of the emergency allocation systems (AST–4). The Department of Energy (DOE) considers AST–4 an important part of our preparedness efforts. We hope your company will participate and

[1] The U.S. oil companies which participate in the Voluntary Agreement are: Amerada Hess Corporation, ARCO Petroleum Products Company, Ashland Oil, Inc., Caltex Petroleum Corporation, Champlin Petroleum Company, Cities Service Company, Conoco, Inc., Exxon International Corporation, Gulf Oil Trading Co., Mobil Oil Corporation, Murphy Oil Corporation, Occidental Oil and Gas Company, Phillips Petroleum Company, Shell Oil Company, Standard Oil Company of California, Standard Oil Company of Indiana, Standard Oil Company of Ohio, Sun Company, Inc., Texaco, Inc., and Union Oil Company of California.

[2] The Experts are James D. Hughes of the United States, Robert Belgrave of the United Kingdom and Enno Schubert of the Federal Republic of Germany.

provide full cooperation to the IEA in this undertaking.

2. This letter sets out guidelines for participation in AST–4 by U.S. oil companies and personnel of the U.S. oil companies and provides required approvals for the disclosure or exchange of confidential or proprietary information or data in connection with AST–4, as required by the Voluntary Agreement and Plan of Action to Implement the International Energy Program ("Voluntary Agreement"), 2 CCH Federal Energy Guidelines, Paragraph 15,845. Participation by U.S. companies is governed by section 252 of the Energy Policy and Conservation Act (EPCA), DOE regulations at 10 CFR Part 209, and the Voluntary Agreement.

3. The primary objectives of AST–4 are: (a) To continue the program of periodic training of personnel of participating IEA governments, oil companies and the IEA Secretariat in the data systems and emergency oil allocation procedures developed to implement the provisions of the Agreement on an International Energy Program (IEP) (TIAS 8278, November 18, 1974), which are delineated in the Emergency Management Manual (EMM) and the Industry Supply Advisory Group/Secretariat Operations Manual (ISOM); (b) to exercise all elements of the National Emergency Sharing Organization (NESO) in each participating IEA country that are essential to the efficient and successful operation of the IEA emergency oil sharing systems, including national emergency procedures; and (c) to test modifications and improvements made to the systems and procedures since the last test (AST–3) held in the autumn of 1980. The scope of AST–4, as detailed in the AST–4 Test Guide, is to be broadly similar to that of AST–3 as far as the IEA Secretariat, the Industry Supply Advisory Group (ISAG), Reporting Company and NESO activities are concerned.

4. AST–4 will begin with the sending of a disruption telex on April 22, 1983, and will continue for approximately eight weeks. It will consist of one full and one curtailed allocation cycle. Prior to the completion of the full regular cycle commencing May 2, 1983, a second disruption telex will be released by the IEA Secretariat. Questionnaire A (QA) and Questionnaire B (QB) data will be submitted and allocation rights and allocation obligations will be calculated by the Secretariat and relayed to countries and companies for each cycle. Following communication of allocation rights and allocation obligations for the second cycle, the test will cease as far as IEA-directed activity is concerned. Thus the large majority of ISAG representatives will be involved for less than four weeks, although a few ISAG representatives may remain until the completion of the test.

5. An Experts Group of three persons engaged as consultants to the IEA Secretariat will witness the test, have access to any information or data to which the ISAG has access, and study the voluntary offer process. The Experts Group will contribute to the test appraisal, and for this purpose is expected to discuss the test with individuals participating in the test. For purposes of this letter, the activities of the Experts Group shall be considered to be part of the carrying out of AST–4. We understand that none of the members of the Experts Group will be an employee of an IEA Reporting Company.

6. Industry will participate in several ways. First, industry representatives will staff the ISAG; the ISAG, with the IEA's Allocation Coordinator, Secretariat and a Standing Group on Emergency Questions Emergency Group composed of representatives of IEA member countries, will comprise the IEA Emergency Management Organization at IEA headquarters in Paris, France, which will conduct the test. Second, Reporting Companies will submit QA and other data to the IEA Secretariat and the ISAG, and individually will discuss these data with the IEA Secretariat and with the ISAG to the extent required for the test; their affiliates will make similar data submissions and have similar individual discussions with the NESOs of the participating countries in which they operate. Third, Reporting Companies will propose and simulate the carrying out of the certain hypothetical supply reallocation measures called "Type 2" allocation by the IEA; in this connection, Reporting Companies may communicate with other Reporting Companies: (a) For the purpose of identifying suitable suppliers or receivers of oil to formulate "closed loop" Type 2 offers, (b) to enable Reporting Companies to work out logistics needed to implement Type 2 offers, or (c) to undertake needed subsequent modification of Type 2 offers which have previously been accepted by the Allocation Coordinator. Finally, it is our understanding that some NESOs may have employees of Reporting or Non-Reporting Companies or their affiliates as members or advisors.

7. In Paris, the test will be conducted, for notice purposes under the Voluntary Agreement, as a single meeting of ISAG carried out in accordance with Section 5 of the Voluntary Agreement. In addition to individual tasks and contacts with the Secretariat by ISAG members, working sessions will include meetings of all ISAG members and smaller group meetings of several ISAG members, as well as joint working sessions of a few ISAG members assigned to solve particular problems. The ISAG Manager or his designee may meet with members of the AST–4 Control Group, consisting of the Chairman of the Industry Advisory Board, the Chairman of the Standing Group on Emergency Questions and the IEA Executive Director, with the AST–4 Design Group Chairman, or with members of the Standing Group on Emergency Questions Emergency Group. A verbatim transcript of certain sessions will be made under the supervision of U.S. Government observers; such transcripts will be available for review by participants in the sessions so transcribed, or their counsel, either during the test or later. For some ISAG sessions, a full and complete record will be prepared by U.S. Government observers who are present. A full and complete record of other communications will be maintained by the U.S. test participants. More detailed recordkeeping requirements, including operating procedures, are set out in the attachment to this letter. These recordkeeping requirements have been prepared in cooperation with the Department of State, the Department of Justice and the Federal Trade Commission, and are to be considered an integral part of this letter of approval.

8. In order to carry out the test, it will be necessary for Reporting Companies to provide the IEA Secretariat and the ISAG with certain information or data on IEA questionnaire forms and formats, and to submit voluntary offers to supply or receive reallocated oil, and they may have to engage in other communications with the IEA Secretariat or ISAG to clarify, amplify, correct, or supplement such data submissions and voluntary offers. Further, ISAG members may have to exchange this and other information or data among themselves, with members of the IEA Secretariat, with IEA Reporting Companies, and with NESOs. Access to such information or data and to ISAG discussions and work sessions will be open to official observers from the European Communities and IEA member countries authorized by the IEA to be present at the test, and to the Experts Group. Aside from the IEA questionnaire and format data and information as to voluntary offers, much of the data or information will be available from public sources. Some such information or data, while actually public information, may not be definitely known to be publicly available by those exchanging it or it may be considered confidential by some companies. Some of the data or information needed to be provided or exchanged clearly will be confidential or proprietary.

9. Accordingly, approval under section 5(b) of the Voluntary Agreement is hereby given to Voluntary Agreement participants and their employees engaged in AST–4 to submit and exchange the types of information or data listed below which involve or might involve disclosure of confidential or proprietary information or data. However, this approval is granted only to the extent that the submission or exchange of these types of confidential or proprietary information or data is necessary during the first cycle, and until allocation rights and allocation obligations have been determined and communicated by the IEA Secretariat in the second cycle, in order to implement the oil allocation procedures of the IEP as guided by the EMM, the ISOM, and the AST–4 Test Guide, and to meet specific problems as they arise during AST–4. Approval is further limited to information or data covering the historical period March 1981 through August 1981. This letter neither approves nor disapproves the activities of company employees serving on NESOs or any communication between a Reporting Company or its affiliate and a NESO. Under these limitations, and those set forth in paragraphs 10, 11, 12, 13 and 14, the submission and exchange of the following types of information or data is approved:

(a) Disaggregated March thru August 1981 QA or QB data submitted during AST–4, *i.e.*, data as required by the QA and QB reporting instructions in effect for AST–4 as further defined in the AST–4 Test Guide, and ISAG work formats derived from such data, including:

—Indigenous production of crude oil and natural gas liquids (NGLs) and feedstocks;
—Imports and exports of crude oil, NGLs and feedstock;
—Petroleum product imports and exports (in crude oil equivalents);
—International marine bunkers;
—Inventory levels and changes; and
—Stocks at sea.

This data base will be amended by Reporting Companies, coordinating with their affiliates as required, and by NESOs for Non-Reporting Companies operating within their boundaries, based on the Secretariat's disruption telex at the beginning of each cycle, and as elaborated during each cycle by updating telexes from the Secretariat. Reporting Companies may mask data if they so choose in accordance with the procedures established in the AST–4 Test Guide. Reporting Companies will rearrange their international supply plans to reflect the reduced availability of certain types of crude oil as well as certain other restrictions as indicated in the disruption telex and updating telexes and will report the new supply plan on QA submitted to the Secretariat. In addition, each NESO will compile QB from information or data received from Reporting Companies or their affiliates operating within its country and from Non-Reporting Companies operating within its country and will submit QB to the Secretariat. Some of the data submitted by companies will be unaffected by the assumed supply disruption and will therefore be actual data. Such actual data are likely to include the following:

—Inventory level changes in March 1981 and inventories at the end of March 1981, from which inventories as of March 1, 1981 can be derived (see paragraph 10(b) with respect to provision of this data to the ISAG);
—Indigenous crude/NGL production through all six months in the data base; and
—International marine bunkers.

(b) Capability of a refinery to process crude oil or specific crude oils, and the capability of a pipeline, dock or terminal or other storage or transit facility to receive, store, or throughput crude oils or specific crude oils or petroleum products or specific petroleum products.

(c) Capability of a port, installation, or waterway to receive or move vessels of various sizes and configurations.

(d) The availability of tankers, including their location, routing, size, specifications and operating characteristics.

(e) Main characteristics of crude grades and product specifications (excluding individual company crude yields and product specifications).

(f) Actual and estimated historical production data on crude oils and NGLs for individual countries.

(g) Aggregated historical country supply patterns for crude oil, NGLs and petroleum products, *e.g.*, imports by country of origin, exports to country of destination, and inventory profiles.

(h) Specific refinery considerations that prevent acceptance or release of certain crudes, *e.g.*, the inability of a refinery to process specific types of crude oil or to make certain specialty products for which the crude oil is particularly suited; the inability of a type of crude oil to meet product specifications; hazards to refinery operations which processing of a particular type of crude oil might cause; or the need for a refinery to operate at a minimum throughput level.

(i) Identification of supply logistics problems relating to certain countries or regions of countries.

(j) Identification, without disclosure of specific costs, prices or financial information, or other underlying facts, of the existence of certain individual company considerations which would preclude or make impracticable a proposed movement of oil, involving:

(i) Commercial policy;

(ii) Supply or transportation factors;

(iii) Affiliate, third-party, concessional or other contractual arrangements; or

(iv) Constraints relating to actions or policies of governments.

(k) Identification of differences between the crude oil and pretroleum product supply mix and demand for products in certain countries or regions of countries.

(l) Information or data concerning voluntary offers made by Reporting Companies to supply or receive, and information or data concerning the implementation of voluntary offers which have been accepted by the Allocation Coordinator.

(m) Clarification, amplification, correction, explanation or supplementation of the types of information enumerated in (a)–(l), privided that this subparagraph (m) does not supersede any specific prohibition contained in this approval letter.

(n) Such additional information or data or types of information or data as may be needed on a timely basis in implementing the oil allocation procedures of the IEP as guided by the EMM, the ISOM and the AST–4 Test Guide, if a request for advance approval under paragrah 17 is not feasible; provided, that prompt written notice of such submission or exchange together with a description of the circumstances necessitating such submission or exchange without a request for advance approval must be given to the representatives of the Secretary of Energy, the Attorney General and the Federal Trade Commission attending the test. Approval for the continued submission or exchange of such information or data can be terminated prospectively by the Department of Energy representative or the Department of Justice representative.

10. In order to carry out the test, these information and data must be provided and exchanged on a disaggregated basis and the finding required by section 5(b)(2) of the Voluntary Agreement in this regard is hereby made, with the following limitations:

(a) During the first test cycle, U.S. ISAG personnel will examine QAs and QBs to detect supply or logistical anomalies that might indicate that an error had been made by a Reporting Company or NESO in preparing or transmitting the data. After detecting a potential supply or logistical anomaly, a U.S. ISAG member may discuss such anomaly with Secretariat personnel, members of ISAG, the Reporting Company or NESO which transmitted the anomalous QA or QB data and the Reporting Company whose data is included in a QB and which data is thought to be such an anomaly. U.S. ISAG personnel may not discuss suspected anomalies with any other persons. All discussions of anomalies among U.S. ISAG personnel and other members of ISAG must be conducted in the presence of a U.S. Government observer at AST–4. When responding to an inquiry from the ISAG member regarding such anomalies, a U.S. Reporting Company may only confirm the accuracy of the reported data, provide corrected data, or discuss with ISAG members whether the reported data accurately reflect the cycle's reallocation and the cycle's disruption scenario. Any further explanation of such anomalies may only be provided to personnel of the IEA Secretariat.

(b) Company-specific opening inventory data as of March 1, 1981, data showing inventory level changes in March 1981 and the "check total" for march 1981 as reflected in QAs and QBs shall not be made available to ISAG personnel on a routine basis, but only as necessary to solve specific supply problems when they arise. A U.S. Government observer present at the AST–4 test site may give written approval for disclosure of such data, upon receipt and consideration of a written request from the ISAG Manager or his delegate stating that access to such data is necessary.

(c) It is understood that the IEA Secretariat will not permit any disaggregated QA data of a Reporting Company, other than data submitted by the Reporting Company in AST–4, to be made available to any other Reporting Company or ISAG representative thereof, or to the Experts Group.

(d) The Experts Group will witness the provision and exchange of these disaggregated information and data, in AST–4. The Voluntary Agreement participants and their representatives serving on the ISAG, however, may not disclose to the Experts Group any additional confidential or proprietary information or data. Section 5(b)(1) of the Voluntary Agreement may apply to certain other communications (not involving confidential or proprietary information or data) with the Experts Group by U.S. Reporting Companies or their representatives serving on the ISAG.

(e) The Department of Energy representative, with the concurrence of the Department of Justice representative, after consultation with the Federal Trade Commission representative at AST–4, may terminate this approval as it applies to the conduct of any supply analysis by U.S. ISAG personnel if such analysis may lead to unwarranted disclosure of competitively sensitive supply or logistical information, or have any other unwarranted anticompetitive effect.

11. This approval does not extend to provisions or exchange of:

(a) Confidential or proprietary crude oil or petroleum product prices;

(b) Costs or market shares of crude oil or petroleum products (other than those which can be derived from the QA or QB data submitted during AST–4); or

(c) Individual company information regarding overall long-term investment.

divestment, refining, operating, transportation or marketing programs.

12. A U.S. Reporting Company will be permitted to communicate confidential or proprietary information or data with another Reporting Company only after first cycle allocation rights and allocation obligations have been determined and communicated, and continuing until its second cycle QA has been submitted to the IEA Secretariat, and only to enable it to formulate "closed-loop" voluntary offers, to arrange the logistics needed to implement Type 2 offers, and to modify previously approved voluntary offers if necessary, for the purpose of carrying out first cycle supply reallocation measures. Type 2 transactions are those intended to balance allocation rights and allocation obligations and to alleviate differences between product demand and the available supply mix. These communications will be limited to discussions of the quality and volumes of oil that would be involved in a voluntary offer and the timing or logistics involved in effecting the physical transfer of such oil. No other confidential or proprietary information or data shall be discussed or exchanged. Prices or values of the oil shall not be discussed. Type 1 transactions are transactions made by a company to satisfy its own commercial supply, distribution or logistics needs in response to an oil supply emergency situation. Type 1 transactions will be assumed to have occurred without inter-company communications during AST–4.

13. Participation in AST–4 does not create an obligation on U.S. ISAG members or U.S. Reporting Companies to provide or exchange any information or data which may be confidential or proprietary.

14. In no case shall an employee or representative of a U.S. company participant in the Voluntary Agreement or any affiliate of a U.S. Company, which affiliate is listed as a participant in the Voluntary Agreement, supply to his company or to any other person, any confidential or proprietary information or data obtained as a consequence of his membership in the ISAG or participation in any NESO, except such information or data as is necessary to be supplied in the course of carrying out AST–4 or related NESO activities. No U.S. ISAG member may remove any documents related to the test from the IEA premises, except as authorized in writing by a U.S. Government representative attending the test.

15. Copies of all QA data shall be provided on QA formats, as distinguished from telex form, to:

Ms. Catherine Monzel, Voluntary Agreement Coordinator, International Affairs, IA–11, Department of Energy, Forrestal Building, Room 7G–078, 1000 Independence Avenue, SW., Washington, D.C. 20585; Telex No. 710–822–0176, TWX No. 710–822–0001.

Ms. Melanie Stewart Cutler, Energy Section, Antitrust Division, Department of Justice, P.O. Box 14141, Washington, D.C. 20044; Telex No. 710–822–1907, TWX No. 710–822–1907.

16. Any confidential or proprietary information or data exchanged or furnished pursuant to the test to or by a U.S. Reporting Company or its representative serving on the ISAG shall be supplied by them, upon request, to U.S. Government observers from the Department of Energy, Department of State, Department of Justice or Federal Trade Commission. During AST–4 U.S. Government observers may obtain access to the offices of U.S. participants at the test site in Paris for the purpose of observing AST–4 elated activities, reviewing records kept in connection with AST–4 or interviewing U.S. Reporting Company employees participating in AST–4.

17. This approval may be modified or revoked in writing by the Department of Energy representative, with the concurrence of the Department of Justice representative in consultation with the Federal Trade Commission representative, if developments during AST–4 indicate that modification or revocation is warranted. Any modification or revocation shall be in writing and conveyed to all participants in the Voluntary Agreement and the ISAG Manager or his designee. No modification or revocation shall have retroactive effect.

18. This approval of U.S. company participation in the test and of the provision of certain data and information (including the need to provide it in disaggregated form) has been the subject of consultation with the Department of State and has been concurred in by the Department of Justice, after consultation with the Federal Trade Commission, all as required by the Voluntary Agreement. Copies of correspondence reflecting our consultation with the Department of State, and the Department of Justice's concurrence in our approval, after consultation with the Federal Trade Commission, are annexed.

Sincerely,

Donald Paul Hodel.

Appendix B

Operating Procedures and Requirements for Recordkeeping by U.S. Companies in the Fourth Allocation Systems Test (AST–4)

1. *Introduction.* The following operating procedures and requirements are in further implementation of the existing U.S. recordkeeping requirements in Section 252 of EPCA and 10 CFR Part 209 and apply to the fourth IEA Allocation Systems Test (AST–4). These operating procedures and requirements apply to U.S. Reporting Companies and to U.S. Reporting Company representatives serving on the ISAG who will be participating in the test at the Test Site.

If experience indicates the need, the U.S. Government observers at the Test Site will have discretion to allow alternative operating procedures and recordkeeping requirements consistent with Section 252 of EPCA and existing regulations.

2. *Definitions.* For purposes of these requirements the following definitions apply:

(a) "Communication" means any written or unwritten disclosure, provision or exchange of data or information (excluding administrative, procedural, or ministerial data or information), not subject to attorney-client privilege, in or relating to the carrying out of AST–4.

(b) "Test Site" means that space in IEA headquarters designated by the Allocation Coordinator as the work area in which AST–4 shall be conducted.

(c) "Test Site Communication" means any unwritten face-to-face Communication occurring on the Test Site, other than in a Test Meeting.

(d) "Test Site Telephone Communication" means any telephonic Communication received at or sent from the Test Site.

(e) "Off-Site Communication" means any unwritten face-to-face or telephonic Communication which does not occur on the Test Site.

(f) "Test Meeting" means the following group meetings held on the Test Site (with or without IEA Secretariat participation):

(i) Meetings of the entire ISAG;

(ii) Meetings of the ISAG's Country Supply, Supply Coordination or Supply Analysis subgroups; or

(iii) Meetings of the ISAG Manager and/or Deputy Manager with ISAG subgroup heads.

3. *U.S. Government Monitoring and Recordkeeping at the Test Site.* (a) A U.S. Government observer shall be present throughout all Test Meetings, and may be present at the Test Site during any other Communications. It is intended that a U.S. Government observer will be present continuously at the Test Site to monitor Test Meetings, Communications, work sessions and individual work by Reporting Company representatives serving on the ISAG: (i) During such regular work hours as ISAG adopts; and (ii) at any extraordinary hours if given reasonable advance notice. U.S. Reporting Company representatives serving on the ISAG may: (i) Engage in individual work or in Communications other than Test Site Communications or Communications in Test Meetings, even if no U.S. Government observer is present at the Test Site; or (ii) engage in Test Site Communications despite the absence of a U.S. Government observer at the Test Site if reasonable advance notice of such Communications has been given to the U.S. Government observers, or if reasonable advance notice cannot be given; provided, that adequate records of such Communications and, with respect to (ii), of the circumstances concerning notice given or of the circumstances which necessitated such Communications without reasonable advance notice, are made by the U.S. Reporting Company representatives serving on the ISAG.

(b) Test Meetings shall be monitored by a U.S. Government observer, who shall be responsible for keeping a written record of each session, or for ensuring that a verbatim transcript is made. Failure of the U.S. Government to maintain a full and complete written record shall not vitiate the antitrust defense accorded by Section 252 of EPCA unless such failure is due to the willful act of a U.S. Reporting Company representative serving of the ISAG or of a U.S. Reporting Company.

(c) U.S. Government observers shall be permitted to be present during any test activities, including Communications, involving a U.S. Reporting Company representative serving on the ISAG, except Communications between an individual U.S. Reporting Company representative serving on the ISAG and his legal counsel.

4. *Unwritten Communications Involving U.S. Reporting Company Representatives Serving on the ISAG.* (a) These recordkeeping requirements for unwritten Communications apply to Test Site Communications, Test Site Telephone Communications, and Off-Site Communications by or to U.S. Reporting Company representatives serving on the ISAG, including communications with members of the Industry Advisory Board or the Experts Group, but excluding Communications with the IEA Secretariat, members of the SEQ Emergency Group, or the U.S. NESO.

(b) All unwritten Communications of U.S. Reporting Company representatives serving on the ISAG which relate to AST–4 shall occur on the Test Site except when circumstances make an Off-Site Communication necessary, *i.e.*, when a need for an immediate Communication arises unexpectedly or after normal working hours or otherwise makes a return to the Test Site impracticable or unreasonable, or when time zone differences involved in necessary Communications otherwise would require early morning arrival or late night stay at the Test Site.

(c) Except when a U.S. Government observer present agrees to make the record, a U.S. Reporting Company representative serving on the ISAG shall make a full and complete record of any Test Site Communication, Test Site Telephone Communication or Off-Site Communication, by means of entering in a standardized log the date, time, identity of the parties (by name and organization) and a description of the transaction or information or data discussed, including identification of any problem involved and any conclusions reached or recommendations made. In the case of an Off-Site Communication, he also shall state the special circumstances necessitating this Communication; and in the case of a Test Site Communication occurring in the absence of a U.S. Government observer from the Test Site, he also shall state the circumstances concerning reasonable advance notice given to the U.S. Government observers, or the circumstances which necessitated such Communication without reasonable advance notice.

(d) When a U.S. Reporting Company representative serving on the ISAG has been assigned to a joint work session to solve a specific identified problem, the overall subject matter of which already is contained in a full and complete record of a Test Meeting, the result of which work session will be reported at a meeting where a full and complete record will be maintained, then notwithstanding subsection (c), the record of such session to be kept by the U.S. ISAG representative need only include the date, time and identity of the parties and a brief indication of the substance of the discussion during the work session, with a reference to the Test Meeting where it was more fully discussed.

(e) When a U.S. Reporting Company representative serving on the ISAG communicates with an individual in a NESO, he shall ascertain whether the NESO individual normally is employed by an oil company, and if so, the identity of that company should be recorded in the log kept pursuant to Section 4(c).

(f) When more than one U.S. Reporting Company representative serving on the ISAG is involved in a Communication, the representatives may designate who shall make and supply the record. Non-U.S. Reporting Company representatives serving on the ISAG may agree to furnish the records of Communications with U.S. Reporting Companies and with U.S. Reporting Company representatives serving on the ISAG which are otherwise required to be furnished by the U.S. Reporting Companies or their representatives on the ISAG, if such records are kept in the required form and supplied to a U.S. Government observer in accordance with these requirements, and if the U.S. Reporting Companies or their representatives involved so agree.

5. *Disposition of Records Made and Documents Prepared or Received at the Test Site by U.S. Reporting Company Representatives Serving on the ISAG.* (a) Each U.S. Reporting Company representative serving on the ISAG shall provide to a U.S. Government observer at the Test Site, within three working days of the first day it covers, a copy of any log kept pursuant to Section 4(c), and within one working day of the occurrence, a copy of any other written Communication which he prepares or receives that relates to the carrying out of AST–4.

(b) The requirement imposed by paragraph (a) of this Section may be waived by the U.S. Government observers at the Test Site, to the extent that the IEA Secretariat agrees to provide copies of such Communications to the U.S. Government observers in accordance with these requirements.

6. *U.S. Government Monitoring at U.S. Reporting Company Offices.* (a) U.S. Government observers shall be permitted to interview all U.S. Reporting Company employees engaged in AST–4 activities at Reporting Company offices upon reasonable advance notice to the U.S. Reporting Company involved. Any interviewed employee may have counsel present.

(b) U.S. Government observers shall be permitted to examine and copy, at company headquarters during normal business hours and upon reasonable notice to the Reporting Company involved, any Communication, or any document or other information source not subject to attorney-client privilege, in the possession of a U.S. Reporting Company, concerning the carrying out of AST–4 activities.

7. *Recordkeeping Requirements for U.S. Reporting Companies.* (a) A U.S. Reporting Company promptly shall make a full and complete record of the following Communications or documents (excluding documents which are administrative, procedural or ministerial in nature) and shall maintain such records and records of any other of the following documents (other than those which are administrative, procedural or ministerial in nature) which relate to the carrying out of AST–4:

(i) Intra-corporate documents, not subject to attorney-client privilege, including telexes received and sent, memoranda concerning intra-company discussions of hypothetical sales or exchanges, documentation concerning actions requested by the ISAG or proposed by a Reporting Company, and any other documents generated by the test;

(ii) Communications with Reporting Company representatives serving on the ISAG, including any of its own representatives serving on the ISAG, except when the Reporting Company has agreed with the ISAG or with a Reporting Company representative serving on the ISAG that the record of the Communication will be made and provided to U.S. Government observers at the Test Site, by ISAG or by the Reporting Company representative;

(iii) Communications with another company or with the IEA Secretariat, including Communications with respect to developing or implementing a voluntary offer; and

(iv) Communications with the Experts Group.

(b) Records of unwritten Communications should be made by U.S. Reporting Companies in the manner described in Section 4 for U.S. Reporting Company representatives serving on the ISAG.

8. *Disposition of Records by Reporting Companies.* (a) Each U.S. Reporting Company within two weeks of preparation shall forward copies of all records required by Section 7 to an appropriate office at company headquarters, where they shall be maintained for five years separately from other company records. These records may be subject to U.S. Government examination during and after AST–4.

(b) Each U.S. Reporting Company shall send to the Department of Energy, the Department of Justice and the Federal Trade Commission, within seven days after the close of the week (ending Saturday) of the Communications recorded thereunder, records required to be made and maintained under Sections 7(a) (ii), (iii) and (iv), except that records of unwritten Communications with another company shall be sent no later than the close of the week (ending Saturday) of the Communications recorded. Any portions of such records which are believed not to be subject to public disclosure should be specified. If possible, copies of Communications by U.S. Reporting Companies shall be sent to the U.S. Government simultaneously with and by the same means of transmission used to send the original. In the case of a voluntary offer a "clear" rather than a coded copy should be sent.

9. *Reports of Actions Taken.* (a) Under the Voluntary Agreement, U.S. Reporting Companies must report to the U.S. Government actions taken pursuant to a plan of action. Therefore, for the purposes of AST–4, each U.S. Reporting Company shall report to the Departments of Energy and Justice and the Federal Trade Commission, actions and hypothetical actions taken as part of the test, such as voluntary offers accepted, and reallocations of supply in response to accepted voluntary offers. Communications with respect to developing or implementing a voluntary offer are to be reported under Section 8(b).

VOL
48
ISS
88
MY
5
1983
UMI

(b) A report shall be submitted within seven days of the end of the week (ending Saturday) in which the action was taken.

(c) The style and content of a report are left to the discretion of the individual U.S. Reporting Company. It can be submitted in any fashion a company believes will best reflect what it has done. In the case of voluntary offers, the record should include substantially all of the material terms contained in the voluntary offer itself.

10. *Reporting Addressees.* Reports and records required hereunder to be sent to U.S. Government agencies should be addressed to:

Ms. Catherine Monzel, Voluntary Agreement Coordinator, International Affairs, IA–11, Department of Energy, Forrestal Building, Room 7G–076, 1000 Independence Avenue, S.W., Washington, D.C. 20585; Telex No. 710–822–0176, TWX No. 710–822–0001;

Ms. Melanie Stewart Cutler, Energy Section, Antitrust Division, Department of Justice, P.O. Box 14141, Washington, D.C. 20044; Telex No. 710–822–1907, TWX No. 710–822–1907; or

Mr. Harvey Blumenthal, Federal Trade Commission/CS–4, Washington, D.C. 20580.

Appendix C

April 19, 1983.

Mr. William F. Baxter,
Assistant Attorney General, Antitrust Division, Department of Justice, Washington, D.C. 20530

Dear Mr. Baxter: The International Energy Agency (IEA) is making final preparations for the fourth test of its emergency allocation systems. The test, known as AST–4, will commence with the IEA's distribution on April 22 of a telex announcing the hypothetical oil supply disruption which will provide the backdrop for the test.

The conduct of AST–4 will require the active participation of U.S. oil companies. Pursuant to section 252 of the Energy Policy and Conservation Act, 42 U.S.C. 6272, the Department of Energy's regulations at 10 CFR Part 209, and the "Voluntary Agreement and Plan of Action to Implement the International Energy Program," 2 CCH Federal Energy Guidelines para. 15,845, an antitrust defense is made available to U.S. oil companies to facilitate their involvement in IEA activities. In order for the U.S. oil companies which are signatories to the Voluntary Agreement to receive the benefit of this antitrust defense for any disclosure or exchange of confidential or proprietary information or data, which may be necessary in AST–4, section 5(b)(2) of the Voluntary Agreement requires that the Secretary of Energy approve such exchange or disclosure, after consultation with the Secretary of State, and with the concurrence of the Attorney General, after the Attorney General has consulted with the Federal Trade Commission. A draft of this letter was published for public comment in the **Federal Register** on March 21, 1983 (48 FR 11760).

Enclosed is an approval letter which I propose to send to the U.S. oil companies which are signatories to the Voluntary Agreement. This letter was developed by the Department of Energy in conjunction with staffs of the Antitrust Division, Department of Justice, the Department of State and the Federal Trade Commission. A draft of this letter was published for public comment in the **Federal Register** on March 21, 1983 (48 FR 11760).

In our view the participation of U.S. oil companies and U.S. oil company personnel and in that connection the disclosure and exchange of confidential or proprietary information and data as specifically set forth in the proposed approval letter, are essential to the conduct of AST–4. Therefore, I request your concurrence in our intended approval.

Sincerely,

Donald Paul Hodel.

Appendix D

April 19, 1983.

Honorable George P. Shultz,
Secretary of State, Washington, D.C. 20620

Dear Mr. Secretary: The International Energy Agency (IEA) is making final preparations for the fourth test of its emergency allocation systems. The test, known as AST–4, will commence with the IEA's distribution on April 22 of a telex announcing the hypothetical oil supply disruption which will provide the backdrop for the test.

The conduct of AST–4 will require the active participation of U.S. oil companies. Pursuant to section 252 of the Energy Policy and Conservation Act, 42 U.S.C. 6272, the Department of Energy's regulations at 10 CFR Part 209, and the "Voluntary Agreement and Plan of Action To Implement the International Energy Program," 2 CCH Federal Energy Guidelines para. 15,845, an antitrust defense is made available to U.S. oil companies to facilitate their involvement in IEA activities. In order for the U.S. oil companies which are signatories to the Voluntary Agreement to receive the benefit of this antitrust defense for any disclosure or exchange of confidential or proprietary information or data, which may be necessary in AST–4, section 5(b)(2) of the Voluntary Agreement requires that the Secretary of Energy approve such exchange or disclosure, after consultation with the Secretary of State, and with the concurrence of the Attorney General, after the Attorney General has consulted with the Federal Trade Commission.

Enclosed is an approval letter which I propose to send to the U.S. oil companies which are signatories to the Voluntary Agreement. This letter was developed by the Department of Energy in conjunction with staffs of the Antitrust Division, Department of Justice, the Department of State and the Federal Trade Commission. A draft of this letter was published for public comment in the **Federal Register** on March 21, 1983 (48 FR 11760).

In our view the participation of U.S. oil companies and U.S. oil company personnel and in that connection the disclosure and exchange of confidential or proprietary information and data as specifically set forth in the proposed approval letter, are essential to the conduct of AST–4. Therefore, I request your concurrence in our intended approval.

Sincerely,

Donald Paul Hodel.

Appendix E

April 20, 1983.

Dear Mr. Secretary: Secretary Shultz has asked me to reply to your letter requesting the views of the Department of State regarding approval of the exchange and disclosure of confidential or proprietary information or data by U.S. oil companies during the fourth test of the International Energy Agency emergency oil allocation system (AST–4). It is important that the U.S. Government and U.S. companies participate fully in AST–4 so as to provide tangible evidence of the continued U.S. commitment to the IEA and its oil crisis response system. Since such participation may entail exchange or disclosure of confidential or proprietary information or data by the U.S. oil companies involved, the Department of State strongly supports your proposed approval of this activity.

Sincerely,

Richard T. McCormack,
Assistant Secretary of State.

Appendix F

April 22, 1983.

Honorable Donald Paul Hodel,
Secretary, Department of Energy, Washington, D.C. 20461

Dear Secretary Hodel: I am writing in response to your recent letter in which you seek the concurrence of the Department of Justice in your intended approval for designated U.S. oil companies, participating in the International Energy Program (IEP) as Reporting Companies, to provide and exchange certain confidential and proprietary information in the course of assisting the International Energy Agency (IEA) in carrying out a fourth test of its emergency oil-sharing system (AST–4). Your approval, conditioned on compliance with annexed recordkeeping requirements and other limitations and antitrust safeguards, is set forth in the letter that you propose to send to these companies, a draft of which you have provided me. Our concurrence in this action is sought pursuant to Section 5(b)(2) of the Voluntary Agreement and Plan of Action to Implement the International Energy Program, which is authorized by Section 252 of the Energy Policy and Conservation Act (EPCA), as amended, and which governs the conduct of participating oil companies in the IEA.

As you note, the Antitrust Division participated in the development of the approval letter. The conditions and procedures outlined in the letter, supplemented by U.S. Government monitoring of the required recordkeeping, exchanges of data and other company activities during the test, will minimize risks to competition and fulfill statutory requirements without imposing overly burdensome requirements on test participants. Accordingly, pursuant to Section 5(b)(2) of the Voluntary Agreement, I hereby concur in your approval of the proposed letter on submission and exchange of confidential and proprietary information and data by U.S. oil company participants in AST–4 and the annexed recordkeeping requirements for the test. This approval is effective as of the commencement of the test on April 22, 1983 and will terminate when allocation rights and obligations have been determined and communicated in the second cycle of the test. I enclose a copy of a letter from the Federal Trade Commission evidencing the consultations we have held with that agency on this matter, as required by Section 5(b) of the Voluntary Agreement.

Sincerely yours,

William F. Baxter,
Assistant Attorney General, Antitrust Division.

Appendix G

April 21, 1983.

Honorable William F. Baxter,
Assistant Attorney General, Antitrust Division, Department of Justice, Washington, D.C. 20530

Dear Mr. Baxter: The Honorable Donald P. Hodel, Secretary of Energy and Administrator of the Voluntary Agreement and Plan of Action to Implement the International Energy Program ("Voluntary Agreement"), has requested your concurrence on the attached clearance letter. The letter provides clearance for the oil company signatories of the Voluntary Agreement to exchange confidential and proprietary information among themselves and to provide such information and data to the International Energy Agency ("IEA") during the IEA's fourth test of the emergency oil allocation system ("AST–4"), beginning April 22, 1983. Under the Voluntary Agreement, the Attorney General must consult with the Commission before concurring in this exchange of information.

Section 252 of the Energy Policy and Conservation Act, 42 U.S.C. 6272, directs the Attorney General and the Federal Trade Commission to monitor the carrying out of the Voluntary Agreement to ensure that the purposes of the International Energy Program ("IEP") are substantially achieved in the least anticompetitive manner practicable. The Commission has examined the types of data and information proposed to be exchanged during AST–4. The data to be used during AST–4 will be almost two years old, likely to be distorted due to the hypothetical supply disruption, and subject to masking by the submitting company. Additionally, U.S. Government monitors will be at the IEA site during the conduct of the test and will have access to the offices of reporting companies during the test to interview company employees engaged in AST–4 related activities. A full and complete record will be made of all communications among U.S. oil company personnel, including a verbatim transcript of most group meetings. Finally, removal of documents from the test site without written U.S. Government approval will be prohibited, as will be communication of confidential information learned at the test to persons not involved in the test.

The safeguards employed and the limited competitive significance of the data appear to strike the appropriate balance between achieving the objectives of the IEP and ensuring that the test is conducted in the least anticompetitive manner practicable. Accordingly, the Commission does not object to your approval of the exchange of information and data needed to carry out AST–4.

By direction of the Commission.

James C. Miller III,
Chairman, Federal Trade Commission.

BILLING CODE 6450–01–M

Bonneville Power Administration

Final Action of Short-Term Sale of Nonfirm Energy to Direct-Service Industrial Customers

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice of final action.

SUMMARY: BPA has offered to sell nonfirm energy to its direct-service industrial (DSI) customers through October 31, 1983, for loads incremental to those operating on March 8, 1983. This sale is designed to stimulate the Northwest's economy, increase employment in the Northwest, and increase BPA revenues.

Eight of BPA's 15 industrial customers have accepted BPA's short-term offer, including five of six operating aluminum company customers. The industries have agreed to buy more than 430 megawatts of nonfirm energy under the short-term contract, and may purchase up to an additional 200 megawatts.

DATE: The short-term sales of nonfirm energy to the DSIs is effective through October 31, 1983.

ADDRESS: Copies of the short-term DSI contract are available from the BPA Public Involvement Office, P.O. Box 12999, Portland, Oregon 97212. Copies of comments received from the public on this subject and a summary of those comments are also available from the Public Involvement Office.

FOR FURTHER INFORMATION CONTACT:

Ms. Donna L. Geiger, Public Involvement Manager, at the above address, 503–230–3478. Oregon callers may use 800–452–8429; callers in California, Idaho, Montana, Nevada, Utah, Washington, and Wyoming may use 800–547–6048. Information may also be obtained from:

Mr. George Gwinnutt, Lower Columbia Area Manager, Suite 288, 1500 Plaza Building, 1500 NE. Irving Street, Portland, Oregon 97232, 503–230–4551

Mr. Ladd Sutton, Eugene District Manager, Room 206, 211 East Seventh Avenue, Eugene, Oregon 97401, 503–687–6952

Mr. Ronald H. Wilkerson, Upper Columbia Area Manager, Room 561, West 920 Riverside Avenue, Spokane, Washington 99201, 509–456–2518

Mr. George E. Eskridge, Montana District Manager, 800 Kensington, Missoula, Montana 59801, 406–329–3860

Mr. Ronald K. Rodewald, Wenatchee District Manager, P.O. Box 741, Wenatchee, Washington 98801, 509–662–4377, extension 379

Mr. Thomas Wagenhoffer, Snake River Area Manager, West 101 Poplar, Walla Walla, Washington 99362, 509–525–5500, extension 701

Mr. Robert N. Laffel, Idaho Falls District Manager, 531 Lomax Street, Idaho Falls, Idaho 83401, 208–523–2706

SUPPLEMENTARY INFORMATION:

Background

In the March 15, 1983 (48 FR 10903), **Federal Register**, BPA announced a proposal to offer nonfirm energy to the DSIs for increases in their loads through October 31, 1983. The offer was intended to encourage industries to restart idle production lines, to increase Northwest employment, to increase BPA revenues, and to make use of energy that might otherwise be wasted.

BPA proposed to sell nonfirm energy to the industries at 11.2 mills per kilowatthour under its current nonfirm energy (NF–2) rate schedule. Nonfirm energy purchases would be limited to loads above those operating on March 8, 1983. Other DSI purchases would continue to be made under BPA's current industrial firm (IP–2) rate at 24.5 mills per kilowatthour.

BPA requested comments from the public on the proposed sale. Comments were accepted through March 21, 1983. BPA received comments from 34 parties. The comments were analyzed and addressed, as appropriate, in revising the offer to the DSIs. Many comments led directly to contract revisions.

BPA offered short-term nonfirm energy to the DSIs on March 22, 1983. The offer closed on April 8, 1983. Eight of BPA's 15 industrial customers accepted the offer, including five or six aluminum company customers. Together, the industries have agreed to increase their loads by buying 430 megawatts (MW) under the short-term contract, and have expressed interest in buying up to another 200 MW during the later months of the contract. Some 600 persons will be hired by the industries as a result of the sale. The sale will increase BPA fiscal year 1983 revenues by $20 million to $29 million.

1983
UMI

The short-term nonfirm energy sale to the DSIs ends on October 31, 1983, the day before BPA's wholesale power rate schedules are to go into effect. Sales of energy to the DSIs after the date will be governed by the 1983 rates, which are now being developed through BPA ratemaking proceedings.

Issues Addressed in Final Offer to DSIs

Most comments BPA received from the public supported the concept of selling nonfirm and surplus energy to increase Northwest industrial production. Commenters expressed concern that (1) BPA not establish ratemaking precedents through the short-term sale, (2) preference and other rights of all BPA customers be protected, (3) BPA assure that nonfirm energy sales to the DSIs would not decrease power availability to other Northwest customer classes, and (4) benefits be conferred equitably on all participating DSIs. BPA believes that the final offer to the DSIs addresses these concerns.

Surplus Energy Available

BPA's offer of nonfirm energy to its DSI customers was made after review of BPA studies which confirmed that BPA had substantially more surplus energy available for sale during the period of the DSI nonfirm energy contract than it was likely to be able to sell. Current studies project that BPA has an energy supply through July 1983 which exceeds available markets by more than 3,000 average megawatts. Preliminary planning studies based on adverse streamflow conditions indicate that this surplus will exceed 1,800 average megawatts for the period July through October 1983.

This supply situation is to be contrasted with anticipated BPA sales. Priority firm loads excluding exchange sales are less than projected. These sales for Fiscal Year 1983, excluding exchange sales, were anticipated to be 4,898 average megawatts. Due to a variety of factors including consumer reaction to increased rates, warm weather, reduced economic activity, and above anticipated water flows for generating customers, the projection for 1983 sales has been reduced to 4,477 average megawatts. Sales of surplus firm to the Southwest have also been adversely affected. In the 1982 rate case, BPA had anticipated sales of surplus firm energy to the Southwest totaling 548 average megawatts. To date, BPA has sold approximately 73 average megawatts.

Terms of BPD-DSI Contract

Copies of the BPA-DSI contract are available from the BPA Public Involvement Office. BPA believes that some of the key terms of the agreement are the following:

—Nonfirm energy is available at a contract rate of 11.2 mills from March 21, 1983, to October 31, 1983, subject to availability and the rights of BPA's preference customers.

—Requests for nonfirm energy are met to the extent that the request exceeds the DSI level of operation on the effective date of the nonfirm contract.

—DSIs that were already operating at or near their contract demand (maximum level of operation) prior to the short-term offer are able to take some nonfirm energy in lieu of their industrial firm energy based upon the amount of nonfirm energy purchased by other DSIs. This "mitigation feature" provides equity to those companies which have continued to operate at a high level notwithstanding a depressed economy.

—The amount of nonfirm energy for all DSIs is reduced in relation to the price of aluminum, once the price of aluminum exceeds 70 cents per pound. Nonfirm energy deliveries under these contracts cease entirely once the price of aluminum reaches 85 cents per pound, and the load is converted to a firm purchase at the 24.5–mill IP–2 rate.

—During the term of the agreement, the demand used to calculate curtailment charges is reduced by the demand associated with the nonfirm energy contract. Curtailment charges are fees that BPA assesses an industrial customer when it elects to operate its facilities below the level of the firm portion of its load.

—No commitment is made to continue nonfirm energy sales after October 31, 1983, and no commitment is made regarding the allocation of revenues that BPA anticipates to receive from the nonfirm sales.

—The nonfirm energy is sold pursuant to the authority of the Bonneville Project Act, the Federal Columbia River Transmission System Act, and Section 5(f) of the Pacific Northwest Electric Power Planning and Conservation Act.

DSI Plans of Service

Each participating DSI submitted a plan of service to BPA, showing the amount of nonfirm energy it planned to purchase and the speed with which it would bring loads on line. Industries also indicated further increases in loads they may make in addition to their committed plans of service.

Each of the industries will increase loads over a period of 1 to 3 months. Following are the summarized plans of services submitted by each participating industrial customer. Once brought up, all loads continue for the term of the agreement unless otherwise specified. All nonfirm additions to load described in these plans of service and October 31, 1983.

Pacific Carbide will increase its load 2.3 MW from March 24 to June 30, 1983, only. Its load prior to the short-term offer was 6.97 MW.

Georgia Pacific, with a pre-offer load of 11.25 MW, added 7 MW. to its loads by March 30, 1983, and may buy another 15 MW beginning May 1.

Pennwalt had a pre-offer load of 55.5 MW. It will purchase an additional 4.35 MW between April 4 and May 31, 1983. Its increase in load will decline to 2.1 MW thereafter.

Aluminum Company of America (ALCOA) had a pre-offer load of 196 MW. It is increasing its loads by 216.9 MW by May 1, 1983, and may buy another 26 MW beginning September 1

Intalco Aluminum was running very close to its capacity prior to the short-term offer, with a load of 432 MW. It is bringing on an additional 5 or 6 MW from late April through June 1983.

Kaiser Aluminum started with a pre-offer load of 349 MW. It is bringing on one 57–MW potline in May and a second 58–MW potline in June. It may bring on a third 58–MW potline in July 1983.

Martin Marietta Aluminum was also operating close to capacity prior to the short-term offer with a load of 366.3 MW. It will add another 40 MW of load gradually from April through August 1983 and may add another 40 MW of load.

Reynolds Aluminum has a pre-offer load of 334.6 MW. It is adding a 50–MW potline by May 15. It may add a second 50–MW potline in July, and a third 50–MW potline in August 1983. Pending negotiation with a third party, an additional two potlines could also be added.

Materials Available

Copies of the short-term DSI sale contract, public comments received by BPA on this issue, a summary of public comments, and the plans of service submitted by each participating DSI are available from the BPA Public Involvement Office.

Issued in Portland, Oregon, April 28, 1983.

Peter T. Johnson,

Administrator, Bonneville Power Administration.

BILLING CODE 6450-01-M

Economic Regulatory Administration

[ERA Case Nos. 51825-3630-01,02,03-82]

Acceptance of Certification and Issuance of Proposed Prohibition Orders for Medina Electric Co-op., Inc., Pearsall Powerplant Units 1, 2, and 3

AGENCY: Economic Regulatory Administration, Energy.

ACTION: Notice of Acceptance of Certification and Issuance of Proposed Prohibition Orders for Medina Electric Cooperative, Inc., Pearsall Powerplant Units 1, 2, and 3.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) is giving notice of its acceptance of a certification filed with it on April 7, 1983 by the Medina Electric Cooperative, Inc. (Medina) concerning its Pearsall Powerplant Units 1, 2, and 3, Pearsall, Texas (hereafter referred to as Pearsall 1, 2, and 3) pursuant to section 301 of the Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. 8301 *et seq.* (FUA or "the Act"). The certification addresses the technical capability and financial feasibility of Pearsall 1, 2, and 3 to use a mixture of petroleum or natural gas and coal as a primary energy source. ERA has reviewed and accepted the certification and its supporting documents and proposes to concur thereon. Accordingly, on the basis of the certification, ERA is issuing proposed prohibition orders to Pearsall 1, 2, and 3 which, if finalized, will prohibit the use of petroleum and natural gas in the powerplants in amounts in excess of the minimum amounts necessary to maintain reliability of operation of the units, consistent with maintaining reasonable fuel efficiency of the mixture.

DATE: Written comments and requests for a public hearing are due on or before June 20, 1983.

ADDRESS: All comments and requests for a public hearing on this matter should be directed to the Fuels Conversion Division, Office of Fuels Programs, Economic Regulatory Administration, Department of Energy, Room GA–093, 1000 Independence Avenue, S.W., Washington, D.C. 20585. Correspondence should clearly indicate the ERA case number for this proceeding.

FOR FURTHER INFORMATION CONTACT:

Robert L. Davies, Deputy Director, Office of Fuels Programs, Economic Regulatory Administration, Department of Energy, 1000 Independence Avenue, S.W., Room GA–007–D, Washington, D.C. 20585, (202) 252–9357

Marya Rowan, Office of General Counsel, Department of Energy, 1000 Independence Avenue, S.W., Room 6B–222, Washington, D.C. 20585, (202) 252–2967

SUPPLEMENTARY INFORMATION: As provided in section 301(c) of FUA and 10 CFR 504.5, 504.6, and 504.8, the Medina Electric Cooperative, Inc. (Medina), on April 7, 1983, certified to ERA that its Pearsall Powerplant Units 1, 2, and 3 (Pearsall 1, 2, and 3) are technically capable of using a mixture of petroleum or natural gas and coal as their primary energy source, and that it is financially feasible to do so. Having received Medina's certification, ERA is authorized by FUA to prohibit the excessive use of petroleum and natural gas in the fuel mixture used by Pearsall 1, 2, and 3 as their primary energy source, if, after examining the basis for the certification and complying with the applicable procedural requirements described below, it is able to concur upon the certification. The amounts of petroleum and natural gas which would be prohibited by any final FUA order would be such amounts of those fuels used in the mixture which would exceed the minimum amounts necessary to maintain the reliability of the unit's operation, consistent with maintaining reasonable fuel efficiency of the mixture. Medina has certified that the minimum amounts of either petroleum or natural gas that would be required for use in the mixture proposed for Pearsall 1, 2, and 3 will constitute 30% of each unit's primary energy source.

As a result of its examination of Medina's certification and the documentation submitted in support thereof, ERA has accepted the certification as filed and proposes to concur thereon. Final concurrence on the certification would permit ERA to issue final prohibition orders to Pearsall 1, 2, and 3. Accordingly, ERA is commencing a proceeding that may result in the issuance of final prohibition orders by issuing the proposed prohibition orders set out below, to Pearsall 1, 2, and 3. The regulations governing the proceeding which the publication of this Notice of Acceptance of Certification and Issuance of Proposed Prohibition Orders commences are 10 CFR Parts 500, 5001 and 504. In accordance with the provisions of 10 CFR 501.52, the following procedures will be followed prior to the issuance of any final prohibition orders:

(1) Section 701(b) of FUA and 10 CFR 501.52(b)(2) require that ERA issue proposed prohibition orders which contain a statement of the reasons that form the basis for ERA's proposed actions. ERA's proposed orders to Pearsall 1, 2, and 3, containing a discussion of the basis for ERA's proposed technical capability and financial feasibility findings, are published below, in compliance with this requirement.

(2) 10 CFR 501.31(b) and 501.52(b)(3) provide that the publication of a Notice of Acceptance shall commence a public comment period of 45 days during which interested persons may submit written comments or request a public hearing. During this period, the recipient of the proposed orders and any other interested persons may submit evidence that they have available relating to the proposed orders, the certification, or the concurrence that ERA must make before final orders can be issued. A request for an extension of the 45 day period may be granted at ERA's discretion. This Notice of Acceptance, accordingly, commences the required public comment period (see "DATES" and "ADDRESS" sections, above for detailed information submissions).

(3) If a hearing is requested during the period provided for such requests, ERA shall provide interested persons with an opportunity to present oral data, views, and arguments at a public hearing held in accordance with Subpart C of 10 CFR Part 501. The hearing may consider, among other matters, the sufficiency of the Medina certification, upon which ERA must concur prior to the issuance of any final prohibition orders to Pearsall 1, 2, and 3.

(4) 10 CFR 501.52(b)(3) provides that no final prohibition orders may be issued until any necessary environmental review conducted pursuant to the National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et seq.* (NEPA) has been completed. ERA will complete this review and will address its results at the time of the issuance of any final orders to Pearsall 1, 2, and 3.

Upon completion of the NEPA review, and unless ERA determines on the basis of information contained in the record of the proceeding, as a whole, that the certification fails to meet the requirements of 10 CFR 504.5, 504.6 and 504.8, ERA proposes to issue final prohibition orders to Pearsall 1, 2, and 3.

VOL

1983

PROPOSED PROHIBITION ORDERS

ERA case No.	Generating station	Powerplant No.	Megawatt capacity	Location
51825-3630-01-82	Pearsall	1	22	Pearsall, TX.
51825-3630-02-82	Pearsall	2	22	Pearsall, TX.
51825-3630-03-82	Pearsall	3	22	Pearsall, TX.

In accordance with section 301 of FUA and 10 CFR 504.5, 504.6, and 504.8, ERA hereby proposes to concur in Medina's certification of technical capability and financial feasibility and to prohibit the powerplant units identified above, from burning either petroleum or natural gas in a mixture with coal, in amounts in excess of the minimum amounts necessary to maintain reliability of operation of the units, consistent with maintaining reasonable fuel efficiency of such mixture.

These proposed prohibition orders are based on the following ERA proposed findings:

Proposed Finding of Technical Capability

ERA proposes to find that Pearsall 1, 2, and 3 have the technical capability to use a mixture of petroleum or natural gas and coal as their primary energy source while maintaining the ability, from the point of fuel intake, to physically sustain combustion of a given fuel and to maintain heat transfer. ERA bases this proposed finding on the certification and supporting materials submitted by Medina which indicate that Pearsall 1, 2, and 3 were originally designed and constructed in anticipation of the future use of coal as their primary energy source. Accordingly, it will be technically feasible to convert these units to the use of a mixture of petroleum or natural gas and coal as their primary energy source without substantial physical modifications. No reduction in rated capacity of the units is expected as the conversions were anticipated in the powerplants' original design. (Letter/Certification of Medina Cooperative, Inc. to the Office of Fuels Programs, April 7, 1983; Study by Alexander Utility Engineering, Inc.)

Proposed Finding of Financial Feasibility

ERA proposes to find that it is financially feasible to use a mixture of petroleum or natural gas and coal as the primary energy source for Pearsall 1, 2, and 3. This proposed finding is based upon information contained in Medina's certification and supporting materials which satisfactorily demonstrate that Medina will have the ability to obtain sufficient capital to finance the proposed conversions and to operate the units on the proposed mixture. As an electric cooperative formed under the Rural Electrification Act of 1936, Medina indicated in its certification that approval to proceed with the proposed conversions is the responsibility of the Rural Electric Administration (REA), the lienholder on Pearsall 1, 2, and 3, and that the REA will thereafter make the necessary financial arrangements for the conversions. Medina certified that it expects to receive REA's approval by June 1, 1983. Medina further certified that, based upon the Alexander Utility Engineering, Inc. report (March 1982) entitled "Pearsall Plant Coal Conversion Feasibility Study" and Supplement I thereto (October 1982), it estimates that the proposed conversions will cost $47.9 million in 1983 dollars and will result in a net reduction in power costs of $57.9–$163.9 million during the first ten years of post-conversion operations. (Letter/Certification from Medina Electric Cooperative, Inc. to the Office of Fuels Conversion, April 7, 1983).

As required by 10 CFR 504.5(d), Medina has submitted, as part of its certification, a proposed compliance schedule setting forth a progressive schedule of events and dates applicable to the accomplishment of the proposed conversions. As provided by 10 CFR 501.2(c), the prohibition orders, if issued, will be final as stated therein for purposes of judicial review under section 702 of FUA, but the prohibitions contained therein will not become effective for purposes of amendment under section 301(d) of FUA and 10 CFR 501.52(d) until all conditions subsequent (if any) listed in the prohibition order compliance schedule are met.

The public file containing the record of this proceeding is available for inspection at the Freedom of Information Reading Room, DOE, 1000 Independence Avenue, S.W., Room 1E–190, Washington, D.C. 20585, Monday through Friday, 8:00 a.m.–4:00 p.m., (202)252–6020.

Issued in Washington, D.C. April 29, 1983.

Robert L. Davies,

Deputy Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 83-Cert-027]

Ferro Corp.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On April 21, 1983, Ferro Corporation (FERRO), One Erieview Plaza, Cleveland, Ohio 44114, filed with the Administrator of the Economic Regulatory Administration (ERA), pursuant to 10 CFR Part 595, an application for certification of an eligible use of approximately 400 Mcf per day of natural gas which is expected to displace the use of approximately 2,900 gallons per day of No. 2 fuel oil (0.35 percent sulfur) at its Electro Plant located in Buffalo, New York.

The eligible sellers of the natural gas are Douglas Drilling, Ltd., and Trison Petroleum Corporation, both c/o Western Petroleum Corporation, 717 17th Street, Denver, Colorado 80202. The gas will be transported by interstate pipeline by National Fuel Gas Supply Corporation, 10 Lafayette Square, Buffalo, New York 14203. The local distribution company is National Fuel Gas Distribution Corporation, 10 Lafayette Square, Buffalo, New York 14203.

Because the natural gas involved in this application may only be available on a monthly basis for 90 delivery days commencing May 1, 1983, FERRO has requested that the certification be issued expeditiously in order that it may be in a position to purchase all of the natural gas possible to displace the maximum volume of fuel oil.

The ERA has carefully reviewed FERRO's application for certification in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that FERRO's application satisfies the criteria enumerated in 10 CFR Part 595. We are, therefore, granting the certification and transmitting that certification to the Federal Energy Regulatory Commission. More detailed information, including a copy of the application, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

The requested certification is being issued prior to the 10-day public comment period because the natural gas to be purchased may only be available for a limited period of time commencing on May 1, 1983. Given this limited availability of the gas and the authority of the Administrator to terminate a certification for good cause (10 CFR 595.06), it is not in the public interest to permanently lose this opportunity to displace fuel oil while public comments are being solicited.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to FERRO and any person filing comments and will be published in the **Federal Register**.

Issued in Washington, D.C. on April 29, 1983.

Robert Davies,

Deputy Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Rice Oil Company and Rice-Lindquist, Inc.; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to Rice Oil Company and Rice-Lindquist, Inc. at 3010 South Broadway, Minot, North Dakota 58701. This Proposed Remedial Order alleges pricing violations in the amount of $209,033 plus interest in connection with the sale of refined petroleum products at prices in excess of those permitted by 10 CFR Part 212 during the time period November 1, 1973 through April 30, 1974.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from James A. Martin, Manager, Litigation Support Group, Economic Regulatory Administration, Department of Energy, P.O. Box 35228, Dallas, Texas 75235, or by calling (214) 767–7407. Within fifteen (15) days of publication of this Notice, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, Federal Building, Room 3304, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Dallas, Texas, on the 21th day of April 1983.

Ben L. Lemos,

Director, Dallas Office, Economic Regulatory Administration.

[FR Doc. 83-11989 Filed 5-4-83; 8:45 am]

BILLING CODE 6450-01-M

Energy Information Administration

Agency Forms Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of submission of request for clearance to the Office of Management and Budget.

SUMMARY: Under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), Department of Energy (DOE) notices of proposed collections under review will be published in the **Federal Register** on the Thursday of the week following their submission to the Office of Management and Budget (OMB). Following this notice is a list of the DOE proposals sent to OMB for approval since Thursday, April 21, 1983. The listing does not contain information collection requirements contained in regulations which are to be submitted under 3504(h) of the Paperwork Reduction Act.

Each entry contains the following information and is listed by the DOE sponsoring office: (1) The form number; (2) Form title; (3) Type of request, e.g., new, revision, or extension; (4) Frequency of collection; (5) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (6) Type of respondent; (7) An estimate of the number of respondents; (8) Annual respondent burden, i.e., an estimate of the total number of hours needed to fill out the form; and (9) A brief abstract describing the proposed collection.

DATE: Last Notice published Thursday, April 21, 1983.

FOR FURTHER INFORMATION CONTACT:

John Gross, Director, Forms Clearance and Burden Control Division, Energy Information Administration, M.S. 1H–023, Forrestal Building, 1000 Independence Ave., NW., Washington, D.C. 20585, (202) 252–2308

Jefferson B. Hill, Department of Energy Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, D.C. 20503, (202) 395–7340

Vartkes Broussalian, Federal Energy Regulatory Commission, Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, D.C. 20503, (202) 395–3087

SUPPLEMENTARY INFORMATION: Copies of proposed collections and supporting documents may be obtained from Mr. Gross. Comments and questions about the items on this list should be directed to the OMB reviewer; comments should also be provided Mr. Gross. If you anticipate commenting on a form, but find that time to prepare these comments will prevent you from submitting comments promptly, you should advise the OMB reviwer of your intent as early as possible.

Issued in Washington, D.C., May 2, 1983.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

DOE Forms Under Review by OMB

Form No. (1)	Form title (2)	Type of request (3)	Response frequency (4)	Response obligation (5)	Respondent description (6)	Estimated number of respondents (7)	Annual respondent burden (8)	Abstract (9)
CE-434	Weatherization Assistance Progress Report.	Revision	Monthly	Mandatory	States, District of Columbia, and Indian Tribes.	75	4,500	The CE-434 form is a monthly report which collects state level data on the progress of the weatherization assistance program. The form collects information on expenditures and other financial data, labor, number of units serviced, and number of people assisted. The information will be used by DOE for monitoring purposes and to improve management of the program.
DP-1	Personal Security Questionnaire.	Revision	On occasion	Required to obtain benefit.	Individuals seeking DOE building access or DOE employees seeking Secret clearance.	27,500	27,500	The information supplied on the DOE Form DP-1 assists the DOE in evaluating the individual's trustworthiness, which benefits the DOE security program, the U.S. government, and the public at large, by assuring that only trustworthy individuals have access to classified information or special nuclear material.
MA-843	DOE Management and Procurement Assistance Reporting and Recordkeeping Requirements.	New	Other: As Specified.	Mandatory	DOE Contractors and Grantees.	10,000	200,000	Data are used by DOE to fulfill management accountability requirements and to oversee utilization of Federal resources for all management procurement and assistance reporting and recordkeeping requirements not previously cleared as part of the Uniform Reporting System for Contractors or the Uniform Reporting System for Federal Assistance-Grants and Cooperative Agreements.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Project No. 5908-001]

City of Ocean Shores, Washington; Notice of Surrender of Preliminary Permit

April 29, 1983.

Take notice that City of Ocean Shores, Washington, Permittee for the proposed West Fork Humptulips River Project No. 5908, has requested that its preliminary permit be terminated. The permit was issued on August 25, 1982, and would have expired on February 28, 1984. The project would have been located on the West Fork Humptulips River, in Grays Harbor County, Washington.

The Permittee filed its request on March 1, 1983, and the surrender of the preliminary permit for Project No. 5908 is deemed accepted as of the date of this notice.

Kenneth F. Plumb,
Secretary.

[FR Doc. 83-11988 Filed 5-4-83; 8:45 am]
BILLING CODE 6717-01-M

[Project No. 5711-001]

Colville Confederated Tribes; Notice of Surrender of Preliminary Permit

April 29, 1983.

Take notice that Colville Confederated Tribes, Permittee for the proposed Nespelem River Project No. 5711, has requested that its preliminary permit be terminated. The permit was issued on June 7, 1982, and would have expired on December 31, 1983. The project would have been located on the Nespelem River, in Okanogan County, Washington.

The Permittee filed its request on February 24, 1983, and the surrender of the preliminary permit for Project No. 5711 is deemed accepted as of the date of this notice.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Project No. 5851-001]

Emerald Peoples Utility District; Notice of Surrender of Preliminary Permit

April 29, 1983.

Take notice that Emerald Peoples Utility District, Permittee for the Black Creek Water Power Project, FERC No. 5851, has requested that its preliminary permit be terminated. The preliminary permit for Project No. 5851 was issued on June 4, 1982, and would have expired on June 30, 1984. The project would have been located on Waldo Lake using the waters of North Fork of Middle Fork of Willamette River, Black, and Salmon Creeks in Lane County, near Oakridge, Oregon.

Emerald Peoples Utility District filed the request on March 15, 1983, and the surrender of the preliminary permit for Project No. 5851 is deemed accepted as of the date of this notice.

Kenneth F. Plumb,
Secretary.

[Project No. 5406-001]

Maintenance Consultants, Inc.; Notice of Surrender of Preliminary Permit

April 29, 1983

Take notice that Maintenance Consultants, Inc., Permittee for the proposed Falls Dam Hydro Project No. 5406, has requested that its preliminary permit be terminated. The permit was issued on March 31, 1982, and would have expired on August 31, 1983. The project would have been located on the Willow River in St. Croix County, Wisconsin.

The Permittee filed its request on September 22, 1982, and the surrender of the preliminary permit for Project No. 5406 is deemed accepted as of the date of this notice.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Project No. 5070-001]

Sunnyside Valley Irrigation District; Surrender of Preliminary Permit

April 29, 1983.

Take notice that Sunnyside Valley Irrigation District Permittee for the proposed Little Naches Hydroelectric Project No. 5070, has requested that its preliminary permit be terminated. The permit was issued on January 11, 1982, and would have expired December 31, 1984. The project would have been located on the Little Naches River in Yakima and Kittitas Counties, Washington.

The Permittee filed its request on March 25, 1983, and the surrender of the preliminary permit for Project No. 5070 is deemed accepted as of the date of this notice.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-59121B; TSH-FRL 2359-6]

Certain Chemicals; Approval of Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of TM-83-36, and TM-83-37 and TM-83-38, three applications for test marketing exemptions (TME) under section 5(h)(6) of the Toxic Substances Control Act (TSCA). The test marketing conditions are described below.

EFFECTIVE DATE: April 28, 1983.

FOR FURTHER INFORMATION CONTACT: Theodore Jones, Acting Chief, Notice Review Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-204, 401 M St. SW., Washington, DC. 20460; (202-382-3725).

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and to permit them to manufacture or import new chemeical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities.

EPA has determined that test marketing of the new chemical substances described below, under the conditions set out in the applications, and for the time periods specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, number of workers exposed to the new chemical, and the levels and duration of exposure must not exceed that specified in the applications. All other conditions described in the applications must be met. The following additional restricitions apply:

1. The applicant must maintain records of the date(s) of shipment(s) to each customer and the quantities supplied in each shipment, and must make these records available to EPA upon request.

2. A bill of lading accompanying each shipment must state that use of the substance is restricted to that approved in the TME.

TME 83-36.

Date of Receipt: March 21, 1983.
Notice of Receipt: April 1, 1983 (48 FR 14036).
Applicant: Confidential.
Chemical: Ester of gluco-heptonic acid (Generic).
Use: Confidential.
Production Volume: Confidential.
Test Marketing Period: 6 months.
Risk Assessment: The Agency identified no significant health or environmental concerns for the test market substance. The gluco-heptonic acid is expected to be poorly absorbed by all routes and rapid biodegradation is expected. During manufacturing, processing and use, human exposure and environmental release is expected to be low and the percentage of new substance in the final product is very low.
Public Comments: None.

TME 83-37.

Date of Receipt: March 22, 1983.
Notice of Receipt: April 1, 1983 (48 FR 14036).
Applicant: Confidential.
Chemical: Substituted amine-boron compound (Generic).
Use: Confidential.
Production Volume: Confidential.
Test Marketing Period: 1 Year.
Commencing on: April 28, 1983.
Risk Assessment: The Agency identified no significant health or environmental concerns for the test market substance. Furthermore, the manufacturing process is designed to prevent worker contact with the new material.
Public Comments: None.

TME 83-38.

Date of Receipt: March 22, 1983.
Notice of Receipt: April 1, 1983 (48 FR 14036).
Applicant: Allied Chemical Corporation.
Chemical: Substituted borazole polymer (Generic).
Use: Industrial boron dopant for semiconductor fabrication.
Production Volume: Confidential.
Test Marketing Period: 1 Year.
Commencing on: April 28, 1983.
Risk Assessment: No significant health or environmental effects were identified. The test market substance is not expected to be absorbed to any extent, nor to be bioavailable if released to the environment.
Public Comments: None.

The Agency reserves the right to rescind approval of an exemption should any new information come to its attention which casts significant doubt on its finding that the test marketing activities will not present an unreasonable risk to health or the environment.

Dated: April 28, 1983.

Marcia E. Williams,
Acting Director, Office of Toxic Substances.

[ORD-FRL 2358-8]

Draft Health Assessment Documents for Nickel, Manganese and Chromium; Notice of Availability

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability.

SUMMARY: A number of metals and associated compounds which are emitted to the ambient air are currently being studied by the Environmental Protection Agency to determine whether they should be regulated as hazardous air pollutants under the Clean Air Act. One of the factors in the Agency's study of these compounds is the evaluation of available information pertaining to human health effects. The evaluations for the compounds listed below are contained in draft health assessment documents prepared by the Office of Health and Environmental Assessment

VOL
48
ISS

1983
UMI

of the Office of Research and Development. In order to have a thorough review of the scientific aspects of these documents, external review drafts of each one will be transmitted to the Agency's Science Advisory Board (SAB) for review, and simultaneously, will be made available for public review and comment.

The titles and publication numbers of the draft health assessment documents are:

Title	EPA No.
Health Assessment Document for Nickel.	EPA-600/8-83-012
Health Assessment Document for Manganese.	EPA-600/8-83-013
Health Assessment Document for Chromium.	EPA-600/8-83-014

The draft document on Nickel will be available for public review on or about May 16 and the Agency will accept public comments until July 15. The draft documents on Chromium and Manganese will tentatively be available in mid June, to be followed by a 60-day public comment period. There will be further announcements in the **Federal Register** specifying the exact dates for release of the Chromium and Manganese documents.

After receipt of all public comments on the three documents, the SAB will hold public meetings to review the documents. Advance notices announcing the time and place for the SAB public meetings and document agenda will be made in the **Federal Register**.

Those persons interested in commenting on the scientific merit of the draft documents will be able to obtain copies as follows:

(1) The draft documents will be available in single copy quantity from EPA at the following address: ORD Publications—CERI–FR, U.S. Environmental Protection Agency, Cincinnati, Ohio 45268, Tel. (513) 684–7565

Requesters should be sure to cite the EPA number(s) assigned to the document(s). To receive these documents, requesters should send their names and addresses to CERI at this time. The Nickel document will be available on or about May 16; the Chromium and Manganese documents are expected to be available in mid June.

(2) The draft documents will also be available for public inspection and copying at the EPA library at Waterside Mall, 401 M Street, S.W., Washington, D.C. 20460.

Commenters are requested to submit separate comments for each document rather than making a combined submission. Comments must be in writing and should be addressed in the manner below:

For nickel: Send comments to Project Officer, Environmental Criteria and Assessment Office (MD–52), U.S. Environmental Protection Agency, Research Triangle Park, N.C. 27711.

Information on where to send comments on Chromium and Manganese will be provided in the **Federal Register** notice(s) announcing the availability of these documents.

For nickel, comments must be received by close of business, July 15, in order to be considered. Closing dates for receipt of comments on Chromium and Manganese will be indicated in the specific **Federal Register** Notices for these documents.

FOR FURTHER INFORMATION CONTACT: For nickel—Diane Chappell, Tel (919) 541–3637.

Dated: April 29,1983.

Courtney Riordan,

Acting Assistant Administrator for Research and Development.

FEDERAL MARITIME COMMISSION

[Docket No. 83-24]

Bob Akin Motor Racing, Inc. v. Cosmos Shipping Company, Inc.; Notice of Filing of Complaint and Assignment

Notice is given that a complaint filed by Bob Akin Motor Racing, Inc. against Cosmos Shipping Company was served April 27, 1983. Complainant alleges that respondent has breached its duties and responsibilities as a freight forwarder in violation of section 44 of the Shipping Act, 1916 in connection with the shipment of a truck, racing car and related parts.

This proceeding has been assigned to Administrative Law Judge William Beasley Harris. Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record.

Francis C. Hurney,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

May 2, 1983.

Background

When executive departments and independent agencies propose public use forms, reporting, or recordkeeping requirements, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Paperwork Reduction Act [44 U.S.C. Chapter 35]. Departments and agencies use a number of techniques to consult with the public on significant reporting requirements before seeking OMB approval. OMB in carrying out its responsibilities under the act also considers comments on the forms and recordkeeping requirements that will affect the public. Reporting or recordkeeping requirements that appear to raise no significant issues are approved promptly. OMB's usual practice is not to take any action on proposed reporting requirements until at least ten working days after notice in the **Federal Register**, but occasionally the public interest requires more rapid action.

List of Forms Under Review

Immediately following the submission of a request by the Federal Reserve for OMB approval of a reporting or recordkeeping requirement, a description of the report is published in the **Federal Register**. This information contains the name and telephone number of the Federal Reserve Board clearance officer (from whom a copy of the form and supporting documents is available). The entries are grouped by type of submission—i.e., new forms, revisions, extensions (burden change), extensions (no change), and reinstatements.

Copies of the proposed forms and supporting documents may be obtained from the Federal Reserve Board clearance officer whose name, address, and telephone number appear below. The agency clearance officer will send you a copy of the proposed form, the request for clearance (SF 83), supporting statement, instructions, transmittal letters, and other documents that are submitted to OMB for review.

For further information contact:

Federal Reserve Board Clearance Officer—Cynthia Glassman—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202–452–3829)

OMB Reviewer—Richard Sheppard—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, D.C. 20503 (202–395–6880)

Request for approval of revisions to existing reports.

1. Report title: Advance Report of Deposits from Large Banks; Advance Report of Deposits from Small Banks
Agency form number: FR 2000, FR 2001
Frequency: Daily, Weekly
Reporters: Commercial banks
SIC Code: 602, 603, 605, 612, 614
Small businesses are affected.
General description of report:
Respondent's obligation to reply is mandatory [12 U.S.C. 248, 461, 3105]; a pledge of confidentiality is promised [5 U.S.C. 52 (b)(4) and (b)(8)].

Package of reports collects information on deposit data for depository institutions that have transaction accounts, or nonpersonal time deposits (FR 2900), Eurocurrency deposits from depository institutions that obtain funds from foreign (non-U.S.) sources or that maintain foreign branches (FR 2950, 2951); and selected items on the FR 2900 in advance from large commercial banks and a sample of small commercial banks (FR 2000, 2001) to ensure compliance and for construction of the monetary aggregates.

Board of Governors of the Federal Reserve System, May 2, 1983.

James McAfee,

Associate Secretary of the Board.

Request for extension with minor revision.

1. Report title: Reports of Selected Borrowings
Agency form number: FR 2415, FR 2415a
Frequency: Weekly, daily depending on which report is filed
Reporters: Large member banks
SIC Code: 602
Small businesses are not affected
General description of report:
Respondent's obligation to reply is voluntary [12 U.S.C. 248(a) and 353 *et seq.*]; a pledge of confidentiality is promised [5 U.S.C. 552(b)(4)].

Report collects information on the outstanding balances of selected borrowings in immediately available funds of large member banks (i.e., those with total assets of $1 billion or more as of December 31, 1977. This report, which provides information mainly on federal funds and repurchase agreements, is used in the analysis and formulation of monetary policy. Limited advance information is collected daily by telephone (FR 2415a) from the fifteen largest respondents.

2. Report title: Government Securities Dealers Reports
Agency form number: FR 2004a,b,c,d
Frequency: Daily, weekly, bimonthly depending on which schedule is filed
Reporters: Primary dealers in U.S. government securities
SIC Code: 602, 621
Small businesses are not affected
General description of report:
Respondent's obligation to reply is voluntary [12 U.S.C. 248(a)(2) and 353–359a]; a pledge of confidentiality is promised [5 U.S.C. 552(b)(4)].

These groups of reports submitted by government securities dealers are used to collect daily positions, daily transactions, weekly financings, and semimonthly futures, forwards, and options data from the primary dealers in U.S. Treasury securities.

Board of Governors of the Federal Reserve System, May 2, 1983.

[Docket No. R-0464]

Federal Reserve Bank Check Collection Services

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Request for comments.

SUMMARY: The Board of Governors is requesting public comment on proposed criteria for selecting depository institutions located outside Federal Reserve office cities for inclusion in a program to accelerate the collection of checks that was approved in December 1982.

DATE: Comments must be received by June 17, 1983.

ADDRESS: Comments, which should refer to Docket No. R–0464, may be mailed to Mr. William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue, NW., Washington, D.C. 20551, or delivered to Room B–2223 between 8:45 a.m. and 5:15 p.m. Comments received may be inspected at Room B–1122 between 8:45 a.m. and 5:15 p.m.,

except as provided in § 261.6(a) of the Board's Rules Regarding the Availability of Information, 12 CFR 261.6(a).

FOR FURTHER INFORMATION CONTACT: Eliott C. McEntee, Assistant Director (202/452-2231) or Florence M. Young, Program Manager (202/452-3955), Division of Federal Reserve Bank Operations; Daniel L. Rhoads, Attorney (202/452-3711), Robert G. Ballen, Attorney (202/452-3265), or Elaine M. Boutilier, Attorney (202/452-2418), Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: On December 17, 1982, the Board approved a program to accelerate the collection of checks by Reserve Banks and thereby improve the efficiency of the nation's payments mechanism. 48 FR 79 (January 3, 1983). The major elements of the program included extending deadlines for depositing checks at Federal Reserve offices and moving to a later, uniform time for the presentment [1] or dispatch of checks to paying institutions.

The first phase of this program was implemented on February 24. New later deposit deadlines were implemented for checks drawn on city and RCPC institutions along with a uniform presentment or dispatch time of 11:00 a.m. for checks drawn on city institutions. Under this first phase of the program, checks with a value of approximately $2 billion are now being collected one day earlier than they were being collected previously. The second phase of the program calls for the presentment or dispatch of checks drawn on city institutions to be moved to 12:00 noon on May 2.

In addition, the program provides that new later deposit deadlines for checks drawn on certain non-city institutions,[2] as well as later presentment or dispatch times for the selected institutions, would be implemented on July 1. Criteria for selecting non-city institutions to be included in this aspect of the program, called the high-dollar group sort (HDGS),[3] were to be developed. There are two primary reasons for including non-city institutions in the accelerated check collection program. First, an analysis of check clearing patterns indicated that there was a substantial increase in the dollar value of checks presented by the Federal Reserve to non-city institutions over the period May 1981 through November 1982. By expanding the program to include certain non-city institutions, it is anticipated that checks with a value of $1 billion could be collected one day earlier than at present. Second, in commenting on the proposal to accelerate the collection of checks, commenters indicated that moving presentment or dispatch times to 12:00 noon for city institutions only would put such institutions at a disadvantage vis-a-vis non-city institutions in competing for corporate cash management business.

Several factors are to be considered in developing criteria for the selection of non-city institutions to be included in the HDGS. The selection criteria should consider the value of improved funds availability in relation to the costs incurred in collecting the funds faster, that is, the value of funds cleared one day earlier versus the additional processing and transportation costs that would be required to achieve this improvement. Finally, the selection criteria should be sufficiently flexible to address changing economic trends and disbursement patterns.

Three principal approaches have been considered for selecting non-city institutions for the HDGS: (1) The value of check presentments by the Reserve Banks; (2) the location of non-city institutions; and (3) market demand. Each of these approaches offers varying degrees of improved availability and responsiveness to changing disbursement patterns. Additionally, the costs associated with servicing and administering each approach would differ.

Value of Check Presentments—Under this approach, the selection process could be developed in two ways. First, non-city institutions could be included in the program on the basis of the daily average dollar value of checks presented to them by the Federal Reserve. All non-city institutions at or above some specific dollar level would be included in the program. Second, non-city institutions could be included on the basis of some measure of average check size and/or the number of large dollar items presented to them by the Federal Reserve. A determination of the appropriate average check size or number of high-dollar checks would be developed through an analysis of Reserve Bank check clearings over a specified time period.

An analysis of daily average presentments to non-city institutions indicated that nearly 30 percent of the total $22 billion daily average presentments by the Federal Reserve to non-city institutions were made to institutions whose daily presentments averaged $20 million or more. The proportion rises to only 37 percent when institutions with daily presentments averaging $10 million or more are included and to 44 percent when institutions with daily presentments averaging $5 million or more are included. However, the number of institutions that would be included in the HDGS would increase 150 percent, from 97 to 249 institutions, between the $20 million and $10 million cutoff points and increase 350 percent, from 97 to 463 institutions, between the $20 million and $5 million cutoff points. These data suggest that, at least initially, a $20 million cutoff point may be preferable in light of the relationship between potential dollars collected and the cost of providing the service.

A selection criterion based on total dollars presented would be uniform and objective as well as simple to implement and administer. This criterion would not, however, allow for accelerating the collection of checks on smaller institutions where it may be cost-effective to do so. There may be opportunities to improve funds availability at a small marginal cost by including institutions whose dollar value of presentments is below the established cutoff. Conversely, this criterion would call for including certain institutions where it may not be cost-effective to do so because transportation costs may be prohibitive.

Using selection criteria based on average check size and/or the number of large dollar checks presented by the Federal Reserve could include institutions on which large dollar checks are frequently drawn but that might not be included in the HDGS under a total dollar value presentment approach. Additionally, this approach would ensure that the checks presented to selected institutions would have a sufficiently high dollar value to make their inclusion in the HDGS cost-effective for collecting institutions. Finally, this approach may offer greater adaptability to changes in market conditions than the pure dollar-based approach. On the other hand, determining the optimal average check size or appropriate number of large dollar checks would require complex analysis.

Geographic Location—A geographic approach has been recommended by some members of the banking community. It has been suggested that all institutions located in specific geographic areas, such as, Ranally Metropolitan Areas, would be included in the HDGS without regard to the value of checks presented to them.

Such an approach would be predictable and objective, since it clearly specifies the groups of depository institutions that would be included in the HDGS. Also, it would treat depository institutions located in Federal Reserve cities and those located in large non-Federal Reserve cities comparably. Nonetheless, this approach appears to have some disadvantages. There may be little benefit from including very small institutions in the HDGS, since the costs of doing so would likely be higher than the potential marginal benefits that may be realized. The inclusion of many small institutions could add significantly to transportation and processing costs while contributing very little to incremental dollars collected. Further, it might be cost effective to serve many institutions that receive large dollar presentments that may not be in the geographic areas specified. Therefore, a pure geographic approach might not maximize improvements in funds availability.

Market Demand—Under this approach, depository institutions could request that certain non-city institutions be included in the HDGS in order to obtain improved funds availability. In administering the market demand approach, the benefits to be obtained through improved funds availability versus the cost of including such non-city institutions in the HDGS would be evaluated. Only when clear net benefits could be achieved would a particular institution be included.

This approach has the advantage of ensuring that the HDGS is responsive to the changing needs of depository institutions. It also provides that institutions would be included in the HDGS only if depository institutions were willing to pay a price that would cover the Federal Reserve's costs of collecting checks on the selected non-city institutions. However, several potential drawbacks are associated with this approach. Improvements in funds availability and in the payments mechanism generally may not be fully realized since the success of the program would be wholly dependent upon the requests of depository institutions. Additionally, this approach may not result in the most efficient allocation of resources since greater or comparable improvements in funds availability may be achieved at costs lower than those associated with limiting selection to depository institutions' requests. Finally, it could be more costly to administer this approach then either the pure total dollar value or geographic approaches because of the continuing necessity to evaluate depository institutions' requests.

Price Determination and Deposit Deadlines—It is proposed that a two-part fee structure be used for the HDGS: a cash letter fee and a per item fee. The cash letter fee would consist of each office's existing intra- or interterritory cash letter fees plus a charge to recover the fixed costs of outgoing transportation. The per item fee will be set to recover processing costs plus the expected value of any holdover or intraterritory transportation float.

Proposed fees for the HDGS have been developed by each Federal Reserve office based upon the costs associated with a high-dollar group sort consisting of non-city institutions with daily average presentments of $20 million or more. A schedule of these proposed fees is attached to this notice. The deposit deadlines for the HDGS would be comparable to the current deadlines for checks drawn on city institutions. It is proposed that the HDGS deposit deadlines would range from 8:00 a.m. to 9:30 a.m. The proposed deposit deadlines also appear in the attachment. Some Federal Reserve offices are considering an optional service that permits institutions to deposit one cash letter for checks drawn on institutions included in the HDGS. Deposit deadlines would be earlier and fees may be slightly higher for this local option.

Presentment—Institutions included in the HDGS will continue to receive a large proportion of the checks presented or dispatched to them in the same manner as at present. It is anticipated that only a small proportion of the checks drawn on these institutions will be presented or dispatched to the banks by 12:00 noon.

Payor Bank Service—The accelerated check collection program, approved by the Board in December, specifically addressed the impact of later presentment on depository institutions' ability to offer cash management services to their customers. As announced by the Board in December, each Reserve Bank will be required to offer a minimum level of service that provides presentment totals by selected account or facilitates the paying institutions' ability to extract such totals. Information concerning the details of each Reserve Bank's service is available from the Reserve Bank.

Implementation—The Board will establish an implementation date when final action on this matter is taken after comments are analyzed.

Combining Selection Criteria—It appears that no one criterion will be fully satisfactory. However, the Board believes that the daily average presentment value approach provides an objective basis for initiating the HDGS. By initially including all institutions with average daily presentments amounting to $20 million or more, the number of selected institutions would be manageable. Meaningful improvements in funds availability could be realized while information is gained regarding depository institutions' use of the HDGS and the cost-effectiveness of including all institutions defined by this criterion.

Further improvements in funds availability could be achieved at a reasonable cost by including additional non-city institutions in the HDGS. Lowering the dollar cutoff, however, may not be the most cost effective approach because improvements in funds availability may not exceed the increased costs that would be incurred to include additional institutions in the HDGS. Therefore, other criteria may be needed for selecting institutions whose average daily presentments are below the $20 million cutoff. All depository institutions that fall within the selection criteria chosen will be included within the HDGS.

Accordingly, the Board requests public comment on the following selection criteria:

1. Initially include all non-city institutions in the HDGS whose daily average presentments by the Federal Reserve amount to $20 million or more.

2. Select additional non-city institutions with total daily average presentments by the Federal Reserve under $20 million for inclusion in the HDGS:

a. Using standards based on the average check size and/or the number of large-dollar checks presented to an institution; or

b. Based on analysis of requests received from depository institutions.

In addition to providing comments on the selection criteria proposed above, the Board asks that commenters also address the following questions:

1. Should a minimum ratio of costs to value of improved funds availability be set for inclusion in the program? If so, what ratio is appropriate?

2. Should the $20 million cutoff be set at a higher or lower level? If so, what should the appropriate level be?

3. Should institutions with average presentments of less than $20 million be

[1] Presentment indicates the time that Reserve offices will present checks at clearinghouse or make them available for pickup for pickup at the Reserve offices.

[2] Non-city institutions are depository institutions that are located outside cities where there are Federal reserve Chick processing offices.

[3] A group sort is a service that Reserve Banks provide to collecting institutions. Under this service, institutions that sort checks drawn on a defined group of institutions may deposit those checks at later deadlines than unsorted deposits.

VOL 48 ISS 88 MAY 1983

added to the program based on criteria using average check size and/or the number of large dollar checks presented?

(a) If so, how should the appropriate average check size be determined?

(b) How should the number and size of the large dollar check criterion be determined?

(c) Which would be a better criterion—the average check size or the number of large dollar checks presented? Should both factors be used?

(d) What timeframe should be used to analyze average check size and/or the number of large dollar checks?

4. If a market demand criterion were used:

(a) How would this best be administered?

BILLING CODE 6210-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N-83-1238]

Certification of a State Land Sales Program

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commisssioner, Office of Interstate Land Sales Registration, HUD.

ACTION: Notice of Certification of the Land Sales Program of the State of Georgia, Secretary of State, Securities Division.

SUMMARY: The Secretary gives public notice that a determination has been made to accept the application and certify the land sales program of the State of Georgia, Secretary of State, Securities Division. A formal agreement was entered into on February 24, 1983, commencing the effect of the certification. The State of Georgia applied for certification of its land sales program under 24 CFR 1710.502, and notice of its application was published in the **Federal Register** on December 13, 1982. The purpose of this public notice of Georgia's certification is to advise the public, and particularly Georgia land developers and other state agencies with land sales regulatory responsibilities, of the terms of the agreement and the agreement's effect upon land sales businesses.

EFFECTIVE DATE: February 24, 1983.

ADDRESSES:

HUD, Office of Interstate Land Sales Registration, Room 4130, 451 7th Street, SW. Washington, D.C. 20410

Secretary of State, Securities Division, 216 State Capitol, Atlanta, Georgia 30334

FOR FURTHER INFORMATION CONTACT: Roger G. Henderson, U.S. Department of Housing and Urban Development, (202) 755-6314. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: The agreement between the Commissioner of Securities for the State of Georgia (Commissioner) and the HUD Office of Interstate Land Sales Registration (OILSR) affects those land subdivisions located in Georgia for which both a Georgia Property Report and Federal Statement of Record (a Federal registration) are required.

The Federal requirements will be satisfied and a registration for the particular subdivision automatically effective upon receipt of a certified copy of the Georgia Property Report in proper form and a Federal registration fee in the amount set out in existing regulations governing administration and enforcement of the Interstate Land Sales Full Disclosure Act. No other documentation will be required.

Federal rescission language will be incorporated into the body of the Georgia Property Report, as appropriate, and in sales contracts. No separate Federal disclaimer page or Federal effective date will appear in the Georgia Property Report.

Background:

Congress, in order to eliminate duplicative reporting requirements, amended the Interstate Land Sales Full Disclosure Act in 1979 to give HUD expanded authority in the certification of states with equivalent land sales protection. Rules were adopted in June 1980 setting out the procedures and criteria for certifying a state land sales program. States can be certified by the Federal government if their land sales program gives purchasers protection either through disclosure requirements or substantive regulation or a combination of the two that is substantially equivalent to that provided by administration of the Federal law. Once a state is certified, HUD may accept a state's disclosure materials, and any documentation required, and declare these effective as a Federal registration.

California was certified on January 6, 1981, Minnesota on October 2, 1981, Florida on January 18, 1982 and Arizona on February 3, 1982. An affirmative decision has been made regarding the Georgia application, and a formal agreement was signed on February 24, 1983, following the close of a 30-day public comment period announced in the **Federal Register** on December 13, 1982. Only two comments were from the California Department of Real Estate and the Arizona Department of Real Estate. The differences stated in those comments have been resolved to the satisfaction of California and Arizona.

The formal agreement is as follows: (insert attachment)

Dated: April 28, 1983.

W. Calvert Brand,

General Deputy Assistant Secretary for Housing—Deputy Federal Housing Commissioner.

Be It Known That the Commissioner of Securities for the State of Georgia (Commissioner) and the United States Department of Housing and Urban Development (HUD), Office of Interstate Land Sales Registration (OILSR)

Agree as follows:

1. That the State of Georgia has adopted and is effectively administering a land sales program pursuant to the Georgia Land Sales Act of 1982, Code Section 44-3-1, *et seq.*, of the Official Code of Georgia, as amended, and Chapter 590-4 of the Rules and Regulations of the State of Georgia. This statute and the rules and regulations promulgated thereunder, administered in accordance with this Agreement, provide lot purchasers and lessees protection that is substantially equivalent to that given them by the Interstate Land Sales Full Disclosure Act (ILSFDA).

2. That the State of Georgia's land sales program is certified by the U.S. Department of Housing and Urban Development pursuant to 24 CFR 1710.501(b). A developer or subdivider who has properly registered with the Commissioner a subdivision located in Georgia may satisfy the registration requirements of the ILSFDA by filing or having filed with the Secretary of HUD, the final Property Report (which was previously filed with Commissioner) with fee, in lieu of the Federal Statement of Record provided that the Commissioner has determined that the Property Report is in compliance with all the substantive and disclosure requirements set forth in the aforementioned Georgia statutory and regulatory provisions and this Agreement. All Property Reports certified by the Commissioner will be prepared pursuant to the format and general instructions set forth in 24 CFR 1710.100 through 1710.118, except that §§ 1710.105 and 1710.118 are modified to substitute the Commissioner for references made to the Federal Government and/or OILSR and to include the requirements of OCGA § 44-3-3)(4)(A). Accordingly, a subdivision located in Georgia will be considered registered with HUD upon HUD's receipt of a certified current Property Report and a fee in the amount specified in OILSR Regulations.

3. That the Commissioner will adopt a rule which, in conjunction with OCGA § 44-3-3(4)(B) and (13) (B), requires developers to file an amendment to the Property Report within 15 days of the date on which the developer knows, or should have known, that there has been a change in any representation of material fact required to be stated in the Property Report.

4. That each agency agrees to notify the other within 30 days of any modification or amendment to its law, regulations or administrative procedures, or of any substantial changes in its administrative capabilities, and to send copies of the pertinent documents, if any, affecting the modifications or amendments, including legal opinions relative to the aforementioned statutory and regulatory provisions and this Agreement.

5. That each agency agrees to notify the other of any action taken to suspend sales in a subdivision covered by this Agreement and to send to the other copies of any administrative orders including Cease and Desist Orders, Suspension Orders and copies of injuctions obtained.

6. That the Commissioner will certify as true and currently in effect all Property Reports in compliance with Georgia's statutory and regulatory provisions and this Agreement, including amended and renewed

1983 UMI

VOL
48
ISS
88
MY
5
1983
UMI

statements, as required by subdividers to comply with the ILSFDA.

7. That while additional documents will not be required to be certified and sent as a matter of course, the Commissioner will cooperate with OILSR by sending copies of any additional documents that are specifically requested.

8. That the Commissioner will cooperate with any other states obtaining HUD certification of its land sales programs by providing copies of documents that are specifically requested.

9. That the Commissioner will accept a disclosure document covering land located in another state but offered for sale in Georgia if the disclosure document has been approved by the other state, provided the other state's land sales program has been certified by OILSR, and that such disclosure document will be the only disclosure document required by the Commissioner with respect to the offer, sale or lease of the subdivided lands. However, the Commissioner is not required to accept disclosure documents covering offerings located in another certified state if that offering is not subject to the registration requirements of the ILSFDA.

10. That this Agreement is limited to disclosure documents required by both agencies and is not intended as a substitute for substantive requirements of the State of Georgia or of the enforcement authority of either agency. Thus, the Commissioner is not required to accept a disclosure document from another certified state when the subdivision in question and its operation do not meet the substantive requirements of Georgia law. In addition, neither OILSR nor the Commissioner are precluded from initiating administrative, civil or criminal proceedings.

11. That OILSR will not certify another state unless that state's Land Sales program offers to purchasers and lessees protection which is substantially equivalent (either in terms of required disclosure or substantive protection or some combination of the two) to that offered through administration of the ILSFDA.

12. That the Commissioner will exert its best efforts to maintain the level of administration upon which certification is based.

13. That for all subdivisions certified to HUD, the Commissioner will assure that pursuant to 15 U.S.C. 1703, as interpreted at 24 CFR 1710.209(f)(3), purchasers are advised in both Property Reports and in all forms of contracts or agreements and promissory notes used in selling or leasing lots of rescission rights accruing to them under Federal law and that no representations will be made by subdividers that they will install or complete roads, sewers, water, gas, or electric service, or recreational amenities unless the subdividers stipulate in their contract of sale or lease that they will provide or complete such services or amenities.

14. That complaints received by OILSR from Georgia residents concerning subdivisions in Georgia will be sent to the Commissioner for investigation; however, they may also be investigated by OILSR. The Commissioner will advise OILSR of any action taken or resolution of each complaint and send OILSR a copy of the Commissioner's reply to the complainant. Where such complaints clearly address only Federal requirements, OILSR will handle the complaint directly. Complaints received by the Commissioner from Georgia residents concerning subdivisions located outside of Georgia will be sent to OILSR for investigation; however, they may also be investigated by the Commissioner. The Commissioner and OILSR will cooperate where both have a direct interest in the subdivision.

15. That the agencies agree to cooperate with each other to the maximum extent possible and legally feasible in enforcement matters. OILSR and the Commissioner will, upon request, exchange copies of inspections of subdivisions located in Georgia performed by its field representatives. The Commissioner will exert its best efforts to make inspections of subdivisions prior to issuing a Certificate of Registration.

16. That each agency agrees to notify the other of any investigation it conducts which affects subdivisions located in Georgia or developers, subdividers, or their agents involved with these subdivisions.

17. That this Agreement does not affect the authority of either agency to assess or collect fees, particularly for filing and registration purposes.

18. That the Secretary of HUD is required periodically to review the laws and regulations and administration thereof of any state whose land sales program is certified; that the Secretary may withdraw certification upon a determination that the state's program no longer offers purchasers protection equivalent to that offered by the ILSFDA; and that prior to withdrawal of certification, the Secretary must issue to the state a notice of intent to withdraw certification, which notice shall afford the state an opportunity for hearing prior to withdrawal.

19. That the Commissioner may withdraw from certification by notice to the Secretary.

20. That this Agreement may be amended or supplemented at a later date by written agreement of both parties.

This agreement is entered into on the 24th day of February, 1983.

Max Cleland,

Secretary of State, Commissioner of Securities, State of Georgia.

H. Wayne Howell,

Director, Securities Division, Assistant Securities Commissioner.

Philip Abrams,

Assistant Secretary for Housing-Federal Housing Commissioner for the U.S. Department of Housing and Urban Development.

BILLING CODE 4210-27-M

Office of the Secretary

[Docket No. N-83-1237]

Submission of Proposed Information Collection to OMB

AGENCY: Ofice of Administration, HUD.

ACTION: Notice

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESS: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: Robert Neal, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Acting Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410, telephone (202) 755-5310. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) whether the proposal is new or an extension or reinstatement of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Acting Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposal should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirement is described as follows:

Notice of Submission of Proposed Information Collection to OMB

Proposal: Record of Employee Interview
Office: Labor Relations
Form No.: HUD-11
Frequency of submission: On Occasion
Affected public: Individuals or Households
Estimated burden hours: 5,000
Status: Extension
Contact: Richard S. Allen, HUD, (202) 755-5370; Robert Neal, OMB, (202) 395-7316

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: April 25, 1983.

ADDRESS: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: Robert Neal, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Acting Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410, telephone (202) 755-5310. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) whether the proposal is new or an extension or reinstatement of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Acting Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposal should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirement is described as follows:

Notice of Submission of Proposed Information Collection to OMB

Proposal: Personal Financial and Credit Statement
Office: Housing
Form No.: HUD-92417
Frequency of submission: On Occasion
Affected public: Businesses or Other Institution (except farms)
Estimated burden hours: 64,000
Status: Extension
Contact: William C. Howell, HUD, (202) 426-0730; Robert Neal, OMB (202) 395-7316

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: April 22, 1983.

Albert J. Kliman,

Director, Budget, Office of the Assistant Secretary for Administration.

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Serial No. AZAZ025000001]

The Bureau of Land Management proposes to offer for sale the following described lands at public auction on August 11, 1983, at 11:00 a.m., at Yavapai County Courthouse, 255 East Gurley, Prescott, Arizona 86301.

Gila and Salt River Meridian, Arizona

	Acres	Value
Parcel G: Legal Description: T. 11N., R. 2 E., sec. 9, NE¼SE¼	40	$50,000

Through the development of land use plans, it has been determined that the sale of the tract is consistent with the Federal Land Policy and Management Act. Surface disposal will be according to Section 203(a) (90 Stat. 2750, 43 U.S.C. 1713) and minerals may be conveyed per Section 209(b) (90 Stat. 2757, 43 U.S.C. 1719). The successful bidder may apply for the reserved mineral estate, except oil and gas, and pay an administrative fee of $50.00 for conveyance.

Unless modified through mutual agreement by the range user and the purchaser, the grazing lessee may continue existing grazing use until February 28, 1992 by honoring the terms and conditions of the current grazing use authorization.

Terms and conditions of the grazing use which must be honored by the purchaser are stated in the "subject to" provisions of the patent.

This notice of realty action will serve as the two year notification of cancellation to the grazing lessee required by 43 CFR 4110.42(b).

If not sold on August 11, 1983 the parcel will be re-offered in the Phoenix District Office at 10:00 a.m., on October 5, 1983. The land will be offered for sale at no less than the appraised fair-market value.

Upon publication of this Notice in the **Federal Register**, the land described above will be segregated from all forms of non-discretionary appropriation under the public land laws, including the mining laws but excepting the mineral leasing laws, for a period of two years, or until the lands are sold. The segregative effect may otherwise be terminated by the Authorized Officer by publication of a termination notice in the **Federal Register** prior to the expiration of the two year period.

The land will be subject to the following reservations when patented:

Excepting and reserving to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States. Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945.

2. All oil and gas, with the right to explore, prospect for, and remove under applicable law, and such regulations as the Secretary of the Interior may prescribe.

And subject to:

1. A right-of-way thereon described under Serial Number PHX 085903 for a road granted under Section 17 of the Act of November 9, 1921 (42 Stat. 216).

2. The right of the grazing lessee to continue the current grazing use until February 28, 1992, per the terms and conditions of the existing grazing authorization. Charges for the use will be no more than the BLM grazing fee scheduled for a given year. This grazing use authorization may be modified only by mutual agreement between the range user and the purchaser.

3. The Federal Emergency Management Agency (FEMA) 100-year floodplain maps developed for this area, and the Yavapai County planning and zoning regarding any flood hazard potential of the land.

Additional information concerning this land, terms and conditions of the sale and bidding instructions may be obtained by calling Arthur Tower, Area Manager, at 602 241-2854 or by writing to the District Manager, Bureau of Land Management, 2929 West Clarendon Avenue, Phoenix, Arizona 85017.

For a period of 45 days from the date of this notice, interested parties may submit comments regarding the proposed action. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior.

Dated: April 29, 1983.

William K. Barker,

District Manager.

[FR Doc. 83-12008 Filed 5-4-83; 8:45 am]

BILLING CODE 4210-84-M

[Serial No. AZAZ025000003]

Arizona: Realty Action Competitive Sale of Public Land in Pinal County

The Bureau of Land Management proposes to offer for sale the following described lands at public auction on July 27, 1983, at 11:00 a.m., in Administration Building No. 1, at Pinal County Courthouse, 1301 Pinal, Florence, Arizona, 85232. Through the development of land use plans, it has been determined that sale of the parcels is consistent with the Federal Land Policy and Management Act of 1976:

Gila and Salt River Meridian, Arizona

	Acres	Value
Parcel No. 1: Legal Description: T. 10 S., R. 11 E., G&SRM, sec. 21: N½	320	$288,000
Parcel No. 2: Legal Description: T. 10 S., R. 11 E., G&SRM, sec. 28: W½, SE¼	480	480,000
The above aggregates 800 acres in Pinal County		

Surface Disposal will be per Section 203(a) (90 Stat. 2750, 43 U.S.C. 1713). Mineral Conveyance (except reserving oil and gas to the Federal government) may be made to the successful bidder, per Section 209(b) (90 Stat. 2757, 43 U.S.C. 1719), if he/she applies and pays an administrative fee of $50.00 for conveyance. Unless modified through mutual agreement by the range user and the purchaser, the grazing lessee may continue existing grazing use until February 28, 1990, by honoring the terms and conditions of the current grazing use authorization. Terms and conditions of the grazing use which must be honored by the purchaser are stated in the "subject to" provisions of the patents.

This notice of realty action will serve as the two year notification of cancellation to the grazing lessee required by 43 CFR 4110.4-2(b).

Lands not sold on July 27, 1983 will be re-offered in the Phoenix District Office at 10:00 a.m., on October 5, 1983. The lands will be offered for sale at no less than the appraised fair-market value.

Upon publication of the Notice in the **Federal Register**, the land described above will be segregated from all forms of nondiscretionary appropriation under the public land laws, including the mining laws but excepting the mineral leasing laws, for a period of two years, or until the lands are sold. The segregative effect may otherwise be terminated by the Authorized Officer by publication of a termination notice in the **Federal Register** prior to the expiration of the two year period.

The lands will be subject to the following reservations when patented:

Parcel No. 1

Excepting and reserving to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States. Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945.

2. All oil and gas, with the right to explore, prospect for, and remove under applicable law, and such regulations as the Secretary of the Interior may prescribe.

And subject to:

1. Those rights granted by Oil and Gas Lease A-10915, made under Section 29 of the Act of February 25, 1920, 41 Stat. 437 and the Act of March 4, 1933, 47 Stat. 1570. This patent will be subject to the right of the permittee or lessee to use so much of the surface of said land as is required for oil and gas exploration and development operations without compensation, resulting from proper oil and gas operations, for the duration of the Lease A-10915, and any authorized extension of the lease. Upon termination or relinquishment of said oil and gas lease, this reservation shall terminate.

2. The Federal Emergency Management Agency (FEMA) 100-year floodplain maps developed for this area, and the Pinal County planning and zoning regarding any flood hazard potential of the land.

3. The right of the grazing lessee to continue the current grazing use until February 28, 1990, per the terms and conditions of the existing grazing authorization. Charges for the use will be no more than the BLM grazing fee scheduled for a given year. This grazing use authorization may be modified only by mutual agreement between the range user and the purchaser.

Parcel No. 2

Excepting and reserving to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States. Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945.

2. All oil and gas, with the right to explore, prospect for, and remove under applicable law, and such regulations as the Secretary of the Interior may prescribe.

3. A right of way thereon described under Serial No. AR-08324, for gas pipeline purposes under the Act of February 25, 1920 (41 Stat. 449).

And subject to:

1. Those rights granted by Oil and Gas Lease A-11119 made under Section 29 of the Act of February 25, 1920, 41 Stat. 437 and the Act of March 4, 1933, 47 Stat. 1570. This patent will be subject to the right of the permittee or lessee to use so much of the surface of said land as is required for oil and gas exploration and development operations without compensation, resulting from proper oil and gas operations, for the duration of the Lease A-11119, and any authorized extension of the lease. Upon termination or relinquishment of said oil and gas lease, this reservation shall terminate.

2. The Federal Emergency Management Agency (FEMA) 100-year floodplain maps developed for this area, and the Pinal County planning and zoning regarding any flood hazard potential of the land.

3. The right of the grazing lessee to continue the current grazing use until February 28, 1990, per the terms and conditions of the existing grazing authorization. Charges for the use will be no more than the BLM grazing fee scheduled for a given year. This grazing use authorization may be modified only by mutual agreement between the range user and the purchaser.

Additional information concerning the land, terms and conditions of the sale, and bidding instructions may be obtained by writing to William K. Barker, District Manager, 2929 West Clarendon Avenue, Phoenix, Arizona 85017, or by calling Arthur E. Tower, Area Manager, 602 241-2854.

For a period of 45 days from the date of this notice, interested parties may submit comments regarding the proposed action. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any

BILLING CODE 4310-84-M

Newcastle Resource Area, Casper District, Wyoming; Final Grazing Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Availability of the Final Newcastle Grazing Environmental Impact Statement.

SUMMARY: The final Grazing Environmental Impact Statement for the Newcastle Resource Area in Wyoming will be available on May 1, 1983. The Final EIS has been completely reprinted in response to comments on the draft document.

FOR FURTHER INFORMATION CONTACT: Darrell Short, Area Manager, Newcastle Resource Area, Bureau of Land Management, P.O. Box 757, Newcastle, Wyoming 82701; (307) 746–4453.

Leslie A. Olver,

Acting District Manager.

[FR Doc. 83-11985 Filed 5-4-83; 8:45 am]

BILLING CODE 4310-84-M

Wyoming; Availability of the Proposed Grazing Management Program for the Divide Environmental Impact Statement Area

AGENCY: Rawlins District Office, Rawlins, Wyoming, Bureau of Land Management, Interior.

ACTION: Notice of availability of draft environmental impact statement.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, notice is hereby given that the Bureau of Land Management, U.S. Department of the Interior, has prepared the Proposed Grazing Management Program for the Divide Environmental Impact Statement Area (Divide EIS) in the Divide and Medicine Bow Resource areas of Wyoming. Copies of the document are available for public review and comment.

In addition, notice is also given that a public hearing will be held in Rawlins, Wyoming, on June 8, 1983, at 7 p.m., at the Rawlins District Office, BLM. Written and oral comments on the Divide EIS will be received at that time.

DATE: Written comments on the proposed action and alternatives contained in the draft EIS will be accepted through June 30, 1983.

ADDRESSES: Written comments on the draft EIS should be sent to: District Manager, Bureau of Land Management, Rawlins District Office, Box 670, Rawlins, Wyoming 82301. The draft EIS is available for inspection at the Rawlins District Office, 1300 N. Third Street, Rawlins, Wyoming 83201.

SUPPLEMENTARY INFORMATION: Environmental impacts that will result from the implementation of the grazing management proposal and the three alternatives to the proposal have been analyzed in the draft EIS. These alternatives are: Enhance watershed, wildlife and soil resources, enhanced livestock grazing, and no action.

All comments will be considered. Those that raise questions or issues concerning the effects of the proposed action, present new data, or question facts or analyses will be responded to in the final EIS.

FOR FURTHER INFORMATION CONTACT: Bob Tigner, Rawlins District Office, Box 670, Rawlins, Wyoming 82301, Telephone (307) 324–7171.

David J. Walter,

District Manager.

BILLING CODE 4310-84-M

Wyoming; Newcastle Resource Area, Casper District, Wyoming; Intent To Prepare Planning Analyses for BLM-Administered Public Lands in Nebraska

AGENCY: Bureau of Land Management, Interior. .

ACTION: Initiation of planning analyses for land disposal in Nebraska on a county by county basis.

SUMMARY: The Newcastle Resource Area is preparing planning analyses in Nebraska according to the procedures outlined in 43 CFR 1601.6–3(b). This consists of an environmental assessment, public participation, interagency coordination and consistency determination. The analyses will address the possible disposal of or retention of BLM-administered public lands in Nebraska on a county by county basis. The location of the lands and the sequence of the analyses is presented in the Supplementary Information section of this notice.

Public Participation: The public is invited to comment on the advisability of disposing or retaining tracts of BLM-administered public lands in Nebraska. During the planning analyses, BLM will contact appropriate State and county officials, adjacent landowners and lessees. Public meetings will be held if the need is identified through public input.

FOR FURTHER INFORMATION CONTACT: Darrell Short, Area Manager, Newcastle Resource Area, Bureau of Land Management, P.O. Box 757, Newcastle, Wyoming 82701, (307) 746–4453.

SUPPLEMENTARY INFORMATION: Tracts of land will be analyzed site-specifically within each county to determine manageability. Manageability would be based on resources present to justify retention in federal ownership. If no resources are present that justifies retention, disposal would be proposed. The following is a sequential list of public lands by county which the planning analyses will be prepared for.

Montana; Termination of Classification of Public Lands for Multiple Use Management

April 27, 1983.

1. On September 24, 1970 (FR Vol. 35 No. 186 p. 14857) the public lands described as:

Fifth Principal, Meridian

T. 157 N., R. 91 W.,
Sec. 13: SE¼NW¼.

Aggregating 40 acres in Mountrail County.

Were classified for multiple use management under the Act of September 19, 1964 (43 U.S.C. 1411–18). This classification segregated the land from appropriation under the agricultural land laws (43 U.S.C., parts 7 and 9; 25 U.S.C., Sec. 334) and from sales (under Section 2455 of the Revised Statutes 43 U.S.C. 1171). The lands remained open to all other applicable forms of appropriations, including the mining and mineral leasing laws.

2. Pursuant to the regulations set forth in 43 CFR 2461.5(c)(2), the classification referred to under paragraph one is hereby terminated. At 8 a.m. on May 27, 1983, the lands described above shall be open to operation of the public land laws generally, subject to valid existing rights, the provision of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 8 a.m. on May 27, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in order of filing.

Inquiries concerning these lands should be addressed to the Chief, Branch of Land Resources, Bureau of Land Management P.O. Box 30157, Billings, Montana 59107.

Kannon Richards,

Acting State Director.

BILLING CODE 4310-84-M

Buffalo Resource Area, Casper District, Wyoming; Availability of Draft Resource Management Plan and Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Notice that the Draft Resource Management Plan and Environmental Impact Statement for the Buffalo Resource Area, Casper District,Wyoming is available for public review and comment.

SUMMARY: The draft Resource Management Plan (RMP) and Environmental Impact Statement (EIS) presents a range of resource management alternatives and the consequences of implementing each alternative for the public lands in the Buffalo Resource Area. The preferred alternative in the draft proposes a balanced use of resources.

Location of documents: The draft RMP and EIS plus associated background and source material is available for public review at the Buffalo Resource Area Office; 300 Spruce; Buffalo, Wyoming.

Additional information on the RMP or requests to be placed on the mailing list should be addressed to Glenn Bessinger, Area Manager, Buffalo Resource Area; 300 Spruce; P.O. Box 670; Buffalo, Wyoming 82834; telephone (307) 684–5586.

Public participation: Public comments on the draft RMP and EIS should be submitted to the person and address noted above. A ninety (90) day comment period is allowed on the draft plan. The comment period extends from May 13, 1983 to August 15, 1983. A public hearing will be held on June 21, 1983, to accept oral or written comment on the RMP. The hearing will begin at 7:00 p.m. in the Meadowlark School, 550 South Barrett; Buffalo, Wyoming.

Public comments on this draft RMP and EIS will be evaluated and a final RMP and EIS will be published about September 30, 1983. A resource management plan will be selected in a record of decision that will be published after this final EIS.

SUPPLEMENTARY INFORMATION: The Casper District is proposing a Resource Management Plan (RMP) to guide future management actions on the public lands within the Buffalo Resource Area which includes Johnson, Campbell, and Sheridan counties. Within these three counties, BLM manages 11.3 percent of the surface, approximately .8 million acres, and about 65.6 percent of the mineral estate, approximately 4.8 million acres.

The RMP will be a 10-year comprehensive land use plan. The planning process included identifying significant issues, establishing plan criteria for those issues, assessing resource capability to respond to the issues and formulating reasonable alternatives that address the issues. Alternatives range from favoring resource production to resource protection. The consequences of implementing each alternative is presented in the environmental statement. Resource management plans are authorized under the Federal Land Management Policy Act of 1976. Standards, guidelines, and procedures for RMP preparation are contained in 43 CFR Part 1600.

An interdisciplinary team was used to develop the RMP. Disciplines included were geology, range, realty, forestry, archeology, economics, hydrology, wildlife, recreation, soils, and air quality.

Major issues identified during the scoping process and addressed in the RMP are rangeland management and wilderness. Other issues addressed in the RMP are: forest products on noncommercial forestland, land disposal, off-road vehicle designations, fire management and fencing reservoirs.

The RMP contains a proposed recommendation on the wilderness suitability of three Wilderness Study Areas (WSA). These WSAs are Fortification Creek, containing 12,419 acres in Johnson and Campbell counties, Gardner Mountain, containing 6,423 acres, and North Fork, 10,089 acres, in Johnson County. After the 90 day comment period on the Draft RMP and EIS, a Wilderness Study Report and final wilderness EIS will be submitted to the Secretary of the Interior.

Dated: May 13, 1983

Paul W. Arrasmith,

District Manager.

BILLING CODE 4310-84-M

Management Framework Plan; New Mexico, San Augustine Coal Area—Notice of Availability; Issues and Planning Criteria

AGENCY: Bureau of Land Management, Interior.

ACTION: Availability of issues and planning criteria.

SUMMARY: The purpose of this notice is to announce the availability for public review of issues and planning criteria to be used in the development of the Management Framework Plan Amendment within the San Augustine Coal Area.

SUPPLEMENTARY INFORMATION: The Bureau of Land Management Las Cruces District, Socorro Resource Area has prepared planning criteria to direct the coal planning process to determine the potential of offering certain lands in Catron and Cibola Counties, New Mexico for competitive Federal coal leasing during the second-round San Juan River Coal Region lease sale scheduled for August 1986. The process will consist of, in part, amending the Divide Planning Area Management Framework Plan within the San Augustine Coal Area, applying the unsuitability criteria described in 43 CFR Part 3460, as amended, and preparing a subsequent Environmental Impact Statement.

As additional issues are identified and new information becomes available during the planning process, and/or from public participation, additional criteria may be developed for future guidance of this planning effort. These planning criteria are available for public review at the Socorro Resource Area Office.

FOR FURTHER INFORMATION CONTACT: Glen B. Sekavec, Team Leader, at 198 Neel Avenue, Socorro, New Mexico, or phone (505) 835–0412.

Dated: April 27, 1983.

Dan C. B. Rathbun

District Manager.

BILLING CODE 4310-84-M

[I-20193 and I-20200]

Idaho; Realty Action; Competitive Sale of Public Lands in Blaine County

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, I–20193 and I–20200, Competitive Sale of public lands in Blaine County, Idaho.

SUMMARY: The following described land has been examined, and through the development of land use decisions based on public input, it has been determined that the sale of these tracts is consistent with Section 203(a) of the Federal Land Policy and Management Act of 1976. The lands will be offered for sale at public auction for no less than the appraised fair market value. Both sealed and oral bids will be accepted.

File	Parcel No.	Acreage	Appraised value
West Magic: T. 2 S., R. 17 East, Boise Meridian, Blaine County, Idaho Section 1:			
I–20193	Lot 48	.078	$3,000
	Lot 49	.078	3,000
	Lot 50	.095	3,300
	Lot 51	.078	2,800
	Lot 52	.048	3,000
	Lots 74 and 75	.344	4,000
	Lot 77	.313	3,300
	Lot 78	.393	3,800
	Lot 79	.534	5,000
East Magic: T. 1 S., R. 18 East, Boise Meridian, Blaine County, Idaho Section 31:			
I–20200	Lot 15	.400	$6,000

The above aggregates 2.359 acres.

Upon publication of this Notice in the **Federal Register**, the land described above will be segregated from all forms of appropriation under the public land laws, including the mining laws, but excepting the mineral leasing laws, for a period of two years or until the lands are sold. The segregative effect may otherwise be terminated by the Authorized Officer by publication of a termination notice in the **Federal Register** prior to the expiration of the two year period.

A patent for the land, when issued, shall be subject to the following reservations:

1. A right-of-way for ditches or canals constructed by the authority of the United States. Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945.

2. All minerals including Gas & Oil shall be reserved to the United States, as required by Section 209(a) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1719.

3. All valid existing rights and reservations of record.

The sale will be held at the Shoshone District Office, Bureau of Land Management, 400 West F Street, Shoshone, Idaho at 10:00 A.M., Friday, July 1, 1983. Additional information concerning this land, terms and conditions of sale, and bidding instructions may be obtained from the Shoshone District Manager at the above address, or by calling 886–2206.

SUPPLEMENTARY INFORMATION: For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager regarding the proposed action. Any adverse comments will be evaluated by the District Manager, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: Charles J. Haszier, District Manager.

Dated: April 28, 1983

Charles J. Haszier,

District Manager.

BILLING CODE 4310-84-M

[M57660]

Montana; Realty Action; Competitive Sale of Public Land in Madison County

AGENCY: Bureau of Land Management, Butte District Office, Interior.

ACTION: Notice of Realty Action M57660, Competitive sale of public land in Madison County.

SUMMARY: The following described lands have been examined and identified as suitable for disposal by sale pursuant to Section 203 of the Federl Land Policy and Management Act

VOL
48
ISS
88
MAY
5
1983
UMI

(FLPMA) of 1976, 43 U.S.C. 1713 (1976), at no less than the fair market value:

Principal Meridian Montana

T. 5 S., R. 3 W., Sec. 30, S½NE¼

The area described contains 80 acres. The land will be offered for sale by a combination of sealed and oral bids utilizing competitive bidding procedures on July 7, 1983.

The subject land is located in the southwestern part of Montana, approximately 6½ miles northwest of Virginia City, the county seat of Madison County. The land has limited resource values and no unique values. Management opportunities are limited by residential development occurring on the private lands surrounding the tract. There are no rare, endangered, or threatened plants and animals. It is not within a potential wilderness area or an area of critical environmental concern.

Public access to the land is via the Ruby-Beebe Park Road (#140) maintained by Madison County.

The proposed sale meets the criteria for Section 203 of FLPMA. Disposal would allow residential development to occur on a tract of land, in an area that is currently being subdivided. The proposed sale is consistent with the Bureau's planning system and Madison County government officials have been notified of the sale. The transfer of the tract into private ownership will benefit the public interest and provide for better land management.

Terms and Conditions

The terms and conditions applicable to this sale are as follows:

1. All minerals will be reserved to the United States together with the right to explore, prospect for, mine, or remove same under applicable law and regulations;

2. A right-of-way for ditches or canals will be reserved to the United States in accordance with 43 U.S.C. 945;

3. The sale of these lands will be subject to all valid existing rights and reservations of record.

The purchaser upon BLM acceptance of the offered bid shall have the opportunity to obtain all of the mineral interests except the oil and gas interests. Disposal of the mineral interests will be made in accordance with Section 209 of FLPMA.

DATES: For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Bureau of Land Management, at the address shown below. Any adverse comments will be evaluated by the BLM Montana State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become a final determination of the Department of the Interior.

The sale will be held at the Madison County Courthouse, Virginia City, Montana on Wednesday, July 7, 1983, at 2:00 p.m.

SUPPLEMENTARY INFORMATION: *Bidder Qualifications:* The bidder must be U.S. citizen or, in the case of a corporation, subject to the laws of any state or the U.S. A state, state instrumentality or political subdivision submitting a bid must be authorized to hold property. Any other entity submitting a bid must be legally capable of holding and conveying lands or interests therein under the laws of the State of Montana. Bids must be made by the principal or his agent.

Bid Standards: No bid will be accepted for less than the appraised value of $34,000, and bids must include all of the land identified in this notice.

Method of Bidding: The land will be sold by a combination of sealed and oral bids. Sealed bids delivered or sent by mail will only be considered if received by the Bureau of Land Management, Butte District Office, 106 N. Parkmont, Butte, Montana 59702, prior to 4:00 p.m., Mountain Standard Time, Tuesday, July 5, 1983. Each sealed bid must be accompanied by a certified check, postal money order, bank draft, or cashier's check made payable to the Bureau of Land Management for not less than one-fifth of the amount bid.

Sealed bids must be in a separate sealed envelope, within the transmittal envelope. The sealed bid envelope must be marked in the lower left-hand corner as follows:

Sealed Bid
Public Land Sale M57660
July 6, 1983

All sealed bids will be opened at 2:00 p.m. on the day of sale. If two or more envelopes containing valid bids of the same amount are received, the determination of which is to be considered the highest bid shall be by drawing. The drawing, if required, shall be held immediately following the opening of the sealed bids. The highest qualifying sealed bid shall then be publicly declared.

Oral bids will be received immediately after all sealed bids have been opened and the highest sealed bid announced. The highest sealed bid will be the base for the oral bids. If the highest bid is an oral bid, the successful bidder will be required to pay immediately one-fifth of the high bid price by cash, personal check, money order, bank draft, or any combination of these. Each oral bid must be in increments not less than fifty dollars.

Final Details: Once a high bid is accepted, the successful bidder shall submit the remainder of the full bid price within 30 days of notification of bid acceptance by the authorized officer. Failure to submit the required amount within the allotted time will result in rejection of the highest bid and the deposit will be forfeited. The land shall then be offered to the second highest bidder, subject to the same terms and conditions. All bids will be either returned, accepted or rejected within 60 days of the sale date.

If no bids, either sealed or oral, are received on the sale date, the land may be offered for sale at a later date.

FOR FURTHER INFORMATION CONTACT: Information related to the sale, including planning documents, environmental assessment, and the record of public discussions is available for review at the Butte District Office, P.O. Box 3388, Butte, Montana 59702.

Dated: April 27, 1983.

Jack McIntosh,

District Manager.

BILLING CODE 4310-84-M

Recreation Management; Establishment of Camping Stay Limits; Eugene District, Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Establishment of camping stay limit for campgrounds and undeveloped public lands in the Eugene District, Oregon.

SUMMARY: Persons may camp within designated campgrounds or on public lands not closed to camping within the Eugene District for a total period of not more than fourteen days during any calendar year. The fourteen day limit may be reached either through a number of separate visits or through a period of continuous occupation of the public lands. Under special circumstances and upon request, the authorized officer may give written permission for extensions to the fourteen day limit.

Additionally no person may leave personal property unattended in designated campgrounds or recreation developments for a period of more than 24 hours, or elsewhere on public lands within the Eugene District for a period of more than 5 days without written permission from the authorized officer.

DATE: This camping stay limit will be effective May 10, 1983.

FOR FURTHER INFORMATION CONTACT: C. Bradley Krueger, Assistant District Manager, Operations, Bureau of Land Management, Eugene District Office, 1255 Pearl Street, Eugene, Oregon 97401, Telephone: (503) 687-6657.

SUPPLEMENTARY INFORMATION: This camping stay limit is being established in order to assist the Bureau in reducing the incidence of long-term occupancy trespass being conducted under the guise of camping, both within campgrounds and on undeveloped public lands in the Eugene District.

Authority for this stay limit is contained in CFR Title 43, Chapter II. Part 8363, Subparts 8363.1-3(b) and 8363.3.

Dwight L. Patton,

District Manager.

BILLING CODE 4310-84-M

Competitive Sale of Public Lands in Bannock County, Idaho; Realty Action

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, I-20086, Competitive Sale of Public Lands in Bannock County, Idaho, commonly known as the Buckskin Tract.

SUMMARY: The following described land has been examined, and through the development of land use decisions based on public input, it has been determined that the sale of the tract is consistent with Section 203(a) of the Federal Land Policy and Management Act of 1976. The lands will be offered for sale at public auction for no less that the appraised fair market value indicated below. Both sealed and oral bids will be accepted.

	Acres	Value
T. 6 S., R. 35 E., Boise Meridian		
Sec. 29: SW¼NW¼, NW¼SW¼...	140	$98,000.00
Sec. 30: S½SW¼NE¼, SE¼NE¼		

Upon publication of the Notice in the **Federal Register**, the land described above will be segregated from all forms of appropriation under the public land laws, including the mining laws, but excepting the mineral leasing laws, for a period of two years, or until the lands are sold. The segregative effect may otherwise be terminated by the Authorized Officer by publication of a termination notice in the **Federal Register** prior to the expiration of the two-year period.

The land will be subject to the following reservations when patented:

1. A right-of-way for ditches or canals constructed by the authority of the United States. Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945.

2. All valid existing rights and reservations of record.

3. All minerals will be reserved to the United States as required by Sec. 209(a) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1719.

4. A 50 foot wide road right-of-way reserved to the United States.

The public auction will be held on July 20, 1983 at 1:00 P.M.

ADDRESSES: The public auction will be held at the Federal Building, 250 S. 4th, Pocatello, Idaho, Room B43. Additional information concerning the land, terms, and conditions of the sale, and bidding instructions may be obtained from Nick James Cozakos, District Manager at the Burley District Office, Route 3, Box 1, Burley, ID 83318 or by calling (208) 678-5514.

SUPPLEMENTARY INFORMATION: For a period 45 days from the date of this notice, interested parties may submit comments to the District Manager regarding the proposed action. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior.

Dated: April 27, 1983.

Nick James Cozakos,

District Manager.

Idaho Falls District; Grazing Advisory Board Meeting

Notice is hereby given in accordance with Pub. L. 92-463 that the Idaho Falls District Grazing Advisory Board will meet June 14, 1983.

Grazing Advisory Board members will meet at 8:00 a.m. at the Bureau of Land Management Office, 940 Lincoln Road, Idaho Falls, ID 83401, for a field tour. The tour is open to the public. Public comment will be accepted at any time during the tour. Anyone wishing to go on the tour is asked to notify the Idaho Falls BLM District Manager at the above address by June 7, 1983. Visitors must provide their own transportation.

The purpose of the field tour is to observe and discuss range improvement projects constructed with Advisory Board funds, future prescribed burn areas, mining claim patent application areas, wildfire recovery areas, noxious weed infestations and general rangeland management. The tour will take place in Clark County in the Crooked Creek/Deep Creek Bench, Medicine Lodge Canyon and Edie Bench areas. The Grazing Advisory Board also will make arrangements for their next meeting.

Summary minutes of the meeting will be kept in the District Office and be available for public inspection and reproduction during regular business hours 7:45 a.m.-4:30 p.m. within 30 days of the meeting.

Dated: April 27, 1983.

O'dell A. Fandsen,

District Manager.

Montana and North Dakota; Fort Union Regional Coal Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Fort Union Regional Coal Team Meeting

SUMMARY: Pursuant to the responsibilities set forth in 43 CFR 3400.4(B), the Montana State Office of BLM is issuing this notice to announce a Fort Union Regional Coal Team Meeting at 8:30 A.M. on June 1, 1983, in the Sixty Floor conference Room of Granite Tower, 222 North 32nd Street, Billings, Montana.

Some of the topics on the agenda are as follows:

Preliminary approval of a Project Management Plan and schedules for the 1985 sale.

RCT guidance on tract delineation for the 1985 sale.

RCT guidance on the Site Specific Analyses for the 1985 sale.

FOR FURTHER INFORMATION CONTACT: Mr. Lloyd Emmons, Project Manager, Fort Union Project, Bureau of Land Management, Montana State Office, P.O. Box 30157, Billings, Montana 59107. Telephone: (406) 657–6291.

Dated: April 28, 1983.

Bill D. Noble,

Acting State Director.

BILLING CODE 4310–84–M

[N–37906]

Nevada; Realty Action Sale of Public Lands in White Pine County

The following described land has been examined and identified as suitable for disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.. 1713), at no less than fair market value:

Parcel No.	Legal description	Acreage
T. 16N., R. 63 E., MDM, Section 23,		
N–37906	N½NW¼SW¼	20
N–37907	S½NW¼SW¼	20
N–37908	N½SW¼SW¼	20
N–37909	S½SW¼SW¼	20
Section 27		
N–37910	N½NE¼NE¼	20
N–37911	S½NE¼NE¼	20
N–37912	W½SE¼NE¼	20
N–37913	SW¼NE¼	40
N–37914	Lots 1, 2, 3, and 4	152.98
N–37915	Lots 5 and 8	76.92
N–37916	W½SE¼	80
Total		469.90

The sale will be made on approximately the 29th day of September, 1983. The exact date, time, and place of the sale will be announced in general news releases and legal notices. Particulars for this public auction sale, including minimum bids, reservations, and other specific items, will be made available to the public at least 30 days before the scheduled sale date.

The land is being offered for sale in order to facilitate land use planning in the area and to accommodate growth occurring in and around the area of White Pine County adjacent to the City of Ely.

There will be no adjustment in the grazing permittee's active grazing preference because the AUMs affected are considered insignificant in relation to the total active preference in the allotment.

The land meets the first and third disposal criteria of Section 203(a) of the aforementioned sale authority. It has potential for suburban residential development. The sale is consistent with the Bureau's planning for the land and has been discussed with the White Pine County Regional Planning Commission. The public interest would be served by offering the land for sale.

The terms and conditions applicable to the sale:

1. Reservations for road rights-of-way will be incorporated into each patent in conjunction with the State of Nevada Department of Transportation and the White Pine County road network.

2. The sale of these lands will be subject to all valid existing rights, including those rights granted by oil and gas lease N–13514.

3. No preference right will be given to adjoining landowners. No bids will be considered for less than the minimum bid and bids for a parcel must include all the lands in the parcel. Federal law requires that bidders be U.S. citizens or, in the case of corporation, subject to the laws of any State of the United States. Proof of citizenship shall accompany the bid.

4. Upon disqualification of the apparent high bidder, the next high bid will be honored if it represents fair market value.

5. A right-of-way is reserved for ditches and canals constructed by the authority of the United States, Act of August 30, 1890 (26 Stat. 391; 43 U.S.C. 945).

6. Leasable minerals will also be reserved to the United States. The sale will be conducted by oral bidding. Bids must be made by the principal or his agent at the time of the sale. The highest oral bid will establish the apparent high bidder. The apparent high bidder will be required to submit a nonrefundable deposit of one-fifth of the full bid price immediately at the sale.

Within three days the apparent high bidder will be confirmed, or rejected if the bid does not represent fair market value. The remainder of the full bid price shall be paid within 30 days of the sale if the apparent high bidder is confirmed. Failure to pay the full price within 30 days shall disqualify the confirmed high bidder and the deposit shall be forfeited and disposed of as other receipts of sale.

All bids will be either returned, accepted, or rejected within 30 days of the sale date.

For a period of 45 days from the date of this Notice, interested parties may submit comments to the State Director, 300 Booth Street, P.O. Box 12000, Reno, Nevada 89520. Any adverse comments will be evaluated by the State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of the Department of the Interior.

Wm. J. Malencik,

Deputy State Director, Operations.

BILLING CODE 4310–84–M

Record of Decision on the National Petroleum Reserve in Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability of the Record of Decision (ROD) of the Alaska State Director, BLM, affecting the National Petroleum Reserve in Alaska.

SUMMARY: The Bureau of Land Management has issued a ROD based on the Final Environmental Impact Statement (FEIS) for Oil and Gas Leasing in the National Petroleum Reserve in Alaska. The Alaska State Director, BLM, has adopted an alternative from the ROD which lies within the range of alternatives identified in the FEIS. This decision consists of:

Land Allocation

—Deletion from leasing of approximately 1,416,000 acres in the Utukok caribou calving area and the Teshekpuk Lake highest density black brant molting area.

—Special management leasing of approximately 4,350,000 acres in four zones.

—Special and standard stipulations for leasing in the remaining approximately 17,787,000 acres of the Reserve.

Leasing Schedule

A 5–Year leasing program for these areas not deleted or deferred that will offer approximately 2,000,000 acres annually.

Stipulations

The stipulations identified in the FEIS are generally adequate for all future leases and will be assigned to individual tracts as deemed necessary. The ROD specifically identifies stipulations that will be assigned to tracts and those which would be permit stipulations.

Studies and Monitoring

The BLM will cooperate closely with the State and Borough, monitoring activity on the Reserve, gathering priority resource data and identifying specific study and research needs.

Subsistence

The lease schedule, lease stipulations, sale rate, development likelihood and future site-specific coordination with the North Slope Borough adequately mitigate subsistence impacts.

ADDRESSES: Copies of the final ROD can be obtained from the Alaska State Office, Public Room, 701 C Street, Box 13, Anchorage, AK 99513; Fairbanks District Office, Public Room, North Post, Fort Wainwright, Box 1150, Fairbanks, AK 99707; and the Office of Public Affairs, Bureau of Land Management (130), 1800 C Street, N.W., Washington, D.C. 20240.

Copies will also be available for review at the following locations: Alaska Federation of Natives, 1577 O Street, Suite 304, Anchorage, AK 99501; Department of the Interior, Resources Library, 701 C Street, Box 36, Anchorage, AK 99513; North Slope Borough, Department of Planning, P.O. BILLING CODE 4310–84–M

Salt Lake District, Utah; Grazing Advisory Board Tour

AGENCY: Bureau of Land Management, Salt Lake District, Interior.

ACTION: Notice.

SUMMARY: Notice is hereby given in accordance with Pub. L. 92–463, that a tour and meeting of the Salt Lake District Grazing Advisory Board will be held on May 24 and 25, 1983.

The Public Tour will begin at 9:30 a.m. on May 24th at the Salt Lake District office, 2370 South 2300 West, Salt Lake City, Utah 84119. A tour of the Tintic Pastures Research Area will be held for the remainder of the day. On May 25th, the Board will tour selected allotments in the Tooele ES Area with the respective permittees and BLM personnel.

The meeting is open to the public. Interested persons may make oral statements between 7:30 to 8:30 a.m. June 25th or file written statements for the Board's consideration. Anyone wishing to make oral statements must notify the District Manager, 2370 South 2300 West, Salt Lake City, UT 84119, by May 15, 1983. Depending on the number of persons wishing to make a statement, a per person time limit may be established by the District Manager.

Summary minutes of the Board will be maintained at the District Office and will be available for public inspection and reproduction (during business hours) within 30 days following the meeting.

Frank W. Snell,

District Manager.

Fish and Wildlife Service

Availability of the Draft Environmental Impact Statement on the Cache River Basin: A Waterfowl Habitat Preservation Proposal

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: This notice advises the public that a draft environmental impact statement (DEIS) on the Cache River Basin: A Waterfowl Habitat Preservation Proposal will be available for public review by May 9.

The draft environmental impact statement (DEIS) considers environmental and socio-economic effects of protecting and preserving internationally significant waterfowl habitat within the ten-year floodplain of the lower and middle Cache River Basin. The DEIS evaluates impacts of alternative actions and determines the degree to which each would accomplish habitat preservation goals.

The eight alternatives being considered by the Fish and Wildlife Service (FWS) are:

Alternative No. 1, (Preferred Alternative)—Through Combined Fee Title, Easement Acquistion and Other Means, the FWS, AGF, Other Agencies, Groups, and Individuals Propose to Preserve All Privately Owned Valuable Waterfowl Habitat within the 133,000-Acre Ten-Year Floodplain;

Alternative No. 2—Combined Fee Title and Easement Acquisition by the FWS of Up to 72,000 Acres of Natural Waterfowl Habitat within the Ten-Year Floodplain;

Alternative No. 3—Combined Fee Title and Easement Acquisition by the FWS of Up to 92,000 Acres of Natural Waterfowl Habitat within the Ten-Year Floodplain;

Alternative No. 4— Easement Acquisition by the FWS of Up to 72,000 Acres of Natural Waterfowl Habitat within the Ten-Year Floodplain;

Alternative No. 5—Fee Title Acquisition by the FWS of Up to 92,000 Acres of Natural Waterfowl Habitat within the Ten-Year Floodplain;

Alternative No. 6—Fee Title Acquisition by the Arkansas Game and Fish Commission of Up to 92,000 Acres of Valuable Waterfowl Habitat within the Ten-Year Floodplain;

Alternative No. 7—Combined Fee Title and Easement Acquisition of Up to 70,000 Acres by the U.S. Army Corps of Engineers as Mitigation for the Construction of the Authorized Cache River Flood Control (Channelization) Project; and,

Upper Delaware Citizens Advisory Council; Meeting

AGENCY: Upper Delaware Citizens Advisory Council, National Park Service, Interior.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the date of the forthcoming meeting of the Upper Delaware Citizens Advisory Council. Notice of this meeting is required under the Federal Advisory Committee Act.

DATE: May 27, 1983, 7 p.m.

ADDRESS: Town of Tusten Hall, Narrowsburg, New York.

FOR FURTHER INFORMATION CONTACT: John T. Hutzky, Superintendent, Upper Delaware National Scenic and Recreational River, Drawer C, Narrowsburg, N.Y. 12764–0159 (717) 729–7135.

SUPPLEMENTARY INFORMATION: The Advisory Council was established under section 704(f) of the National Parks and Recreation Act of 1978, Pub. L. 95–625, 16 U.S.C. 1274 note, to encourage maximum public involvement in the development and implementation of the plans and program authorized by the Act. The Council is to meet and report to the Delaware River Basin Commission, the Secretary of the Interior, and the Governors of New York and Pennsylvania in the preparation of a management plan and on programs which relate to land and water use in the Upper Delaware region. The agenda for the meeting will include discussion of Draft Management Plan.

The meeting will be open to the public. Any member of the public may file with the Council a written statement concerning agenda items. The statement should be addressed to the Council c/o Upper Delaware National Scenic and Recreational River, Drawer C, Narrowsburg, N.Y. 12764–0159. Minutes of the meeting will be available for inspection four weeks after the meeting at the permanent headquarters of the Upper Delaware National Scenic and Recreational River, River Road, 1¾ miles north of Narrowsburg, N.Y., Damascus Township, Pennsylvania.

Dated: April 29, 1983.

Don H. Castleberry,

Acting Regional Director, Mid-Atlantic Region.

BILLING CODE 4310–70–M

INTERSTATE COMMERCE COMMISSION

Motor Carrier; Applications; Decision-Notice

[OP 5MCF–199]

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 1134. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by 49 CFR 1182.1 of the Commission's Rules of Practice. See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11344 and 11349*, 363 I.C.C. 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register**. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirement of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1182.2. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1182.2(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Dated: April 18, 1983.

By the Commission, Review Board No. 2, members Carleton, Williams and Ewing.

Agatha L. Mergenovich,

Secretary.

MC–F–15220, filed March 30, 1983. Applicant MICHIGAN TRAILWAYS, INC. (MICHIGAN TRAILWAYS) (12154 N. Saginaw Rd., P.O. Box 98, Clio, MI 48420)—CONTROL—WHITE PINE TRANSIT CO., INC., (WHITE PINE) (400 E. Leonard St., P.O. Box 681, Ironwood, MI 49938). Representative: Robert J. Brooks, 1828 L St., N.W., Suite 1111, Washington, DC 20036. Michigan Trailways seeks authority to acquire control of White Pine, a motor common carrier of passengers. Stanley L. Cupp, president and majority stockholder of Michigan, also seeks authority to acquire control of White Pine. By certificate issued March 13, 1969, in MC–129948 (Sub-2), White Pine was granted authority to operate as a motor common carrier transporting passengers and their baggage, in the same vehicle with passengers, over regular routes, between (a) Iron Belt, WI, and White Pine, MI; (b) Mercer, WI, and Wakefield, MI, and (c) Ashland, WI, and Ironwood, MI, serving all intermediate points, with restrictions. Michigan Trailways acquired all of the issued and outstanding stock of White Pine through an agreement dated April 21, 1982, at which time applicant was unaware that White Pine was a motor common carrier and that Commission approval was necessary pursuant to 49 U.S.C. 11343(a). Michigan Trailways is a motor common carrier of passengers pursuant to Certificate No. MC 109173 and sub-numbers thereunder.

Notes.—(A) A directly related extension application has been filed in No. MC 109173 (Sub-No. 7), which was published in the **Federal Register** on January 14, 1983, for authority to transport passengers, (1) over regular routes, between Flint and Detroit, MI: from Flint over U.S. Hwy 23 to junction Interstate Hwy 69, then over Interstate Hwy 69 to junction Interstate Hwy 475, then over Interstate Hwy 475 to junction Interstate Hwy 75, then over Interstate Hwy 75 to Detroit, and return over the same route, serving all intermediate points and the off-route point of Pontiac, MI; (2) over irregular-routes, in charter and special operations, between points in the United States. (B) As a condition to a grant of that authority, Michigan Trailways was required to file this continuance in control application or submit an affidavit indicating why such approval is unnecessary. (C) It was through the above-mentioned **Federal Register** publication and subsequent investigation by Michigan Trailways that White Pine's motor carrier status was ascertained.

Motor Carriers; Finance Applications; Decision-Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10928, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 5, (202) 275–7289.

Volume No. OP5–FC–198

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

MC–FC–81414. By decision of April 26, 1983 issued under U.S.C. 10926 and the transfer rules at 49 CFR Part 1161, Review Board number 3 approved the transfer to LES ENTREPRISES ROLAND BERGERON, INC., OF STE–THERESE, P.Q., CANADA, of Certificate No. MC–143928 issued December 1, 1978, to TRANSPORT BLAINVILLE, INC., OF ST. EUSTACHE, P.Q., CANADA, authorizing the transportation over irregular routes of passengers and their baggage in round-trip charter operations beginning and ending at ports of entry on the International Boundary line between the United States and Canada, at points in New York, Vermont, New Hampshire, and Maine, and extending to points in the United States (except AK and HI). Representative: Russell R. Sage, P.O. Box 11278, Alexandria, VA 22312.

For the following, please direct status calls to Team 4 at 202–275–7669.

Volume No. OP4–FC–258

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing.

MC–FC–81410. By decision of April 28, 1983 issued under 49 U.S.C. 10924 and 10926 and the transfer rules at 49 CFR Parts 1045B and 1161, Review Board Number 2 approved the transfer to REVIS TRUCK BROKERAGE, INC., Cumming, GA, of Certificate No. MC–159636 (A) and License No. MC–159636 (B), both issued June 14, 1982, to JERRY YORK, doing business as YORK TRUCK BROKERAGE, Cumming, GA, authorizing the transportation of (1) general commodities (except classes A and B explosives, household goods and commodities in bulk), between Cumming Alpharetta, Roswell, Marietta, Dawsonville, and Gainesville, GA, on the one hand, and, on the other, points in the U.S. (except AK and HI), and (2) as a broker, arranging for the transportation of general commodities (except household goods), between points in the U.S. (except AK and HI). Representative: Barbara R. Turner, 100 Tower Rd., Cumming, GA 30130, 404–889–0110, for applicants.

Motor Carriers; Notice of Proposed Exemptions

AGENCY: Interstate Commerce Commission.

ACTION: Notices of proposed exemptions.

SUMMARY: The motor carriers shown below seek exemptions pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 11343*, 367 I.C.C. 113 (1982), 47 FR 53303 (November 24, 1982).

DATES: Comments must be received within 30 days after the date of publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood, (202) 275–7977.

SUPPLEMENTARY INFORMATION: Please refer to the petition for exemption, which may be obtained free of charge by contacting petitioner's representative. In the alternative, the petition for exemption may be inspected at the offices of the Interstate Commerce Commission during usual business hours.

Decided: April 26, 1983.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

Volume No. OP–5–F–200

MC–F–15238 CENTRE, LTD.—control exemption—CARTWRIGHT VAN LINES, INC., and CARTWRIGHT MOVING & STORAGE CO., INC. Centre, Ltd., a non-carrier holding company, seeks an exemption from the requirements under section 11343 of prior regulatory approval to acquire control of 100 percent of the issued and outstanding stock of Cartwright Van Lines, Inc. (MC–88368) and its wholly owned subsidiary Cartwright International Van Lines, Inc. (FF–360), and 80 percent of the issued and outstanding stock of Cartwright Moving & Storage Co., Inc. (MC–152324). Send comments to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423; (2) Petitioner's representative, Thomas R. Kingsley, 10614 Amherst Ave., Silver Spring, MD 20902. Comments should refer to No. MC–F–15238.

MC–F–15243 LAMBE'S TRUCKING LTD.—purchase exemption—NICOLL TRUCKING (MEDICINE HAT) LTD. Lambe's Trucking Ltd. seeks an exemption from the requirement under section 11343 of prior regulatory approval for its purchase of the authority of Nicoll Trucking (Medicine Hat) Ltd. contained in Certificates No. MC–140686 (Sub-Nos. 2, 3, and 4) authorizing transportation of Mercer commodities, lumber and wood products, building materials, and chemicals and related products between ports of entry in Washington, Idaho, Montana, and North Dakota, on the one hand, and, on the other, described points in the United States. Send comments to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423 and (2) Petitioner's representative, John T. Wirth, Nelson & Harding, 2800 Petro-Lewis Tower, 717 Seventeenth Street, Denver, CO 80202, (303) 892–6700. Comments should refer to No. MC–F–15243.

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisified before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate of foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service in for a named shipper "under contract."

Please direct status inquiries to Team Five at 202–275–7289.

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to the public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board No. 2. Members Carleton, Williams, and Ewing.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

BILLING CODE 7035–01–M

[I.C.C. Order No. P–52]

Rail Carriers; Western Railroad Co.; Passenger Train Operation

It appearing, that the National Railroad Passenger Corporation (Amtrak) has established through passenger train service between Seattle, Washington and Los Angeles, California. The operation of these trains requires the use of the tracks and other facilities of Southern Pacific Transportation Company (SP). A portion of the SP tracks near Dunsmuir, California (M.P. 327.6) are temporarily out of service because of a derailment. An alternative route is available via the Western Pacific Railroad Company between Sacramento and Bieber, California.

It is the opinion of the Commission that the use of such alternate route is necessary in the interest of the public and the commerce of the people; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered,

(a) Pursuant to the authority vested in me by order of the Commission decided April 29, 1981, and of the authority vested in the Commission by Section 402(c) of the Rail Passenger Service Act of 1970 (45 U.S.C. 562(c)), the Western Pacific Railroad Company (WP), is directed to operate trains of the National Railroad Passenger Corporation (Amtrak) between a connection with Southern Pacific Transportation Company (SP) at Sacramento, California and Bieber, California.

(b) In executing the provisions of this order, the common carriers involved shall proceed even though no agreements or arrangements now exist between them with reference to the compensation terms and conditions applicable to said transportation. The compensation terms and conditions shall be, during the time this order remains in force, those which are voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, the compensation terms and conditions shall be as hereafter fixed by the Commission upon petition of any or all of the said carriers in accordance with pertinent authority conferred upon it by the Interstate Commerce Act and by the Rail Passenger Service Act of 1970, as amended.

(c) *Application.* The provisions of this order shall apply to intrastate, interstate and foreign commerce.

(d) *Effective date.* This order shall become effective at 1:50 a.m. (EST), April 23, 1983.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., April 25, 1983, unless otherwise modified, amended, or vacated by order of this Commission.

This order shall be served upon Western Pacific Railroad Company, and upon the National Railroad Passenger Corporation (Amtrak), and a copy of this order shall be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., April 23, 1983.

Interstate Commerce Commission.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Bureau of Prisons

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Proposed Activation of the Former Air Force Station at Mt. Laguna, Cleveland National Forest, San Diego County, California

AGENCY: Bureau of Prisons, Justice.

ACTION: Notice of intent to prepare a draft environmental impact statement.

SUMMARY: 1. *Proposed Action:* The Bureau of Prisons proposes to activate the former Air Force Station at Mt. Laguna, California for use as a Federal Prison Camp for minimum custody inmates. The 140-acre property consists of 66 structures containing approximately 172,000 square feet.

The Bureau of Prisons has been, and continues to be, actively investigating surplus military facilities which can be converted to camp facilities housing inmates with minimum custody classifications. Also, the Bureau of Prisons is committed to using existing facilities whenever possible to avoid costly new construction.

The proposed Federal Prison Camp would be used to house 250 inmates, and approximately 50 full-time staff would provide 24-hour supervision.

The Bureau of Prisons would be required to obtain a Special Use Permit from the Forest Service in order to operate the Federal Prison Camp.

2. *Alternatives:* Alternative courses of action considered will include but not be limited to (1) activation of the facility by other State and Federal agencies, (2) the use of other surplus facilities for a Federal Prison Camp, (3) contracting for correctional services at State or County facilities, and (4) no action taken.

3. *Scoping Process:* The Bureau of Prisons prepared an Environmental Assessment for circulation and comments in October, 1982. On November 15, 1982, the San Diego Association of Governments reviewed the proposal and generated several questions which required further study.

On December 12, 1982, the Bureau of Prisons and the Forest Service jointly held a public meeting at Mt. Laguna, at which time the public was afforded the opportunity to learn more about the proposed Federal Prison Camp. Subsequently, the Bureau of Prisons decided that a complete EIS was needed.

4. *Availability:* The Draft EIS is currently scheduled to be available in June, 1983. This schedule is subject to change without notice.

5. *Responsible Official:* Loy S. Hayes, Chief, Facilities Development and Operations, Bureau of Prisons, 320 First St., NW., Washington, D.C. 20534.

Dated: May 2, 1983.

Loy Hayes,

Chief Facilities Development and Operations.

BILLING CODE 4410-05-M

NATIONAL CAPITAL PLANNING COMMISSION

Revised Procedures for Public Participation

AGENCY: National Capital Planning Commission (NCPC).

ACTION: Notice of proposed amendment.

SUMMARY: The proposed amendment to the Commission's Revised Procedures for Public Participation (48 FR 9095, March 3, 1983) sets forth guidelines for oral presentations at Commission meetings by members of the public.

DATE: Comments must be received on or before June 6, 1983.

ADDRESS: Interested persons should submit comments to Daniel H. Shear, Secretary to the Commission, National Capital Planning Commission, 1325 G Street NW., Washington, D.C. 20576.

FOR FURTHER INFORMATION CONTACT: Samuel K. Frazier, Public Affairs Officer, National Capital Planning Commission, 1325 G Street NW., Washington, D.C. 20576, (202) 724-0174.

SUPPLEMENTARY INFORMATION: Add at end of the section entitled *"How do you express your views to the Commission?":*

The following guidelines are applicable to oral presentations:

(a) *Length of presentation:* Presentations of individuals who are representing themselves are ordinarily limited to 5 minutes. Presentations of representatives of organizations are ordinarily limited to 10 minutes. Organizations may use one or more participants in making their presentation. However, the Chairman may set different time limits for both individuals and organizations, depending on the nature of the item, the number of speakers who have registered, and the total time available.

(b) *Copies of written statements:* Written statements are not required of those who make oral presentations. However, they are preferred if at all possible. If a speaker desires to submit a written statement or other materials to each member of the Commission, they must be submitted to the Secretary to the Commission by noon of the day preceding the day of the meeting, and copies will be reproduced by the Secretary and distributed to each member of the Commission prior to the beginning of the meeting. Otherwise, materials must be delivered in twenty-five copies to the Public Affairs Officer prior to the beginning of the meeting.

(c) *Representatives of organizations:* Speakers representing organizations should preface their remarks by identifying the organization, its purpose, and the number of members, indicating their position or title in the organization, and stating the date on which the organization met and took a position on the matter before the Commission.

(d) *Nature of comments:* Comments are solicited on all matters before the Commission. However, comments on non-Federal plans and projects should be limited to their effect on Federal interests in the National Capital Region. For more detailed information, please refer to the section below entitled: "What should your statement contain?"

(e) *Order of speakers:* Ordinarily the order of speakers is determined by the date and time on which they registered. However, the Chairman may adjust the order of speakers.

Daniel H. Shear,

Secretary to the Commission.

April 19, 1983.

BILLING CODE 7520-01-M

NATIONAL SCIENCE FOUNDATION

Forms Submitted to OMB for Review

In accordance with the Paperwork Reduction Act and OMB Guidelines, NSF is posting this notice of information collection that will affect the public.

Agency Clearance Officer: Herman G. Fleming (202) 357-9421.

OMB Officer: Gwendolyn Pla, (202) 395-7313.

Title: Request for Proposals.

Affected Public: Individuals or Households; State or Local Governments; Businesses or Other For-Profit; Non-Profit Institutions; Small Businesses or Organizations.

Number of Responses: 32 responses; total number of hours, 3,870.

Abstract: Request for Proposal used to competitively solicit proposals in response to NSF need for services. Impact will be on those individuals or organizations who elect to submit proposals in response to RFP. Information gathered will be evaluated in light of NSF procurement requirements to determine who will be awarded a contract.

Dated: May 2, 1983.

Herman G. Fleming,

OMB Clearance Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Meeting

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the Advisory Committee on Reactor Safeguards will hold a meeting on May 12-14, 1983, in Room 1046, 1717 H Street, NW., Washington, D.C. Notice of this meeting was published in the **Federal Register** on April 27, 1983.

The agenda for the subject meeting will be as follows:

Thursday, May 12, 1983

8:30 A.M.-8:45 A.M.: Opening Remarks (Open)—The ACRS Chairman will report briefly on matters of current interest regarding ACRS activities.

8:45 A.M.-12:30 P.M.: LaCrosse Boiling Water Reactor (Open)—The members will hear and discuss the report of the ACRS project subcommittee and consultants who may be present regarding the SEP/IPSAR review of this facility.

Members of the NRC Staff and representatives of the Licensee will make presentations and respond to questions regarding this matter.

Portions of this session will be closed as necessary to discuss Proprietary information related to this project.

1:30 P.M.-2:30 P.M. Regionalization of NRC Activities (Closed)—The members of the Committee will discuss proposed NRC plans to regionalize staff activities.

This portion of the meeting will be closed to discuss matters which relate solely to the internal personnel rules and practices of the agency.

2:30 P.M.-3:30 P.M.: Licensee Event Reporting (Open)—The members of the Committee will discuss proposed changes in NRC rules on Licensee Event Reports (10 CFR 50.75) and Immediate Notification Requirements (10 CFR 50.73). Representatives of the NRC Staff will participate as appropriate.

3:30 P.M.-4:40 P.M.: Proposed Regulatory Guide on Instrument Sensing Lines (Task No. IC 126-5) (Open)—The Committee members will discuss the proposed NRC Regulatory Guide On Instrument Sensing Lines. Members of the NRC Staff will participate as appropriate.

4:30 P.M.-5:30 P.M.: Evaluation of Operating Experience (Open)—The members of the Committee will discuss proposed ACRS comments regarding the NRC sponsored report (NUREG/CR-2497), "Precursors to Potential Severe Core Damage Accidents."

Friday, May 13, 1983

8:30 A.M.-9:00 A.M.: Future ACRS Activities (Open)—The Committee members will discuss anticipated ACRS Subcommittee and full Committee activities including proposed procedures for ACRS participation in NRC rulemaking and policy making activities.

9:00 A.M.-10:00 A.M.: Preparation for ACRS Meeting with NRC Commissioners (Open)—The members of the Committee will review ACRS positions and discuss proposed comments regarding the NRC Safety Research Program on Severe Accident Research, the NRC Accident Source Term Program.

10:00 A.M.-11:30 A.M.: Meeting with NRC Commissioners (Open)—The Committee will meet with members of the Commission to discuss topics noted above.

11:30 A.M.-12:30 P.M. and 1:30 P.M.-3:30 P.M.: Haddam Neck Nuclear Plant (Open)—The Committee members will hear the report of its Subcommittee and consultants who are present regarding the SEP/IPSAR for this project.

Representatives of the NRC Staff and the Licensee will make presentations and respond to questions regarding this matter.

3:30 P.M. -6:30 P.M.: Standardized Nuclear Power Plant (GESSAR-II) (Open)—The members will hear and discuss the report of the ACRS Subcommittee and consultants who are present regarding the request for an FDA for this standardized nuclear island concept.

Representatives of the NRC Staff and the Applicant (General Electric Company) will make presentations and respond to questions regarding this matter.

Portions of this session will be closed as necessary to discuss Proprietary Information applicable to this project.

Saturday, May 14, 1983

8:30 A.M.-12:00 Noon: Preparation of ACRS Reports to NRC (Open/Closed) The Committee members will discuss proposed reports to NRC regarding matters considered during this meeting.

Portions of this session will be closed as necessary to discuss Proprietary Information applicable to the matters being discussed, and information that will be involved in an adjudicatory proceeding.

1:00 P.M.-3:30 P.M.: Reports of ACRS Subcommittees (Open)—The Committee will hear and discuss the reports of designated Subcommittees regarding safety-related matters including the proposed DOE Site Characterization Report on The Basalt Waste Isolation Project for the Hanford Reservation as a site for high level waste disposal, proposed changes in ECCS evaluation models and associated analysis methods for boiling water reactors, use of PRA in the safety evaluation of nuclear facilities, and developments in the consideration of extreme environmental phenomena (seismic events).

3:30 P.M.-4:00 P.M.: Miscellaneous (Open/Closed)—This session will be used to complete discussion of items considered during this meeting. A portion will be closed as necessary to discuss activities of members that would represent an undue invasion of personal privacy.

Procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 1, 1982 (47 FR 43474). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture and television cameras during

VOL

1983
UMI

this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a telephone call to the ACRS Executive Director (R. F. Fraley) prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

I have determined in accordance with Subsection 10(d) Pub. L. 92–463 that is is necessary to close portions of this meeting as noted above to discuss Proprietary Information (5 U.S.C. 552b(c)(4)) information which will be involved in an adjudicatory proceeding (5 U.S.C. 552b(c)(10)) and information that relates solely to the internal personnel rules and practices of the agency (5 U.S.C. 552b(c)(2)).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 202/634–3265), between 8:15 A.M. and 5:00 P.M. EDT.

Dated: April 29, 1983.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590–01–M

[Docket Nos. 50–317 and 50–318]

Baltimore Gas and Electric Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 82 and 65 to Facility Operating Licenses Nos. DPR–53 and DPR–69, issued to Baltimore Gas and Electric Company, which revised Technical Specifications for operation of the Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2. The amendments were effective as of the date of issuance.

The amendments revise the Technical Specifications to correct typographical errors, establish procedures limiting overtime for personnel involved in safety related activities, increase the steam generator minimum pressurization temperature, delete a requirement on the pressurizer safety valve acoustic monitor, and change administrative requirements to provide for yearly audit and review of the safeguards contingency plan and emergency plan.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has make appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of the amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendments.

For further details with respect to this action, see (1) the application for amendments dated February 24, 1983, (2) Amendment Nos. 82 and 65 to License Nos. DPR–53 and DPR–69, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Calvert County Library, Prince Frederick, Maryland. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 21st day of April, 1983.

For the Nuclear Regulatory Commission.

Robert A. Clark,

Chief, Operating Reactors Branch No. 3, Division of Licensing.

[FR Doc. 83–11971 Filed 5–4–83; 8:45 am]

BILLING CODE 7590–01–M

[Docket Nos. 50–317 and 50–318]

Baltimore Gas & Electric Co. (Calvert Cliffs Nuclear Power Plant Unit Nos. 1 and 2); Exemption

I

The Baltimore Gas and Electric Company (the licensee) is the holder of Facility Operating License Nos. DPR–53 and DPR–69 which authorize operation of the Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2 These licenses provide, among other things, that they are subject to all rules, regulations and Orders of the Commission now or hereafter in effect.

The facility comprises two pressurized water reactors at the licensee's site located in Calvert County, Maryland.

II

On November 19, 1980, the Commission published a revised Section 10 CFR 50.48 and a new Appendix R to 10 CFR Part 50 regarding fire protection features of nuclear power plants (45 FR 76602). The revised §50.48 and Appendix R became effective on February 7, 1981. Section 50.48(c) established the schedules for satisfying the provisions of Appendix R. Section III of Appendix R contains fifteen subsections, lettered A through O, each of which specifies requirements for a particular aspect of the fire protection features at a nuclear power plant.

Subsection III.G.2 requires that fire detectors and an automatic fire suppression system be installed in areas of the plant where cables or equipment of redundant trains of systems, necessary to achieve and maintain hot shutdown conditions, are located in the same fire area outside containment and are separated by 20 feet free of intervening combustibles. By application dated March 4, 1983, the licensee requested relief from the above requirement as it applies to automatic fire suppression systems for the Units 1 and 2 intake structure.

Subsection III.G.3 requires that fixed fire suppression be provided in areas where alternative shutdown capability has also been provided. Although the March 4, 1983 application requests relief from the requirement to provide fixed/automatic fire suppression in the control room complex pursuant to Subsection III.G.2, we interpret this as a request for relief pursuant to Subsection III.G.3. This is appropriate since an alternative shutdown means is provided for the control room complex.

The fire protection features of the control room complex (areas 400, 401, 402, 403, 404, 405, 406, 415, 431, 432, 434, 435, and 436) were addressed in the Calvert Cliffs Fire Protection Safety Evaluation Report (FPSER) which the NRC issued on September 14, 1979. The FPSER indicates that the control room complex fire protection features include smoke detectors installed in (1) HVAC ducts, (2) control room ceiling, (3) the log and instrument room (presently the Technical Support Center), (4) supervisor's office, and (5) computer rooms. The Computer rooms have, in addition, heat detectors located within cabinets and under the floor which actuate Halon 1301 systems protecting these cabinets and subfloor area. A manual hose and portable extinguishers are available for manual fire suppression.

As indicated in the March 4, 1983 application, improvements have been made in the control room complex fire protection features since issuance of the FPSER. These improvements include: (1) Providing nozzles for manual hose protection compatible with the hazards and equipment in the control room; (2) removal of all wooden furniture and shelves from the control room complex and (3) metal partitions to separate adjoining panels from the computer terminal. The existing control room bullet-proof doors, which had not previously been shown to be "3-hour rated", have been tested and approved as indicated in the NRC letter dated August 16, 1982 and the accompanying Exemption. In addition to the above fire protection features, a review of Calvert Cliffs Technical Specification 6.2.2.a indicates that the control room must be continuously manned during all modes of reactor operation. Based upon the fire protection features provided and the existence of a continuous fire watch we conclude that any fire in the control room complex would be promptly detected and extinguished. Therefore, the addition of a fixed fire suppression system would not significantly enhance the fire protection features of the control room complex.

The second area addressed in the March 4, 1983 application is the intake structure. This area is important to safety since it contains the salt water pumps which provide cooling water for safety-related equipment. The intake structure is an enclosed concrete structure having a three hour fire rating. This area contains the circulating water pumps (six per unit) each of which is in a pit in the floor of the structure to contain any oil which may leak from the pump. Each pit is surrounded by a curb to prevent external flammable liquids from entering the pit. The circulating water pumps are separated from the salt water pumps by approximately 20 feet and from each other by over 30 feet.

Salt water pumps (three per unit) are located in separate concrete-lined pits below the floor level of the structure and are separated from each other by approximately 61 feet. The curbs for these pits have openings to allow access to equipment ladders. The licensee has indicated that these openings will be closed within six months to restore the integrity of the curbs. Each pump's motor is mounted approximately 14 feet above floor level directly above the pump. Power cables from each salt water pump are routed in conduit to the west wall of the intake structure and are separated by a minimum of 45 feet horizontally from those of the adjacent salt water pumps. The intake structure is provided with fire (smoke) detection and with portable fire extinguishers. The hose stations have sufficient hose to reach any fire with at least one effective water stream.

In summary, the intake structure can be characterized as having a low fire loading (approximately 16,000 BTU/ft²) and a large separation between redundant components of safety-related equipment. Because of the low fire loading, large volume and ceiling height, reasonable assurance is provided that a fire in the intake structure would be detected and efficiently extinguished prior to damaging the redundant salt water pumps in this area. Based on the above, we conclude that the installation of an automatic fire suppression system in the intake structure would not significantly improve the level of fire protection in this area.

III

Based on the consideration of the fire protection features of the control room complex and the intake structure, we conclude that the existing fire protection features provide fire protection that is equivalent to the technical requirements of Subsections III.G.2 and III.G.3, respectively. On this basis, the staff concludes that the installation of fixed fire suppression systems in the control room complex and intake structure would not significantly improve the fire suppression capability in these areas. Accordingly, relief from the technical requirements of Section III.G. of Appendix R to 10 CFR Part 50, as these requirements relate to installation of fixed fire suppression systems for the control room complex and the intake structure, should be granted.

IV

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, an exemption is authorized by law and will not endanger life or property or the common defense and security and is otherwise in the public interest and hereby grants the following exemption with respect to the requirements of Sections III.G.2 and III.G.3 of Appendix R to 10 CFR Part 50:

The installation of fixed/automatic fire suppression systems for the control room complex and the intake structure is not required for Calvert Cliffs Units 1 and 2.

The NRC staff has determined that the granting of this Exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

Dated at Bethesda, Maryland this 21st day of April, 1983.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing.

Gessar II BWR/6 Nuclear Island Design; Availability of Safety Evaluation Report

Notice is hereby given that the Office of Nuclear Reactor Regulation has published its Safety Evaluation Report on the proposed Final Design Approval for the GESSAR II BWR/6 Nuclear Island Design. The application for a Final Design Approval was docketed on February 22, 1982.

The report is being referred to the Advisory Committee on Reactor Safeguards and is being made available at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555 for inspection and copying. The report (Document No. NUREG–0979) can also be purchased, at current rates, from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161, and through the NRC GPO sales program by writing to the U.S. Nuclear Regulatory Commission, Attention Sales Manager, Washington, D.C. 20555.

Dated at Bethesda, Maryland, this 28th day of April 1983.

For the Nuclear Regulatory Commission.

Donald S. Brinkman,

Acting Chief, Standardization & Special Projects Branch, Division of Licensing.

Philadelphia Electric Co. (Limerick Generating Station, Units 1 and 2); Reconstitution of Atomic Safety and Licensing Appeal Board

Notice is hereby given that, in accordance with the authority conferred by 10 CFR 2.787(a), the Chairman of the Atomic Safety and Licensing Appeal Panel has reconstituted the Atomic Safety and Licensing Appeal Board for this operating license proceeding to substitute Gary J. Edles for Stephen F. Eilperin. As reconsitituted, the Appeal

VOL 48 ISS 88 MY 5 1983 UMI

Board for this operating license proceeding will consist of the following members:
Christine N. Kohl, Chairman
Gary J. Edles
Dr. Reginald L. Gotchy.

Dated: April 28, 1983.

Barbara A. Tompkins,
Secretary to the Appeal Board.

BILLING CODE 7590-01-M

[Docket Nos. 50-361 and 50-362]

Southern California Edison Co., et al.; Facility Operating License Nos. NPF-10 and NPF-15

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 18 to Facility Operating License No. NPF-10, and Amendment No. 6 to Facility Operating License No. NPF-15 to Southern California Edison Company (SCE), San Diego Gas and Electric Company, The City of Riverside, California and The City of Anaheim, California (licensees) for the San Onofre Nuclear Generating Station, Units 2 and 3 (the facility) located in San Diego County, California. These amendments are effective April 27, 1983.

The amendments modify the Emergency Preparedness license conditions to require further efforts to assemble and keep current a list of housebound people within the Plume Exposure Emergency Planning Zone, and to develop and initiate a training program to assist Orange County Transit District bus drivers in the event of a radiological emergency at San Onofre. These amendments were authorized by the Atomic Safety and Licensing Appeal Board's Decision of March 4, 1983, ALAB-717.

Issuance of these amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendments.

Notice of these amendments is subsumed by the prior public notice of the overall action regarding issuance of operating licenses for these facilities, published in the Federal Register on April 7, 1977 (42 FR 18460).

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendments.

For further details with respect to this action, see (1) the Atomic Safety and Licensing Appeal Board's Decision, ALAB-717, dated March 4, 1983 (2) Amendment No. 18 to Facility Operating License No. NPF-10, and (3) Amendment No. 6 to Facility Operating License No. NPF-15.

These items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and the San Clemente Library, 242 Avenida Del Mar, San Clemente, California 92672. A copy of items (1), (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 27th day of April, 1983.

For the Nuclear Regulatory Commission.

George W. Knighton,
Chief, Licensing Branch No. 3, Division of Licensing.

BILLING CODE 7590-01-M

[Docket Nos. 50-338 and 50-339]

Virginia Electric & Power Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 46 and 29 to Facility Operating License Nos. NPF-4 and NPF-7 issued to the Virginia Electric and Power Company (the licensee) which revised Technical Specifications for operation of the North Anna Power Station, Units No. 1 and No. 2 (the facility) located in Louisa County, Virginia. The amendments were effective as of the date of issuance.

The amendments revise the partial power multiplier from 0.2 to 0.3 for $F^{N}_{\Delta H}$. In addition, an administrative change has been made to the NA-2 TS 4.2.2.2.g. to provide consistency between the North Anna Power Station, Units No. 1 and No. 2 Technical Specifications.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since these amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated December 8, 1982, (2) Amendment No. 46 and No. 29 to Facility Operating Licenses No. NPF-4 and NPF-7 and (3) the Commission's related Safety Evaluation. These items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555 and the Board of Supervisor's Office, Louisa County Courthouse, Louisa, Virginia 23093 and at the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901. A copy of items (2) and (3) may be obtained upon request to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 22d day of April, 1983.

For the Nuclear Regulatory Commission.

Robert A. Clark,
Chief, Operating Reactors Branch #3, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-280]

Virginia Electric and Power Co.; Granting of Relief From ASME Code Requirements Inservice Inspection Requirements

The U.S. Nuclear Regulatory Commission (the Commission) has granted relief from certain requirements of the ASME Code, Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components," to Virginia Electric and Power Company (the licensee) for the Surry Power Station, Unit No. 1 located in Surry County, Virginia. The ASME Code requirments are incorporated by reference into the Commission's rules and regulations in 10 CFR Part 50.

The relief allows the licensee to replace three 1½-inch drain valves and one 2-inch manual isolation valve in the main steam system without performing

hydrostatic tests for the entire steam generators and a considerable portion of the main steam piping. A leakage test will be performed instead. This relief is the same as that provided in NRC letter dated October 1, 1982, for Unit 1 and the Evaluation of Relief Request attached to that letter applies to this relief request. In this instance, three steam generators are affected instead of one previously.

The request for this granting of relief complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the Evaluation of Relief Request dated October 1, 1982.

The Commission has determined that the granting of this relief will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

For further details with respect to this action, see (1) the request for relief dated March 16, 1983; (2) the letter to the licensee dated April 27, 1983; and (3) the letter to the licensee dated October 1, 1982, transmitting the Commission's related Evaluation of Relief Request. These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the Swem Library, College of William and Mary, Williamsburg, Virginia 23185. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 27th day of April 1983.

For the Nuclear Regulatory Commission.

Steven A. Varga,
Chief, Operating Reactors Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-313]

Arkansas Power & Light Co.; Issuance of Amendment to Facility Operating License and Granting of Relief From ASME Section XI Inservice Inspection Requirements

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 77 to Facility Operating License No. DPR-51, issued to Arkansas Power and Light Company (the licensee), which revised the Technical Specifications for operation of Arkansas Nuclear One, Unit No. 1 (ANO-1) located in Pope County, Arkansas. The amendment is effective as of the date of issuance.

The amendment modifies the Technical Specifications relating to inservice inspection requirements of safety class components.

By letter dated April 18, 1983, as supported by the related Safety Evaluation, the Commission has also granted to the licensee relief from certain requirements of the ASME Code, Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components". The relief relates to the inservice inspection program for ANO-1. The ASME Code requirements are incorporated by reference into the Commission's rules and regulations in 10 CFR Part 50. The relief is effective as of its date of issuance.

The application for the amendment and request for relief comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment and letter granting relief. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment and the granting of this relief will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4), an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment and request for relief dated October 19, 1977, as supplemented December 15, 1978, (2) Amendment No. 77 to License No. DPR-51, (3) the Commission's related Safety Evaluation and (4) the Commission's letter to the licensee dated April 18, 1983. These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Arkansas Tech University, Russellville, Arkansas. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 18th day of April 1983.

For the Nuclear Regulatory Commission.

John F. Stolz,
Chief, Operating Reactors Branch No. 4, Division of Licensing.

[FR Doc. 83-12100 Filed 5-4-83; 8:45 am]
BILLING CODE 7590-01-M

[Docket Nos. 50-295 and 50-304]

Commonwealth Edison Co. (Zion Station, Unit Nos. 1 and 2); Revised Order Confirming Licensee Commitments on Post-TMI Related Issues

I

Commonwealth Edison Company (the licensee) is the holder of Facility Operating License Nos. DPR-39 and DPR-48 which authorizes the operation of the Zion Station, Unit Nos. 1 and 2 (the facilities) at power levels not in excess of 3250 megawatts thermal. The facilities are pressurized reactors (PWRs) located at the licensee's site in Zion, Illinios.

II

Following the accident at Three Mile Island Unit No. 2 (TMI-2) on March 28, 1979, the Nuclear Regulatory Commission (NRC) staff developed a number of proposed requirements to be implemented on operating reactors and on plants under construction. These requirements include Operational Safety, Siting and Design, and Emergency Preparedness and are intended to provide substantial additional protection in the operation of nuclear facilities based on the experience from the accident at TMI-2 and the official studies and investigations of the accident. The staff's proposed requirements and schedule for implementation are set forth in NUREG-0737, "Clarification of TMI Action Plan Requirements." Among these requirements are a number of items, consisting of hardware modifications, administrative procedure implementation and specific information to be submitted by the licensee, scheduled to be completed on or after July 1, 1981. On March 17, 1982, a letter (Generic Letter 82-05) was sent to all licensees of operating power reactors for those items that were scheduled to be implemented from July 1, 1981 through March 1, 1982. Subsequently, on May 5, 1982, a letter (Generic Letter 82-10) was also sent to all licensees of operating power reactors for those items that were scheduled for implementation after March 1, 1982. These letters are hereby

VOL 48 ISS 88 MAY 5 1983 UMI

incorporated by reference. In these letters each licensee was requested to furnish within 30 days pursuant to 10 CFR 50.54(f) the following information for items which the staff had proposed for completion on or after July 1, 1981:

(1) For applicable items that have been completed, confirmation of completion and the date of completion, (2) for items that have not been completed, a specific schedule for implementation, which the licensee committed to meet, and (3) justification for delay, demonstration of need for the proposed schedule, and a description of the interim compensatory measures being taken.

Commonwealth Edison Company responded to Generic Letter 82–05 by letters dated April 15, 1982, November 29, 1982 and January 14, 1983; the licensee responded to Generic Letter 82–10 by letter dated July 24, 1982. On March 14, 1983, the Commission issued an Order Confirming the Licensee's commitments to implement certain post-TMI related items set forth in NUREG 0737. By letter of March 30, 1983, further clarified by letter of April 8, 1983, the Commonwealth Edison Company informed the staff of technical difficulties and delays in hardware delivery and requested revision of completion dates for three items, II.B.2, II.B.3, II.F.1(2). The staff's evaluation of the licensee's proposed delays for these items is provided herein:

II.B.2 Plant Shielding

As part of the plant shielding task, the radiation monitor which controls the control room air intake is being replaced with a new monitor that is part of the SPING computerized monitoring system. The new monitor has been installed, calibrated, and tested. However, a new operator for the control room air intake damper is needed to make the system fully operational. The manufacturer's delivery date for this item has been extended beyond licensee's original estimate.

In the interim, the damper has been placed in the accident mode, which isolates the outside air intake and routes the air flow through charcoal filters. Operation in this mode will provide the necessary protection until the new damper operator can be installed. In addition, in the interim, there is an existing monitor that is serving the air control function until the SPING problem can be fixed. This interim operation using the existing monitor is acceptable. All other immediate requirements for this task item have been completed.

II.B.3 Post Accident Sampling

The containment air sample radiation monitor is also being upgraded with the SPING monitoring system discussed above. The installation for Unit 1 is complete. For Unit 2 completion is expected in April 1983. There is an existing radiation monitor providing containment air sampling measurements and its operation during the interim period is aceptable. All other immediate requirements for this task have been completed.

II.F.1.2 Accident Monitoring Instrumentation

The existing vent stack radiation monitors are being replaced with new monitors that are part of the SPING monitoring system. The electronics-related problems previously identified have recently been resolved, and final calibration is in progress at this time on both units. In addition, the Unit 2 sample vacuum pump has failed and must be replaced. The actions are expected to be completed by the end of April 1983. In the interim, the existing monitors will continue to provide the necessary monitoring functions. The interim operation of the existing vent stack monitor is acceptable. All other immediate requirements for this task have been completed.

We find, based on the above evaluation, that: (1) The licensee has taken corrective actions regarding the delays and has made a responsible effort to implement the NUREG–0737 requirements noted: (2) there is good cause for the several delays (unexpected design complexity, interface problems, and equipment delays); and (3) as noted above, interim compensatory measures have been provided.

IV

Accordingly, pursuant to Sections 103, 161i, and 161o of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 2 and 50, it is hereby ordered that the licensee shall:

Implement and maintain items II.B.2, II.B.3, and II.F.1(2) described in the Attachments to this Order in the manner described in the licensee's submittals noted in Section III herein no later than the dates in the Attachments.

V

The licensee may requrest a hearing on this order within 20 days of the date of publication of this Order in the **Federal Register.** A request for a hearing shall be addressed to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. A copy shall also be sent to the Executive Legal Director at the same address.

If a hearing is requested by the licensee, the Commission will issue an Order designating the time and place of any such hearing.

If a hearing is held concerning this Order, the issue to be considered at the hearing shall be whether the licensee should comply with the requirements set forth in Section IV of this Order. This Order is effective upon expiration of the time within which a hearing may be requested.

For the Nuclear Regulatory commission.

Darrell G. Eisenhut,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

Dated at Bethesda, Marland this 26th day of April 1983.

Dairyland Power Cooperative; Availability of Draft Integrated Plant Safety Assessment Report for the LaCrosse Boiling Water Reactor

The Nuclear Regulatory Commission's (NRC) Office of Nuclear Reactor Regulation (NRR) has published its Draft Integrated Plant Safety Assessment Report related to Dairyland Power Cooperative's LaCrosse Boiling Water Reactor, located in Vernon County, Wisconsin.

The report documents the review completed under the Systematic Evaluation Program (SEP). The SEP was initiated by the NRC to review the design of older operating nuclear reactor plants to reconfirm and document their safety. The review has provided for: (1) An assessment of the significance of differences between current technical positions on selected safety issues and those that existed when LaCrosse was licensed, (2) a basis for deciding on how these differences should be resolved in an integrated plant review, and (3) a documented evaluation of plant safety. Equipment and procedural changes have been identified as a result of the review.

The report is being referred to the Advisory Committee on Reactor Safeguards and is being made available at the NRC's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555 and at the LaCrosse Public Library, 800 Main Street, LaCrosse, Wisconsin 54601 for inspection and copying. Single copies of this report (Document No. NUREG–0827) may be requested from the U.S. Nuclear Regulatory Commission, Director, Division of Technical Information and Document Control, Washington, D.C. 20555, Attention: Publications Unit.

Dated at Bethesda, Maryland this 18th day of April 1983.

For the Nuclear Regulatory Commission.

Walter A. Paulson,

Acting Chief, Operating Reactors Branch No. 5, Division of Licensing.

[Docket Nos. 50–269, 50–270 and 50–287]

Duke Power Co.; Notice of Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 120, 120 and 117 to Facility Operating Licenses Nos. DPR–38, DPR–47 and DPR–55, respectively, issued to Duke Power Company, which revised the Technical Specifications (TSs) for operation of the Oconee Nuclear Station, Units Nos. 1, 2 and 3, located in Oconee County, South Carolina. The amendments are effective as of the date of issuance.

VOL
48
ISS
88
MY
5
1983
UMI

These amendments revise the TS withdrawal schedule for the reactor vessel surveillance capsules.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of these amendments.

For further details with respect to this action, see: (1) The application for amendments dated February 23, 1983, (2) Amendments Nos. 120, 120, and 117 to Licenses Nos. DPR–36, DPR–47 and DPR–55, respectively, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Oconee County Library, 501 West Southbroad Street, Walhalla, South Carolina 29691. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 15th day of April 1983.

For the Nuclear Regulatory Commission.

John F. Stolz,

Chief Operating Reactors Branch No. 4, Division of Licensing.

Gulf States Utilities Co., et al. (River Bend Station, Units 1 and 2); Prehearing Conference Order

April 29, 1983.

Pursuant to 10 CFR 2.751a, and upon consideration of a conflict in the schedule of the Board Chairman with the prehearing conference date, the oral representation of the parties that they have no objection to a change in the date, and upon consideration of the entire record in this matter, it is this 29th day of April, 1983 ordered:

1. That the prehearing conference shall commence at 9:30 A.M. on Tuesday, June 14, 1983 in Courtroom 801 of the State District Court, 19th Judical District, Governmental Bldg., 222 St. Louis Street, Baton Rouge, LA 70801, and continue from day to day until completed; and

2. That paragraphs 2 and 3 of this Board's Order dated April 5, 1983 shall remain in full force and effect.

For The Board.

B. Paul Cotter, Jr.,

Administrative Judge.

[Docket No. 50-395]

Virgil C. Summer Nuclear Station (Unit No. 1); Notice of Issuance of Amendment to Facility Operating License No. NPF-12

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 15 to Facility Operating License No. NPF–12, issued to South Carolina Electric & Gas Company and South Carolina Public Service Authority (the licensees) for the Virgil C. Summer Nuclear Station, Unit No. 1 (the facility) located in Fairfield County, South Carolina. The amendment changes the Technical Specifications to reflect the additional fire protection equipment that has been installed, the actual location and number of fire detectors in the plant, and the location of water spray and sprinkler systems.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) South Carolina Electric & Gas Company letter, dated October 8, 1982, (2) Amendment No. 15 to Facility Operating License No. NPF–12 with Appendix A Technical Specifications page changes, and (3) the Commission's related Safety Evaluation.

All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555 and the Fairfield County Library, Garden and Washington Streets, Winnsboro, South Carolina 29180. A copy of Amendment No. 15 may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 27th day of April 1983.

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

White House Science Council (WHSC); Meeting

The White House Science Council, the purpose of which is to advise the Director, Office of Science and Technology Policy (OSTP), will meet on May 19 and 20, 1983, in Room 5026, New Executive Office Building, Washington, D.C. The meeting will begin at 7:00 p.m. on May 19, recess and reconvene at 8:00 a.m. on May 20. Following is the proposed agenda for the meeting:

(1) Briefing of the Council, by the Assistant Directors of OSTP, on the current activities of OSTP.

(2) Briefing of the Council by OSTP personnel and personnel of other agencies on proposed, ongoing, and completed panel studies.

(3) Discussion of composition of panels to conduct studies.

The May 19 session and a portion of the May 20 session will be closed to the public.

The briefing on some of the current activities of OSTP necessarily will involve discussion of material that is formally classified in the interest of national defense or for foreign policy reasons. This is also true for a portion of the briefing on panel studies. As well, a portion of both of these briefings will require discussion of internal personnel procedures of the Executive Office of the President and information which, if prematurely disclosed, would significantly frustrate the implementation of decisions made requiring agency action. These portions of the meeting will be closed to the public pursuant to 5 U.S.C. 552b(c) (1), (2), and 9(B).

A portion of the discussion of panel composition will necessitate the disclosure of information of a personal nature, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Acordingly, this portion of the meeting will also be closed to the public, pursuant to 5 U.S.C. 552 b(c)(6).

The portion of the meeting open to the public will begin at 10:00 a.m. Because of the security in the New Executive Office Building persons wishing to attend the open portion of the meeting should contact Jerry Jennings, Executive Director of the Office of Science and Technology Policy at (202) 456–7740, prior to 3:00 p.m. on May 18. Mr. Jennings is also available to provide further information regarding this meeting.

Dated: April 28, 1983.

Jerry D. Jennings,

Executive Director, Office of Science and Technology Policy.

BILLING CODE 3170-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 13203; 811-1618]

American Option & Equity Fund, Inc.; Proposal To Terminate Registration

April 28, 1983.

Notice is hereby given that the Commission proposes, pursuant to Section 8(f) of the Investment Company Act of 1940 ("Act"), to declare by order on its own motion that American Option & Equity Fund, Inc. ("Fund"), 3301 Van Buren Street, Topeka, KS 66611, registered under the Act as an open-end, diversified, management investment company, has ceased to be an investment company as defined in the Act.

Information contained in the files of the Commission indicates that the Fund was organized by National Investment Corporation, Inc., a Topeka, Kansas-based holding company, under the laws of the State of Delaware on February 26, 1968, as American Equity Fund, Inc. The Fund registered under the Act on March 1, 1968, and on August 5, 1968, it filed a registration statement (File No. 2–29797) under the Security Act of 1933 ("1933 Act") in connection with a proposed public offering of its shares of capital stock. That registration statement was declared effective by the Commission on January 24, 1969.

On July 21, 1977, the Fund's shareholders voted to change its name from American Equity Fund, Inc., to American Option and Equity Fund, Inc. Financial statements contained in post-effective amendment number 18 to the fund's registration statement under the 1933 Act, filed with the Commission on April 3, 1978, disclosed that as of December 31, 1977, the Fund had 609,036 shares outstanding having an equivalent net asset value per share of $4.96, or total net assets of $3,022,729.

On October 25, 1978, the Fund's board of directors unanimously adopted resolutions declaring that it was advisable that the Fund be voluntarily dissolved in accordance with Delaware law and that it be deregistered as an investment company under the Act. At a meeting of the Fund's shareholders on December 18, 1978, shareholders approved the board of directors' resolutions providing for the liquidation and dissolution of the Fund. B. C. Christopher & Co., was selected as the Fund's agent to liquidate its portfolio at a cost to the Fund of 15 cents per share. A reserve in the amount of $37,000 to cover liquidation and dissolution expenses was established by the Fund's board of directors. The plan of liquidation provided that a certificate of dissolution was to be filed with the State of Delaware after the Fund's assets were distributed to shareholders. The distribution to shareholders in the amount of $4.56 per share was made on December 27, 1978, and since that date the Fund has done no business.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission, on its own motion, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and upon the taking effect of that order the registration of that investment company shall cease to be in effect.

Notice is further given that any interested person wishing to request a hearing on the aplication may, not later than May 23, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-12120 Filed 5-4-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 13205; 812-5518]

Capital Housing Partners—CLIII et al.; Filing of Application for Exemption

April 28, 1983.

Notice is hereby given that Capital Housing Partners—CLIII (the "Partnership"), a District of Columbia limited partnership, and its general partners, C.R.I., Inc. ("CRI"), William B. Dockser, Martin C. Schwartzberg and H. William Willoughby (collectively with CRI and the Partnership, "Applicants"), One Central Plaza, 11300 Rockville Pike, Rockville, Maryland 20852, filed an application on March 28, 1983, pursuant to Section 6(c) of the Investment Company Act of 1940 (the "Act"), for an order exempting the Partnership from all provisions of the Act and the rules and regulations thereunder. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicants state that the Partnership was organized to invest in four other limited partnerships (the "Local Limited Partnerships") which will own and operate government-assisted apartment complexes. Applicants state that the Partnership will operate as a "two-tier" partnership, that is, the Partnership, as a limited partner, will invest in the Local Limited Partnerships. The Local Limited Partnerships consist of: (1) An Illinois limited partnership and a Minnesota limited partnership, each of which owns and is developing a government-assisted apartment project for elderly and handicapped persons of low and moderate income and (2) a California limited partnership and an Arizona limited partnership, each of which owns and is developing a government-assisted apartment project for individuals and families of low and moderate income (the "Projects"). Applicants state that the managing general partner of the Partnership is CRI and that an affiliate of CRI will be a general partner in each Local Limited Partnership.

VOL 48 ISS 88 MY 5 1983 UMI

Applicants represent that the Partnership, in reliance upon Rule 506 under Section 4(2) of the Securities Act of 1933, will offer $6,110,000 of limited partnership interests in 100 units (the "Units") of $61,100 each, subject to increase or decrease in certain circumstances. Applicants state further that subscriptions for half Units may be accepted by the general partners, and accordingly, the Partnership's securities could be held by more than 100 persons. Applicants state that Merrill Lynch, Pierce, Fenner & Smith Incorporated and CRICO Securities Corporation, an affiliate of the general partners, and other selected broker dealers will act as selling agents for the offering of Units. Applicants state further that purchasers of Units will become limited partners ("Limited Partners") of the Partnership.

Applicants state that, although the Partnership's direct control over the management of each apartment complex is limited, the Partnership's ownership of interests in Local Limited Partnerships shall, in an economic sense, be tantamount to direct ownership of the apartment complexes themselves. According to the application, the interests in Local Limited Partnerships will have no substantial value other than their pro rata share of the value of the apartment complexes, and no Local Limited Partnership will generate a substantial amount of income or expense other than as directly related to the development, ownership and operation of its apartment complex. Applicants represent that, through its investment in the Local Limited Partnerships, the Partnership intends to realize (1) a potential increase in its equity in the Projects through amortization of the Projects' mortgage indebtedness, (2) cash flow from operations, (3) a potential increase in the value of the Projects, (4) cash distributions through potential refinancing of the Projects, and (5) certain current tax benefits.

Applicants state that the Partnership is organized as a limited partnership because a limited partnership is the only form of organization which provides investors with both (1) the ability to claim on their individual tax returns the deductions, losses, credits and other tax items arising from the Partnership's interests in Local Limited Partnerships which own and operate the Projects, and (2) liability limited to their capital investment. Applicants maintain that the purpose of the Partnership is to provide a vehicle for private investment in government-assisted apartment complexes in accordance with the determination made by Congress in the legislation creating the National Housing Partnership.

Applicants state that the Partnership will be controlled by its general partners pursuant to the Limited Partnership Agreement and Second Amended Certificate of Limited Partnership of the Partnership (the "Partnership Agreement"). Applicants maintain that the Limited Partners will not be entitled to participate in the control of the Partnership's business. Applicants further maintain that, under the Partnership Agreement, each Limited Partner is entitled to review all books and records of the Partnership at any and all reasonable times.

Section 6(c) of the act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision of the Act or of any rule or regulation under the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

According to the application, Investment Company Act Release No. 8456 (August 9, 1974) ("Release No. 8456") lists two conditions which must be satisfied by two-tier partnerships which invest in limited partnerships engaged in the development and building of housing for low and moderate income persons to obtain an exemption from the Act, pursuant to section 6(c) of the Act: (1) "interests in the issuer should be sold only to persons for whom investments in limited profit, essentially tax-shelter, investments would not be unsuitable," and (2) "requirements for fair dealing by the general partners of the issuer with the limited partners of the issuer should be included in the basic organizational documents of the company." The Partnership believes that the suitability standards applicable to the sale of the Units are consistent with the requirements of Release No. 8456. According to the application, each subscriber will represent, among other things, that (1) some part of the subscriber's income (without regard to the investment) through 1988 will be subject to federal income tax at the rate of 45% or more, and (2) the subscriber has either (a) a net worth, or joint net worth with his or her spouse, in excess of $1,000,000 as of the date of the subscription agreement, or (b) had individual gross income (exclusive of gross income of his or her spouse) in excess of $200,000 in 1981 and 1982, and reasonably expects to have individual gross income (exclusive of gross income of his or her spouse) in excess of $200,000 in 1983.

Applicants also state that the Partnership Agreement and Private Placement Memorandum contain numerous provisions designed to insure fair dealing by the general partners with the Limited Partners. Applicants represent that all compensation to be paid to the general partners and their affiliates is specified in the Private Placement Memorandum and no compensation will be payable to the general partners or any of their affiliates not so specified. Applicants maintain that all such compensation is fair and on terms no less favorable to the Partnership than would be the case if such arrangements had been made with independent third parties. Further, the application states that the Partnership believes that such compensation meets all applicable guidelines necessary to permit the Units to be offered and sold in the various states which prescribe such guidelines, including, without limitation, the statement of policy adopted by the North American Securities Administrators Association, Inc. With respect to real estate programs.

Applicants assert that the Partnership's exemption from the Act is both necessary and appropriate in the public interest. Applicants assert that, by investing in Local Limited Partnership interests, the Partnership is implementing the national policy enunciated by Congress in Section 901 of Title IX of the Housing and Urban Development Act of 1968: "to encourage the widest possible participation by private enterprise in the provision of housing for low or moderate income families." Applicants maintain that the requested exemption would be consistent with the protection of investors and the purposes and policies underlying the Act. Applicants assert that the general purpose of the Act is to prevent the abuses that can occur when management has discretion to invest the public's money. Applicants assert that, in this case, management's discretion to invest the public's money is limited by the Partnership agreement, and the investment policies stated therein, as well as by identification and description to investors, before they decide to invest, of the Local Limited Partnerships.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 23, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commisssion, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

Cincinnati Stock Exchange; Application for Unlisted Trading Privileges and of Opportunity for Hearing

April 29, 1983.

In the matter of application of the Cincinnati Stock Exchange for Unlisted Trading Privileges in Certain Securities; Securities Exchange Act of 1934.

The above named national securities exchange has filed an application with the Securities and Exchange Commission pursuant to Section 12(f) (1) (B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the common stock of:

Continental Airlines Corporation
Common Stock, $.01 Par Value (File No. 7-6616)

This security is listed and registered on one or more other national securities exchange and is reported on the consolidated transaction reporting system.

Interested persons are invited to submit on or before May 20, 1983 written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extension of unlisted trading privileges pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13204; 812-5413]

DBL Tax-Free Cash Fund Inc.; Filing of Application for an Order Exempting Applicant

April 28, 1983.

Notice is hereby given that DBL Tax-Free Cash Fund Inc. ("Applicant"), 60 Broad Street, New York, New York 10004, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on December 23, 1982, and amendments thereto on April 11 and 21, 1983, for an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant to the extent necessary: (1) From the provisions of Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 thereunder to permit Applicant to calculate its net asset value per share based on the amortized cost method of valuation and to value in the manner described in the application certain rights to sell its portfolio securities to brokers, dealers, and banks; and (2) from the provisions of Section 12(d)(3) of the Act to permit Applicant to acquire from brokers and dealers the aforesaid rights to sell portfolio securities. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and are referred to the Act and the rules thereunder for further information as to the provisions to which the exemptions apply.

Applicant seeks high current income exempt from federal income taxes to the extent consistent with liquidity and the preservation of capital. Applicant pursues this objective by investing principally in a portfolio of high quality, tax-exempt securities with short-term remaining maturities issued by state or municipal governments and by public authorities. Applicant's investment policies allow it to invest in the widest range of securities providing income exempt from federal income taxes that meet its quality standards. Such securities include floating rate industrial development bonds and securities issued by state or municipal governments and by public authorities as interim financing in anticipation of tax collections, revenue receipts, bond sales, or project notes. Applicant's policies also allow it to purchase floating and variable rate obligations, with remaining maturities in excess of one year, so long as the interest rate on such obligations is adjusted at least annually and the obligations carry demand features permitting Applicant to redeem principal and accrued interest upon notice of seven days or less.

Variable rate demand instruments that Applicant may purchase include participation interests sold by banks in tax-exempt municipal obligations. Applicant expects banks offering these interests to concentrate them in industrial development bonds ("IDBs"). Applicant represents that a participation interest gives it an undivided interest in the municipal obligation in the proportion that Applicant's participation interest bears to the total principal amount of the obligation. Each participation interest is backed by an irrevocable letter of credit or bank guarantee found by Applicant to meet prescribed quality standards. Applicant has the right to sell the instrument back to the bank and draw on the letter of credit on demand, after seven days' notice, for all or any part of the full principal amount of Applicant's participation interest in the IDB, plus accrued interest. In determining maturity and dollar-weighted average portfolio maturity, a variable rate demand note's maturity will be deemed the longer of: (1) The notice period required before Applicant is entitled to prepayment under the note, or (2) the period remaining until the note's next interest rate adjustment. Applicant agrees to comply with Rule 2a-7, as proposed or as adopted, whenever it purchases variable rate demand instruments (including participation interests sold by banks in industrial development bonds).

Applicant may also acquire participations in privately negotiated loans to municipal borrowers, provided it obtains an opinion of counsel that interest payable by such municipal borrowers is exempt from federal income tax. Applicant recognizes that to the extent such loan participations are considered to be illiquid securities, they will be subject to its internal restrictions as well as the Commission's restrictions on investing in illiquid securities. Under those restrictions Applicant could not invest more than an aggregate of ten percent of its assets in illiquid securities. Applicant represents that any loan participations it acquires will conform

VOL 48 ISS 88 MY 5 1983 UMI

with all the conditions imposed as a prerequisite to obtaining amortized cost relief, especially those involving high quality and remaining maturity. Applicant may also purchase "when-issued" securities so long as it commits no more than twenty percent of its net assets to such instruments and intends to actually acquire such instruments.

In support of the relief requested, Applicant asserts that amortized cost valuation would be in its shareholders' best interests. Applicant represents that maintenance of a constant net asset value per share affords shareholders the convenience of determining the value of their holdings simply by knowing the number of shares they own. Applicant declares that amortized cost valuation, absent unusual circumstances, represents the fair value of its portfolio securities. Applicant submits that the requested exemption is necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant expressly agrees that the following conditions may be imposed in any order of the Commission granting the exemption requested:

1. In supervising Applicant's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, the board of directors undertakes—as a particular responsibility within its overall duty of care owed to its shareholders—to establish procedures reasonably designed, taking into account current market conditions and Applicant's investment objective, to stabilize Applicant's net asset value per share, as computed for the purposes of distribution, redemption, and repurchase, at $1.00 per share.

2. Included among the procedures to be adopted by the board of directors shall be the following:

(a) Review by the board of directors, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per share as determined by using available market quotations from Applicant's amortized cost price per share, and the maintenance of records of such review. To fulfill this condition, Applicant states that it intends to use actual quotations or estimates of market value reflecting current market conditions chosen by the board of directors in the exercise of its discretion to be appropriate indicators of value. Such quotations or estimates may include, *inter alia*, (1) quotations or estimates of market value for individual portfolio instruments, or (2) values obtained from yield data relating to classes of instruments published by reputable sources.

(b) In the event such deviation from Applicant's $1.00 amortized cost price per share exceeds ½ of 1 percent, a requirement that the board of directors will promptly consider what action, if any, should be initiated.

(c) Where the board of directors believes that the extent of any deviation from Applicant's amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results, which action may include: redeeming shares in kind; selling portfolio instruments prior to maturity to realize capital gains or losses or to shorten Applicant's average portfolio maturity; withholding dividends; or utilizing a net asset value per share as determined by using available market quotations.

3. Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable price per share; provided, however, that it will not (a) purchase any instrument with a remaining maturity of greater than one year, or (b) maintain a dollar-weighted average portfolio maturity which exceeds 120 days. In fulfilling this condition, Applicant agrees that, if the disposition of a portfolio instrument results in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant will invest its available cash in such a manner as to reduce such dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

4. Applicant will record, maintain, and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in condition 1 above, and Applicant will record, maintain, and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the board of directors' considerations and actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of the board of directors' meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act as though such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit its portfolio investments, including repurchase agreements, to those United States dollar-denominated instruments which its board of directors determines present minimal credit risks, and which are of high quality as determined by any major rating service, or, in the case of any instruments that are not rated, of comparable quality as determined by the board of directors.

6. Applicant will include in each quarterly report, as an attachment to Form N–1Q, a statement indicating whether any action pursuant to condition 2(c) was taken during the preceding fiscal quarter, and, if any such action was taken, Applicant will describe the nature and circumstances of such action.

Applicant also requests exemptive relief to the extent necessary to enable it to acquire "stand-by" commitments. Applicant intends to acquire stand-by commitments solely to facilitate portfolio liquidity. Applicant describes a stand-by commitment as the equivalent of a "put" option acquired by Applicant with respect to a particular municipal obligation it holds. Applicant states that stand-by commitments acquired by it will have the following features: (1) They will be in writing and will be physically held by Applicant's custodian; (2) they will be exercisable by Applicant at any time prior to the maturity of the underlying securities; (3) they will be entered into only with brokers, dealers, and banks which, in the opinion of Applicant's investment adviser, present minimal risks of default; (4) Applicant's right to exercise them will be unconditional and unqualified; (5) although they will not be transferable, municipal obligations purchased subject to such a commitment could be sold to a third party at any time, even though the commitment is outstanding; and (6) their exercise price will be (i) Applicant's acquisition cost of the municipal obligations subject to a commitment (excluding any accrued interest which Applicant paid on their acquisition), less any amortized market premium or plus any amortized market or original issue discount during the period it owned the securities, plus (ii) all interest accrued on the securities since the last interest payment date during the period the securities were owned by Applicant.

Applicant expects stand-by commitments will be generally available without the payment of any direct or indirect consideration. However, if necessary and advisable, Applicant states that it will pay for stand-by commitments, either separately in cash or by paying a higher price for portfolio securities acquired subject to a commitment (thus reducing the yield to maturity otherwise available for the same securities). As stated by Applicant, as a matter of policy, the total amount "paid" in either manner for outstanding stand-by commitments held in its portfolio will not exceed ½ of 1 percent of the value of its total assets calculated immediately after the acquisition of any such commitment.

Applicant states that it will value each stand-by commitment at zero in determining net asset value. Should Applicant pay directly or indirectly for a stand-by commitment, its costs will be reflected as unrealized loss for the period it holds the commitment and as realized gain or loss when the commitment is exercised or expires. Applicant asserts that the acquisition of a stand-by commitment would not affect the valuation of the underlying obligation which Applicant will continue to value in accordance with the amortized cost method for which it now seeks exemption. Nor would the maturity of a municipal obligation be shortened by any stand-by commitment attached to it, and Applicant thus claims that stand-by commitments will not affect its dollar-weighted average maturity. Applicant does not intend to exercise stand-by commitments for trading purposes.

Applicant states that it may apply to the Internal Revenue Service for a ruling, or seek from its counsel an opinion, that interest on municipal obligations subject to stand-by commitments will be exempt from federal income taxation. In the absence of a favorable tax ruling or opinion of counsel, Applicant will not purchase securities subject to stand-by commitments.

Section 6(c) of the Act permits the Commission, among other things, to grant an exemption by order upon application from any provision or provisions of the Act, or from any rule or regulation thereunder, provided such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant contends that the above requested relief is appropriate, in the public interest, and consistent with the protection of investors. Applicant submits that the proposed acquisition of stand-by commitments will not affect its net asset value per share for purposes of sales and redemptions and will not pose new investment risks, but rather will improve its liquidity and ability to pay redemption proceeds expeditiously. Applicant will enter into stand-by commitments only with brokers, dealers, and banks that, in its investment adviser's opinion, possess a satisfactory credit rating. In addition to the credit of these institutions, Applicant's rights under the stand-by commitments will be secured to the extent of the value of the underlying securities subject to the commitments. In the event of a default under a stand-by commitment, Applicant assumes that it would be an unsecured creditor ony to the extent, if any, that the amount due under the stand-by commitment exceeds the value of the underlying securities it owns. Applicant therefore asserts that its risk of loss is not qualitatively different from the risk of loss faced by any investment company holding securities pending settlement after having agreed to sell the securities in the ordinary course of business.

Applicant represents that its investment adviser intends to periodically evaluate the credit of institutions issuing stand-by commitments in accordance with current procedures used to evaluate the quality of the institution's short-term debt securities, including periodic review of the institution's assets, liabilities, contingent claims, and other relevant financial information. Accordingly, Applicant believes that its acquisition of stand-by commitments will not meaningfully expose its assets to substantial risk, nor require Applicant to evaluate the credit of dealers in determining its net asset value. Applicant will not acquire stand-by commitments to promote reciprocal practices, to encourage the sale of its shares, or to obtain research services.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 19, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 22925; 70-6864]

New England Electric Transmission Corporation; Proposed Issuance and Sale of Notes to Bank and Commercial Paper

April 29, 1983.

New England Electric Transmission Corporation ("NEET"), 25 Research Drive, Westborough, Massachusetts 01581, an electric utility subsidiary of New England Electric System ("NEES"), a registered holding Company, has filed a declaration with this Commission pursuant to Sections 6 (a) and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50(a)(5) thereunder.

By order dated November 10, 1981 (HCAR No. 22268), NEES was authorized to acquire the common stock of a new subsidiary, NEET, organized for the purpose of constructing, owning, and operating certain transmission facilities to constitute part of a major transmission interconnection between New England and the province of Quebec. In order to provide an interconnection between the electric systems of the New England Power Poo. and Hydro-Quebec, a 450 kV direct current transmission line is to be built from a new terminal facility at the Des Cantons substation near Sherbrooke, Quebec, to a similar terminal facility in Monroe, New Hampshire near the Comerford hydro electric station of New England Power Company ("NEP"), the generation and transmission subsidiary of NEES. The Canadian portion of the facilities will be built by Hydro-Quebec. The transmission line from the Canadian border to Comerford will extend down through Vermont, cross the Connecticut River near Littleton, New Hampshire, and extend through New Hampshire to NEP's Comerford Station. The portion of the line located in Vermont (about 53 miles) will be constructed by Vermont Electric Transmission Company. The remaining six miles of transmission line and the terminal facility at Comerford ("NEET project") will be constructed by NEET.

Pursuant to a letter of intent with The First National Bank of Boston (the "Bank"), NEET proposes to enter into a credit agreement ("Credit Agreement") with the Bank under which NEET may

VOL 48 ISS 88 MY 5 1983 UMI

obtain up to $120 million for construction of the NEET Project through the issuance of commercial paper backed by the Bank's letter of credit or directly from the Bank pursuant to a revolving credit agreement. In addition, the Credit Agreement will provide that NEET may elect to convert up to the entire $120 million of construction loans to a five-year term loan. Annual commitment amounts will be made available under the construction loan over the estimated construction period. For support of the commercial paper borrowings, NEET will pay a total of ⅝% per annum on the amount of commercial paper outstanding. NEET will pay the Bank $20,000 annually as an administrative fee. Additional fees will be payable by NEET to the dealer marketing the commercial paper and to the paying agent who will also act as depository. NEET may borrow directly from the Bank, acting for itself and as agent for participating banks, on the following terms: (1) at the Bank's Base Rate in effect from time to time; (2) at the Bank's one, two, three, or six-month CD Rate plus ½%; (3) at the Bank's nine-month CD Rate plus ¾%; or (4) at the one, two, three, or six-month LIBOR plus ⅜%. Commitment amounts will be set for each year during construction on the basis of NEET's prior estimates of construction expenditures for that year. During each commitment period, a commitment fee of ¼% per year will be payable on the unused portion of the annual commitment amount, and a fee of ⅛% per year will be payable on the difference between the commitment amount in effect and the total commitment of $120 million.

All construction loans will mature on November 1, 1987, or the earlier commercial operation of the NEET Project. At the time, NEET may elect to borrow under the Credit Agreement on a term-loan basis amounts up to the full amount of construction loans then outstanding. The Term Loan will be for a term of 5 years. Amounts borrowed under the Term Loan will bear interest at increasing rates with a maximum in the fifth year equivalent to one of the following chosen by NEET: (i) ½% plus the Bank's Base Rate in effect from time to time; or (ii) 1% plus the Bank's CD Rate for the selected CD-Rate interest period if such period is 30, 60, 90, or 180 days; or 1¼% plus CD Rate if the selected CD Rate interest period is 270 days; or (iii) ⅞% plus LIBOR for the selected LIBOR period.

The declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by May 26, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarant at the address specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration, as filed or as it may be amended, may be permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-19717; File No. SR-MSE-83-5]

Self-Regulatory Organizations; Proposed Rule Change; Midwest Stock Exchange, Inc.; Relating to an Increase in the Members of the Board of Governors

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on April 25, 1983, the Medwest Stock Exchange, Incorporated filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed constitutional amendments will increase the number of governors on the Board of Governors from 26 to 27 by adding a position for another Chicago area member governor. The change will also provide for an increase in the minimum number of floor representatives on the Board from two to three.

II. Self-Regulatory Organization's Statement of the Purpose of, and Staturory Basis for, the Proposed Rule Change

In its filing with Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B), and (C) below of the most significant aspects of such statements.

(A) Self-regulatory organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The responsibilities of the Floor Governors have increased dramatically in recent years with increased volumes, the advent of ITS and their involvement in the development and operation of new floor systems. The Constitution now provides for a minimum of two governors who shall be active on the Floor of the Exchange. The Exchange proposes to increase the required number of Floor representatives on the Board at this time from two to three. Nominating Committees have, in recent years, determined that four Floor Governors has been an appropriate number. The Board has determined, and will so recommend to the Nominating Committe, that five Floor representatives on the Board is now appropriate. By not changing the Constitution to require five Floor Governors, Nominating Committees of the future can retain the flexibility to change the number of Floor Governors if the need for Floor representation of the Board becomes less significant than it clearly is now. By adding a new position for a Chicago area Governor to accommodate a new Floor Governor rather than decreasing the number of Chicago area non-floor or out-or-town member Governors, the Board can retain the invaluable contributions made by such member Governor groups.

The proposed rule change is consistent with Section 6 (b) (3) of the Securities Exchange Act of 1934 in that it assures a fair representation of the Exchange's members in the selection of its directors and the administration of its affairs.

(B) Self-Regulatory Organization's Statement on Burden on Completition

The Midwest Stock Exchange, Incorporated does not believe that any burdens will be placed on completition as a result of the proposed amendments.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Comments have neither been solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action.

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section.

Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 29, 1983.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13202; 812-5529]

UBF North America, Inc. et al.; Application Filing

April 28, 1983.

In the Matter of: UBF North America, Inc., 100 West Tenth Street, Wilmington, Delaware; c/o Charles J. Johnson, Jr., Esq., Brown, Wood, Ivey, Mitchell & Petty, One World Trade Center, 58th Floor, New York, New York 10048; Filing of an Application for an Order Pursuant to Section 6(c) of the Act Exempting Applicant From all Provisions of the Act.

Notice is hereby given that UBF North America, Inc. ("Applicant") filed an application on April 14, 1983, for an order of the Commission, pursuant to Section 6(c) of the Investment Company Act of 1940 (the "Act"), exempting Applicant from all provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it is a Delaware corporation with its principal office located at UBF International Center, Aleksanterinkatu 36, Helsinki 10, Finland, and that all of its issued and outstanding capital stock will be owned by Union Bank of Finland Ltd. ("UBF"), a bank organized and existing under the laws of Finland, which has been exempted from the provisions of the Act pursuant to Section 6(c) enabling it to sell commercial paper in the United States. Applicant was organized in 1983 for the purpose of obtaining funds in the commercial paper market to be used by UBF and its other subsidiaries.

According to the application the Commission granted UBF an order, pursuant to Section 6(c) of the Act, exempting UBF from all provisions of the Act (Investment Company Act Release No. 10858 (September 5, 1979)) (the "1979 Order"). Information with respect to UBF, including a description of its business and Finland banking regulation to which UBF is subject, is included in UBF's application requesting the 1979 Order. Applicant affirms that there have been no material changes in the information set forth in the application for the 1979 Order, which application is on file with the Commission (File No. 812-4744).

Applicant presently proposes to issue and sell unsecured negotiable promissory notes of the type generally referred to as commercial paper notes (the "Notes") to be unconditionally guaranteed by UBF with maturities not to exceed 270 days in bearer form and denominated in United States dollars, the proceeds form which (except for amounts needed to repay maturing Notes of Applicant) will be made available solely to UBF and its other subsidiaries in the form of loans or deposits for use in repaying maturing UBF commercial paper in funding current transactions of UBF and its other subsidiaries. The reason for selling commercial paper through Applicant, rather than by UBF directly, is that the Commercial paper would thereby be a legal investment for a wider range of institutional investors. The application states that to the extent the guarantee of the Notes by UBF constitutes a separate security for purposes of applying the provisions of the Act, the offer and sale of such security is covered by the exemption heretofore granted to UBF in the 1979 Order.

Applicant represents that the Notes will be issued in the minimum denomination of $100,000; that it presently intends that not in excess of $350,000,000 of the Notes will be outstanding at any one time; and that the Notes will not have any provisions for renewal at the option of Applicant or the holders thereof or for automatic rollover. The Notes will be direct liabilities of Applicant and will rank *pari passu* among themselves and prior to Applicant's capital stock and equally with any other unsecured indebtedness of Applicant, other than any subordinated indebtedness which will rank inferior to the Notes. As a result of the Notes being unconditionally guranteed by UBF, holders of the Notes will be holders of obligations of UBF. The grarantee of UBF will rank *pari passu* with all other unsecured unsubordinated indebteness of UBF, including UBF's deposit liabilities, and prior to any subordinated indebtedness of UBF and UBF's share capital.

Applicant plans to sell the Notes without registration under the Securities Act of 1933 (the "1933 Act"), in reliance upon an opinion of its special legal counsel in the United States that the Notes and the related grarantee will qualify for the exemption from the registration requirements of the 1933 Act provided by Section 3(a)(3) thereof. Applicant represents that it will not proceed with its proposed offering until it has received such an opinion. Applicant does not request the Commission's review or approval of such opinion. Applicant represents that the proposed issue of the Notes and any future issue of Applicant's securities in the United States will have received, prior to issuance, one of the three highest investment grade ratings from at least one of the nationally recognized

VOL 48 ISS 88 MY 5 1983 UMI

statistical rating organizations, and Applicant's special legal counsel in the United States shall certify the receipt of such rating; provided, however, that no such rating need be obtained with respect to any such issue if, in the opinion of Applicant's special legal counsel, such counsel having taken into account for the purpose thereof the doctrine of "integration" referred to in Rule 502 under the 1933 Act and various releases and relevant no-action letters made public by the Commission, an exemption from registration is available under section 4(2) of the 1933 Act. The Applicant is not subject to the reporting requirements of the Securities Exchange Act of 1934 and will not become subject to such requirements as a result of the issuance and sale of the Notes.

The Application states that the Notes will be sold by Applicant to a commercial paper dealer in the United States which, as principal, will reoffer them to investors in the United States. In certain cases, however, the commercial paper dealer may offer the Notes as agent. Applicant states that this dealer has advised it that the Notes will not be advertised or otherwise offered for sale to the general public, but instead will be sold to institutional investors, wealthy individuals and other purchasers of the type that normally participate in the commercial paper market. Applicant undertakes to ensure that the dealer will provide each offeree prior to any sale of the Notes with a memorandum describing the business of the Applicant and UBF and containing the most recent publicly available fiscal year-end audited balance sheet and income statements of UBF. Applicant represents that such memoranda will be at least as comprehensive as those customarily used in commercial paper offerings in the United States and will include a brief paragraph highlightling material differences between Finnish and United States generally accepted accounting principles applicable to commercial banks such as UBF. Such memoranda will be updated periodically to reflect material changes in the financial status of UBF and its subsidiaries.

Applicant represents that, although it has no present intention of doing so, it may in the future offer other securities (other than shares of its capital stock) for sale in the United States and that such future offerings will be made only pursuant to a registration statement under the 1933 Act or pursuant to an applicable exemption from registration under the 1933 Act. Any such offering will be made on the basis of a disclosure document appropriate for such registration or exemption, as the case may be, and in any event at least as comprehensive as that used in the presently proposed offering. Applicant undertakes to ensure that such a disclosure document will be provided to each offeree who has indicated an interest in such securities, prior to any sale of such securities to such offeree, except that in the case of an offering made pursuant to a registration statement under the 1933 Act such a disclosure document will be provided to such persons and in such manner as may be required by the 1933 Act and the rules and regulations thereunder. Applicant consents to having any order granting the relief requested under Section 6(c) of the Act expressly conditioned upon its compliance with is undertaking regarding disclosure memoranda.

Applicant has appointed The Corporation Trust Company, 100 West Tenth Street, Wilmington, Delaware, as its agent for service of process and Applicant represents that UBF will appoint the Consul general of Finland in New York as agent in the United States to accept service of process in any action based on UBF's guarantees of the Notes and instituted in any state or Federal court by a holder of any of the Notes. Applicant further represents that UBF will expressly accept the jurisdiction of an appropriate state or Federal court in the City and State of New York in respect of any such action and that such appointment of an authorized agent and consent to jurisdiction will be irrevocable until all amounts due and to become due in respect of the Notes have been paid.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities or transactions, from any provision or provisions of the Act or any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

The application states that Applicant will carry on the normal business of a financing subsidiary of a foreign commercial bank, and accordingly it does not believe that it should be treated as an "investment company" within the meaning of the Act. However, recognizing the uncertainty that has been expressed as to whether foreign commercial banks and, by logical extension, their financing subsidiaries organized in the United States are "investment companies" under the Act, the Applicant is making this application under Section 6(c) of the Act. Applicant states that approval of the application would be consistent with the requirements of Section 6(c) of the Act for the same reasons set forth in the application for the 1979 Order and that the exemption is necessary or appropriate in the public interest, is consistent with the protection of investors and is consistent with the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 23, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the addresses stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

[Proposal No. 05/05-0175]

United Venture Capital, Inc.; Notice of Application for a License as a Small Business Investment Company

Notice is hereby given of the filing of an application with the Small Business Administration pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1982)), by United Venture Capital, Inc., 15901 West Nine Mile Road, Suite 618, Southfield, Michigan 48075 for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958 (the Act), as amended (15 U.S.C. 661 *et seq.*).

The proposed officers, directors, and stockholders are:

Name and address, Title and relationship and Percent of ownership

Irving Meklir, 15901 West Nine Mile Road, Suite 618, Southfield, Michigan 48075; President, Treasurer, Director, 100

Rose Meklir, 15901 West Nine Mile Road, Suite 618, Southfield, Michigan 48075; Vice President, Director

Gary Meklir, 15901 West Nine Mile Road, Suite 618, Southfield, Michigan 48075; Vice President, Secretary, Director

The applicant proposes to begin operations with a capitalization of $504,000 and will be a source of equity capital and long term funds for qualified small business concerns.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under this management, including adequate profitability and financial soundness, in accordance with the Act and Regulations.

Notice is further given that any person may, not later than 15 days from the date of the publication of this Notice, submit written comments on the proposed SBIC to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

A copy of this Notice will be published in a newspaper of general circulation in Southfield, Michigan.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: April 28, 1983.

BILLING CODE 8025-01-M

TENNESSEE VALLEY AUTHORITY

Paperwork Reduction Act of 1980; Form Under Review by the Office of Management and Budget

AGENCY: Tennessee Valley Authority.

ACTION: Form Under Review by the Office of Management and Budget.

SUMMARY: The Tennessee Valley Authority (TVA) has sent to OMB the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C Chapter 35).

Requests for information, including copies of the form proposed and supporting documentation, should be directed to the Agency Clearance Officer whose name, address, and telephone number appear below. Questions or comments should be directed to the Agency Clearance Officer and also to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, Attention: Desk Officer for Tennessee Valley Authority, 395-7313.

Agency Clearance Officer: John O. Catron, Tennessee Valley Authority, 100 Lupton Building, Chattanooga, TN 37401; (615) 751-2523, FTS 858-2523.

Type of Request: Revision.

Title of Information Collection: TVA 6254A, TVA 6254B, TVA 6254C, TVA 6254D, TVA 6254E, TVA 6254F, TVA Revised Home Insulation Program (Energy Package).

Frequency of Use: Nonrecurring.

Type of Affected Public: Residential consumers of TVA electrical energy.

Standard Industrial Classification: N/A.

Small Business or Organizations Affected: No.

Federal Budget Functional Category Code: 271.

Estimated Number of Annual Responses: 840,000.

Estimated Total Annual Burden Hours: 42,000.

Estimated Annual Cost from Federal Government Appropriated Funds: 0.

Need For and Uses of Information: Information is needed to determine applicable energy improvements for residences in the Tennessee Valley Region. Data obtained will be composed to establish standards of various residential conservation programs and recommendations to consumers outlining the methods and actions necessary to conserve and/or manage electrical energy.

Dated: April 27, 1983.

John W. Thompson,

Assistant General Manager, Senior Agency Official.

BILLING CODE 8120-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Summary Notice No. PE-83-10]

Petitions for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before May 25, 1983.

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Petition Docket No. ———, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: The petition, any comments received and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-204), Room 916, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426-3644.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, D.C., on April 29, 1983.

John H. Cassady,

Assistant Chief Counsel, Regulations and Enforcement Division.

PETITIONS FOR EXEMPTION

Docket No.	Petitioner	Regulations affected	Description of relief sought
23581	Susan L. Swiatek	14 CFR 121.311(b)	To permit petitioner's son Bryan, who has a severe case of cerebral palsy, to be held in the arms of an adult who is occupying a seat, even though Bryan has already reached his second birthday. Bryan is 2¼ years old and weighs 25 pounds (which is comparable to the weight of a normal 1-year old).
23560	U.S. Parachute Assn., (USPA)	14 CFR 91.47 and 105.43	To permit petitioner to use its Douglas DC-3/C-47 and Lockheed L-18 aircraft to carry parachutists for hire at the 1983 National Parachuting Championships to be held in Muskogee, Oklahoma. It would also permit foreign parachutists to use parachutes that do not meet certain equipment and packing requirements.
21980	Florida Aircraft Leasing Corp	14 CFR 91.31	Amendment to Exemption 3458 to allow petitioner to operate certain of its aircraft without complying with the zero fuel and landing weight requirements of the operating limitations prescribed for these aircraft in the FAA-approved flight manual, subject to certain conditions and limitations. The amendment would delete Douglas DC-8, S/N 44884 from, and add Douglas DC-8, S/N 52-3231 to, the exemption.
23596	Arthur J. Spence	14 CFR 103.1(b)	To permit petitioner to operate his ultralight vehicle for purposes other than sport or recreation.
23558	Air Logistics	14 CFR 135.165(b)(5)	Supplemental petition to allow petitioner to operate its aircraft under instrument flight rules or in extended overwater operations without two independent receivers for navigation.
23607	Herman Miller, Inc.	14 CFR Portions of Parts 21 and 91	To permit petitioner to operate and maintain its Learjet 35A aircraft using a FAA-approved minimum equipment list.
23600	Mid Pacific Airlines, Inc. (Mid Pacific)	14 CFR Portions of Part 121	To permit petitioner, a commuter air carrier, to continue to operate without licensed dispatchers when it begins operating as a flag air carrier.
23603	Delta Air Lines, Inc	14 CFR 91.32 and 121.333	To permit petitioner to operate its L-1011 and L-767 aircraft up to and including flight level 430 (43,000 feet) without one pilot at the controls being required to wear and use an oxygen mask.
23524	Catalina Air Freight, Inc	14 CFR 103.1(b)	To allow petitioner to operate an ultralight vehicle for purposes other than sport or recreation.
23518	Atlantic Richfield Co	14 CFR 21.181	Supplemental petition to permit petitioner to operate two leased U.S.-registered Boeing Vertol 234 helicopters using a FAA-approved minimum equipment list.

PETITIONS FOR EXEMPTION—Continued

Docket No.	Petitioner	Regulations affected	Description of relief sought
23612	Rotor-Aire, Inc	14 CFR 135.261	To permit petitioner to perform helicopter emergency medical evacuation service without complying with flight and duty time requirements of this section.

DISPOSITIONS OF PETITIONS FOR EXEMPTION

Docket No.	Petitioner	Regulations affected	Description of relief sought disposition
23216	McMahen Aviation, Inc	14 CFR 91.79(b)(c) and 93.113	To permit petitioner's pipeline patrol aircraft to fly as low as 500 feet vertically from persons, 200 feet laterally from property; and also to permit transit through certain high density control zones under Special VFR. *Partial grant 4/13/83.*
21987	Texas Department of Public Safety	14 CFR 91.70(b), 91.79(c), 91.85(b), and 91.109(a).	To permit petitioner to conduct certain law enforcement flight operations in close proximity to suspect aircraft; in airport traffic areas at speeds greater than the authorized limits; without operating the aircraft's position lights; at less than 500 feet above the surface over other than congested areas; in airport traffic areas other than to land at or takeoff from an airport in that area; and/or in deviation from prescribed VFR cruising altitudes. *Partial grant §§ 91.70(b), 91.79(c), 91.85(b), and 91.109(a) 4/18/83.*
22450	Georgia State Patrol	14 CFR 91.79(c) and 91.109(a)	To permit petitioner to conduct law enforcement aircraft operations in formation with suspect aircraft; without lights at night; below 500 feet other than to land or takeoff; and/or at other than appropriate cruising altitudes. *Partial grant §§ 91.79(c) and 91.109(a) 4/18/83.*
22473	Henson Aviation, Inc. and Ransome Airlines, Inc	14 CFR 93.123, 93.125 and 93.129	To permit the petitioners to operate area navigation system-equipped DeHavilland DHC-7 aircraft in RNAV and MLS operations in test proving flights at Washington National Airport outside of the FAR reservation restrictions. *Partial grant 4/26/83.*
23617	Pacific Southwest Airlines	14 CFR 91.307	To allow operation in the United States, under a service to small communities exemption, of specified Stage-1 airplanes identified by registration and serial number, that have not been shown to comply with the applicable operating noise limits as follows: Until not later than January 1, 1985: 4 DC-9-30: N705PS, N706PS, N707PS, and N708PS. *Granted 4/25/83.*
23490	Air Midwest, Inc., (AMI)	14 CFR 61.31	To allow the petitioner's pilots, without possessing the required type rating, to operate its Fairchild-Swearingen Metro IIA aircraft which have been manufactured in accordance with SFAR-41 until the next scheduled instrument proficiency check. *Granted 4/19/83.*
23483	Reeder Air, Inc	14 CFR 43.3(g)	To permit petitioner's appropriately trained and certificated pilots to remove, check, and reinstall magnetic chip detector plugs in the Allison 250C series turbine engine, aircraft transmission engine, aircraft transmission, and tail rotor gearbox installed on Bell 206B helicopters operated by petitioner. *Granted 4/22/83.*
23447	Amway Corp	14 CFR 21.181	To permit petitioner to operate a Boeing 727 aircraft, N529AC, using an FAA-approved minimum equipment list. *Granted 4/21/83.*
23462	Amway Corp	14 CFR 21.181	To permit petitioner to operate two BAC 1-11 aircraft, N523AC and N524AC, using an FAA-approved minimum equipment list. *Granted 4/21/83.*
23499	Lifeline, Inc	14 CFR 61.118	To allow petitioner's volunteer pilots to be reimbursed for fuel when serving on official Lifeline missions. *Granted 4/27/83.*
23459	Aero Union Corp	14 CFR 125.11(b)	To permit petitioner to advertise Boeing 377MG (Mini Guppy) aircraft for transportation of outsized cargo in Part 125 operations. *Denied 4/25/83.*
23430	McDonnell Douglas Corp	14 CFR 61.57	To permit petitioner's employees to act as pilot in command of certain aircraft without having made three takeoffs and landings within the preceding 90 days in an aircraft of the same type. *Granted 4/27/83.*
23036	Icelandair S.A. and Overseas Nat'l Airways, Inc	14 CFR Portions of Parts 21 and 91	To allow petitioner to operate one U.S.-registered DC-8-50 aircraft, N816R, leased from ONA, and to maintain the aircraft in accordance with ONA's continuous airworthiness maintenance and inspection program and to use the FAA-approved Master Minimum Equipment List Granted 4/28/83.
23505	Cameron Balloons, Ltd	14 CFR 91.42(c) and 21.191	To permit petitioner to operate hot air balloons over populated areas for the purpose of advertising. *Denied 4/25/83.*
23461	Flying Carpet Marketing Company	14 CFR 103.1	To permit petitioner to operate ultralight aircraft for purposes other than sport or recreation, specifically banner towing. *Denied 4/27/83.*
22279	Apollo Airways, Inc	14 CFR 61.31(a)(1)	To allow petitioner's presently qualified HP-137 pilots in command to operate the HP-137 aircraft recertificated in accordance with SFAR 41 without possessing a type rating for the recertificated airplane. *Cancelled 2/22/83.*
16299	Kenmore Air Harbor, Inc	14 CFR 141.37(e), and para. 3(b)(4) of Appendix D of Part 141.	To extend Exemption 2376B which permits petitioner to use a seadrome without permanent runway lights for night training flights involving seaplanes. In addition, it permits credit toward flight instruction for cross-country night flights in seaplanes with a landing in a body of water less than 100 miles from the point of departure, provided that those flights include a landing at a point other than the point of departure and the flights are round-trip night cross-country flights to a point more than 100 miles from the point of departure. *Granted 4/27/83.*

BILLING CODE 4910-13-M

Office of the Secretary

Reports, Forms, and Recordkeeping Requirements; Submittals to OMB, March 23-April 25, 1983

AGENCY: Office of the Secretary, DOT.

ACTION: Notice.

SUMMARY: This notice lists those forms, reports, and recordkeeping requirements, transmitted by the Department of Transportation, between March 23, 1983 and April 25, 1983 to the Office of Management and Budget (OMB) for its approval. This notice is published in accordance with the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35).

FOR FURTHER INFORMATION CONTACT: John Windsor, John Chandler, or Annette Wilson, Information Requirements Division, M-34, Office of the Secretary of Transportation, 400 7th Street, SW., Washington, D.C. 20590, (202) 426-1887 or

Gary Waxman or Wayne Leiss, Office of Management and Budget, New Executive Office Building, Room 3001, Washington, D.C. 20503, (202) 395–7313.

SUPPLEMENTARY INFORMATION:

Background

Section 3507 of Title 44 of the United States Code, as adopted by the Paperwork Reduction Act of 1980, requires that agencies prepare a notice for publication in the **Federal Register**, listing those information collection requests submitted to the Office of Management and Budget (OMB) for approval under that Act. OMB reviews and approves agency submittals in accordance with criteria set forth in that Act. In carrying out its responsibilities, OMB also considers public comments on the proposed forms, reporting and recordkeeping requirements.

On Mondays and Thursdays, as needed, the Department of Transportation will publish in the **Federal Register** a list of those forms, reporting and recordkeeping requirements that it has submitted to OMB for review and approval under the Paperwork Reduction Act. The list will include new items imposing paperwork burdens on the public as well as revisions, renewals and reinstatements of already existing requirements. OMB approval of an information collection requirement must be renewed at least once every three years. The published list also will include the following information for each item submitted to OMB:

(1) A DOT control number.

(2) An OMB approval number if the submittal involves the renewal, reinstatement or revision of a previously approved item.

(3) The name of the DOT Operating Administration or Secretarial Office involved.

(4) The title of the information collection request.

(5) The form numbers used, if any.

(6) The frequency of required responses.

(7) The persons required to respond.

(8) A brief statement of the need for and uses to be made of the information collection.

Information Availability and Comments

Copies of the DOT information collection requests submitted to OMB may be obtained from the DOT officials listed in the "For Further Information Contact" paragraph set forth above.

Comments on the requests should be forwarded, as quickly as possible, directly to the OMB officials listed in the "For Further Information Contact" paragraph set forth above. If you anticipate submitting substantive comments, but find that more than 5 days from the date of publication is needed to prepare them, please notify the OMB officials of your intent immediately.

Items Submitted for Review by OMB

The following information collection requests were submitted to OMB between March 23, 1983, and April 25, 1983

DOT No: 2139
OMB No: 2120–0044
By: Federal Aviation Administration
Title: Rotocraft External-Load Operator Certificate Application-FAR 133
Forms: FAA Form 8710–4
Frequency: On Occasion
Respondents: Helicopter operators carrying external (suspended) loads
Need/Use: As a part of air safety, certification is required of all Rotorcraft operators carrying suspended loads and currently certified operators must file amendments when additional aircraft or equipment is added to their operations.

DOT No: 2140
OMB No: 2137–0022
By: Research and Special Programs Administration
Title: Recordkeeping Requirements for Cylinder Retesting and Reinspection
Forms: None
Frequency: Triennially, Quinquennially, or Decennially
Respondents: Owners of high pressure cylinders
Need/Use: To verify that cylinders have not been damaged by handling or corroded by the materials with which they have been charged and are safe to recharge and transport on the public highways, waterways and airways.

DOT No: 2141
OMB No: 2125–0037
By: Federal Highway Administration
Title: Inspection, Repair and Maintenance and Driver Vehicle Inspection Report
Forms: None
Frequency: On occasion
Respondents: Drivers and Motor Carriers
Need/Use: Used to identify defects likely to affect safety of operation and to record inspection.

DOT No: 2142
OMB No: None
By: Federal Highway Administration
Title: Annual Relocation Assistance and Payment Statistics
Forms: PR–1226
Frequency: Annually
Respondents: State highway agencies
Need/Use: Information is needed by the Federal Highway Administration in order to provide relocation statistics required by Congress, and to make management decisions in areas of: defining the role of the Federal Government in fulfilling its oversight responsibilities, determining the acceptable level of review of State operations to be consistent with the Federal role, assessing the impact of the relocation program, identifying waste and abuses, and in recommending legislative, regulatory and administrative changes in the relocation assistance program.

DOT No: 2143
OMB No: 2127–0045
By: National Highway Traffic Safety Administration
Title: 49 CFR Part 556, Petitions for Inconsequentiality
Forms: None
Frequency: On occasion
Respondents: Manufacturers of motor vehicles/equipment
Need/Use: The regulation establishes procedures for petitioning the agency for an exemption from the notice and remedy requirements of the Act due to an Inconsequential Defect or Noncompliance.

DOT No: 2144
OMB No: 2127–0046
By: National Highway Traffic Safety Administration
Title: 49 CFR Part 552, Petitions for Rulemaking
Forms: None
Frequency: On Occasion
Respondents: Individuals/businesses
Need/Use: This regulation establishes procedures for filing petitions with the agency to commence a rulemaking or to make a defect or noncompliance determination.

DOT No: 2145
OMB No: None
By: Office of the Secretary of Transportation
Title: Airport Questionnaire
Forms: One Questionnaire
Frequency: Once
Respondents: Fully certificated airports
Need/Use: The Department of Transportation is conducting a congressional-mandated study of airport defederalization. As part of that study, the views of the 528 certificated airports are required, and we plan to obtain those views by circulating a questionnaire.

DOT No: 2146
OMB No: 2133–0005, 2133–0009, 2133–0022
By: Maritime Administration
Title: Uniform Financial Reporting Requirements
Forms: MA–172 (2133–0005)
Frequency: Semiannually, annually, ongoing recordkeeping
Respondents: Contractors with Maritime Administration under financial assistance programs administered pursuant to Titles II, V–VIII, and XI MM Act 1936
Need/Use: The Maritime Administration requires uniform financial reporting in order to assure compliance with certain legal and regulatory requirements and to assure uniformity in analysis of the industry, subsegments, and individual company performance.

DOT No: 2147
OMB No: None
By: Maritime Administration
Title: Records Retention Schedule for Subsidized Operators
Forms: None
Frequency: 2–3 years
Respondents: Operators with construction-differential subsidy or operating-differential subsidy
Need/Use: Required to obtain benefit. CDS and ODS operators participating within the Maritime Administration financial assistance programs must keep certain business and financial records for settlement and audit.

DOT No: 2148
OMB No: 2115–0034
By: U.S. Coast Guard
Title: Survivor Debriefing Form (Marine Casualty)
Forms: Prescribed Format
Frequency: On Occasion
Respondents: Survivors of civilian marine casualties
Need/Use: Information collected by the Coast Guard via the Survivor Debriefing Form is authorized under 14 U.S.C. 88 and 14 U.S.C. 93. The Coast Guard uses this information to assist in the search for, and rescue of other victims of a marine casualty incident. Analysis of information collected from survivors may provide knowledge of casuality and help prevent similar incidents in the future.

DOT No: 2149
OMB No: 2137–0015
By: Research and Special Programs Administration
Title: Tank Car Record Requirements
Forms: None
Frequency: On Occasion
Respondents: Tank car tank owners
Need/Use: To show results of periodic tests and inspections of tank car tanks so that compliance with standards can be ascertained and integrity of the tank cars assured.

Issued in Washington, D.C., on April 27, 1983.

Karen S. Lee,

Deputy Assistant Secretary for Administration.

[FR Doc. 83–11601 Filed 5–4–83; 8:45 am]

BILLING CODE 4910–62–M

Research and Special Programs Administration

International Standards on the Transport of Dangerous Goods

AGENCY: Materials Transportation Bureau (MTB) Research and Special Programs Administration, DOT.

ACTION: Notice of public meeting.

SUMMARY: This notice set forth the venue and proposed agenda for a public meeting which will review the recent activities of the MTB relating to the development of international standards for the transport of dangerous goods.

DATE: June 1, 1983, 9:30 a.m. to 4:00 p.m.

ADDRESS: Room 4234, Nassif Building, 400 7th Street, SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT: Edward A. Altemos, International Standards Coordinator, Office of Hazardous Materials Regulation, Materials Transportation Bureau, Department of Transportation, Washington, D.C. 20590. (202) 426–0656.

SUPPLEMENTARY INFORMATION:

Particular topics to be reviewed at this meeting will include:

1. Result of the December 1983 meeting of the United Nations' Committee of Experts on the Transport of Dangerous Goods.

2. Status of the development of the International Civil Aviation Organization's (ICAO) dangerous goods regulations and results of the seventh meeting of the ICAO Dangerous Goods Panel.

3. Recent decisions of the RID/ADR Joint Meeting with respect to the transport of dangerous goods by rail and road in Europe. Interested persons are invited to attend and participate in this meeting. Persons planning to attend the meeting are cautioned that this meeting is intended only to review the most recent activities and decisions of international organizations governing the transport of dangerous goods. Therefore, it is recommended attendees be familiar with these organizations, their functions and the standards issued by them.

Issued in Washington, D.C. on April 28, 1983.

Alan I. Roberts,

Associate Director for Hazardous Materials Regulation, Materials Transportation Bureau.

[FR Doc. 83–11680 Filed 5–4–83; 8:45 am]

BILLING CODE 4910–60–M

DEPARTMENT OF THE TREASURY

Customs Service

[T.D. 83–103]

Revocation of Landing Rights Designation of Melbourne, Florida, Regional Airport

AGENCY: Customs Service, Treasury.

ACTION: Notice of revocation of landing rights designation.

SUMMARY: This notice announces that Customs is revoking the landing rights designation of Melbourne Regional Airport in Melbourne, Florida, in view of the low level of international aircraft arrivals there, the significant expense involved in processing those arrivals and the proximity of two other landing rights airports to the Melbourne area. This change will enable Customs to obtain more efficient use of its personnel, facilities, and resources.

EFFECTIVE DATE: The landing rights designation of Melbourne Regional Airport is revoked effective June 6, 1983.

FOR FURTHER INFORMATION CONTACT: C. Duane Oveson, Office of Passenger Enforcement and Facilitation, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202–566–5607).

SUPPLEMENTARY INFORMATION:

Background

Under section 1109(b) of the Federal Aviation Act of 1958 (49 U.S.C. 1509(b)), the Secretary of the Treasury is authorized to designate places in the United States as ports of entry for civil aircraft arriving from any place outside of the United states and for merchandise carried on the aircraft. These airports are referred to as "international airports," and the location and name of each are listed in 6.13, Customs Regulations (19 CFR 6.13).

In accordance with § 6.2, Customs Regulations (19 CFR 6.2), the first landing of every civil aircraft arriving in the United States must be at an "international airport" unless the aircraft has been specifically exempted from this requirement or permission to land elsewhere has been granted. Customs officers are assigned to all international airports to accept entries

VOL
48
ISS
88
MY

1983
UMI

of merchandise, collect duties, and enforce Customs laws and regulations.

A "landing rights airport" is an airport, not designated an as international airport, at which civil aircraft arriving in the United States from any place outside of the United States may land upon being granted permission by Customs to do so. In such a case, Customs assigns its personnel to that airport for that aircraft.

The Melbourne Regional Airport (Melbourne) at Melbourne, Florida, has been a "landing rights airport" since July 1971.

Arrivals of aircraft from outside the United States at Melbourne are handled by a small staff of Customs officers from Port Canaveral, Florida, which is 30 miles from Melbourne. There are two other landing rights airports in the general area that process international arrivals: the St. Lucie County International Airport (St. Lucie) in Fort Pierce, Florida, which is approximately 50 miles south of Melbourne, and the Orlando International Airport (Orlando) in Orlando, Florida, which is approximately 50 miles northwest of Melbourne.

Since 1971, there has been a low level of international aircraft arrivals at Melbourne. The costs to Customs to process these arrivals have been significant. The excessive time spent by Customs officers in traveling to and from Melbourne for the limited number of arrivals is a nonproductive expenditure of scarce resources. In addition, Customs has recently implemented an intensified enforcement program in South and Central Florida, to combat the influx of narcotics into the United States by air. That program has necessitated a concentration of Customs resources into eight Florida airports.

Accordingly, in a notice published in the **Federal Register** on October 19, 1982 (47 FR 46611), Customs proposed to revoke the landing rights designation of Melbourne Regional Airport, and solicited public comment on the proposal.

Discussion of Comments

Fifty seven comments were received in response to the notice. All of the comments except for one were opposed to the revocation of the landing rights designation. The commenters in opposition state that: (1) The revocation will adversely affect the economic growth and development of the Melbourne area; (2) the level of international aircraft activity at Melbourne justifies the landing rights designation; (3) the amount which the Government will save by a revocation of landing rights is relatively insignificant; (4) the revocation will inconvenience importers, passengers, and aircraft pilots; and (5) St. Lucie, one of the facilities which will pick up many of the landings which won't occur at Melbourne, has poor facilities compared to Melbourne.

One commenter is in favor of the revocation and resultant decrease in traffic for safety reasons because Melbourne is the home of a large aviation training college and the air is constantly filled with small training planes.

For fiscal years 1978–1980, there was an average of 649 international aircraft arrivals at Melbourne, compared with an average of 5,057 at St. Lucie and 1,525 at Orlando. In fiscal year 1981, 893 international aircraft arrivals were made at Melbourne, as opposed to 5,249 at St. Lucie and 2,084 at Orlando. It is not appropriate to consider fiscal year 1982 figures since landings at Melbourne have been greatly limited by an interim amendment to § 6.14, Customs Regulations (19 CFR 6.14), effective April 1, 1982.

The estimated annual savings to the Government as a result of the revocation will be $28,000. Customs considers this to be a significant savings.

With respect to the commenters' statement about the facilities at St. Lucie, Customs notes that St. Lucie has received a $3 million grant to improve its facilities. St. Lucie uses the Federal Aviation Administration tower and visual ommirange approach from Vero Beach Municipal Airport in Vero Beach, Florida, 12 miles north of St. Lucie. When the weather is such that an aircraft cannot land at St. Lucie, the pilot has a choice of landing at several other airports south of St. Lucie which have full instrument landing system capabilities.

Customs Determination

After a consideration of the proposal and the comments received thereon, Customs has made a determination to revoke the landing rights designation of Melbourne Regional Airport in Melbourne, Florida.

This determination is based upon the low level of international aircraft arrivals at Melbourne, the significant expense in processing those arrivals, and the proximity of two other landing rights airports to the Melbourne area.

Authority

This action is undertaken pursuant to the authority of R.S. 251, as amended, section 624, 46 Stat. 759, section 1109, 72 Stat. 799, as amended (19 U.S.C. 66, 1624, 49 U.S.C. 1509).

Drafting Information

The principal author of this document was Gerard J. O'Brien, Jr., Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Dated: March 25, 1983.

Alfred R. De Angelus,

Acting Commissioner of Customs.

BILLING CODE 4820-02-M

Office of the Secretary

Organization and Functional Statements; U.S. Savings Bonds Division

1. Office of the National Director

Provides the overall management of the Department of the Treasury's U.S. Savings Bonds Program; establishes policies; directs the development and execution of a national marketing program for U.S. Savings Bonds; carries out the policies to attain the overall objectives established by the Secretary of the Treasury; and provides leadership and direction to the paid staff and the volunteers indentified with the program.

2. Office of the Executive Director and Deputy Executive Director

Provides the day-to-day management of the Department of the Treasury's U.S. Savings Bonds Program and participates fully with the National Director in providing the overall management of the Division, establishing policies, directing the development and evaluation of a national marketing program for U.S. Savings Bonds, carrying out the policies to attain the overall objectives established by the Secretary of the Treasury, and providing leadership and direction to the paid staff and to the volunteers identified with the Program. Provides overall management and direction to the Division's field staff.

a. Management Analysis Staff

The Management Analysis Staff is assigned to the Office of the Executive Director with the Deputy Executive Director serving as the first line supervisor over the staff.

The Management Analysis Staff's responsibilities include performing management analysis and evaluations of the performance of field and Headquarter's operational functions and identifying areas for improvement. The Management Analysis staff may be called upon to participate in other audits

the Division conducts including PME's and financial management reviews.

b. Program Control Staff

Assures a satisfactory and efficient flow of information between branches, offices, and the executive levels; collects, analyzes, and reports on a wide variety of performance and program information gathered from the field; monitors progress of various Division management plans and provides analytical evaluations periodically to the Executive Director and Deputy Executive Director; monitors ongoing implementation of Division strategies and policies, analyzing and evaluating the relationships involved; provides staff assistance to the Division's Executive Committee in its program planning and evaluation activities.

3. Administration Branch

Plans, develops and administers administrative policies and procedures for the U.S. Savings Bonds Division. Formulates budget policies, develops, promotes, and executes the budget and fiscal operations of the Division; develops, oversees and administers the personnel management programs and operations; develops, oversees, and administers the resource management and related programs; develops and administers the Division's physical security, paperwork management, employee assistance, EEO, and other related programs.

a. Office of Financial Management

Develops and executes a complete financial management program for the Division, including budget management, design and administration of internal funding and expenditure controls, financial analysis, cost benefit A–76 studies, payroll and other financial services.

b. Office of Personnel

Provides a complete program of advice, support, development evaluation, policy direction and services for personnel management, organizations, position and manpower management and pay administration programs in the U.S. Savings Bonds Division, including comprehensive Employee Relations, Employee Development, Staffing and Placement, Position Classification and Training/Career Development programs. Coordinates with and advises management officials, employee committees, special interest groups and provides liaison between the services organization and other Treasury organizations and the Office of Personnel on personnel management matters. Has responsibility for the Division's personnel security and Equal Employment Opportunity special emphasis programs.

c. Office of Resource Management

Plans and directs Division-wide procurement and property management, supply, space acquisition and utilization programs and furnishes special services, equipment and supplies. Administers service functions involving the purchasing of supplies, receipt and distribution of mail, printing procurement, distribution of all printed promotional material for the Division and provides other related support services for the Division.

4. Market and Product Development Branch

Reviews and develops the Division's short-term and long-term nationwide sales and marketing plans and strategies; develops and manages a nationwide volunteer network and provides support to key volunteers.

a. Office of National Marketing Programs

Provides analytical, planning and project management services in support of the National Marketing Program. Performs on-going market research and analysis; prepares detailed regional/national market evaluations and plans; prepares and monitors a variety of operating policies for the Division relating to marketing programs; forecasts demands and sales; designs, initiates and manages a variety of special marketing programs which are nation-wide in scope (direct mail, telemarketing, etc.); issues reports on its activities.

5. Sales Operations Branch

Develop, coordinate, and execute the marketing plans throughout the Division's field offices. Ensure that Division sales policies and directives are communicated to and carried out by subordinate field offices. Has the overall resposibility for the nomination and development of the field volunteer network.

a. District Offices

Directs, plan, and administers the Savings Bonds Program on a district-wide basis, negotiating goals and the means to achieve these goals. Assures the effective execution of an annual distric-wide sales plan for promoting the sales and retention of Savings Bonds throughout the assigned sales territory. Directs the recruitment, organization, and training of volunteers for committees at state and local levels; plans and organizes special meetings and conferences. Maintains contacts with top executives and leaders in business and industry, banking, labor, education, and the press, radio, TV and other media to secure and maintain their assistance and cooperation in the program. Recommends changes in the operations and organization of the Districts and methods of improving the Division's sales program as necessary

b. Area Offices

Ensures the effective and efficient execution of the Division's annual marketing plan throughout the assigned sales territory.

6. Public Communications Branch

Plans, develops and executes national advertising, promotion and publicity programs by various means, i.e., maintains working relationships with the Advertising Council and the national advertising media; organizes, leads and services national committees for advertising, promotion and publicity programs; provides layout and design of promotional materials and technical services necessary in the presentation of graphic and dramatic material; encourages active support by the motion picture and entertainment industries, newspaper cartoonists and syndicates and other promotional groups; and administers the Division's Public Information Program.

a. Office of Public Affairs

Plans and implements the Public Affairs activities which includes working with the press and media, business, and trade and professional journals. Provides technical advice, guidance and support to the Treasurer of the United States on Public Affairs.

b. Office of Advertising

Develops national advertising programs and campaigns for print media; recruits and maintains the support of newspapers, magazines and the outdoor and transit advertising industries. Serves as liaison between the Division and the task force agencies of the Advertising Council. Develops and prepares artwork layout and designs in the planning, creation and preparation of editorial, technical and consumer materials. Develops and implements a program for securing cooperation in using and developing advertisement with various national adavertising, promotion and medial groups such as the Magazines Publishers Association and the Cartoonist Society.

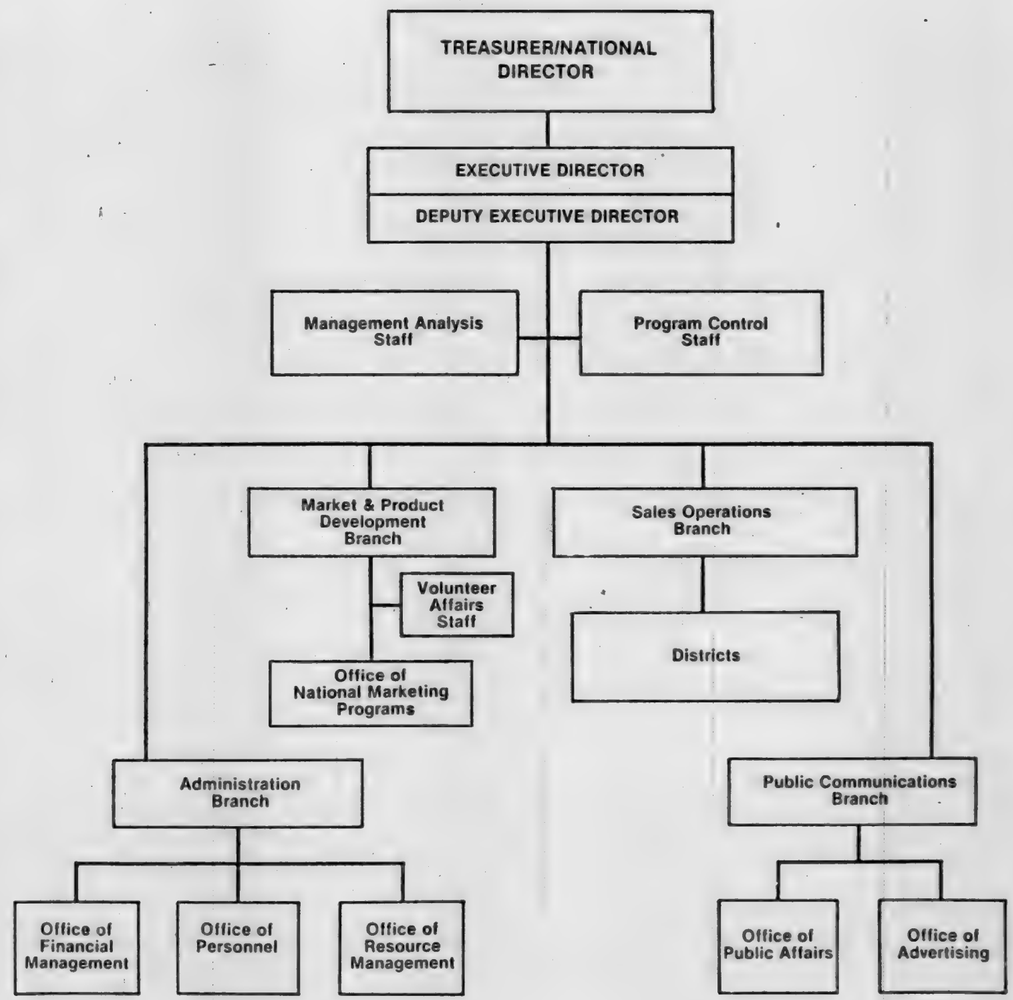
BILLING CODE 4810-25-M

U.S. Savings Bonds Division Department of the Treasury Organizational Chart



Although the Savings Bonds Division operates as a Bureau at the primary organization level of the Department, the designation of Division was continued as being more acceptable to the extensive corps of volunteers who help carry out the objectives of the program. As a result, the Bureau level is omitted and the organization breakdown begins with the Division level.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 11:05 p.m. on Friday, April 29, 1983, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to: (1) Receive bids for the purchase of certain assets of and the assumption of the liability to pay deposits made in Heritage Bank, Ashland, Oregon, which was closed by the Superintendent of Banks for the State of Oregon on Friday, April 29, 1983; (2) accept the bid for the transaction submitted by Valley of the Rogue Bank, Rogue River, Oregon, an insured State nonmember bank; (3) approve the applications of Valley of the Rogue Bank, Rogue River, Oregon for consent to purchase the assets of and to assume the liability to pay deposits made in Heritage Bank, Ashland, Oregon, and for consent to establish the sole office of Heritage Bank as a branch of Valley of the Rogue Bank; and (4) provide such financial assistance, pursuant to section 13(c)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(2)), as was necessary to facilitate the purchase and assumption transaction.

At that same meeting, the Board of Directors: (1) Received bids for the purchase of certain assets of and the assumption of the liability to pay deposits made in First National Bank of Oak Lawn, Oak Lawn, Illinois, which was closed by the Acting Comptroller of the Currency on April 29, 1983; (2) accepted the bid for the transaction submitted by Oak Lawn National Bank, Oak Lawn, Illinois, a newly-chartered national bank; and (3) provided such financial assistance, pursuant to section 13(c)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(2)), as was necessary to effect the purchase and assumption transaction.

In calling the meeting, the Board determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Mr. H. Joe Selby, acting in the place and stead of Director C. T. Conover (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: May 2, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714-01-M

5

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Monday, May 9, 1983, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b(c)(2), (c)(6), (c)(8), and (c)(9)(A)(ii) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings, (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda:

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street NW., Washington D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389-4425.

Dated: May 2, 1983.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2 p.m. on Monday, May 9, 1983, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Application for consent to merge, establish three branches and redesignate the main office location:

Farmers and Mechanics Savings Bank, Middletown, Connecticut, an insured mutual savings bank, for consent to merge, under its charter and title with The City Saving Bank of Middletown, Middletown, Connecticut, to establish three of the offices of The City Savings Bank of Middletown as branches of the resultant bank, and to redesignate the main office of The City Savings Bank of Middletown as the main office of the resultant bank.

Request for an exemption pursuant to section 348.4(b)(2) of the Corporation's rules and regulations entitled "Management Official Interlocks:"

The Boston Bank of Commerce, Boston, Massachusetts.

Momorandum and Resolution re: Semiannual Agenda of Regulations.

Reports of committees and officers:

Minutes of actions approved by the standing committees of the Corporation pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications or requests approved by the Director or Associate Director of the Division and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Reports of the Director, Office of Corporate Audits and Internal Investigations:

Audit Report re: Liquidation Audits (Wilcox County Bank and Watkins Banking Company Liquidation Site Audits) (dated November 16, 1982)

Audit Report re: Liquidation Budget Process (dated November 30, 1982)

Audit Report re: Aquia Bank and Trust Company Liquidation Site, Stafford, Virginia—Report of Internal Accounting Controls for the Period Ended October 31, 1982 (dated January 7, 1983)

Audit Report re: The American Bank and Trust Company New York, New York (dated April 8, 1983)

Discussion Agenda:

Memorandum and Resolution re: Proposed amendment to Part 337 of the Corporation's rules and regulations, entitled "Unsafe and Unsound Banking Practices," to add a new section which would, with reference to the FDIC's "Statement of Policy on the Applicability of the Glass-Steagall Act to Securities Activities of Subsidiaries of Insured Nonmember Banks" issued by the Board of Directors on August 23, 1982: (1) Define bona fide subsidiary; (2) limit a bank's permissible investment in a securities subsidiary; (3) require notice of intent to invest in such a subsidiary; (4) limit the permissible securities activities of nonmember bank subsidiaries; and (5) place certain other restrictions on loans, extensions of credit, and other transactions between nonmember banks and their subsidiaries or affiliates that engage in securities activities.

Memorandum and Resolution re: Uniform Interagency Community Reinvestment Act Assessment Rating System.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, N.W., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389-4425.

Dated: May 2, 1983.

Federal Deposit Insurance Corporation.

FEDERAL DEPOSIT INSURANCE CORPORATION

Changes in Subject Matter of Agency Meetings

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552(b)(e)(2)), notice is hereby given that at its closed meeting held at 11:30 a.m. on Monday, May 2, 1983, the Corporation's Board of Directors determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Currency), that Corporation business required the withdrawal from the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matter:

Recommendations regarding the Corporation's investments

The Board further determined, by the same majority vote, that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, the following matter:

Discussion of the granting of assistance to two banks under section 13(c) of the Federal Deposit Insurance Act: Names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii).

The Board further determined, by the same majority vote, that no earlier, notice of the changes in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matter added to the agenda in a meeting open to public observation; and that the matter added to the agenda could be considered in a closed meeting by authority of subsections (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii)).

Dated: May 3, 1983.

Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its open meeting held at 11:00 a.m. on Monday, May 2, 1983, the Corporation's Board of Directors determined, on motion of Chairman William M. Issac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C.T. Conover, (Comptroller of the Currency), that Corporation business required the withdrawal from the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matters:

Memorandum and Resolution re: Proposed amendment to Part 337 of the Corporation's rules and regulations, entitled "Unsafe and Unsound Banking Practices," to add a new section which would, with reference to the FDIC's "Statement of Policy on the Applicability of the Glass-Steagall Act to Securities Activies of Subsidiaries of Insured Nonmember Banks" issued by the Board of Directors on August 23, 1982: (1) Define bona fide subsidiary; (2) limit a bank's permissible investment in a securities subsidiary; (3) require notice of intent to invest in such a subsidiary; (4) limit the permissible securities activities of nonmember bank subsidiaries; and (5) place certain other restrictions on loans, extensions of credit, and other transactions between nonmember banks and their subsidiaries or affiliates that engage in securities activities.

Memorandum and Resolution re: Uniform Interagency Community Reinvestment Act Assessment Rating System.

On motion of Chairman Issac, seconded by Director Sprague, concurred in by Director Conover, the Board further determined that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matter.

Memorandum and Resolution re: Proposed amendments to Parts 304 and 309 of the Corporation's rules and regulations, entitled "Forms, Instructions, and Reports" and Disclosure of Information," respectively, which would discontinue confidential treatment of information filed by insured banks with the Corporation on the size and number of the bank's deposit accounts and make several related technical changes.

By the same majority vote, the Board further determined that no earlier notice of these changes in the subject matter of the meeting was practicable.

Dated: May 3, 1983

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Circular No. 2524]

43 CFR Part 1600

Planning, Programming, Budgeting; Amendments to the Planning Regulations; Elimination of Unneeded Provisions

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking enhances and clarifies the planning process and eliminates burdensome, outdated and unneeded provisions in the existing planning regulations. The decision as to which provisions should be eliminated or clarified was arrived at after review of public comments received in response to a request by the Secretary of the Interior, review of the existing regulations by Bureau of Land Management personnel and consideration of comments submitted in response to the proposed rulemaking. The final rulemaking also renumbers the sections of the existing regulations. The effective date of the final rulemaking is 60 days from the date of publication in the **Federal Register**. This will provide the public with an opportunity to identify any comments that they feel have not been addressed by the Department of the Interior in this final rulemaking, as well as any significant concerns they might have with the final rulemaking.

EFFECTIVE DATE: July 5, 1983. Comments should be submitted by June 6, 1983. Any comments postmarked or received after the above date may not be considered.

ADDRESS: Any suggestions, inquiries or comments should be sent to: Director (140), Bureau of Land Management, 1800 C Street, N.W., Washington, D.C. 20240.

Comments will be available for public review in Room 5555 of the above address during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday.

FOR FURTHER INFORMATION CONTACT: David C. Williams, (202) 653–8842.

SUPPLEMENTARY INFORMATION: The proposed rulemaking was published in the **Federal Register** on November 23, 1981 (46 FR 57448). Comments were invited for 60 days ending on January 22, 1982. Comments were received from 304 different sources, 65 from conservation, civic, industry, and other associations, 23 from State governments, 22 from companies, 20 from various Federal agencies, 3 from local government associations and 171 from individuals. In general, the comments were favorable to the planning system used by the Bureau of Land Management. Many of the proposed changes were favorably received, but the majority of unfavorable comments protested proposed changes in the public participation provisions of the existing regulations. While the final rulemaking adopts many of the changes made by the proposed rulemaking in the area of public participation, the final rulemaking has been amended to assure meaningful public participation in keeping with the strong support in the Department of the Interior and the Bureau of Land Management for public participation in the planning process. The specific changes made in the public participation section and other provisions of the final rulemaking will be discussed later in the preamble as part of the discussion on those specific sections. Other specific comments will be discussed in connection with the sections they concern.

Section 1601.0–1 Purpose.

The few comments on this section interpreted the language of the proposed rulemaking as indicating that the Bureau of Land Management was going to continue to rely on existing plans for an indefinite period rather than preparing resource management plans. The Bureau of Land Management intends to use plans that were in existence prior to the passage of the Federal Land Policy and Management Act of 1976, if they comply with standards established in these regulations and provide an adequate basis for resource management decisions, but intends to use them only until time and funds permit completion of resource management plans. Therefore, the final rulemaking adopts the language of the proposed rulemaking.

Section 1601.0–2 Objectives.

Section 1601.0–2 of the proposed rulemaking was the focal point of a large number of comments that objected to the perceived emphasis of the proposed rulemaking on economic values (maximizing resource values) and for the failure to recognize public participation mandated by the Federal Land Policy and Management Act, as opposed to mere consultation. As a result of the comments, the section was studied and has been changed in the final rulemaking to ensure public participation in the planning process. The final rulemaking retains the emphasis on maximizing resource values, consistent with the concept of multiple use management, and adds the definition of the term "multiple use" to clarify previous misconceptions.

Section 1601.0–3 Authorities.

There were no comments on the proposed changes in § 1601.0–3 and the proposed changes have been adopted in the final rulemaking.

Section 1601.0–4 Responsibilities.

Many of the comments supported the change made in § 1601.0–4 by the proposed rulemaking. A few comments raised questions about the ability of an Area Office and its staff to handle the land use planning responsibility. The final rulemaking adopts the proposed change with clarification. Also, the described responsibilities of State Directors and District Managers in plan preparation and approval are refined. This makes clear the responsibility of the State Director to approve resource management plans, consistent with the authority delegated to State Directors to file environmental impact statements associated with plans. In addition, the final rulemaking contains changes that were made to eliminate duplicative provisions and redundant language.

Section 1601.0–5 Definitions.

Several comments on § 1601.0–5 of the proposed rulemaking recommended reinstating many of the definitions deleted in the proposed rulemaking. A careful restudy of the existing regulations in light of the comments led to changes in some of the definitions in the final rulemaking. In response to specific comments, changes have been made by the final rulemaking in the definition of the terms "consistent," "resource management plan" and "officially approved and adopted resource related plans," and the term "multiple use" is added to the definition section. In order to clarify the existing regulations and make them less burdensome, the final rulemaking has deleted several terms from the existing regulations.

Section 1601.0–6 Policy.

The comments on § 1601.0–6 of the proposed rulemaking expressed opposing views, with some charging that the change made by the proposed rulemaking would be contrary to the aim of making the regulations more efficient, while others expressed the view that the planning process might need two documents, a resource management plan and an environmental impact statement. After careful consideration of the comments, the final rulemaking amends the language of the proposed rulemaking and provides that the planning decision

should be issued in a single document, if possible. However, the issuing officer still retains discretion as to the form of the decision document(s).

Section 1601.0–7 Scope.

Only a few comments were directed to § 1601.0–7 of the proposed rulemaking. During the decisionmaking process on the final rulemaking, a careful review was made of this section and it was decided that it could be rewritten to express the intent of the section in substantially fewer words. As a result, the final rulemaking contains a substantially revised scope section.

Section 1601.0–8 Principles.

Some of the comments on this section objected to the change made by the proposed rulemaking, while other comments supported the shortening of the section. The objection to the change made by the proposed rulemaking was on the basis that the items dropped from the existing regulations were needed as guidance for the land use planning process. The final rulemaking adopts the language of the proposed rulemaking, with an amendment clarifying the point that public involvement, local economies and consideration of impacts on non-Federal lands are fundamental components of the planning process.

Section 1611 Guidance for planning—Section 1610.1 in Final.

Numerous comments addressed this section. Some questioned the use of guidance documents. Many expressed concern about the changes made in the sections of the existing regulations covering planning guidance, while others supported the concept that the existing regulations could be shortened by removing parts of the existing guidance language and putting them in the Bureau Manual. The final rulemaking contains a revision of the section of the proposed rulemaking, including the title, for further clarity and refinement. The revision retains the essential elements of the existing regulations, including the provision for public review of State Director guidance when the guidance is applied during the planning process.

The final rulemaking adopts as paragraph (b) of revised § 1610.1 the proposed rulemaking language for § 1611.2. A couple of comments expressed the view that State Directors should be furnished guidance for use in the decisionmaking process on whether to deviate from established resource area boundaries. This guidance will be furnished through the Bureau Manual and is not needed in the regulations.

Finally, paragraph (c) of § 1610.1 of the final rulemaking incorporates § 1611.3 of the proposed rulemaking. Language is added from the existing regulations allowing the District or Area Manager the discretion of supplementing his/her staff with outside assistance as necessary to achieve an interdisciplinary approach. The addition made to this paragraph meets the principal objection raised by those who commented on this section of the proposed rulemaking.

Section 1614 Public participation—Section 1610.2 in Final.

The proposed changes to the public participation provisions in section 1614 were the subject of the largest number of comments. The majority of the comments were critical of the proposed changes because they felt the proposed revisions weakened the regulations. Many suggested that the original language of § 1601.3 should be retained as the new § 1610.2 in the final rulemaking. The comments resulted in a total review of the public participation provisions and the modification in the final rulemaking to reflect recommendations in the comments. In addition to the changes made in the final rulemaking, the Bureau Manual will incorporate specific procedural standards to ensure that public participation is sought and used throughout the planning process.

One specific change made by the final rulemaking is retention of the 90-day review period for a draft resource management plan and draft environmental impact statement as a minimum instead of the 45 days called for in the proposed rulemaking and required by the Council on Environmental Quality regulations.

Many of the comments objected to the proposed rulemaking's removal from this section of the specific points in the preparation of the resource management plan where the public is notified of opportunity for participation in the process. These specific opportunities have been added by the final rulemaking to highlight and make clear important opportunities for public participation. The final rulemaking also adds requirements for conducting public hearings.

Several of the comments questioned the dedication of the Bureau of Land Management to the policy of public participation in its land-use planning process. The Bureau believes that meaningful public participation is essential to the planning process and that early consultation with the public and public involvement throughout the process leads to better decisionmaking. The Bureau will continue its efforts to seek and obtain public participation in its land use planning process.

Section 1615 Coordination with other Federal agencies, State and local governments and Indian tribes—Section 1610.3 in Final.

This section in the final rulemaking is a rewrite of several sections of the proposed rulemaking. The coordination sections of the proposed rulemaking received a number of comments. Some complained that the changes made by the proposed rulemaking lessened the coordination opportunities of those outside the Bureau of Land Management. Some objected to the definition of consistency that was contained in the proposed rulemaking. Other comments supported the thrust of the changes made by the proposed rulemaking. The diversity of the comments on these sections resulted in a careful review of the coordination sections, with the aim of retaining the basic elements of coordination and clarifying, while eliminating the detail that was considered unnecessary, or more appropriate to the Bureau Manual. The coordination section in final rulemaking provides the essential elements of coordination while eliminating unneeded provisions.

The final rulemaking retains the specific provisions for coordination of Bureau planning activities and guidance as a basis for achieving plan consistency with existing officially adopted and approved plans, policies or programs of other Federal agencies, State agencies, Indian tribes and local governments that may be affected by Bureau of Land Management planning. As part of this requirement, the final rulemaking provides that the State Director should seek the policy advice of the affected Governor(s) early in the planning process.

The final rulemaking retains language making it clear that where there is a conflict between State and local governmental policies, plans and programs, the higher authority will normally be followed. This aids development of consistent resource management plans by adopting an established standard to which Bureau consistency efforts may be related.

Several comments expressed the view that the consistency requirements of the final rulemaking should give State governments greater control of the Bureau of Land Management planning process, while other comments wanted the final rulemaking to give State and local governments less influence on resource management planning. After

VOL
48
ISS
88
MY
5
1983
UMI

careful study of this question, the final rulemaking amends the consistency requirements language of the proposed rulemaking to give State Governments authority to review the resource management plan and plan amendments and to identify inconsistencies and provide recommendations on those inconsistencies. The final rulemaking requires the review of those recommendations and a procedure for appeal of the failure to accept them.

Section 1616.1 Identification of issues—Section 1610.4–1 in Final.

This section of the proposed rulemaking was the subject of only minor comments. The comments suggested that a change be made to allow issues to be added to the planning process without repeating issue identification. This suggestion was adopted by the final rulemaking, along with some language that clarifies the roles of the Area and District Manager in this action.

Section 1616.2 Development of Planning criteria—Section 1610.4–2 in Final.

Many of the numerous comments on § 1616.2 of the proposed rulemaking urged that the planning criteria be published for review and comment. Use of planning criteria throughout the planning process was generally viewed as an essential ingredient to substantive public participation in the planning process and a key to compliance with section 309(e) of the Federal Land Policy and Management Act. The final rulemaking adopts some of the language of the proposed rulemaking. However, the final rulemaking provides that proposed planning criteria be made available for public comment prior to being approved by the District Manager for use in the planning process. The final rulemaking also contains a commitment that only approved planning criteria shall be used in the planning process. Finally, the final rulemaking adds language to the proposed rulemaking describing the basis of the planning criteria. The Bureau Manual will require the use of approved planning criteria in each of the subsequent actions in the resource management planning process.

Section 1616.3 Inventory data and information collection—Section 1610.4–3 in Final.

The comments on § 1616.3 of the proposed rulemaking raised questions about the extent of the inventories that are conducted in connection with the land use planning activity. The land use planning inventories are supplemental to the basic resource inventories that are conducted by the various programs in connection with their basic needs. The requirements for the basic resource inventories are established by the programs in their respective sections of the Bureau of Land Management Manual. These manual sections are available for public inspection at any time. In response to the comments, the section has been amended to clarify the issues raised and to remove aspects repetitive of requirements in the National Environmental Policy Act and associated procedures.

Section 1616.4 Analysis of the management situation—Section 1610.4–4 in Final.

The comments on this section expressed a range of views, some supporting the changes made by the proposed rulemaking and others supporting retention of the language of the existing regulations. After careful reviews of the comments, the section has been expanded in the final rulemaking to clearly express its intent. The final rulemaking retains the list of factors which may be considered at this stage of the planning process. However, the methodologies for determining capabilities require substantial development work, and continued updating of guidance on capability and use of the concept will be incorporated in Bureau of Land Management Manual instruction. The provisions for Areas of Critical Environmental Concern have been moved to § 1610.7–2 in the final rulemaking.

Section 1616.5 Formulation of alternatives—Section 1610.4–5 in Final.

Section 1616.5 was the focus of numerous comments that were critical of the changes made by the proposed rulemaking, particularly the removal of the existing requirement for a range of choices for alternatives favoring resource protection. The final rulemaking, consistent with regulations implementing the National Environmental Policy Act, requires that all reasonable alternatives be considered during the planning process. The requirement in the existing regulations for noting alternatives that were identified and eliminated from the study, with the reasons for the elimination, has been adopted in this final rulemaking.

Section 1616.6 Estimation of the effects of alternatives—Section 1610.4–6 in Final.

The comments on this section of the proposed rulemaking felt the proposed deletion of the data reliability phrase weakened the regulations. The final rulemaking adopts the language of the proposed rulemaking and also adopts language which provides for the planning process to be guided by the data reliability provisions of the regulations of the Council on Environmental Quality implementing the National Environmental Policy Act.

Section 1616.7 Selection of preferred alternatives—Section 1610.4–7 in Final.

The comments on § 1616.7 were nearly universal in their objection to the deletion of the requirement that the selection of the preferred alternative be based on the planning criteria as well as guidance. The intent was not to avoid consideration of the criteria and the final rulemaking adopts language which clarifies the intent of the proposed rulemaking.

After considering the comments on the question of referral of the draft plan and draft environmental impact statement to the Governor(s) of the affected State(s), the final rulemaking had been amended to make it clear that all draft plans and draft environmental impact statements, not just plans involving coal resources, will be referred to the Governor(s) of the affected State(s) as well as other governmental entities for comments. The section has also been amended to clarify what documents are furnished to the State Director and to provide for subsequent State Director approval of the plan.

Section 1616.8 Selection of resource management plan—Section 1610.4–8 in Final.

The comments on § 1616.8 generally opposed the changes in the proposed rulemaking. Apparently, the public had the misunderstanding that this provision constitutes final adoption of the plan. This is not the case, and since the principal provision deleted by the proposed rulemaking is covered by provisions of the Council on Environmental Quality regulations on the National Environmental Policy Act, it is not repeated in the final rulemaking. However, the section has been amended in the final rulemaking to clarify the intent of this provision. The amendment also makes clear the supervisory responsibility of the State Director.

Section 1616.9 Monitoring and evaluation—Section 1610.4–9 in Final.

There were few comments on this section. The final rulemaking has been further clarified while retaining the provision for established intervals for monitoring but removes the "not more than 5 years" since each resource management plan must explicitly provide for monitoring at specific intervals. The final sentence in the proposed rulemaking is not needed since monitoring reports and records is part of the documentation relevant to the planning process and are available for public review.

Section 1617.1 Resource management plan approval and administrative review—Section 1610.5–1 in Final.

The final rulemaking amends § 1617.1 of the proposed rulemaking by rewriting paragraph (a) to condense it, and reflect the basic requirement for the State Director to approve and take action on the resource management documents. The procedural requirements for the approval process will be set out in the Bureau Manual section on planning. Further, the final rulemaking deletes the sentence in paragraph (b) dealing with the designation of Areas of Critical Environmental Concern. This sentence is no longer needed because the regulations contain a specific section on designation of Areas of Critical Environmental Concern.

Section 1617.2 Protest Procedures—Section 1610.5–2 in Final.

There were several objections to the change in the protest provision made by § 1617.1(d) of the proposed rulemaking. After careful analysis of the comments, it was determined that the public misunderstood the proposed change, which was designed to clarify the protest provision. In addition, changes have been made in this provision in the final rulemaking to provide for a one-stage protest process to correspond with the delegation of plan approval and environmental impact statement filing authority to the State Director level. A specific subsection is established for protest procedures and subsequent subsections in § 1611.5 are renumbered in the final rulemaking.

Section 1617.3 Conformity and implementation—Section 1610.5–3 in Final.

After a careful review of the few comments received on § 1617.3 of the proposed rulemaking, the final rulemaking makes only minor changes in the content of the section, but rewrites it for clarity and brevity, including the addition of a new paragraph that makes it clear that more detailed plans for coal, oil shale and tar sand must not only conform to the provisions of their applicable regulations, but must also conform to the requirements of this part.

Section 1617.4 Changing the resource management plan—Section 1610.5–4, 1610.5–6 in Final.

In response to concerns raised in the comments on the section of the proposed rulemaking that the provision on maintenance appeared to allow a minor change in the scope of resource use in a plan, the final rulemaking amends the maintenance provision and the amendment provision to make clear the distinct difference between the two concepts and their impacts on an existing plan. The final rulemaking makes it clear that maintenance cannot make a change in the scope of resource use in a plan, while an amendment can make a change in the scope of resource use.

Even though a large number of comments on the revision provision of the proposed rulemaking questioned the deletion of the 10-year update requirement, none of those comments made a convincing argument for restoring the 10-year requirement to replace the "as necessary" provision in the proposed regulations.

Section 1617.7 Designation of areas unsuitable for surface mining—Section 1610.7–1 in Final.

This section has been revised by the final rulemaking in order to bring the planning regulations into conformance with the Federal Coal Management regulations in Group 3400 of Title 43 of the Code of Federal Regulations and to clarify the use of plans in the management of Federal coal resources. Therefore, to be consistent with the Federal Coal Management regulations, this amendment allows the application of the unsuitability criteria to areas already under lease during mine plan review, rather than during the preparation of resource management plan.

Section 1617.8 Designation of Areas of Critical Environmental Concern—Section 1610.7–2 in Final.

A great number of comments were concerned about the changes the proposed rulemaking would make in the provisions for Areas of Critical Environmental Concern. After restudy in light of the comments, most of the provisions of the existing regulations covering Areas of Critical Environmental Concern have been restored by the final rulemaking and consolidated in this section to show how they are provided for in the planning process and in the regulations. Many comments recommended restudying the identification criteria that are in the existing regulations. After careful consideration of the comments and the regulations, the final rulemaking restores two of the four identification criteria that are presently in the existing regulations. The criteria that are being restored are those that are considered most germane to the identification process. The decision on this section of the final rulemaking was based in part on the comments received on the proposed rulemaking published in the **Federal Register** on December 16, 1980 (45 FR 82679).

Language has been added by the final rulemaking that requires the State Director to publish a notice in the **Federal Register** for public comment when a draft resource management plan involves the potential designation of an Area of Critical Environmental Concern.

The final rulemaking does not adopt the suggestion made by a few of the comments to restore existing § 1601.7–1 dealing with the maintenance of records of the planning and environmental analysis process. These requirements can be handled by the planning process guidance in the Bureau manual.

Three comments objected to the deletion of §1601.7–2 of the existing regulations concerning authority annotations. After a careful review of the comments and the regulations, it was decided that there was no need to retain that section and the final rulemaking does not restore it.

Deletion of § 1601.7–3 from the existing regulations was also objected to by several of the comments. The final rulemaking does not change the proposed rulemaking with reference to this section because of the belief that document content is more appropriate for Bureau Manuals than for regulations.

Section 1618 Transition period—Section 1610.8 in the Final.

The comments on section 1618 were concerned about the language of the proposed rulemaking that was read to mean that existing management framework plans would be retained rather than going forward with the completion of resource management plans. The final rulemaking makes clear the intention of the Bureau of Land Management to complete resource management plans for lands under its jurisdiction as rapidly as possible, on a priority basis, within fiscal and manpower constraints. The final rulemaking adopts the title of this section in the existing regulations

VOL
48
ISS
88
MY
5
1983
UMI

because it more accurately reflects the function of the section.

Several of the comments questioned the lack of an environmental impact statement for this rulemaking. An environmental assessment was prepared and has been reviewed in light of the changes in the final rulemaking. The environmental assessment indicates that the changes in the existing regulations made by the final rulemaking would have no significant impact on the human environment. A Finding of No Significant Impact was also prepared. Further, an environmental impact statement is prepared with each resource management plan. The planning process also provides for each plan amendment to be subject to the preparation of an environmental impact statement.

Editorial and grammatical changes, as needed, have been made.

The principal author of this final rulemaking is David C. Williams, Office of Planning and Environmental Coordination, assisted by the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

These amendments to the existing planning regulations will not have any significant impact on the economy. The changes made by this amendment will reduce the regulatory burden imposed on the public by the existing planning regulations.

The planning regulations that are being amended by this final rulemaking have an impact on all public lands under the jurisdiction of the Bureau of Land Management. The planning process is required for all actions taken by the Bureau on the public lands and affects all entities equally.

List of Subjects in 43 CFR Part 1600

Administrative practice and procedures, Environmental impact statements, Indians, Intergovernmental relations, Public lands, Public lands—classification.

Under the authority of sections 201 and 202 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1711 and 1712), Part 1600, Subchapter A, Chapter II of Title 43 of the Code of Federal Regulations is revised to read as set forth below.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

May 2, 1983.

PART 1600—PLANNING, PROGRAMMING, BUDGETING

Subpart 1601—Planning

§ 1601.0–1 Purpose.

The purpose of this subpart is to establish in regulations a process for the development, approval, maintenance, amendment and revision of resource management plans, and the use of existing plans for public lands administered by the Bureau of Land Management.

§ 1601.0–2 Objective.

The objective of resource management planning by the Bureau of Land Management is to maximize resource values for the public through a rational, consistently applied set of regulations and procedures which promote the concept of multiple use management and ensure participation by the public, state and local governments, Indian tribes and appropriate Federal agencies. Resource management plans are designed to guide and control future management actions and the development of subsequent, more detailed and limited scope plans for resources and uses.

§ 1601.0–3 Authority.

These regulations are issued under the authority of sections 201 and 202 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1711–1712); the Public Rangelands Improvement Act of 1978 (43 U.S.C. 1901); section 3 of the Federal Coal Leasing Amendments Act of 1976 (30 U.S.C. 201(a)); sections 522, 601, and 714 of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 et seq.); and the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.).

1601.0–4 Responsibilities.

(a) National level policy and procedure guidance for planning shall be provided by the Secretary and the Director.

(b) State Directors shall provide quality control and supervisory review, including plan approval; for plans and related environmental impact statements and shall provide additional guidance, as necessary, for use by District and Area managers. State Directors shall file draft and final environmental impact statements associated with resource management plans and amendments.

(c) Resource management plans, amendments, revisions and related environmental impact statements shall be prepared by District or Area Managers, and approved by State Directors. In general, Area Managers will be responsible for directly supervising the preparation of the plan, and the District Manager for providing general direction and guidance to the planning effort.

§ 1601.0–5 Definitions.

As used in this part, the term:

(a) "Areas of Critical Environmental Concern" or "ACEC" means areas within the public lands where special management attention is required (when such areas are developed or used or where no development is required) to protect and prevent irreparable damage to important historic, cultural, or scenic values, fish and wildlife resources, or other natural systems or processes, or to protect life and safety from natural hazards. The identification of a potential ACEC shall not, of itself, change or prevent change of the management or use of public lands.

(b) "Conformity or conformance" means that a resource management action shall be specifically provided for in the plan, or if not specifically mentioned, shall be clearly consistent with the terms, conditions, and decisions of the approved plan or plan amendment.

(c) "Consistent" means that the Bureau of Land Management plans will adhere to the terms, conditions, and decisions of officially approved and adopted resource related plans, or in their absence, with policies and programs, subject to the qualifications in § 1615.2 of this title.

(d) "Guidance" means any type of written communication or instruction that transmits objectives, goals, constraints, or any other direction that helps the District and Area Managers and staff know how to prepare a specific resource management plan.

(e) "Local government" means any political subdivision of the State and any general purpose unit of local government with resource planning, resource management, zoning, or land use regulation authority.

(f) "Multiple use" means the management of the public lands and their various resource values so that they are utilized in the combination that will best meet the present and future needs of the American people; making the most judicious use of the lands for some or all of these resources or related services over areas large enough to provide sufficient latitude for periodic adjustments in use to conform to changing needs and conditions; the use of some lands for less than all of the resources; a combination of balanced and diverse resource uses that takes into account the long term needs of future generations for renewable and non-renewable resources, including, but not limited to, recreation, range, timber, minerals, watershed, wildlife and fish, and natural scenic, scientific and historical values; and harmonious and coordinated management of the various resources without permanent impairment of the productivity of the lands and the quality of the environment with consideration being given to the relative values of the resources and not necessarily to the combination of uses that will give the greatest economic return or the greatest unit output.

(g) "Officially approved and adopted resource related plans" means plans, policies, programs and processes prepared and approved pursuant to and in accordance with authorization provided by Federal, State or local constitutions, legislation, or charters which have the force and effect of State law.

(h) "Public" means affected or interested individuals, including consumer organizations, public land resource users, corporations and other business entities, environmental organizations and other special interest groups and officials of State, local, and Indian tribal governments.

(i) "Public lands" means any lands or interest in lands owned by the United States and administered by the Secretary of the Interior through the Bureau of Land Management, except lands located on the Outer Continental Shelf and lands held for the benefit of Indians, Aleuts and Eskimos.

(j) "Resource area" means a geographic portion of a Bureau of Land Management district. It is the administrative subdivision whose manager has primary responsibility for day-to-day resource management activities and resource use allocations and is, in most instances, the area for which resource management plans are prepared and maintained.

(k) "Resource management plan" means a land use plan as described by the Federal Land Policy and Management Act. The resource management plan generally establishes in a written document:

(1) Land areas for limited, restricted or exclusive use; designation, including ACEC designation; and transfer from Bureau of Land Management Administration;

(2) Allowable resource uses (either singly or in combination) and related levels of production or use to be maintained;

(3) Resource condition goals and objectives to be attained;

(4) Program constraints and general management practices needed to achieve the above items;

(5) Need for an area to be covered by more detailed and specific plans;

(6) Support action, including such measures as resource protection, access development, realty action, cadastral survey, etc., as necessary to achieve the above;

(7) General implementation sequences, where carrying out a planned action is dependent upon prior accomplishment of another planned action; and

(8) Intervals and standards for monitoring and evaluating the plan to determine the effectiveness of the plan and the need for amendment or revision.

It is not a final implementation decision on actions which require further specific plans, process steps, or decisions under specific provisions of law and regulations.

§ 1601.0–6 Environmental impact statement policy.

Approval of a resource management plan is considered a major Federal action significantly affecting the quality of the human environment. The environmental analysis of alternatives and the proposed plan shall be accomplished as part of the resource management planning process and, wherever possible, the proposed plan and related environmental impact statement shall be published in a single document.

§1601.0–7 Scope.

(a) These regulations apply to all public lands.

(b) These regulations also govern the preparation of resource management plans when the only public land interest is the mineral estate.

§1601.0–8 Principles.

The development, approval, maintenance, amendment and revision of resource management plans will provide for public involvement and shall be consistent with the principles described in section 202 of the Federal Land Policy and Management Act of 1976. Additionally, the impact on local economies and uses of adjacent or nearby non-Federal lands and on non-public land surface over Federally-owned mineral interests shall be considered.

Subpart 1610—Resource Management Planning

§1610.1 Resource management planning guidance.

(a) Guidance for preparation and amendment of resource management plans may be provided by the Director and State Director, as needed, to help the District and Area Manager and staff prepare a specific plan. Such guidance may include the following:

(1) National level policy which has been established through legislation, regulations, executive orders or other Presidential, Secretarial or Director approved documents. This policy may include appropriately developed resource management commitments, suct as a right-of-way corridor crossing several resource areas, which are not required to be reexamined as part of the planning process.

(2) Analysis requirements, planning procedures and other written information and instructions required to be considered in the planning process.

(3) Guidance developed at the State Director level, with necessary and appropriate governmental coordination as prescribed by § 1610.3 of this title. Such guidance shall be reconsidered by the State Director at any time during the planning process that the State Director level guidance is found, through public involvement or other means, to be inappropriate when applied to a specific area being planned.

(b) A resource management plan shall be prepared and maintained on a resource area basis, unless the State Director authorizes a more appropriate area.

(c) An interdisciplinary approach shall be used in the preparation, amendment and revision of resource management plans as provided in 40 CFR 1502.6. The disciplines of the preparers shall be appropriate to the values involved and the issues identified during the issue identification and environmental impact statement scoping stage of the planning process. The District or Area Manager may use any necessary combination of Bureau of Land Management staff, consultants, contractors, other governmental personnel, and advisors to achieve an interdisciplinary approach.

§ 1610.2 Public Participation.

(a) The public shall be provided opportunities to meaningfully participate in and comment on the preparation of plans, amendments and related guidance and be given early notice of planning activities. Public involvement in the resource management planning process shall conform to the requirements of the National Environmental Policy Act and associated implementing regulations.

(b) The Director shall, early in each fiscal year, publish a planning schedule advising the public of the status of each plan in process of preparation or to be started during that fiscal year, the major action on each plan during that fiscal year and projected new planning starts for the 3 succeeding fiscal years. The notice shall call for public comments on projected new planning starts so that such comments can be considered in refining priorities for those years.

(c) Upon starting the preparation, amendment or revision of resource management plans, public participation shall be initiated by a notice published in the **Federal Register** and appropriate media, including newspapers of general circulation in the State, adjoining States where the District Manager deems it appropriate, and the District. This notice may also constitute the scoping notice required by regulation for the National Environmental Policy Act (40 CFR 1501.7). This notice shall include the following:

(1) Description of the proposed planning action;

(2) Identification of the geographic area for which the plan is to be prepared;

(3) The general types of issues anticipated;

(4) The disciplines to be represented and used to prepare the plan;

(5) The kind and extent of public participation opportunities to be provided;

(6) The times, dates and locations scheduled or anticipated for any public meetings, hearings, conferences or other gatherings, as known at the time;

(7) The name, title, address and telephone number of the Bureau of Land Management official who may be contacted for further information; and

(8) The location and availability of documents relevant to the planning process.

(d) A list of individuals and groups known to be interested in or affected by a resource management plan shall be maintained by the District Manager and those on the list shall be notified of public participation activities. Individuals or groups may ask to be placed on this list. Public participation activities conducted by the Bureau of Land Management shall be documented by a record or summary of the principal issues discussed and comments made.

The documentation together with a list of attendees shall be available to the public and open for 30 days to any participant who wishes to clarify the views he/she expressed.

(e) At least 15 days' public notice shall be given for public participation activities where the public is invited to attend. Any notice requesting written comments shall provide for at least 30 calendar days for response. Ninety days shall be provided for review of the draft plan and draft environmental impact statement. The 90-day period shall begin when the Environmental Protection Agency publishes a notice of the filing of the draft environmental impact statement in the **Federal Register.**

(f) Public notice and opportunity for participation in resource mangement plan preparation shall be appropriate to the areas and people involved and shall be provided at the following specific points in the planning process:

(1) General notice at the outset of the process inviting participation in the identification of issues (See §§ 1610.2(c) and 1610.4–1);

(2) Review of the proposed planning criteria (See § 1610.4–2);

(3) Publication of the draft resource management plan and draft environmental impact statement (See § 1610.4–7);

(4) Publication of the proposed resource management plan and final environmental impact statement which triggers the opportunity for protest (See §§ 1610.4–8 and 1610.5–1(b)); and

(5) Public notice and comment on any significant change made to the plan as a result of action on a protest (See § 1610.5–1(b)).

(g) Copies of an approved resource management plan and amendments shall be reasonably available for public review. This includes copies at the State Office for the District, the District Manager's Office, the Area Office for lands directly involved and additional locations determined by the District Manager. Plans, amendments and revisions shall be published and single copies shall be available to the public upon request during the public participation process. After approval, a fee may be charged for additional copies at a rate established by the Director.

(h) Supporting documents to a resource management plan shall be available for public review at the office where the plan was prepared.

(i) Fees for reproducing requested documents beyond those used as part of the public participation activities and other than single copies of the printed plan amendment or revision may be charged according to the Department of the Interior schedule for Freedom of Information Act requests in 43 CFR Part 2.

(j) When resource management plans involve areas of potential mining for coal by means other than underground mining, and the surface is privately owned, the Bureau of Land Management shall consult with all surface owners who meet the criteria in § 3400.0–5 of this title. Contact shall be made in accordance with Subpart 3427 of this title and shall provide time to fully consider surface owner views. This contact may be made by mail or in person by the District or Area Manager or his/her appropriate representative. A period of at least 30 days from the time of contact shall be provided for surface owners to convey their preference to the Area or District Manager.

(k) If the plan involves potential for coal leasing, a public hearing shall be provided prior to the approval of the plan, if requested by any person having an interest which is, or may be, adversely affected by implementation of such plan. The hearing shall be conducted as prescribed in § 3420.1–5 of this title and may be combined with a regularly scheduled public meeting. The authorized officer conducting the hearing shall:

(1) Publish a notice of the hearing in a newspaper of general circulation in the affected geographical area at least once e week for 2 consecutive weeks;

(2) Provide an opportunity for testimony by anyone who so desires; and

(3) Prepare a record of the proceedings of the hearing.

§ 1610.3 Coordination with other Federal agencies, State and local governments, and Indian tribes.

§1610.3–1 Coordination of planning efforts.

(a) In addition to the public involvement prescribed by § 1610.2 of this title the following coordination is to be accomplished with other Federal agencies, State and local governments, and Indian tribes. The objectives of the coordination are for the State Directors and District and Area Managers to keep apprised of non-Bureau of Land Management plans; assure that consideration is given to those plans that are germane in the development of resource management plans for public lands; assist in resolving, to the extent practicable, inconsistencies between Federal and non-Federal government plans; and provide for meaningful public involvement of other Federal agencies, State and local government officials, both elected and appointed, and Indian tribes in the development of resource management plans, including early pubic notice of proposed decisions which may have a significant impact on non-Federal lands.

(b) State Directors and District and Area Managers shall provide other Federal agencies, State and local governments, and Indian tribes opportunity for review, advice, and suggestion on issues and topics which may affect or influence other agency or other government programs. To facilitate coordination with State governments, State Directors should seek the policy advice of the Governor(s) on the timing, scope and coordination of plan components; definition of planning areas; scheduling of public involvement activities; and the multiple use opportunities and constraints on public lands. State Directors may seek written agreements with Governors or their designated representatives on processes and procedural topics such as exchanging information, providing advice and participation, and timeframes for receiving State government participation and review in a timely fashion. If an agreement is not reached, the State Director shall provide opportunity for Governor and State agency review, advice and suggestions on issues and topics that the State Director has reason to believe could affect or influence State government programs.

(c) In developing guidance to District Managers, in compliance with section 1611 of this title, the State Director shall:

(1) Ensure that it is as consistent as possible with existing officially adopted and approved resource related plans, policies or programs of other Federal agencies, State agencies, Indian tribes and local governments that may be affected, as prescribed by § 1610.3–2 of this title;

(2) Identify areas where the proposed guidance is inconsistent with such policies, plans or programs and provide reasons why the inconsistencies exist and cannot be remedied; and

(3) Notify the other Federal agencies, State agencies, Indian tribes or local governments with whom consistency is not achieved and indicate any appropriate methods, procedures, actions and/or programs which the State Director believes may lead to resolution of such inconsistencies.

(d) A notice of intent to prepare, amend, or revise a resource management plan shall be submitted, consistent with State procedures for coordination of Federal activities, for circulation among State agencies. This notice shall also be submitted to Federal agencies, the heads of county boards, other local government units and Tribal Chairmen or Alaska Native Leaders that have requested such notices or that the responsible line manager has reason to believe would be concerned with the plan or amendment. These notices shall be issued simultaneously with the public notices required under § 1610.2(b) of this title.

(e) Federal agencies, State and local governments and Indian tribes shall have the time period prescribed under § 1610.2 of this title for review and comment on resource management plan proposals. Should they notify the District or Area Manager, in writing, of what they believe to be specific inconsistencies between the Bureau of Land Management resource management plan and their officially approved and adopted resources related plans, the resource management plan documentation shall show how those inconsistencies were addressed and, if possible, resolved.

(f) When an Advisory Council has been formed under section 309 of the Federal Land Policy and Management Act for the district in which the resource area is located, that council shall be informed and their views sought and considered throughout the resource management planning process.

§ 1610.3–2 Consistency requirements.

(a) Guidance and resource management plans and amendments to management framework plans shall be consistent with officially approved or adopted resource related plans, and the policies and programs contained therein, of other Federal agencies, State and local governments and Indian tribes, so long as the guidance and resource management plans are also consistent with the purposes, policies and programs of Federal laws and regulations applicable to public lands, including Federal and State pollution control laws as implemented by applicable Federal and State air, water, noise, and other pollution standards or implementation plans.

(b) In the absence of officially approved or adopted resource-related plans of other Federal agencies, State and local governments and Indian tribes, guidance and resource management plans shall, to the maximum extent practical, be consistent with officially approved and adopted resource related policies and programs of other Federal agencies, State and local governments and Indian tribes. Such consistency will be accomplished so long as the guidance and resource management plans are consistent with the policies, programs and provisions of Federal laws and regulations applicable to public lands, including, but not limited to, Federal and State pollution control laws as implemented by applicable Federal and State air, water,

VOL
48
ISS
88
MY
5
1983
UMI

noise and other pollution standards or implementation plans.

(c) State Directors and District and Area Managers shall, to the extent practicable, keep apprised of State and local governmental and Indian tribal policies, plans, and programs, but they shall not be accountable for ensuring consistency if they have not been notified, in writing, by State and local governments or Indian tribes of an apparent inconsistency.

(d) Where State and local government policies, plans, and programs differ, those of the higher authority will normally be followed.

(e) Prior to the approval of a proposed resource management plan, or amendment to a management framework plan or resource management plan, the State Director shall submit to the Governor of the State(s) involved, the proposed plan or amendment and shall identify any known inconsistencies with State or local plans, policies or programs. The Governor(s) shall have 60 days in which to identify inconsistencies and provide recommendations in writing to the State Director. If the Governor(s) does not respond within the 60-day period, the plan or amendment shall be presumed to be consistent. If the written recommendation(s) of the Governor(s) recommend changes in the proposed plan or amendment which were not raised during the public participation process on that plan or amendment, the State Director shall provide the public with an opportunity to comment on the recommendation(s). If the State Director does not accept the recommendations of the Governor(s), The State Director shall notify the Governor(s) and the Governor(s) shall have 30 days in which to submit a written appeal to the Director of the Bureau of Land Management. The Director shall accept the recommendations of the Governor(s) if he/she determines that they provide for a reasonable balance between the National interest and the State's interest. The Director shall communicate to the Governor(s) in writing and publish in the **Federal Register** the reasons for his/her determination to accept or reject such Governor's recommendations.

§ 1610.4 Resource management planning process.

§ 1610.4–1 Identification of issues.

At the outset of the planning process, the public, other Federal agencies, State and local governments and Indian tribes shall be given an opportunity to suggest concerns, needs, and resource use, development and protection opportunities for consideration in the preparation of the resource management plan. The District and Area Manager shall analyze those suggestions, plus available district records of resource conditions, trends, needs and problems, and select topics and determine the issues to be addressed during the planning process. Issues may be modified during the planning process to incorporate new information. The identification of issues shall also comply with the scoping process required by regulations implementing the National Environmental Policy Act (40 CFR 1501.7).

§ 1610.4–2 Development of planning criteria.

The District or Area Manager shall prepare criteria to guide development of the resource management plan or revision, to ensure that it is tailored to the issues previously identified and to ensure that unnecessary data collection and analyses are avoided. Planning criteria shall generally be based upon applicable law, Director and State Director guidance, the results of public participation and coordination with other Federal agencies, State and local governments and Indian tribes. Proposed planning criteria, including any significant changes, shall be made available for public comment prior to being approved by the District manager for use in the planning process. Planning criteria may be changed as planning proceeds, based on public suggestions and the findings of the various studies and assessments.

§ 1610.4–3 Inventory data and information collection.

(a) The District or Area Manager shall arrange for resource, environmental, social, economic and institutional data and information to be collected, or assembled if already available. New information and inventory data collection will emphasize significant issues and decisions with the greatest potential impact. Inventory data and information shall be collected in a manner that aids application in the planning process, including subsequent monitoring requirements.

§ 1610.4–4 Analysis of the management situation.

The District or Area Manager shall analyze the inventory data and other information available to determine the ability of the resource area to respond to identified issues and opportunities. The analysis of the management situation shall provide, consistent with multiple use principles, the basis for formulating reasonable alternatives, including the types of resources for development or protection. Factors to be considered may include, but are not limited to:

(a) The types of resource use and protection authorized by the Federal Land Policy and Management Act and other relevant legislation;

(b) Opportunities to meet goals and objectives defined in national and State Director guidance;

(c) Resource demand forecasts and analyses relevant to the resource area;

(d) The estimated sustained levels of the various goods, services and uses that may be attained under existing biological and physical conditions and under differing management practices and degrees of management intensity which are economically viable under benefit cost or cost effectiveness standards prescribed in national or State Director guidance;

(e) Specific requirements and constraints to achieve consistency with policies, plans and programs of other Federal agencies, State and local government agencies and Indian tribes;

(f) Opportunities to resolve public issues and management concerns;

(g) Degree of local dependence on resources from public lands;

(h) The extent of coal lands which may be further considered under provisions of § 3420.2–3(a) of this title; and

(i) Critical threshold levels which should be considered in the formulation of planned alternatives.

§ 1610.4–5 Formulation of alternatives.

All reasonable resource management alternatives shall be considered and several complete alternatives developed for detailed study. The alternatives developed shall reflect the variety of issues and guidance applicable to the resource uses. In order to limit the total number of alternatives analyzed in detail to a manageable number for presentation and analysis, all reasonable variations shall be treated as subalternatives. One alternative shall be for no action, which means continuation of present level or systems of resource use. The plan shall note any alternatives identified and eliminated from detailed study and shall briefly discuss the reasons for their elimination.

§ 1610.4–6 Estimation of effects of alternatives.

The District or Area Manager shall estimate and display the physical, biological, economic, and social effects of implementing each alternative considered in detail. The estimation of effects shall be guided by the planning criteria and procedures implementing the National Environmental Policy Act. The estimate may be stated in terms of probable ranges where effects cannot be precisely determined.

§ 1610.4–7 Selection of preferred alternative.

The District or Area Manager shall evaluate the alternatives and the estimation of their effects according to the planning criteria, and develop a preferred alternative which shall best meet Director and State Director guidance. The preferred alternative shall be incorporated into the draft resource management plan and draft environmental impact statement. The resulting draft resource management plan and draft environmental impact statement shall be forwarded to the State Director for approval, publication, and filing with the Environmental Protection Agency. This draft plan and environmental impact statement shall be provided for comment to the Governor of the State involved, and to officials of other Federal agencies, State and local governments and Indian tribes that the State Director has reason to believe would be concerned. This action shall constitute compliance with the requirements of § 3420.1–7 of this title.

§1610.4–8 Selection of resource management plan.

After publication of the draft resource management plan and draft environmental impact statement, the District Manager shall evaluate the comments received and select and recommend to the State Director, for supervisory review and publication, a proposed resource management plan and final environmental impact statement. After supervisory review of the proposed resource management plan, the State Director shall publish the plan and file the related environmental impact statement.

1610.4–9 Monitoring and evaluation.

The proposed plan shall establish intervals and standards, as appropriate, for monitoring and evaluation of the plan. Such intervals and standards shall be based on the sensitivity of the resource to the decisions involved and shall provide for evaluation to determine whether mitigation measures are satisfactory, whether there has been significant change in the related plans of other Federal agencies, State or local governments, or Indian tribes, or whether there is new data of significance to the plan.

The District Manager shall be responsible for monitoring and evaluating the plan in accordance with the established intervals and standards and at other times as appropriate to determine whether there is sufficient cause to warrant amendment or revision of the plan.

§ 1610.5 Resource management plan approval, use and modification.

§1610.5–1 Resource management plan approval and administrative review.

(a) The proposed resource management plan or revision shall be submitted by the District Manager to the State Director for supervisory review and approval. When the review is completed the State Director shall either publish the proposed plan and file the related environmental impact statement or return the plan to the District Manager with a written statement of the problems to be resolved before the proposed plan can be published.

(b) No earlier than 30 days after the Environmental Protection Agency publishes a notice of the filing of the final environmental impact statement in the **Federal Register**, and pending final action on any protest that may be filed, the State Director shall approve the plan. Approval shall be withheld on any portion of a plan or amendment being protested until final action has been completed on such protest. Before such approval is given, there shall be public notice and opportunity for public comment on any significant change made to the proposed plan. The approval shall be documented in a concise public record of the decision, meeting the requirements of regulations for the National Environmental Policy Act of 1969 (40 CFR 1505.2).

§ 1610.5–2 Protest procedures.

(a) Any person who participated in the planning process and has an interest which is or may be adversely affected by the approval or amendment of a resource management plan may protest such approval or amendment. A protest may raise only those issues which were submitted for the record during the planning process.

(1) The protest shall be in writing and shall be filed with the Director. The protest shall be filed within 30 days of the date the Environmental Protection Agency published the notice of receipt of the final environmental impact statement containing the plan or amendment in the **Federal Register**. For an amendment not requiring the preparation of an environmental impact statement, the protest shall be filed within 30 days of the publication of the notice of its effective date.

(2) The protest shall contain:

(i) The name, mailing address, telephone number and interest of the person filing the protest;

(ii) A statement of the issue or issues being protested;

(iii) A statement of the part or parts of the plan or amendment being protested;

(iv) A copy of all documents addressing the issue or issues that were submitted during the planning process by the protesting party or an indication of the date the issue or issues were discussed for the record; and

(v) A concise statement explaining why the State Director's decision is believed to be wrong.

(3) The Director shall promptly render a decision on the protest. The decision shall be in writing and shall set forth the reasons for the decision. The decision shall be sent to the protesting party by certified mail, return receipt requested.

(b) The decision of the Director shall be the final decision of the Department of the Interior.

§ 1610.5–3 Conformity and implementation.

(a) All future resource management authorizations and actions, as well as budget or other action proposals to higher levels in the Bureau of Land Management and Department, and subsequent more detailed or specific planning, shall conform to the approved plan.

(b) After a plan is approved or amended, and if otherwise authorized by law, regulation, contract, permit, cooperative agreement or other instrument of occupancy and use, the District and Area Manager shall take appropriate measures, subject to valid existing rights, to make operations and activities under existing permits, contracts, cooperative agreements or other instruments for occupancy and use, conform to the approved plan or amendment within a reasonable period of time. Any person adversely affected by a specific action being proposed to implement some portion of a resource management plan or amendment may appeal such action pursuant to 43 CFR 4.400 at the time the action is proposed for implementation.

(c) If a proposed action is not in conformance, and warrants further consideration before a plan revision is scheduled, such consideration shall be through a plan amendment in accordance with the provisions of § 1610.5–5 of this title.

(d) More detailed and site specific plans for coal, oil shale and tar sand resources shall be prepared in accordance with specific regulations for those resources: group 3400 of this title for coal; group 3900 of this title for oil shale; and part 3140 of this title for tar sand. These activity plans shall be in

VOL 48 ISS 88 MAY 5 1983 UMI

conformance with land use plans prepared and approved under the provisions of this part.

§ 1610.5–4 Maintenance.

Resource management plans and supporting components shall be maintained as necessary to reflect minor changes in data. Such maintenance is limited to further refining or documenting a previously approved decision incorporated in the plan. Maintenance shall not result in expansion in the scope of resource uses or restrictions, or change the terms, conditions, and decisions of the approved plan. Maintenance is not considered a plan amendment and shall not require the formal public involvement and interagency coordination process described under §§ 1610.2 and 1610.3 of this title or the preparation of an environmental assessment or environmental impact statement. Maintenance shall be documented in plans and supporting records.

§ 1610.5–5 Amendment.

A resource management plan may be changed through amendment. An amendment shall be initiated by the need to consider monitoring and evaluation findings, new data, new or revised policy, a change in circumstances or a proposed action that may result in a change in the scope of resource uses or a change in the terms, conditions and decisions of the approved plan. An amendment shall be made through an environmental assessment of the proposed change, or an environmental impact statement, if necessary, public involvement as prescribed in § 1610.2 of this title, interagency coordination and consistency determination as prescribed in § 1610.3 of this title and any other data or analysis that may be appropriate. In all cases, the effect of the amendment on the plan shall be evaluated. If the amendment is being considered in response to a specific proposal, the analysis required for the proposal and for the amendment may occur simultaneously.

(a) If the environmental assessment does not disclose significant impact, a finding of no significant impact may be made by the District Manager. The District Manager shall then make a recommendation on the amendment to the State Director for approval, and upon approval, the District Manager shall issue a public notice of the action taken on the amendment. If the amendment is approved, it may be implemented 30 days after such notice.

(b) If a decision is made to prepare an environmental impact statement, the amending process shall follow the same procedure required for the preparation and approval of the plan, but consideration shall be limited to that portion of the plan being considered for amendment. If several plans are being amended simultaneously, a single environmental impact statement may be prepared to cover all amendments.

§ 1610.5–6 Revision.

A resource management plan shall be revised as necessary, based on monitoring and evaluation findings (§ 1610.4–9), new data, new or revised policy and changes in circumstances affecting the entire plan or major portions of the plan. Revisions shall comply with all of the requirements of these regulations for preparing and approving an original resource management plan.

§ 1610.5–7 Situations where action can be taken based on another agency's plan, or a land use analysis.

These regulations authorize the preparation of a resource management plan for whatever public land interests exist in a given land area. There are situations of mixed ownership where the public land estate is under non-Federal surface, or administration of the land is shared by the Bureau of Land Management with another Federal agency. The District and Area Manager may use the plans or the land use analysis of other agencies when split or shared estate conditions exist in any of the following situations:

(a) Another agency's plan (Federal, State, or local) may be used as a basis for an action only if it is comprehensive and has considered the public land interest involved in a way comparable to the manner in which it would have been considered in a resource management plan, including the opportunity for public participation.

(b) After evaluation and review, the Bureau of Land Management may adopt another agency's plan for continued use as a resource management plan if an agreement is reached between the Bureau of Land Management and the other agency to provide for maintenance and amendment of the plan, as necessary, to comply with law and policy applicable to public lands.

(c) A land use analysis may be used to consider a coal lease when there is no Federal ownership interest in the surface or when coal resources are insufficient to justify plan preparation costs. The land use analysis process, as authorized by the Federal Coal Leasing Amendments Act, consists of an environmental assessment or impact statement, public participation as required by § 1610.2 of this title, the consultation and consistency determinations required by § 1610.3 of this title, the protest procedure prescribed by § 1610.5–2 of this title and a decision on the coal lease proposal. A land use analysis meets the planning requirements of section 202 of the Federal Land Policy and Management Act. The decision to approve the land use analysis and to lease coal is made by the Departmental official who has been delegated the authority to issue coal leases.

§ 1610.6 Management decision review by Congress.
